INTRODUCTION

The *World Factbook* is prepared by the Central Intelligence Agency for the use of US Government officials, and the style, format, coverage, and content are designed to meet their specific requirements. Information is provided by Antarctic Information Program (National Science Foundation), Armed Forces Medical Intelligence Center (Department of Defense), Bureau of the Census (Department of Commerce), Bureau of Labor Statistics (Department of Labor), Central Intelligence Agency, Council of Managers of National Antarctic Programs, Defense Intelligence Agency (Department of Defense), Department of Energy, Department of State, Fish and Wildlife Service (Department of the Interior), Maritime Administration (Department of Transportation), National Geospatial-Intelligence Agency (Department of Defense), Naval Facilities Engineering Command (Department of Defense), Office of Insular Affairs (Department of the Interior), Office of Naval Intelligence (Department of Defense), US Board on Geographic Names (Department of the Interior), US Transportation Command (Department of Defense), Oil & Gas Journal, and other public and private sources.

The *Factbook* is in the public domain. Accordingly, it may be copied freely without permission of the Central Intelligence Agency (CIA). The official seal of the CIA, however, may NOT be copied without permission as required by the CIA Act of 1949 (50 U.S.C. section 403m). Misuse of the official seal of the CIA could result in civil and criminal penalties.

A BRIEF HISTORY OF BASIC INTELLIGENCE AND THE WORLD FACTBOOK

The Intelligence Cycle is the process by which information is acquired, converted into intelligence, and made available to policymakers. Information is raw data from any source, data that may be fragmentary, contradictory, unreliable, ambiguous, deceptive, or wrong. Intelligence is information that has been collected, integrated, evaluated, analyzed, and interpreted. Finished intelligence is the final product of the Intelligence Cycle ready to be delivered to the policymaker.

The three types of finished intelligence are: basic, current, and estimative. Basic intelligence provides the fundamental and factual reference material on a country or issue. Current intelligence reports on new developments. Estimative intelligence judges probable outcomes. The three are mutually supportive: basic intelligence is the foundation on which the other two are constructed; current intelligence continually updates the inventory of knowledge; and estimative intelligence revises overall interpretations of country and issue prospects for guidance of basic and current intelligence. *The World Factbook*, *The President's Daily Brief*, and the *National Intelligence Estimates* are examples of the three types of finished intelligence.

The United States has carried on foreign intelligence activities since the days of George Washington but only since World War II have they been coordinated on a government-wide basis. Three programs have highlighted the development of coordinated basic intelligence since that time: (1) the *Joint Army Navy Intelligence Studies* (JANIS), (2) the *National Intelligence Survey* (NIS), and (3) *The World Factbook*.

During World War II, intelligence consumers realized that the production of basic intelligence by different components of the US Government resulted in a great duplication of effort and conflicting information. The Japanese attack on Pearl Harbor in 1941 brought home to leaders in Congress and the executive branch the need for integrating departmental reports to national policymakers. Detailed and coordinated information was needed not only on such major powers as Germany and Japan, but also on places of little previous interest. In the Pacific Theater, for example, the Navy and Marines

had to launch amphibious operations against many islands about which information was unconfirmed or nonexistent. Intelligence authorities resolved that the United States should never again be caught unprepared.

In 1943, Gen. George B. Strong (G-2), Adm. H. C. Train (Office of Naval Intelligence—ONI), and Gen. William J. Donovan (Director of the Office of Strategic Services—OSS) decided that a joint effort should be initiated. A steering committee was appointed on 27 April 1943 that recommended the formation of a Joint Intelligence Study Publishing Board to assemble, edit, coordinate, and publish the *Joint Army Navy Intelligence Studies* (JANIS). JANIS was the first interdepartmental basic intelligence program to fulfill the needs of the US Government for an authoritative and coordinated appraisal of strategic basic intelligence. Between April 1943 and July 1947, the board published 34 JANIS studies. JANIS performed well in the war effort, and numerous letters of commendation were received, including a statement from Adm. Forrest Sherman, Chief of Staff, Pacific Ocean Areas, which said, "JANIS has become the indispensable reference work for the shore-based planners."

The need for more comprehensive basic intelligence in the postwar world was well expressed in 1946 by George S. Pettee, a noted author on national security. He wrote in *The Future of American Secret Intelligence* (Infantry Journal Press, 1946, page 46) that world leadership in peace requires even more elaborate intelligence than in war. "The conduct of peace involves all countries, all human activities—not just the enemy and his war production."

The Central Intelligence Agency was established on 26 July 1947 and officially began operating on 18 September 1947. Effective 1 October 1947, the Director of Central Intelligence assumed operational responsibility for JANIS. On 13 January 1948, the National Security Council issued Intelligence Directive (NSCID) No. 3, which authorized the *National Intelligence Survey* (NIS) program as a peacetime replacement for the wartime JANIS program. Before adequate NIS country sections could be produced, government agencies had to develop more comprehensive gazetteers

and better maps. The US Board on Geographic Names (BGN) compiled the names; the Department of the Interior produced the gazetteers; and CIA produced the maps.

The Hoover Commission's Clark Committee, set up in 1954 to study the structure and administration of the CIA, reported to Congress in 1955 that: "The National Intelligence Survey is an invaluable publication which provides the essential elements of basic intelligence on all areas of the world. There will always be a continuing requirement for keeping the Survey up-to-date." The *Factbook* was created as an annual summary and update to the encyclopedic NIS studies. The first classified *Factbook* was published in August 1962, and the first unclassified version was published in June 1971. The NIS program was terminated in 1973 except for the *Factbook*, map, and gazetteer components. The 1975 *Factbook* was the first to be made available to the public with sales through the US Government Printing Office (GPO). The *Factbook* was first made available on the Internet in June 1997. The year 2010 marks the 63rd anniversary of the establishment of the Central Intelligence Agency and the 67th year of continuous basic intelligence support to the US Government by *The World Factbook* and its two predecessor programs.

The Evolution of The World Factbook

National Basic Intelligence Factbook produced semiannually until 1980. Country entries include sections on Land, Water, People, Government, Economy, Communications, and Defense Forces.

1981—Publication becomes an annual product and is renamed *The World Factbook*. A total of 165 nations are covered on 225 pages.

1983—Appendices (Conversion Factors, International Organizations) first introduced.

1984—Appendices expanded; now include: A. The United Nations, B. Selected United Nations Organizations, C. Selected International Organizations, D. Country Membership in Selected Organizations, E. Conversion Factors.

1987—A new Geography section replaces the former separate Land and Water sections. UN Organizations and Selected International Organizations appendices merged into a new International Organizations appendix. First multi-color-cover *Factbook*.

1988—More than 40 new geographic entities added to provide complete world coverage without overlap or omission. Among the new entities are Antarctica, oceans (Arctic, Atlantic, Indian, Pacific), and the World. The front-of-the-book explanatory introduction expanded and retitled to Notes, Definitions, and Abbreviations. Two new Appendices added: Weights and Measures (in place of Conversion Factors) and a Cross-Reference List of Geographic Names. *Factbook* size reaches 300 pages.

1989—Economy section completely revised and now includes an Overview briefly describing a country's economy. New entries added under People, Government, and Communications.

1990—The Government section revised and considerably expanded with new entries.

1991—A new International Organizations and Groups appendix added. *Factbook* size reaches 405 pages.

1992—Twenty new successor state entries replace those of the Soviet Union and Yugoslavia. New countries are respectively: Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan; and Bosnia and Herzegovina, Croatia, Macedonia, Serbia and Montenegro, Slovenia. Number of nations in the *Factbook* rises to 188.

1993—Czechoslovakia's split necessitates new Czech Republic and Slovakia entries. New Eritrea entry added after it secedes from Ethiopia. Substantial enhancements made to Geography section.

1994—Two new appendices address Selected International Environmental Agreements. The gross domestic product (GDP) of most developing countries changed to a purchasing power parity (PPP) basis rather than an exchange rate basis. *Factbook* size up to 512 pages.

1995—The GDP of all countries now presented on a PPP basis. New appendix lists estimates of GDP on an exchange rate basis. Communications category split; Railroads, Highways, Inland waterways, Pipelines, Merchant marine, and Airports entries now make up a new Transportation category. *The World Factbook* is first produced on CD-ROM.

1996—Maps accompanying each entry now present more detail. Flags also introduced for nearly all entities. Various new entries appear under Geography and Communications. *Factbook* abbreviations consolidated into a new Appendix A. Two new appendices present a Cross-Reference List of Country Data Codes and a Cross-Reference List of Hydrogeographic Data Codes. Geographic coordinates added to Appendix H, Cross-Reference List of Geographic Names. *Factbook* size expands by 95 pages in one year to reach 652.

1997—*The World Factbook* introduced onto the Internet. A special printed edition prepared for the CIA's 50th anniversary. A schema or Guide to Country Profiles introduced. New color maps and flags now accompany each country profile. Category headings distinguished by shaded backgrounds. Number of categories expanded to nine with the addition of an Introduction (for only a few countries) and Transnational Issues (which includes Disputes-international and Illicit drugs).

1998—The Introduction category with two entries, Current issues and Historical perspective, expanded to more countries. Last year for the production of CD-ROM versions of the *Factbook*.

1999—Historical perspective and Current issues entries in the Introduction category combined into a new Background statement. Several new Economy entries introduced. A new physical map of the world added to the back-of-the-book reference maps.

2000—A new "country profile" added on the Southern Ocean. The Background statements dramatically expanded to over 200 countries and possessions. A number of new Communications entries added.

2001—Background entries completed for all 267 entities in the *Factbook*. Several new HIV/AIDS entries introduced under the People category. Revision begun on individual country maps to include elevation extremes and a partial geographic grid. Weights and Measures appendix deleted.

2002—New entry on Distribution of Family income—Gini index added. Revision of individual country maps continued (process still ongoing).

2003—In the Economy category, petroleum entries added for oil production, consumption, exports, imports, and proved reserves, as well as natural gas proved reserves.

2004—Bi-weekly updates launched on *The World Factbook* website. Additional petroleum entries included for natural gas production, consumption, exports, and imports. In the Transportation category, under Merchant marine, subfields added for foreign-owned vessels and those registered in other countries. Descriptions of the many forms of government mentioned in the *Factbook* incorporated into the Definitions and Notes.

2005—In the People category, a Major infectious diseases field added for countries deemed to pose a higher risk for travelers. In the Economy category, entries included for Current account balance, Investment, Public debt, and Reserves of foreign exchange and gold. The Transnational issues category expanded to include Refugees and internally displaced persons. Size of the printed *Factbook* reaches 702 pages.

2006—In the Economy category, national GDP figures now presented at Official Exchange Rates (OER) in addition to GDP at purchasing power parity (PPP). Entries in the Transportation section reordered; Highways changed to Roadways, and Ports and harbors to Ports and terminals.

2007—In the Government category, the Capital entry significantly expanded with up to four subfields, including new information having to do with time. The subfields consist of the name of the capital itself, its geographic coordinates, the time difference at the capital from coordinated universal time (UTC), and, if applicable, information on daylight saving time (DST). Where appropriate, a special note is added to highlight those countries with multiple time zones. A Trafficking in persons entry added to the Transnational issues category. A new appendix, Weights and Measures, (re) introduced to the online version of the *Factbook*.

2008—In the Geography category, two fields focus on the increasingly vital resource of water: Total renewable water resources and Freshwater withdrawal. In the Economy category, three fields added for: Stock of direct foreign investment—at home, Stock of direct foreign investment—abroad, and Market value of publicly traded shares. Concise descriptions of all major religions included in the Definitions and Notes. Responsibility for printing of *The World Factbook* turned over to the Government Printing Office.

2009—The online *Factbook* site completely redesigned with many new features. In the People category, two new fields provide information on education in terms of opportunity and resources: School Life Expectancy and Education expenditures.

Additionally, the Urbanization entry expanded to include all countries. In the Economy category, five fields added: Central bank discount rate, Commercial bank prime lending rate, Stock of narrow money, Stock of broad money, and Stock of domestic credit.

2010—Weekly updates inaugurated on the *The World Factbook* website. The dissolution of the Netherlands Antilles results in two new listings: Curacao and Sint Maarten. In the Communications category, a Broadcast media field replaces the former Radio broadcast stations and TV broadcast stations entries. In the Geography section, under Natural hazards, a Volcanism subfield added for countries with historically active volcanoes. In the Government category, a new National anthems field introduced. Concise descriptions of all major Legal systems incorporated into the Definitions and Notes. In order to facilitate comparisons over time, dozens of the entries in the Economy category expanded to include two (and in some cases three) years' worth of data.

2011—The People section expanded to People and Society, incorporating ten new fields. The Economy category added Taxes and other revenues and Budget surplus (+) or deficit (-), while the Government section introduced International law organization participation and National symbols. A new African nation, South Sudan, brings the total number of countries in *The World Factbook* to 195.

2012—The National Anthems entry in the Government section now includes playable audio files.

NOTES AND DEFINITIONS

Abbreviations This information is included in **Appendix A: Abbreviations**, which includes all abbreviations and acronyms used in the *Factbook*, with their expansions.

Acronyms An acronym is an abbreviation coined from the initial letter of each successive word in a term or phrase. In general, an acronym made up solely from the first letter of the major words in the expanded form is rendered in all capital letters (NATO from North Atlantic Treaty Organization; an exception would be ASEAN for Association of Southeast Asian Nations). In general, an acronym made up of more than the first letter of the major words in the expanded form is rendered with only an initial capital letter (Comsat from Communications Satellite Corporation; an exception would be NAM from Nonaligned Movement). Hybrid forms are sometimes used to distinguish between initially identical terms (ICC for International Chamber of Commerce and ICCr for International Criminal Court).

Administrative divisions This entry generally gives the numbers, designatory terms, and first-order administrative divisions as approved by the US Board on Geographic Names (BGN). Changes that have been reported but not yet acted on by the BGN are noted.

Age structure This entry provides the distribution of the population according to age. Information is included by sex and age group (0-14 years, 15-64 years, 65 years and over). The age structure of a population affects a nation's key socioeconomic issues. Countries with young populations (high percentage under age 15) need to invest more in schools, while countries with older populations (high percentage ages 65 and over) need to invest more in the health sector. The age structure can also be used to help predict potential political issues. For example, the rapid growth of a young adult population unable to find employment can lead to unrest.

Agriculture—products This entry is an ordered listing of major crops and products starting with the most important.

Airports This entry gives the total number of airports or airfields recognizable from the air. The runway(s) may be paved (concrete or asphalt surfaces) or unpaved (grass, earth, sand, or gravel surfaces) and may include closed or abandoned installations. Airports or airfields that are no longer recognizable (overgrown, no facilities, etc.) are not included. Note that not all airports have accommodations for refueling, maintenance, or air traffic control.

Airports—with paved runways This entry gives the total number of airports with paved runways (concrete or asphalt surfaces) by length. For airports with more than one runway, only the longest runway is included according to the following five groups—(1) over 3,047 m (over 10,000 ft), (2) 2,438 to 3,047 m (8,000 to 10,000 ft), (3) 1,524 to 2,437 m (5,000 to 8,000 ft), (4) 914 to 1,523 m (3,000 to 5,000 ft), and (5) under 914 m (under 3,000 ft). Only airports with usable runways are included in this listing. Not all airports have facilities for refueling, maintenance, or air traffic control. The type aircraft capable of operating from a runway of a given length is dependent upon a number of factors including elevation of the runway, runway gradient, average maximum daily temperature at the airport, engine types, flap settings, and take-off weight of the aircraft.

Airports—with unpaved runways This entry gives the total number of airports with unpaved runways (grass, dirt, sand, or gravel surfaces) by length. For airports with more than one runway, only the longest runway is included according to the following five groups—(1) over 3,047 m (over 10,000 ft), (2) 2,438 to 3,047 m (8,000 to 10,000 ft), (3) 1,524 to 2,437 m (5,000 to 8,000 ft), (4) 914 to 1,523 m (3,000 to 5,000 ft), and (5) under 914 m (under 3,000 ft). Only airports with usable runways are included in this listing. Not all airports have facilities for refueling, maintenance, or air traffic control. The type aircraft capable of operating from a runway of a given length is dependent upon a number of factors including elevation of the runway, runway gradient, average maximum daily temperature at the airport, engine types, flap settings, and take-off weight of the aircraft.

Appendixes This section includes *Factbook*-related material by topic.

Area This entry includes three subfields. *Total area* is the sum of all land and water areas delimited by international boundaries and/or coastlines. *Land area* is the aggregate of all surfaces delimited by international boundaries and/or coastlines, excluding inland water bodies (lakes, reservoirs, rivers). *Water areas* is the sum of the surfaces of all inland water bodies, such as lakes, reservoirs, or rivers, as delimited by international boundaries and/or coastlines.

Area—comparative This entry provides an area comparison based on total area equivalents. Most entities are compared with the entire US or one of the 50 states based on area measurements (1990 revised) provided by the US Bureau of the Census. The smaller entities are compared with Washington, DC (178 sq km, 69 sq mi) or The Mall in Washington, DC (0.59 sq km, 0.23 sq mi, 146 acres).

Background This entry usually highlights major historic events and current issues and may include a statement about one or two key future trends.

Birth rate This entry gives the average annual number of births during a year per 1,000 persons in the population at midyear; also known as crude birth rate. The birth rate is usually the dominant factor in determining the rate of population growth. It depends on both the level of fertility and the age structure of the population.

Broadcast media This entry provides information on the approximate number of public and private TV and radio stations in a country, as well as basic information on the availability of satellite and cable TV services.

Budget This entry includes *revenues*, *expenditures*, and capital expenditures. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Budget surplus (+) or deficit (-) This entry records the difference between national government revenues and expenditures, expressed as a percent of GDP. A positive (+) number indicates that revenues exceeded expenditures (a budget surplus), while a negative (-) number indicates the reverse (a budget deficit). Normalizing the data, by dividing the budget balance by GDP, enables easy comparisons across countries and indicates whether a national government saves or borrows money. Countries with high budget deficits (relative to their GDPs) generally have more difficulty raising funds to finance expenditures, than those with lower deficits.

Capital This entry gives the *name* of the seat of government, its *geographic coordinates*, the *time difference* relative to **Coordinated Universal Time (UTC)** and the time observed in Washington, DC, and, if applicable, information on *daylight saving time (DST)*. Where appropriate, a special note has been added to highlight those countries that have multiple time zones.

Central bank discount rate This entry provides the annualized interest rate a country's central bank charges commercial, depository banks for loans to meet temporary shortages of funds.

Children under the age of 5 years underweight This entry gives the percent of children under five considered to be underweight. Underweight means weight-for-age is approximately 2 kg below for standard at age one, 3 kg below standard for ages two and three, and 4 kg below standard for ages four and five. This statistic is an indicator of the nutritional status of a community. Children who suffer from growth retardation as a result of poor diets and/or recurrent infections tend to have a greater risk of suffering illness and death.

Climate This entry includes a brief description of typical weather regimes throughout the year.

Coastline This entry gives the total length of the boundary between the land area (including islands) and the sea.

Commercial bank prime lending rate This entry provides a simple average of annualized interest rates commercial banks charge on new loans, denominated in the national currency, to their most credit-worthy customers.

Communications This category deals with the means of exchanging information and includes the telephone, radio, television, and Internet host entries.

Communications—note This entry includes miscellaneous communications information of significance not included elsewhere.

Constitution This entry includes the dates of adoption, revisions, and major amendments.

Coordinated Universal Time (UTC) UTC is the international atomic time scale that serves as the basis of timekeeping for most of the world. The hours, minutes, and seconds expressed by UTC represent the time of day at the Prime Meridian (0° longitude) located near Greenwich, England as reckoned from midnight. UTC is calculated by the Bureau International des Poids et Mesures (BIPM) in Sevres, France. The BIPM averages data collected from more than 200 atomic time and frequency standards located at about 50 laboratories worldwide. UTC is the basis for all civil time with the Earth divided into time zones expressed as positive or negative differences from UTC. UTC is also referred to as "Zulu time." See the Standard Time Zones of the World map included with the Reference Maps.

Country data codes See Data codes.

Country map Most versions of the *Factbook* provide a country map in color. The maps were produced from the best information available at the time of preparation. Names and/or boundaries may have changed subsequently.

Country name This entry includes all forms of the country's name approved by the US Board on Geographic Names (Italy is used as an example): *conventional long form* (Italian Republic), *conventional short form* (Italy), *local long form* (Repubblica Italiana), *local short form* (Italia), *former* (Kingdom of Italy), as well as the *abbreviation*. Also see the Terminology note.

Crude oil See entry for oil.

Current account balance This entry records a country's net trade in goods and services, plus net earnings from rents, interest, profits, and dividends, and net transfer payments (such as pension funds and worker remittances) to and from the rest of the world during the period specified. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Data codes This information is presented in Appendix D: Cross-Reference List of Country Data Codes and Appendix E: Cross-Reference List of Hydrographic Data Codes.

Date of information In general, information available as of January in a given year is used in the preparation of the printed edition.

Daylight Saving Time (DST) This entry is included for those entities that have adopted a policy of adjusting the official local time forward, usually one hour, from Standard Time during summer months. Such policies are most common in mid-latitude regions.

Death rate This entry gives the average annual number of deaths during a year per 1,000 population at midyear; also known as crude death rate. The death rate, while only a rough indicator of the mortality situation in a country, accurately indicates the current mortality impact on population growth. This indicator is significantly affected by age distribution, and most countries will eventually show a rise in the overall death rate, in spite of continued decline in mortality at all ages, as declining fertility results in an aging population.

Debt—external This entry gives the total public and private debt owed to nonresidents repayable in internationally accepted currencies, goods, or services. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Dependency status This entry describes the formal relationship between a particular nonindependent entity and an independent state.

Dependent areas This entry contains an alphabetical listing of all nonindependent entities associated in some way with a particular independent state.

Diplomatic representation The US Government has diplomatic relations with 190 independent states, including 188 of the

193 UN members (excluded UN members are Bhutan, Cuba, Iran, North Korea, and the US itself). In addition, the US has diplomatic relations with 2 independent states that are not in the UN, the Holy See and Kosovo, as well as with the EU.

Diplomatic representation from the US This entry includes the *chief of mission*, *embassy address*, *mailing address*, *telephone number*, *FAX number*, *branch office locations*, *consulate general locations*, and *consulate locations*.

Diplomatic representation in the US This entry includes the *chief of mission*, *chancery address*, *telephone*, *FAX*, *consulate general locations*, and *consulate locations*. The use of the annotated title Appointed Ambassador refers to a new ambassador who has presented his/her credentials to the secretary of state but not the US president. Such ambassadors fulfill all diplomatic functions except meeting with or appearing at functions attended by the president until such time as they formally present their credentials at a White House ceremony.

Disputes—international This entry includes a wide variety of situations that range from traditional bilateral boundary disputes to unilateral claims of one sort or another. Information regarding disputes over international terrestrial and maritime boundaries has been reviewed by the US Department of State. References to other situations involving borders or frontiers may also be included, such as resource disputes, geopolitical questions, or irredentist issues; however, inclusion does not necessarily constitute official acceptance or recognition by the US Government.

Distribution of family income—Gini index This index measures the degree of inequality in the distribution of family income in a country. The index is calculated from the Lorenz curve, in which cumulative family income is plotted against the number of families arranged from the poorest to the richest. The index is the ratio of (a) the area between a country's Lorenz curve and the 45 degree helping line to (b) the entire triangular area under the 45 degree line. The more nearly equal a country's income distribution, the closer its Lorenz curve to the 45 degree line and the lower its Gini index, e.g., a Scandinavian country with an index of 25. The more unequal a country's income distribution, the farther its Lorenz curve from the 45 degree line and the higher its Gini index, e.g., a Sub-Saharan country with an index of 50. If income were distributed with perfect equality, the Lorenz curve would coincide with the 45 degree line and the index would be zero; if income were distributed with perfect inequality, the Lorenz curve would coincide with the horizontal axis and the right vertical axis and the index would be 100.

Drinking water source This entry provides information about access to improved or unimproved drinking water sources available to segments of the population of a country. *Improved drinking water*—use of any of the following sources: piped water into dwelling, yard, or plot; public tap or standpipe; tubewell or borehole; protected dug well; protected spring; or rainwater collection. *Unimproved drinking water*—use of any of the following sources: unprotected dug well; unprotected spring; cart with small tank or drum; tanker truck; surface water, which includes rivers, dams, lakes, ponds, streams, canals or irrigation channels; or bottled water.

Economy This category includes the entries dealing with the size, development, and management of productive resources, i.e., land, labor, and capital.

Economy—overview This entry briefly describes the type of economy, including the degree of market orientation, the level of economic development, the most important natural resources, and the unique areas of specialization. It also characterizes major economic events and policy changes in the most recent 12 months and may include a statement about one or two key future macroeconomic trends.

Education expenditures This entry provides the public expenditure on education as a percent of GDP.

Electricity—consumption This entry consists of total electricity generated annually plus imports and minus exports, expressed in kilowatt-hours. The discrepancy between the amount of electricity generated and/or imported and the amount consumed and/or exported is accounted for as loss in transmission and distribution.

Electricity—exports This entry is the total exported electricity in kilowatt-hours.

Electricity—imports This entry is the total imported electricity in kilowatt-hours.

Electricity—production This entry is the annual electricity generated expressed in kilowatt-hours. The discrepancy between the amount of electricity generated and/or imported and the amount consumed and/or exported is accounted for as loss in transmission and distribution.

Elevation extremes This entry includes both the highest point and the lowest point.

Entities Some of the independent states, dependencies, areas of special sovereignty, and governments included in this publication are not independent, and others are not officially recognized by the US Government. "Independent state" refers to a people politically organized into a sovereign state with a definite territory. "Dependencies" and "areas of special sovereignty" refer to a broad category of political entities that are associated in some way with an independent state. "Country" names used in the table of contents or for page headings are usually the short-form names as approved by the US Board on Geographic Names and may include independent states, dependencies, and areas of special sovereignty, or other geographic entities. There are a total of 267 separate geographic entities in *The World Factbook* that may be categorized as follows:

Environment—current issues This entry lists the most pressing and important environmental problems. The following terms and abbreviations are used throughout the entry:

Acidification—the lowering of soil and water pH due to acid precipitation and deposition usually through precipitation; this process disrupts ecosystem nutrient flows and may kill freshwater fish and plants dependent on more neutral or alkaline conditions (see acid rain).

Acid rain—characterized as containing harmful levels of sulfur dioxide or nitrogen oxide; acid rain is damaging and potentially deadly to the earth's fragile ecosystems; acidity is measured using the pH scale where 7 is neutral, values greater than 7 are considered alkaline, and values below 5.6 are considered acid precipitation; note—a pH of 2.4 (the acidity of vinegar) has been measured in rainfall in New England.

Aerosol—a collection of airborne particles dispersed in a gas, smoke, or fog.

Afforestation—converting a bare or agricultural space by planting trees and plants; reforestation involves replanting trees on areas that have been cut or destroyed by fire.

Asbestos—a naturally occurring soft fibrous mineral commonly used in fireproofing materials and considered to be highly carcinogenic in particulate form.

Biodiversity—also biological diversity; the relative number of species, diverse in form and function, at the genetic, organism, community, and ecosystem level; loss of biodiversity reduces an ecosystem's ability to recover from natural or man-induced disruption.

Bio-indicators—a plant or animal species whose presence, abundance, and health reveal the general condition of its habitat.

Biomass—the total weight or volume of living matter in a given area or volume.

Carbon cycle—the term used to describe the exchange of carbon (in various forms, e.g., as carbon dioxide) between the atmosphere, ocean, terrestrial biosphere, and geological deposits.

Catchments—assemblages used to capture and retain rainwater and runoff; an important water management technique in areas with limited freshwater resources, such as Gibraltar.

DDT (dichloro-diphenyl-trichloro-ethane)—a colorless, odorless insecticide that has toxic effects on most animals; the use of DDT was banned in the US in 1972.

Defoliants—chemicals which cause plants to lose their leaves artificially; often used in agricultural practices for weed control, and may have detrimental impacts on human and ecosystem health.

Deforestation—the destruction of vast areas of forest (e.g., unsustainable forestry practices, agricultural and range land clearing, and the over exploitation of wood products for use as fuel) without planting new growth.

Desertification—the spread of desert-like conditions in arid or semi-arid areas, due to overgrazing, loss of agriculturally productive soils, or climate change.

Dredging—the practice of deepening an existing waterway; also, a technique used for collecting bottom-dwelling marine

organisms (e.g., shellfish) or harvesting coral, often causing significant destruction of reef and ocean-floor ecosystems.

Drift-net fishing—done with a net, miles in extent, that is generally anchored to a boat and left to float with the tide; often results in an over harvesting and waste of large populations of non-commercial marine species (by-catch) by its effect of "sweeping the ocean clean."

Ecosystems—ecological units comprised of complex communities of organisms and their specific environments.

Effluents—waste materials, such as smoke, sewage, or industrial waste which are released into the environment, subsequently polluting it.

Endangered species—a species that is threatened with extinction either by direct hunting or habitat destruction.

Freshwater—water with very low soluble mineral content; sources include lakes, streams, rivers, glaciers, and underground aquifers.

Greenhouse gas—a gas that "traps" infrared radiation in the lower atmosphere causing surface warming; water vapor, carbon dioxide, nitrous oxide, methane, hydrofluorocarbons, and ozone are the primary greenhouse gases in the Earth's atmosphere.

Groundwater—water sources found below the surface of the earth often in naturally occurring reservoirs in permeable rock strata; the source for wells and natural springs.

Highlands Water Project—a series of dams constructed jointly by Lesotho and South Africa to redirect Lesotho's abundant water supply into a rapidly growing area in South Africa; while it is the largest infrastructure project in southern Africa, it is also the most costly and controversial; objections to the project include claims that it forces people from their homes, submerges farmlands, and squanders economic resources.

Inuit Circumpolar Conference (ICC)—represents the roughly 150,000 Inuits of Alaska, Canada, Greenland, and Russia in international environmental issues; a General Assembly convenes every three years to determine the focus of the ICC; the most current concerns are long-range transport of pollutants, sustainable development, and climate change.

Metallurgical plants—industries which specialize in the science, technology, and processing of metals; these plants produce highly concentrated and toxic wastes which can contribute to pollution of ground water and air when not properly disposed.

Noxious substances—injurious, very harmful to living beings.

Overgrazing—the grazing of animals on plant material faster than it can naturally regrow leading to the permanent loss of plant cover, a common effect of too many animals grazing limited range land.

Ozone shield—a layer of the atmosphere composed of ozone gas (O₃) that resides approximately 25 miles above the Earth's surface and absorbs solar ultraviolet radiation that can be harmful to living organisms.

Poaching—the illegal killing of animals or fish, a great concern with respect to endangered or threatened species.

Pollution—the contamination of a healthy environment by man-made waste.

Potable water—water that is drinkable, safe to be consumed.

Salination—the process through which fresh (drinkable) water becomes salt (undrinkable) water; hence, desalination is the reverse process; also involves the accumulation of salts in topsoil caused by evaporation of excessive irrigation water, a process that can eventually render soil incapable of supporting crops.

Siltation—occurs when water channels and reservoirs become clogged with silt and mud, a side effect of deforestation and soil erosion.

Slash-and-burn agriculture—a rotating cultivation technique in which trees are cut down and burned in order to clear land for temporary agriculture; the land is used until its productivity declines at which point a new plot is selected and the process repeats; this practice is sustainable while population levels are low and time is permitted for regrowth of natural vegetation; conversely, where these conditions do not exist, the practice can have disastrous consequences for the environment.

Soil degradation—damage to the land's productive capacity because of poor agricultural practices such as the excessive use of pesticides or fertilizers, soil compaction from heavy equipment,

or erosion of topsoil, eventually resulting in reduced ability to produce agricultural products.

Soil erosion—the removal of soil by the action of water or wind, compounded by poor agricultural practices, deforestation, overgrazing, and desertification.

Ultraviolet (UV) radiation—a portion of the electromagnetic energy emitted by the sun and naturally filtered in the upper atmosphere by the ozone layer; UV radiation can be harmful to living organisms and has been linked to increasing rates of skin cancer in humans.

Waterborne diseases—those in which bacteria survive in, and are transmitted through, water; always a serious threat in areas with an untreated water supply.

Environment—international agreements This entry separates country participation in international environmental agreements into two levels—*party to* and *signed, but not ratified*. Agreements are listed in alphabetical order by the abbreviated form of the full name.

Environmental agreements This information is presented in Appendix C: Selected International Environmental Agreements, which includes the name, abbreviation, date opened for signature, date entered into force, objective, and parties by category.

Ethnic groups This entry provides an ordered listing of ethnic groups starting with the largest and normally includes the percent of total population.

Exchange rates This entry provides the average annual price of a country's monetary unit for the time period specified, expressed in units of local currency per US dollar, as determined by international market forces or by official fiat. The International Organization for Standardization (ISO) 4217 alphabetic currency code for the national medium of exchange is presented in parenthesis. Closing daily exchange rates are not presented in *The World Factbook*, but are used to convert stock values—e.g., the market value of publicly traded shares—to US dollars as of the specified date.

Executive branch This entry includes several subfields. *Chief of state* includes the name and title of the titular leader of the country who represents the state at official and ceremonial functions but may not be involved with the day-to-day activities of the government. *Head of government* includes the name and title of the top administrative leader who is designated to manage the day-to-day activities of the government. For example, in the UK, the monarch is the chief of state, and the prime minister is the head of government. In the US, the president is both the chief of state and the head of government. *Cabinet* includes the official name for this body of high-ranking advisers and the method for selection of members. *Elections* includes the nature of election process or accession to power, date of the last election, and date of the next election. *Election results* includes the percent of vote for each candidate in the last election.

Exports This entry provides the total US dollar amount of merchandise exports on an f.o.b. (free on board) basis. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Exports—commodities This entry provides a listing of the highest-valued exported products; it sometimes includes the percent of total dollar value.

Exports—partners This entry provides a rank ordering of trading partners starting with the most important; it sometimes includes the percent of total dollar value.

Flag description This entry provides a written flag description produced from actual flags or the best information available at the time the entry was written. The flags of independent states are used by their dependencies unless there is an officially recognized local flag. Some disputed and other areas do not have flags.

Flag graphic Most versions of the *Factbook* include a color flag at the beginning of the country profile. The flag graphics were produced from actual flags or the best information available at the time of preparation. The flags of independent states are used by their dependencies unless there is an officially recognized local flag. Some disputed and other areas do not have flags.

Freshwater withdrawal (domestic/industrial/agricultural)

This entry provides the annual quantity of water in cubic kilometers removed from available sources for use in any purpose. Water drawn-off is not necessarily entirely consumed and some portion may be returned for further use downstream. Domestic sector use refers to water supplied by public distribution systems. Note that some of this total may be used for small industrial and/or limited agricultural purposes. Industrial sector use is the quantity of water used by self-supplied industries not connected to a public distribution system. Agricultural sector use includes water used for irrigation and livestock watering, and does not account for agriculture directly dependent on rainfall. Included are figures for total annual water withdrawal and *per capita* water withdrawal.

GDP (official exchange rate) This entry gives the gross domestic product (GDP) or value of all final goods and services produced within a nation in a given year. A nation's GDP at official exchange rates (OER) is the home-currency-denominated annual GDP figure divided by the bilateral average US exchange rate with that country in that year. The measure is simple to compute and gives a precise measure of the value of output. Many economists prefer this measure when gauging the economic power an economy maintains vis-à-vis its neighbors, judging that an exchange rate captures the purchasing power a nation enjoys in the international marketplace. Official exchange rates, however, can be artificially fixed and/or subject to manipulation—resulting in claims of the country having an under- or over-valued currency—and are not necessarily the equivalent of a market-determined exchange rate. Moreover, even if the official exchange rate is market-determined, market exchange rates are frequently established by a relatively small set of goods and services (the ones the country trades) and may not capture the value of the larger set of goods the country produces. Furthermore, OER-converted GDP is not well suited to comparing domestic GDP over time, since appreciation/depreciation from one year to the next will make the OER GDP value rise/fall regardless of whether home-currency-denominated GDP changed.

GDP (purchasing power parity) This entry gives the gross domestic product (GDP) or value of all final goods and services produced within a nation in a given year. A nation's GDP at purchasing power parity (PPP) exchange rates is the sum value of all goods and services produced in the country valued at prices prevailing in the United States in the year noted. This is the measure most economists prefer when looking at per-capita welfare and when comparing living conditions or use of resources across countries. The measure is difficult to compute, as a US dollar value has to be assigned to all goods and services in the country regardless of whether these goods and services have a direct equivalent in the United States (for example, the value of an ox-cart or non-US military equipment); as a result, PPP estimates for some countries are based on a small and sometimes different set of goods and services. In addition, many countries do not formally participate in the World Bank's PPP project that calculates these measures, so the resulting GDP estimates for these countries may lack precision. For many developing countries, PPP-based GDP measures are multiples of the official exchange rate (OER) measure. The differences between the OER- and PPP-denominated GDP values for most of the wealthy industrialized countries are generally much smaller.

GDP—composition by sector This entry gives the percentage contribution of agriculture, industry, and services to total GDP. Agriculture includes farming, fishing, and forestry. Industry includes mining, manufacturing, energy production, and construction. Services cover government activities, communications, transportation, finance, and all other private economic activities that do not produce material goods. The distribution will total less than 100 percent if the data are incomplete.

GDP—per capita (PPP) This entry shows GDP on a purchasing power parity basis divided by population as of 1 July for the same year.

GDP—real growth rate This entry gives GDP growth on an annual basis adjusted for inflation and expressed as a percent. The growth rates are year-over-year, and not compounded.

GDP methodology In the Economy category, GDP dollar estimates for countries are reported both on an official exchange rate

(OER) and a purchasing power parity (PPP) basis. Both measures contain information that is useful to the reader. The PPP method involves the use of standardized international dollar price weights, which are applied to the quantities of final goods and services produced in a given economy. The data derived from the PPP method probably provide the best available starting point for comparisons of economic strength and well-being between countries. In contrast, the currency exchange rate method involves a variety of international and domestic financial forces that may not capture the value of domestic output. Whereas PPP estimates for OECD countries are quite reliable, PPP estimates for developing countries are often rough approximations. In developing countries with weak currencies, the exchange rate estimate of GDP in dollars is typically one-fourth to one-half the PPP estimate. Most of the GDP estimates for developing countries are based on extrapolation of PPP numbers published by the UN International Comparison Program (UNICP) and by Professors Robert Summers and Alan Heston of the University of Pennsylvania and their colleagues. GDP derived using the OER method should be used for the purpose of calculating the share of items such as exports, imports, military expenditures, external debt, or the current account balance, because the dollar values presented in the *Factbook* for these items have been converted at official exchange rates, not at PPP. One should use the OER GDP figure to calculate the proportion of, say, Chinese defense expenditures in GDP, because that share will be the same as one calculated in local currency units. Comparison of OER GDP with PPP GDP may also indicate whether a currency is over- or under-valued. If OER GDP is smaller than PPP GDP, the official exchange rate may be undervalued, and vice versa. However, there is no strong historical evidence that market exchange rates move in the direction implied by the PPP rate, at least not in the short- or medium-term. Note: the numbers for GDP and other economic data should not be chained together from successive volumes of the *Factbook* because of changes in the US dollar measuring rod, revisions of data by statistical agencies, use of new or different sources of information, and changes in national statistical methods and practices.

Geographic coordinates This entry includes rounded latitude and longitude figures for the centroid or center point of a country expressed in degrees and minutes; it is based on the locations provided in the Geographic Names Server (GNS), maintained by the National Geospatial-Intelligence Agency on behalf of the US Board on Geographic Names.

Geographic names This information is presented in **Appendix F: Cross Reference List of Geographic Names**. It includes a listing of various alternate names, former names, local names, and regional names referenced to one or more related *Factbook* entries. Spellings are normally, but not always, those approved by the US Board on Geographic Names (BGN). Alternate names and additional information are included in parentheses.

Geography This category includes the entries dealing with the natural environment and the effects of human activity.

Geography—note This entry includes miscellaneous geographic information of significance not included elsewhere.

Gini index See entry for **Distribution of family income—Gini index**

GNP Gross national product (GNP) is the value of all final goods and services produced within a nation in a given year, plus income earned by its citizens abroad, minus income earned by foreigners from domestic production. The *Factbook*, following current practice, uses GDP rather than GNP to measure national production. However, the user must realize that in certain countries net remittances from citizens working abroad may be important to national well-being.

Government This category includes the entries dealing with the system for the adoption and administration of public policy.

Government—note This entry includes miscellaneous government information of significance not included elsewhere.

Government type This entry gives the basic form of government. Definitions of the major governmental terms are as follows. (Note that for some countries more than one definition applies.):

Absolute monarchy—a form of government where the monarch rules unhindered, i.e., without any laws, constitution, or legally organized opposition.

Anarchy—a condition of lawlessness or political disorder brought about by the absence of governmental authority.

Authoritarian—a form of government in which state authority is imposed upon many aspects of citizens' lives.

Commonwealth—a nation, state, or other political entity founded on law and united by a compact of the people for the common good.

Communist—a system of government in which the state plans and controls the economy and a single—often authoritarian—party holds power; state controls are imposed with the elimination of private ownership of property or capital while claiming to make progress toward a higher social order in which all goods are equally shared by the people (i.e., a classless society).

Confederacy (Confederation)—a union by compact or treaty between states, provinces, or territories, that creates a central government with limited powers; the constituent entities retain supreme authority over all matters except those delegated to the central government.

Constitutional—a government by or operating under an authoritative document (constitution) that sets forth the system of fundamental laws and principles that determines the nature, functions, and limits of that government.

Constitutional democracy—a form of government in which the sovereign power of the people is spelled out in a governing constitution.

Constitutional monarchy—a system of government in which a monarch is guided by a constitution whereby his/her rights, duties, and responsibilities are spelled out in written law or by custom.

Democracy—a form of government in which the supreme power is retained by the people, but which is usually exercised indirectly through a system of representation and delegated authority periodically renewed.

Democratic republic—a state in which the supreme power rests in the body of citizens entitled to vote for officers and representatives responsible to them.

Dictatorship—a form of government in which a ruler or small clique wield absolute power (not restricted by a constitution or laws).

Ecclesiastical—a government administrated by a church.

Emirate—similar to a monarchy or sultanate, but a government in which the supreme power is in the hands of an emir (the ruler of a Muslim state); the emir may be an absolute overlord or a sovereign with constitutionally limited authority.

Federal (Federation)—a form of government in which sovereign power is formally divided—usually by means of a constitution—between a central authority and a number of constituent regions (states, colonies, or provinces) so that each region retains some management of its internal affairs; differs from a confederacy in that the central government exerts influence directly upon both individuals as well as upon the regional units.

Federal republic—a state in which the powers of the central government are restricted and in which the component parts (states, colonies, or provinces) retain a degree of self-government; ultimate sovereign power rests with the voters who chose their governmental representatives.

Islamic republic—a particular form of government adopted by some Muslim states; although such a state is, in theory, a theocracy, it remains a republic, but its laws are required to be compatible with the laws of Islam.

Maoism—the theory and practice of Marxism-Leninism developed in China by Mao Zedong (Mao Tse-tung), which states that a continuous revolution is necessary if the leaders of a communist state are to keep in touch with the people.

Marxism—the political, economic, and social principles espoused by 19th century economist Karl Marx; he viewed the struggle of workers as a progression of historical forces that would proceed from a class struggle of the proletariat (workers) exploited by capitalists (business owners), to a socialist "dictatorship of the proletariat," to, finally, a classless society—Communism.

Marxism-Leninism—an expanded form of communism developed by Lenin from doctrines of Karl Marx; Lenin saw imperialism as the final stage of capitalism and shifted the focus of workers' struggle from developed to underdeveloped countries.

Monarchy—a government in which the supreme power is lodged in the hands of a monarch who reigns over a state or territory, usually for life and by hereditary right; the monarch may be either a sole absolute ruler or a sovereign—such as a king, queen, or prince—with constitutionally limited authority.

Oligarchy—a government in which control is exercised by a small group of individuals whose authority generally is based on wealth or power.

Parliamentary democracy—a political system in which the legislature (parliament) selects the government—a prime minister, premier, or chancellor along with the cabinet ministers—according to party strength as expressed in elections; by this system, the government acquires a dual responsibility: to the people as well as to the parliament.

Parliamentary government (Cabinet-Parliamentary government)—a government in which members of an executive branch (the cabinet and its leader—a prime minister, premier, or chancellor) are nominated to their positions by a legislature or parliament, and are directly responsible to it; this type of government can be dissolved at will by the parliament (legislature) by means of a no confidence vote or the leader of the cabinet may dissolve the parliament if it can no longer function.

Parliamentary monarchy—a state headed by a monarch who is not actively involved in policy formation or implementation (i.e., the exercise of sovereign powers by a monarch in a ceremonial capacity); true governmental leadership is carried out by a cabinet and its head—a prime minister, premier, or chancellor—who are drawn from a legislature (parliament).

Presidential—a system of government where the executive branch exists separately from a legislature (to which it is generally not accountable).

Republic—a representative democracy in which the people's elected deputies (representatives), not the people themselves, vote on legislation.

Socialism—a government in which the means of planning, producing, and distributing goods is controlled by a central government that theoretically seeks a more just and equitable distribution of property and labor; in actuality, most socialist governments have ended up being no more than dictatorships over workers by a ruling elite.

Sultanate—similar to a monarchy, but a government in which the supreme power is in the hands of a sultan (the head of a Muslim state); the sultan may be an absolute ruler or a sovereign with constitutionally limited authority.

Theocracy—a form of government in which a Deity is recognized as the supreme civil ruler, but the Deity's laws are interpreted by ecclesiastical authorities (bishops, mullahs, etc.); a government subject to religious authority.

Totalitarian—a government that seeks to subordinate the individual to the state by controlling not only all political and economic matters, but also the attitudes, values, and beliefs of its population.

Greenwich Mean Time (GMT) The mean solar time at the Greenwich Meridian, Greenwich, England, with the hours and days, since 1925, reckoned from midnight. GMT is now a historical term having been replaced by UTC on 1 January 1972. See **Coordinated Universal Time**.

Gross domestic product See **GDP**

Gross national product See **GNP**

Gross world product See **GWP**

GWP This entry gives the gross world product (GWP) or aggregate value of all final goods and services produced worldwide in a given year.

Health expenditures This entry provides the total expenditure on health as a percentage of GDP. Health expenditures are broadly defined as activities performed either by institutions or individuals through the application of medical, paramedical, and/or nursing knowledge and technology, the primary purpose of which is to promote, restore, or maintain health.

Heliports This entry gives the total number of heliports with hard-surface runways, helipads, or landing areas that support routine

sustained helicopter operations exclusively and have support facilities including one or more of the following facilities: lighting, fuel, passenger handling, or maintenance. It includes former airports used exclusively for helicopter operations but excludes heliports limited to day operations and natural clearings that could support helicopter landings and takeoffs.

HIV/AIDS—adult prevalence rate This entry gives an estimate of the percentage of adults (aged 15-49) living with HIV/AIDS. The adult prevalence rate is calculated by dividing the estimated number of adults living with HIV/AIDS at yearend by the total adult population at yearend.

HIV/AIDS—deaths This entry gives an estimate of the number of adults and children who died of AIDS during a given calendar year.

HIV/AIDS—people living with HIV/AIDS This entry gives an estimate of all people (adults and children) alive at yearend with HIV infection, whether or not they have developed symptoms of AIDS.

Hospital bed density This entry provides the number of hospital beds per 1,000 people; it serves as a general measure of inpatient service availability. Hospital beds include inpatient beds available in public, private, general, and specialized hospitals and rehabilitation centers. In most cases, beds for both acute and chronic care are included. Because the level of inpatient services required for individual countries depends on several factors—such as demographic issues and the burden of disease—there is no global target for the number of hospital beds per country. So, while 2 beds per 1,000 in one country may be sufficient, 2 beds per 1,000 in another may be woefully inadequate because of the number of people hospitalized by disease.

Household income or consumption by percentage share Data on household income or consumption come from household surveys, the results adjusted for household size. Nations use different standards and procedures in collecting and adjusting the data. Surveys based on income will normally show a more unequal distribution than surveys based on consumption. The quality of surveys is improving with time, yet caution is still necessary in making inter-country comparisons.

Hydrographic data codes See Data codes

Illicit drugs This entry gives information on the five categories of illicit drugs—narcotics, stimulants, depressants (sedatives), hallucinogens, and cannabis. These categories include many drugs legally produced and prescribed by doctors as well as those illegally produced and sold outside of medical channels.

Cannabis (*Cannabis sativa*) is the common hemp plant, which provides hallucinogens with some sedative properties, and includes marijuana (pot, Acapulco gold, grass, reefer), tetrahydrocannabinol (THC, Marinol), hashish (hash), and hashish oil (hash oil).

Coca (mostly *Erythroxylum coca*) is a bush with leaves that contain the stimulant used to make cocaine. Coca is not to be confused with cocoa, which comes from cacao seeds and is used in making chocolate, cocoa, and cocoa butter.

Cocaine is a stimulant derived from the leaves of the coca bush.

Depressants (sedatives) are drugs that reduce tension and anxiety and include chloral hydrate, barbiturates (Amytal, Nembutal, Seconal, phenobarbital), benzodiazepines (Librium, Valium), methaqualone (Quaalude), glutethimide (Doriden), and others (Equanil, Placidyl, Valmid).

Drugs are any chemical substances that effect a physical, mental, emotional, or behavioral change in an individual.

Drug abuse is the use of any licit or illicit chemical substance that results in physical, mental, emotional, or behavioral impairment in an individual.

Hallucinogens are drugs that affect sensation, thinking, self-awareness, and emotion. Hallucinogens include LSD (acid, microdot), mescaline and peyote (mexc, buttons, cactus), amphetamine variants (PMA, STP, DOB), phencyclidine (PCP, angel dust, hog), phencyclidine analogues (PCE, PCPy, TCP), and others (psilocybin, psilocyn).

Hashish is the resinous exudate of the cannabis or hemp plant (*Cannabis sativa*).

Heroin is a semisynthetic derivative of morphine.

Mandrax is a trade name for methaqualone, a pharmaceutical depressant.

Marijuana is the dried leaf of the cannabis or hemp plant (*Cannabis sativa*).

Methaqualone is a pharmaceutical depressant, referred to as mandrax in Southwest Asia and Africa.

Narcotics are drugs that relieve pain, often induce sleep, and refer to opium, opium derivatives, and synthetic substitutes. Natural narcotics include opium (paregoric, parepectolin), morphine (MS-Contin, Roxanol), codeine (Tylenol with codeine, Empirin with codeine, Robitussin AC), and thebaine. Semi-synthetic narcotics include heroin (horse, smack), and hydromorphone (Dilaudid). Synthetic narcotics include meperidine or Peridine (Demerol, Mepergan), methadone (Dolophine, Methadose), and others (Darvon, Lomotil).

Opium is the brown, gummy exudate of the incised, unripe seed-pod of the opium poppy.

Opium poppy (*Papaver somniferum*) is the source for the natural and semisynthetic narcotics.

Poppy straw is the entire cut and dried opium poppy-plant material, other than the seeds. Opium is extracted from poppy straw in commercial operations that produce the drug for medical use.

Qat (kat, khat) is a stimulant from the buds or leaves of *Catha edulis* that is chewed or drunk as tea.

Quaaludes is the North American slang term for methaqualone, a pharmaceutical depressant.

Stimulants are drugs that relieve mild depression, increase energy and activity, and include cocaine (coke, snow, crack), amphetamines (Desoxyn, Dexedrine), ephedrine, ecstasy (clarity, essence, doctor, Adam), phenmetrazine (Preludin), methylphenidate (Ritalin), and others (Cylert, Sanorex, Tenuate).

Imports This entry provides the total US dollar amount of merchandise imports on a c.i.f. (cost, insurance, and freight) or f.o.b. (free on board) basis. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Imports—commodities This entry provides a listing of the highest-valued imported products; it sometimes includes the percent of total dollar value.

Imports—partners This entry provides a rank ordering of trading partners starting with the most important; it sometimes includes the percent of total dollar value.

Independence For most countries, this entry gives the date that sovereignty was achieved and from which nation, empire, or trusteeship. For the other countries, the date given may not represent "independence" in the strict sense, but rather some significant nationhood event such as the traditional founding date or the date of unification, federation, confederation, establishment, fundamental change in the form of government, or state succession. For a number of countries, the establishment of statehood was a lengthy evolutionary process occurring over decades or even centuries. In such cases, several significant dates are cited. Dependent areas include the notation "none" followed by the nature of their dependency status. Also see the Terminology note.

Industrial production growth rate This entry gives the annual percentage increase in industrial production (includes manufacturing, mining, and construction).

Industries This entry provides a rank ordering of industries starting with the largest by value of annual output.

Infant mortality rate This entry gives the number of deaths of infants under one year old in a given year per 1,000 live births in the same year; included is the total death rate, and deaths by sex, male and female. This rate is often used as an indicator of the level of health in a country.

Inflation rate (consumer prices) This entry furnishes the annual percent change in consumer prices compared with the previous year's consumer prices.

International disputes see Disputes—international

International law organization participation This entry includes information on a country's acceptance of jurisdiction of the International Court of Justice (ICJ) and of the International Criminal Court (ICCt); 55 countries have accepted ICJ jurisdiction with reservations and 11 have accepted ICJ jurisdiction without reservations; 114 countries have accepted ICCt jurisdiction. **Appendix B: International Organizations and Groups** explains the differing mandates of the ICJ and ICCt.

International organization participation This entry lists in alphabetical order by abbreviation those international organizations in which the subject country is a member or participates in some other way.

International organizations This information is presented in **Appendix B: International Organizations and Groups** which includes the name, abbreviation, date established, aim, and members by category.

Internet country code This entry includes the two-letter codes maintained by the International Organization for Standardization (ISO) in the ISO 3166 Alpha-2 list and used by the Internet Assigned Numbers Authority (IANA) to establish country-coded top-level domains (ccTLDs).

Internet hosts This entry lists the number of Internet hosts available within a country. An Internet host is a computer connected directly to the Internet; normally an Internet Service Provider's (ISP) computer is a host. Internet users may use either a hard-wired terminal, at an institution with a mainframe computer connected directly to the Internet, or may connect remotely by way of a modem via telephone line, cable, or satellite to the Internet Service Provider's host computer. The number of hosts is one indicator of the extent of Internet connectivity.

Internet users This entry gives the number of users within a country that access the Internet. Statistics vary from country to country and may include users who access the Internet at least several times a week to those who access it only once within a period of several months.

Introduction This category includes one entry, **Background**.

Investment (gross fixed) This entry records total business spending on fixed assets, such as factories, machinery, equipment, dwellings, and inventories of raw materials, which provide the basis for future production. It is measured gross of the depreciation of the assets, i.e., it includes investment that merely replaces worn-out or scrapped capital.

Irrigated land This entry gives the number of square kilometers of land area that is artificially supplied with water.

Judicial branch This entry contains the name(s) of the highest court(s) and a brief description of the selection process for members.

Labor force This entry contains the total labor force figure.

Labor force—by occupation This entry lists the percentage distribution of the labor force by sector of occupation. *Agriculture* includes farming, fishing, and forestry. *Industry* includes mining, manufacturing, energy production, and construction. *Services* cover government activities, communications, transportation, finance, and all other economic activities that do not produce material goods. The distribution will total less than 100 percent if the data are incomplete and may range from 99-101 percent due to rounding.

Land boundaries This entry contains the total length of all land boundaries and the individual lengths for each of the contiguous border countries. When available, official lengths published by national statistical agencies are used. Because surveying methods may differ, country border lengths reported by contiguous countries may differ.

Land use This entry contains the percentage shares of total land area for three different types of land use: *arable land*—land cultivated for crops like wheat, maize, and rice that are replanted after each harvest; *permanent crops*—land cultivated for crops like citrus, coffee, and rubber that are not replanted after each harvest; includes land under flowering shrubs, fruit trees, nut trees, and vines, but excludes land under trees grown for wood or timber; *other*—any land

not arable or under permanent crops; includes permanent meadows and pastures, forests and woodlands, built-on areas, roads, barren land, etc.

Languages This entry provides a rank ordering of languages starting with the largest and sometimes includes the percent of total population speaking that language.

Legal system This entry provides the description of a country's legal system. A statement on judicial review of legislative acts is also included for a number of countries. The legal systems of nearly all countries are generally modeled upon elements of five main types: civil law (including French law, the Napoleonic Code, Roman law, Roman-Dutch law, and Spanish law); common law (including United State law); customary law; mixed or pluralistic law; and religious law (including Islamic law). An additional type of legal system—international law, which governs the conduct of independent nations in their relationships with one another—is also addressed below. The following list describes these legal systems, the countries or world regions where these systems are enforced, and a brief statement on the origins and major features of each.

Civil Law—The most widespread type of legal system in the world, applied in various forms in approximately 150 countries. Also referred to as European continental law, the civil law system is derived mainly from the Roman *Corpus Juris Civilis*, (Body of Civil Law), a collection of laws and legal interpretations compiled under the East Roman (Byzantine) Emperor Justinian I between A.D. 528 and 565. The major feature of civil law systems is that the laws are organized into systematic written codes. In civil law the sources recognized as authoritative are principally legislation—especially codifications in constitutions or statutes enacted by governments—and secondarily, custom. The civil law systems in some countries are based on more than one code.

Common Law—A type of legal system, often synonymous with "English common law," which is the system of England and Wales in the UK, and is also in force in approximately 80 countries formerly part of or influenced by the former British Empire. English common law reflects Biblical influences as well as remnants of law systems imposed by early conquerors including the Romans, Anglo-Saxons, and Normans. Some legal scholars attribute the formation of the English common law system to King Henry II (r.1154-1189). Until the time of his reign, laws customary among England's various manorial and ecclesiastical (church) jurisdictions were administered locally. Henry II established the king's court and designated that laws were "common" to the entire English realm. The foundation of English common law is "legal precedent"—referred to as *stare decisis*, meaning "to stand by things decided." In the English common law system, court judges are bound in their decisions in large part by the rules and other doctrines developed—and supplemented over time—by the judges of earlier English courts.

Customary Law—A type of legal system that serves as the basis of, or has influenced, the present-day laws in approximately 40 countries—mostly in Africa, but some in the Pacific islands, Europe, and the Near East. Customary law is also referred to as "primitive law," "unwritten law," "indigenous law," and "folk law." There is no single history of customary law such as that found in Roman civil law, English common law, Islamic law, or the Napoleonic Civil Code. The earliest systems of law in human society were customary, and usually developed in small agrarian and hunter-gatherer communities. As the term implies, customary law is based upon the customs of a community. Common attributes of customary legal systems are that they are seldom written down, they embody an organized set of rules regulating social relations, and they are agreed upon by members of the community. Although such law systems include sanctions for law infractions, resolution tends to be reconciliatory rather than punitive. A number of African states practiced customary law many centuries prior to colonial influences. Following colonization, such laws were written down and incorporated to varying extents into the legal systems imposed by their colonial powers.

European Union Law—A sub-discipline of international law known as "supranational law" in which the rights of sovereign nations are limited in relation to one another. Also referred to

as the Law of the European Union or Community Law, it is the unique and complex legal system that operates in tandem with the laws of the 27 member states of the European Union (EU). Similar to federal states, the EU legal system ensures compliance from the member states because of the Union's decentralized political nature. The European Court of Justice (ECJ), established in 1952 by the Treaty of Paris, has been largely responsible for the development of EU law. Fundamental principles of European Union law include: *subsidiarity*—the notion that issues be handled by the smallest, lowest, or least centralized competent authority; *proportionality*—the EU may only act to the extent needed to achieve its objectives; *conferral*—the EU is a union of member states, and all its authorities are voluntarily granted by its members; *legal certainty*—requires that legal rules be clear and precise; and *precautionary principle*—a moral and political principle stating that if an action or policy might cause severe or irreversible harm to the public or to the environment, in the absence of a scientific consensus that harm would not ensue, the burden of proof falls on those who would advocate taking the action.

French Law—A type of civil law that is the legal system of France. The French system also serves as the basis for, or is mixed with, other legal systems in approximately 50 countries, notably in North Africa, the Near East, and the French territories and dependencies. French law is primarily codified or systematic written civil law. Prior to the French Revolution (1789–1799), France had no single national legal system. Laws in the northern areas of present-day France were mostly local customs based on privileges and exemptions granted by kings and feudal lords, while in the southern areas Roman law predominated. The introduction of the Napoleonic Civil Code during the reign of Napoleon I in the first decade of the 19th century brought major reforms to the French legal system, many of which remain part of France's current legal structure, though all have been extensively amended or redrafted to address a modern nation. French law distinguishes between “public law” and “private law.” Public law relates to government, the French Constitution, public administration, and criminal law. Private law covers issues between private citizens or corporations. The most recent changes to the French legal system—introduced in the 1980s—were the decentralization laws, which transferred authority from centrally appointed government representatives to locally elected representatives of the people.

International Law—The law of the international community, or the body of customary rules and treaty rules accepted as legally binding by states in their relations with each other. International law differs from other legal systems in that it primarily concerns sovereign political entities. There are three separate disciplines of international law: public international law, which governs the relationship between provinces and international entities and includes treaty law, law of the sea, international criminal law, and international humanitarian law; private international law, which addresses legal jurisdiction; and supranational law—a legal framework wherein countries are bound by regional agreements in which the laws of the member countries are held inapplicable when in conflict with supranational laws. At present the European Union is the only entity under a supranational legal system. The term “international law” was coined by Jeremy Bentham in 1780 in his *Principles of Morals and Legislation*, though laws governing relations between states have been recognized from very early times (many centuries B.C.). Modern international law developed alongside the emergence and growth of the European nation-states beginning in the early 16th century. Other factors that influenced the development of international law included the revival of legal studies, the growth of international trade, and the practice of exchanging emissaries and establishing legations. The sources of International law are set out in Article 38-1 of the Statute of the International Court of Justice within the UN Charter.

Islamic Law—The most widespread type of religious law, it is the legal system enforced in over 30 countries, particularly in the Near East, but also in Central and South Asia, Africa, and Indonesia. In many countries Islamic law operates in tandem with a civil law system. Islamic law is embodied in the sharia, an Arabic word meaning “the right path.” Sharia covers all aspects of public and private life and organizes them into five categories: obligatory, recommended,

permitted, disliked, and forbidden. The primary sources of sharia law are the Qur'an, believed by Muslims to be the word of God revealed to the Prophet Muhammad by the angel Gabriel, and the Sunnah, the teachings of the Prophet and his works. In addition to these two primary sources, traditional Sunni Muslims recognize the consensus of Muhammad's companions and Islamic jurists on certain issues, called *ijmas*, and various forms of reasoning, including analogy by legal scholars, referred to as *qiyas*. Shia Muslims reject *ijmas* and *qiyas* as sources of sharia law.

Mixed Law—Also referred to as pluralistic law, mixed law consists of elements of some or all of the other main types of legal systems—civil, common, customary, and religious. The mixed legal systems of a number of countries came about when colonial powers overlaid their own legal systems upon colonized regions but retained elements of the colonies' existing legal systems.

Napoleonic Civil Code—A type of civil law, referred to as the Civil Code or *Code Civil des Français*, forms part of the legal system of France, and underpins the legal systems of Bolivia, Egypt, Lebanon, Poland, and the US state of Louisiana. The Civil Code was established under Napoleon I, enacted in 1804, and officially designated the *Code Napoleon* in 1807. This legal system combined the Teutonic civil law tradition of the northern provinces of France with the Roman law tradition of the southern and eastern regions of the country. The Civil Code bears similarities in its arrangement to the Roman *Body of Civil Law* (see Civil Law above). As enacted in 1804, the Code addressed personal status, property, and the acquisition of property. Codes added over the following six years included civil procedures, commercial law, criminal law and procedures, and a penal code.

Religious Law—A legal system which stems from the sacred texts of religious traditions and in most cases professes to cover all aspects of life as a seamless part of devotional obligations to a transcendent, imminent, or deep philosophical reality. Implied as the basis of religious law is the concept of unalterability, because the word of God cannot be amended or legislated against by judges or governments. However, a detailed legal system generally requires human elaboration. The main types of religious law are sharia in Islam, halakha in Judaism, and canon law in some Christian groups. Sharia is the most widespread religious legal system (see Islamic Law), and is the sole system of law for countries including Iran, the Maldives, and Saudi Arabia. No country is fully governed by halakha, but Jewish people may decide to settle disputes through Jewish courts and be bound by their rulings. Canon law is not a divine law as such because it is not found in revelation. It is viewed instead as human law inspired by the word of God and applying the demands of that revelation to the actual situation of the church. Canon law regulates the internal ordering of the Roman Catholic Church, the Eastern Orthodox Church, and the Anglican Communion.

Roman Law—A type of civil law developed in ancient Rome and practiced from the time of the city's founding (traditionally 753 B.C.) until the fall of the Western Empire in the 5th century A.D. Roman law remained the legal system of the Byzantine (Eastern Empire) until the fall of Constantinople in 1453. Preserved fragments of the first legal text, known as the Law of the Twelve Tables, dating from the 5th century B.C., contained specific provisions designed to change the prevailing customary law. Early Roman law was drawn from custom and statutes; later, during the time of the empire, emperors asserted their authority as the ultimate source of law. The basis for Roman laws was the idea that the exact form—not the intention—of words or of actions produced legal consequences. It was only in the late 6th century A.D. that a comprehensive Roman code of laws was published (see Civil Law above). Roman law served as the basis of law systems developed in a number of continental European countries.

Roman-Dutch Law—A type of civil law based on Roman law as applied in the Netherlands. Roman-Dutch law serves as the basis for legal systems in seven African countries, as well as Guyana, Indonesia, and Sri Lanka. This law system, which originated in the province of Holland and expanded throughout the Netherlands (to be replaced by the French Civil Code in 1809), was instituted in a number of sub-Saharan African countries during the Dutch colonial period. The Dutch jurist/philosopher Hugo

Grotius was the first to attempt to reduce Roman-Dutch civil law into a system in his *Jurisprudence of Holland* (written 1619-20, commentary published 1621). The Dutch historian/lawyer Simon van Leeuwen coined the term "Roman-Dutch law" in 1652.

Spanish Law—A type of civil law, often referred to as the Spanish Civil Code, it is the present legal system of Spain and is the basis of legal systems in 12 countries mostly in Central and South America, but also in southwestern Europe, northern and western Africa, and southeastern Asia. The Spanish Civil Code reflects a complex mixture of customary, Roman, Napoleonic, local, and modern codified law. The laws of the Visigoth invaders of Spain in the 5th to 7th centuries had the earliest major influence on Spanish legal system development. The Christian Reconquest of Spain in the 11th through 15th centuries witnessed the development of customary law, which combined canon (religious) and Roman law. During several centuries of Hapsburg and Bourbon rule, systematic recom compilations of the existing national legal system were attempted, but these often conflicted with local and regional customary civil laws. Legal system development for most of the 19th century concentrated on formulating a national civil law system, which was finally enacted in 1889 as the Spanish Civil Code. Several sections of the code have been revised, the most recent of which are the penal code in 1989 and the judiciary code in 2001. The Spanish Civil Code separates public and private law. Public law includes constitutional law, administrative law, criminal law, process law, financial and tax law, and international public law. Private law includes civil law, commercial law, labor law, and international private law.

United States Law—A type of common law, which is the basis of the legal system of the United States and that of its island possessions in the Caribbean and the Pacific. This legal system has several layers, more possibly than in most other countries, and is due in part to the division between federal and state law. The United States was founded not as one nation but as a union of 13 colonies, each claiming independence from the British Crown. The US Constitution, implemented in 1789, began shifting power away from the states and toward the federal government, though the states today retain substantial legal authority. US law draws its authority from four sources: *constitutional law*, *statutory law*, *administrative regulations*, and *case law*. Constitutional law is based on the US Constitution and serves as the supreme federal law. Taken together with those of the state constitutions, these documents outline the general structure of the federal and state governments and provide the rules and limits of power. US statutory law is legislation enacted by the US Congress and is codified in the United States Code. The 50 state legislatures have similar authority to enact state statutes. Administrative law is the authority delegated to federal and state executive agencies. Case law, also referred to as common law, covers areas where constitutional or statutory law is lacking. Case law is a collection of judicial decisions, customs, and general principles that began in England centuries ago, that were adopted in America at the time of the Revolution, and that continue to develop today.

Legislative branch This entry contains information on the structure (unicameral, bicameral, tricameral), formal name, number of seats, and term of office. *Elections* includes the nature of the election process or accession to power, date of the last election, and date of the next election. *Election results* includes the percent of vote and/or number of seats held by each party in the last election.

Life expectancy at birth This entry contains the average number of years to be lived by a group of people born in the same year, if mortality at each age remains constant in the future. The entry includes *total population* as well as the *male* and *female* components. Life expectancy at birth is also a measure of overall quality of life in a country and summarizes the mortality at all ages. It can also be thought of as indicating the potential return on investment in human capital and is necessary for the calculation of various actuarial measures.

Literacy This entry includes a *definition* of literacy and Census Bureau percentages for the *total population*, *males*, and *females*. There are no universal definitions and standards of literacy. Unless otherwise specified, all rates are based on the most common definition—the

ability to read and write at a specified age. Detailing the standards that individual countries use to assess the ability to read and write is beyond the scope of the *Factbook*. Information on literacy, while not a perfect measure of educational results, is probably the most easily available and valid for international comparisons. Low levels of literacy, and education in general, can impede the economic development of a country in the current rapidly changing, technology-driven world.

Location This entry identifies the country's regional location, neighboring countries, and adjacent bodies of water.

Major cities—population This entry provides the population of the capital and up to four major cities defined as urban agglomerations with populations of at least 750,000 people. An *urban agglomeration* is defined as comprising the city or town proper and also the suburban fringe or thickly settled territory lying outside of, but adjacent to, the boundaries of the city. For smaller countries, lacking urban centers of 750,000 or more, only the population of the capital is presented.

Major infectious diseases This entry lists major infectious diseases likely to be encountered in countries where the risk of such diseases is assessed to be very high as compared to the United States. These infectious diseases represent risks to US government personnel traveling to the specified country for a period of less than three years. The **degree of risk** is assessed by considering the foreign nature of these infectious diseases, their severity, and the probability of being affected by the diseases present. The diseases listed do not necessarily represent the total disease burden experienced by the local population. The risk to an individual traveler varies considerably by the specific location, visit duration, type of activities, type of accommodations, time of year, and other factors. Consultation with a travel medicine physician is needed to evaluate individual risk and recommend appropriate preventive measures such as vaccines.

Diseases are organized into the following six exposure categories shown in *italics* and *listed in typical descending order of risk*. Note: The sequence of exposure categories listed in individual country entries may vary according to local conditions.

food or waterborne diseases acquired through eating or drinking on the local economy:

Hepatitis A—viral disease that interferes with the functioning of the liver; spread through consumption of food or water contaminated with fecal matter, principally in areas of poor sanitation; victims exhibit fever, jaundice, and diarrhea; 15% of victims will experience prolonged symptoms over 6-9 months; vaccine available.

Hepatitis E—water-borne viral disease that interferes with the functioning of the liver; most commonly spread through fecal contamination of drinking water; victims exhibit jaundice, fatigue, abdominal pain, and dark colored urine.

Typhoid fever—bacterial disease spread through contact with food or water contaminated by fecal matter or sewage; victims exhibit sustained high fevers; left untreated, mortality rates can reach 20%.

vectorborne diseases acquired through the bite of an infected arthropod:

Malaria—caused by single-cell parasitic protozoa *Plasmodium*; transmitted to humans via the bite of the female *Anopheles* mosquito; parasites multiply in the liver attacking red blood cells resulting in cycles of fever, chills, and sweats accompanied by anemia; death due to damage to vital organs and interruption of blood supply to the brain; endemic in 100, mostly tropical, countries with 90% of cases and the majority of 1.5-2.5 million estimated annual deaths occurring in sub-Saharan Africa.

Dengue fever—mosquito-borne (*Aedes aegypti*) viral disease associated with urban environments; manifests as sudden onset of fever and severe headache; occasionally produces shock and hemorrhage leading to death in 5% of cases.

Yellow fever—mosquito-borne viral disease; severity ranges from influenza-like symptoms to severe hepatitis and hemorrhagic fever; occurs only in tropical South America and sub-Saharan Africa, where most cases are reported; fatality rate is less than 20%.

Japanese Encephalitis—mosquito-borne (*Culex tritaeniorhynchus*) viral disease associated with rural areas in Asia; acute encephalitis can progress to paralysis, coma, and death; fatality rates 30%.

African Trypanosomiasis—caused by the parasitic protozoa *Trypanosoma*; transmitted to humans via the bite of bloodsucking Tsetse flies; infection leads to malaise and irregular fevers and, in advanced cases when the parasites invade the central nervous system, coma and death; endemic in 36 countries of sub-Saharan Africa; cattle and wild animals act as reservoir hosts for the parasites.

Cutaneous Leishmaniasis—caused by the parasitic protozoa *leishmania*; transmitted to humans via the bite of sandflies; results in skin lesions that may become chronic; endemic in 88 countries; 90% of cases occur in Iran, Afghanistan, Syria, Saudi Arabia, Brazil, and Peru; wild and domesticated animals as well as humans can act as reservoirs of infection.

Plague—bacterial disease transmitted by fleas normally associated with rats; person-to-person airborne transmission also possible; recent plague epidemics occurred in areas of Asia, Africa, and South America associated with rural areas or small towns and villages; manifests as fever, headache, and painfully swollen lymph nodes; disease progresses rapidly and without antibiotic treatment leads to pneumonic form with a death rate in excess of 50%.

Crimean-Congo hemorrhagic fever—tick-borne viral disease; infection may also result from exposure to infected animal blood or tissue; geographic distribution includes Africa, Asia, the Middle East, and Eastern Europe; sudden onset of fever, headache, and muscle aches followed by hemorrhaging in the bowels, urine, nose, and gums; mortality rate is approximately 30%.

Rift Valley fever—viral disease affecting domesticated animals and humans; transmission is by mosquito and other biting insects; infection may also occur through handling of infected meat or contact with blood; geographic distribution includes eastern and southern Africa where cattle and sheep are raised; symptoms are generally mild with fever and some liver abnormalities, but the disease may progress to hemorrhagic fever, encephalitis, or ocular disease; fatality rates are low at about 1% of cases.

Chikungunya—mosquito-borne (*Aedes aegypti*) viral disease associated with urban environments, similar to Dengue Fever; characterized by sudden onset of fever, rash, and severe joint pain usually lasting 3-7 days, some cases result in persistent arthritis.

water contact diseases acquired through swimming or wading in freshwater lakes, streams, and rivers:

Leptospirosis—bacterial disease that affects animals and humans; infection occurs through contact with water, food, or soil contaminated by animal urine; symptoms include high fever, severe headache, vomiting, jaundice, and diarrhea; untreated, the disease can result in kidney damage, liver failure, meningitis, or respiratory distress; fatality rates are low but left untreated recovery can take months.

Schistosomiasis—caused by parasitic trematode flatworm *Schistosoma*; fresh water snails act as intermediate host and release larval form of parasite that penetrates the skin of people exposed to contaminated water; worms mature and reproduce in the blood vessels, liver, kidneys, and intestines releasing eggs, which become trapped in tissues triggering an immune response; may manifest as either urinary or intestinal disease resulting in decreased work or learning capacity; mortality, while generally low, may occur in advanced cases usually due to bladder cancer; endemic in 74 developing countries with 80% of infected people living in sub-Saharan Africa; humans act as the reservoir for this parasite.

aerosolized dust or soil contact disease acquired through inhalation of aerosols contaminated with rodent urine:

Lassa fever—viral disease carried by rats of the genus *Mastomys*; endemic in portions of West Africa; infection occurs through direct contact with or consumption of food contaminated by rodent urine or fecal matter containing virus particles; fatality rate can reach 50% in epidemic outbreaks.

respiratory disease acquired through close contact with an infectious person:

Meningococcal meningitis—bacterial disease causing an inflammation of the lining of the brain and spinal cord; one of the most important bacterial pathogens is *Neisseria meningitidis* because of its potential to cause epidemics; symptoms include stiff neck, high fever, headaches, and vomiting; bacteria are transmitted from person to person by respiratory droplets and facilitated

by close and prolonged contact resulting from crowded living conditions, often with a seasonal distribution; death occurs in 5-15% of cases, typically within 24-48 hours of onset of symptoms; highest burden of meningococcal disease occurs in the hyperendemic region of sub-Saharan Africa known as the "Meningitis Belt" which stretches from Senegal east to Ethiopia.

animal contact disease acquired through direct contact with local animals:

Rabies—viral disease of mammals usually transmitted through the bite of an infected animal, most commonly dogs; virus affects the central nervous system causing brain alteration and death; symptoms initially are non-specific fever and headache progressing to neurological symptoms; death occurs within days of the onset of symptoms.

Manpower available for military service This entry gives the number of males and females falling in the military age range for a country (defined as being ages 16-49) and assumes that every individual is fit to serve.

Manpower fit for military service This entry gives the number of males and females falling in the military age range for a country (defined as being ages 16-49) and who are not otherwise disqualified for health reasons; accounts for the health situation in the country and provides a more realistic estimate of the actual number fit to serve.

Manpower reaching militarily significant age annually This entry gives the number of males and females entering the military manpower pool (i.e., reaching age 16) in any given year and is a measure of the availability of military-age young adults.

Map references This entry includes the name of the *Factbook* reference map on which a country may be found. Note that boundary representations on these maps are not necessarily authoritative. The entry on **Geographic coordinates** may be helpful in finding some smaller countries.

Maritime claims This entry includes the following claims, the definitions of which are excerpted from the United Nations Convention on the Law of the Sea (UNCLOS), which alone contains the full and definitive descriptions:

territorial sea—the sovereignty of a coastal state extends beyond its land territory and internal waters to an adjacent belt of sea, described as the territorial sea in the UNCLOS (Part II); this sovereignty extends to the air space over the territorial sea as well as its underlying seabed and subsoil; every state has the right to establish the breadth of its territorial sea up to a limit not exceeding 12 nautical miles; the normal baseline for measuring the breadth of the territorial sea is the mean low-water line along the coast as marked on large-scale charts officially recognized by the coastal state; where the coasts of two states are opposite or adjacent to each other, neither state is entitled to extend its territorial sea beyond the median line, every point of which is equidistant from the nearest points on the baseline from which the territorial seas of both states are measured; the UNCLOS describes specific rules for archipelagic states.

contiguous zone—according to the UNCLOS (Article 33), this is a zone contiguous to a coastal state's territorial sea, over which it may exercise the control necessary to: prevent infringement of its customs, fiscal, immigration, or sanitary laws and regulations within its territory or territorial sea; punish infringement of the above laws and regulations committed within its territory or territorial sea; the contiguous zone may not extend beyond 24 nautical miles from the baselines from which the breadth of the territorial sea is measured (e.g., the US has claimed a 12-nautical mile contiguous zone in addition to its 12-nautical mile territorial sea); where the coasts of two states are opposite or adjacent to each other, neither state is entitled to extend its contiguous zone beyond the median line, every point of which is equidistant from the nearest points on the baseline from which the contiguous zone of both states are measured.

exclusive economic zone (EEZ)—the UNCLOS (Part V) defines the EEZ as a zone beyond and adjacent to the territorial sea in which a coastal state has: sovereign rights for the purpose of exploring and exploiting, conserving and managing the natural

resources, whether living or non-living, of the waters superjacent to the seabed and of the seabed and its subsoil, and with regard to other activities for the economic exploitation and exploration of the zone, such as the production of energy from the water, currents, and winds; jurisdiction with regard to the establishment and use of artificial islands, installations, and structures; marine scientific research; the protection and preservation of the marine environment; the outer limit of the exclusive economic zone shall not exceed 200 nautical miles from the baselines from which the breadth of the territorial sea is measured.

continental shelf—the UNCLOS (Article 76) defines the continental shelf of a coastal state as comprising the seabed and subsoil of the submarine areas that extend beyond its territorial sea throughout the natural prolongation of its land territory to the outer edge of the continental margin, or to a distance of 200 nautical miles from the baselines from which the breadth of the territorial sea is measured where the outer edge of the continental margin does not extend up to that distance; the continental margin comprises the submerged prolongation of the landmass of the coastal state, and consists of the seabed and subsoil of the shelf, the slope and the rise; wherever the continental margin extends beyond 200 nautical miles from the baseline, coastal states may extend their claim to a distance not to exceed 350 nautical miles from the baseline or 100 nautical miles from the 2,500-meter isobath, which is a line connecting points of 2,500 meters in depth; it does not include the deep ocean floor with its oceanic ridges or the subsoil thereof.

exclusive fishing zone—while this term is not used in the UNCLOS, some states (e.g., the United Kingdom) have chosen not to claim an EEZ, but rather to claim jurisdiction over the living resources off their coast; in such cases, the term exclusive fishing zone is often used; the breadth of this zone is normally the same as the EEZ or 200 nautical miles.

Market value of publicly traded shares This entry gives the value of shares issued by publicly traded companies at a price determined in the national stock markets on the final day of the period indicated. It is simply the latest price per share multiplied by the total number of outstanding shares, cumulated over all companies listed on the particular exchange.

Maternal mortality rate The maternal mortality rate (MMR) is the annual number of female deaths per 100,000 live births from any cause related to or aggravated by pregnancy or its management (excluding accidental or incidental causes). The MMR includes deaths during pregnancy, childbirth, or within 42 days of termination of pregnancy, irrespective of the duration and site of the pregnancy, for a specified year.

Median age This entry is the age that divides a population into two numerically equal groups; that is, half the people are younger than this age and half are older. It is a single index that summarizes the age distribution of a population. Currently, the median age ranges from a low of about 15 in Uganda and Gaza Strip to 40 or more in several European countries and Japan. See the entry for "Age structure" for the importance of a young versus an older age structure and, by implication, a low versus a higher median age.

Merchant marine Merchant marine may be defined as all ships engaged in the carriage of goods; or all commercial vessels (as opposed to all nonmilitary ships), which excludes tugs, fishing vessels, offshore oil rigs, etc. This entry contains information in four fields—total, ships by type, foreign-owned, and registered in other countries.

Total includes the number of ships (1,000 GRT or over), total DWT for those ships, and total GRT for those ships. DWT or dead weight tonnage is the total weight of cargo, plus bunkers, stores, etc., that a ship can carry when immersed to the appropriate load line. GRT or gross register tonnage is a figure obtained by measuring the entire sheltered volume of a ship available for cargo and passengers and converting it to tons on the basis of 100 cubic feet per ton; there is no stable relationship between GRT and DWT.

Ships by type includes a listing of barge carriers, bulk cargo ships, cargo ships, chemical tankers, combination bulk carriers, combination ore/oil carriers, container ships, liquefied gas tankers,

livestock carriers, multifunctional large-load carriers, petroleum tankers, passenger ships, passenger/cargo ships, railcar carriers, refrigerated cargo ships, roll-on/roll-off cargo ships, short-sea passenger ships, specialized tankers, and vehicle carriers.

Foreign-owned are ships that fly the flag of one country but belong to owners in another.

Registered in other countries are ships that belong to owners in one country but fly the flag of another.

Military This category includes the entries dealing with a country's military structure, manpower, and expenditures.

Military—note This entry includes miscellaneous military information of significance not included elsewhere.

Military branches This entry lists the service branches subordinate to defense ministries or the equivalent (typically ground, naval, air, and marine forces).

Military expenditures This entry gives spending on defense programs for the most recent year available as a percent of gross domestic product (GDP); the GDP is calculated on an exchange rate basis, i.e., not in terms of purchasing power parity (PPP).

Military service age and obligation This entry gives the required ages for voluntary or conscript military service and the length of service obligation.

Money figures All money figures are expressed in contemporary US dollars unless otherwise indicated.

National anthem A generally patriotic musical composition—usually in the form of a song or hymn of praise—that evokes and eulogizes the history, traditions, or struggles of a nation or its people. National anthems can be officially recognized as a national song by a country's constitution or by an enacted law, or simply by tradition. Although most anthems contain lyrics, some do not.

National holiday This entry gives the primary national day of celebration—usually independence day.

National symbol(s) A national symbol is a faunal, floral, or other abstract representation—or some distinctive object—that over time has come to be closely identified with a country or entity. Not all countries have national symbols; a few countries have more than one.

Nationality This entry provides the identifying terms for citizens—noun and adjective.

Natural gas—consumption This entry is the total natural gas consumed in cubic meters (cu m). The discrepancy between the amount of natural gas produced and/or imported and the amount consumed and/or exported is due to the omission of stock changes and other complicating factors.

Natural gas—exports This entry is the total natural gas exported in cubic meters (cu m).

Natural gas—imports This entry is the total natural gas imported in cubic meters (cu m).

Natural gas—production This entry is the total natural gas produced in cubic meters (cu m). The discrepancy between the amount of natural gas produced and/or imported and the amount consumed and/or exported is due to the omission of stock changes and other complicating factors.

Natural gas—proved reserves This entry is the stock of proved reserves of natural gas in cubic meters (cu m). Proved reserves are those quantities of natural gas, which, by analysis of geological and engineering data, can be estimated with a high degree of confidence to be commercially recoverable from a given date forward, from known reservoirs and under current economic conditions.

Natural hazards This entry lists potential natural disasters. For countries where volcanic activity is common, a *volcanism* sub-field highlights historically active volcanoes.

Natural resources This entry lists a country's mineral, petroleum, hydropower, and other resources of commercial importance, such as rare earth elements (REEs).

Net migration rate This entry includes the figure for the difference between the number of persons entering and leaving a country during the year per 1,000 persons (based on midyear

population). An excess of persons entering the country is referred to as net immigration (e.g., 3.56 migrants/1,000 population); an excess of persons leaving the country as net emigration (e.g., -9.26 migrants/1,000 population). The net migration rate indicates the contribution of migration to the overall level of population change. The net migration rate does not distinguish between economic migrants, refugees, and other types of migrants nor does it distinguish between lawful migrants and undocumented migrants.

Obesity—adult prevalence rate This entry gives the percent of a country's population considered to be obese. Obesity is defined as an adult having a Body Mass Index (BMI) greater to or equal to 30.0. BMI is calculated by taking a person's weight in kg and dividing it by the person's squared height in meters.

Oil—consumption This entry is the total oil consumed in barrels per day (bbl/day). The discrepancy between the amount of oil produced and/or imported and the amount consumed and/or exported is due to the omission of stock changes, refinery gains, and other complicating factors.

Oil—exports This entry is the total oil exported in barrels per day (bbl/day), including both crude oil and oil products.

Oil—imports This entry is the total oil imported in barrels per day (bbl/day), including both crude oil and oil products.

Oil—production This entry is the total oil produced in barrels per day (bbl/day). The discrepancy between the amount of oil produced and/or imported and the amount consumed and/or exported is due to the omission of stock changes, refinery gains, and other complicating factors.

Oil—proved reserves This entry is the stock of proved reserves of crude oil in barrels (bbl). Proved reserves are those quantities of petroleum which, by analysis of geological and engineering data, can be estimated with a high degree of confidence to be commercially recoverable from a given date forward, from known reservoirs and under current economic conditions.

People—note This entry includes miscellaneous demographic information of significance not included elsewhere.

People and Society This category includes entries dealing with national identity (including ethnicities, languages, and religions), demography (a variety of population statistics) and societal characteristics (health and education indicators).

Personal Names—Capitalization The *Factbook* capitalizes the surname or family name of individuals for the convenience of our users who are faced with a world of different cultures and naming conventions. The need for capitalization, bold type, underlining, italics, or some other indicator of the individual's surname is apparent in the following examples: MAO Zedong, Fidel CASTRO Ruz, George W. BUSH, and TUNKU SALAHUDDIN Abdul Aziz Shah ibni Al-Marhum Sultan Hisamuddin Alam Shah. By knowing the surname, a short form without all capital letters can be used with confidence as in President Castro, Chairman Mao, President Bush, or Sultan Tunku Salahuddin. The same system of capitalization is extended to the names of leaders with surnames that are not commonly used such as Queen ELIZABETH II. For Vietnamese names, the given name is capitalized because officials are referred to by their given name rather than by their surname. For example, the president of Vietnam is Tran Duc LUONG. His surname is Tran, but he is referred to by his given name—President LUONG.

Personal Names—Spelling The romanization of personal names in the *Factbook* normally follows the same transliteration system used by the US Board on Geographic Names for spelling place names. At times, however, a foreign leader expressly indicates a preference for, or the media or official documents regularly use, a romanized spelling that differs from the transliteration derived from the US Government standard. In such cases, the *Factbook* uses the alternative spelling.

Personal Names—Titles The *Factbook* capitalizes any valid title (or short form of it) immediately preceding a person's name. A title standing alone is not capitalized. Examples: President PUTIN and President OBAMA are chiefs of state. In Russia, the president is chief of state and the premier is the head of the government, while in the US, the president is both chief of state and head of government.

Petroleum See entries under Oil.

Petroleum products See entries under Oil.

Physicians density This entry gives the number of medical doctors (physicians), including generalist and specialist medical practitioners, per 1,000 of the population. Medical doctors are defined as doctors that study, diagnose, treat, and prevent illness, disease, injury, and other physical and mental impairments in humans through the application of modern medicine. They also plan, supervise, and evaluate care and treatment plans by other health care providers. The World Health Organization estimates that fewer than 2.3 health workers (physicians, nurses, and midwives only) per 1,000 would be insufficient to achieve coverage of primary healthcare needs.

Pipelines This entry gives the lengths and types of pipelines for transporting products like natural gas, crude oil, or petroleum products.

Piracy Piracy is defined by the 1982 United Nations Convention on the Law of the Sea as any illegal act of violence, detention, or depredation directed against a ship, aircraft, persons, or property in a place outside the jurisdiction of any State. Such criminal acts committed in the territorial waters of a littoral state are generally considered to be armed robbery against ships. Information on piracy may be found, where applicable, in the **Transportation—note**.

Political parties and leaders This entry includes a listing of significant political organizations and their leaders.

Political pressure groups and leaders This entry includes a listing of a country's political, social, labor, or religious organizations that are involved in politics, or that exert political pressure, but whose leaders do not stand for legislative election. International movements or organizations are generally not listed.

Population This entry gives an estimate from the US Bureau of the Census based on statistics from population censuses, vital statistics registration systems, or sample surveys pertaining to the recent past and on assumptions about future trends. The total population presents one overall measure of the potential impact of the country on the world and within its region. Note: Starting with the 1993 *Factbook*, demographic estimates for some countries (mostly African) have explicitly taken into account the effects of the growing impact of the HIV/AIDS epidemic. These countries are currently: The Bahamas, Benin, Botswana, Brazil, Burkina Faso, Burma, Burundi, Cambodia, Cameroon, Central African Republic, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Ethiopia, Gabon, Ghana, Guyana, Haiti, Honduras, Kenya, Lesotho, Malawi, Mozambique, Namibia, Nigeria, Rwanda, South Africa, Swaziland, Tanzania, Thailand, Togo, Uganda, Zambia, and Zimbabwe.

Population below poverty line National estimates of the percentage of the population falling below the poverty line are based on surveys of sub-groups, with the results weighted by the number of people in each group. Definitions of poverty vary considerably among nations. For example, rich nations generally employ more generous standards of poverty than poor nations.

Population growth rate The average annual percent change in the population, resulting from a surplus (or deficit) of births over deaths and the balance of migrants entering and leaving a country. The rate may be positive or negative. The growth rate is a factor in determining how great a burden would be imposed on a country by the changing needs of its people for infrastructure (e.g., schools, hospitals, housing, roads), resources (e.g., food, water, electricity), and jobs. Rapid population growth can be seen as threatening by neighboring countries.

Ports and terminals This entry lists major ports and terminals primarily on the basis of the amount of cargo tonnage shipped through the facilities on an annual basis. In some instances, the number of containers handled or ship visits were also considered.

Public debt This entry records the cumulative total of all government borrowings less repayments that are denominated in a country's home currency. Public debt should not be confused with external debt, which reflects the foreign currency liabilities of both the private and public sector and must be financed out of foreign exchange earnings.

Railways This entry states the *total* route length of the railway network and of its component parts by gauge, which is the measure of the distance between the inner sides of the load-bearing rails. The four typical types of gauges are: *broad, standard, narrow, and dual*. Other gauges are listed under *note*. Some 60% of the world's railways use the standard gauge of 1.4 m (4.7 ft). Gauges vary by country and sometimes within countries. The choice of gauge during initial construction was mainly in response to local conditions and the intent of the builder. Narrow-gauge railways were cheaper to build and could negotiate sharper curves, broad-gauge railways gave greater stability and permitted higher speeds. Standard-gauge railways were a compromise between narrow and broad gauges.

Rare earth elements Rare earth elements or REEs are 17 chemical elements that are critical in many of today's high-tech industries. They include lanthanum, cerium, praseodymium, neodymium, promethium, samarium, europium, gadolinium, terbium, dysprosium, holmium, erbium, thulium, ytterbium, lutetium, scandium, and yttrium. Typical applications for REEs include batteries in hybrid cars, fiber optic cables, flat panel displays, and permanent magnets, as well as some defense and medical products.

Reference maps This section includes world and regional maps.

Refugees and internally displaced persons This entry includes those persons residing in a country as *refugees* or internally displaced persons (IDPs). The definition of a refugee according to a United Nations Convention is "a person who is outside his/her country of nationality or habitual residence; has a well-founded fear of persecution because of his/her race, religion, nationality, membership in a particular social group or political opinion; and is unable or unwilling to avail himself/herself of the protection of that country, or to return there, for fear of persecution." The UN established the Office of the UN High Commissioner for Refugees (UNHCR) in 1950 to handle refugee matters worldwide. The UN Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) has a different operational definition for a Palestinian refugee: "a person whose normal place of residence was Palestine during the period 1 June 1946 to 15 May 1948 and who lost both home and means of livelihood as a result of the 1948 conflict." However, UNHCR also assists some 400,000 Palestinian refugees not covered under the UNRWA definition. The term "internally displaced person" is not specifically covered in the UN Convention; it is used to describe people who have fled their homes for reasons similar to refugees, but who remain within their own national territory and are subject to the laws of that state.

Religions This entry is an ordered listing of religions by adherents starting with the largest group and sometimes includes the percent of total population. The core characteristics and beliefs of the world's major religions are described below.

Baha'i—Founded by Mirza Husayn-Ali (known as Baha'u'llah) in Iran in 1852, Baha'i faith emphasizes monotheism and believes in one eternal transcendent God. Its guiding focus is to encourage the unity of all peoples on the earth so that justice and peace may be achieved on earth. Baha'i revelation contends the prophets of major world religions reflect some truth or element of the divine, believes all were manifestations of God given to specific communities in specific times, and that Baha'u'llah is an additional prophet meant to call all humankind. Bahais are an open community, located worldwide, with the greatest concentration of believers in South Asia.

Buddhism—Religion or philosophy inspired by the 5th century B.C. teachings of Siddhartha Gautama (also known as Gautama Buddha "the enlightened one"). Buddhism focuses on the goal of spiritual enlightenment centered on an understanding of Gautama Buddha's Four Noble Truths on the nature of suffering, and on the Eightfold Path of spiritual and moral practice, to break the cycle of suffering of which we are a part. Buddhism ascribes to a karmic system of rebirth. Several schools and sects of Buddhism exist, differing often on the nature of the Buddha, the extent to which enlightenment can be achieved—for one or for all, and by whom—religious orders or laity.

Basic Groupings

Theravada Buddhism: The oldest Buddhist school, Theravada is practiced mostly in Sri Lanka, Cambodia, Laos, Burma, and Thailand, with minority representation elsewhere in Asia and the West. Theravadans follow the Pali Canon of Buddha's teachings, and believe that one may escape the cycle of rebirth, worldly attachment, and suffering for oneself; this process may take one or several lifetimes.

Mahayana Buddhism, including subsets Zen and Tibetan (Lamaistic) Buddhism: Forms of Mahayana Buddhism are common in East Asia and Tibet, and parts of the West. Mahayanas have additional scriptures beyond the Pali Canon and believe the Buddha is eternal and still teaching. Unlike Theravada Buddhism, Mahayana schools maintain the Buddha-nature is present in all beings and all will ultimately achieve enlightenment. **Hoa Hao**: a minority tradition of Buddhism practiced in Vietnam that stresses lay participation, primarily by peasant farmers; it eschews expensive ceremonies and temples and relocates the primary practices into the home.

Christianity—Descending from Judaism, Christianity's central belief maintains Jesus of Nazareth is the promised messiah of the Hebrew Scriptures, and that his life, death, and resurrection are salvific for the world. Christianity is one of the three monotheistic Abrahamic faiths, along with Islam and Judaism, which traces its spiritual lineage to Abraham of the Hebrew Scriptures. Its sacred texts include the Hebrew Bible and the New Testament (or the Christian Gospels).

Basic Groupings

Catholicism (or Roman Catholicism): This is the oldest established western Christian church and the world's largest single religious body. It is supranational, and recognizes a hierarchical structure with the Pope, or Bishop of Rome, as its head, located at the Vatican. Catholics believe the Pope is the divinely ordered head of the Church from a direct spiritual legacy of Jesus' apostle Peter. Catholicism is comprised of 23 particular Churches, or Rites—one Western (Roman or Latin-Rite) and 22 Eastern. The Latin Rite is by far the largest, making up about 98% of Catholic membership. Eastern-Rite Churches, such as the Maronite Church and the Ukrainian Catholic Church, are in communion with Rome although they preserve their own worship traditions and their immediate hierarchy consists of clergy within their own rite. The Catholic Church has a comprehensive theological and moral doctrine specified for believers in its catechism, which makes it unique among most forms of Christianity.

Mormonism (including the Church of Jesus Christ of Latter-Day Saints): Originating in 1830 in the United States under Joseph Smith, Mormonism is not characterized as a form of Protestant Christianity because it claims additional revealed Christian scriptures after the Hebrew Bible and New Testament. The Book of Mormon maintains there was an appearance of Jesus in the New World following the Christian account of his resurrection, and that the Americas are uniquely blessed continents. Mormonism believes earlier Christian traditions, such as the Roman Catholic, Orthodox, and Protestant reform faiths, are apostasies and that Joseph Smith's revelation of the Book of Mormon is a restoration of true Christianity. Mormons have a hierarchical religious leadership structure, and actively proselytize their faith; they are located primarily in the Americas and in a number of other Western countries.

Jehovah's Witnesses structure their faith on the Christian Bible, but their rejection of the Trinity is distinct from mainstream Christianity. They believe that a Kingdom of God, the Theocracy, will emerge following Armageddon and usher in a new earthly society. Adherents are required to evangelize and to follow a strict moral code.

Orthodox Christianity: The oldest established eastern form of Christianity, the Holy Orthodox Church, has a ceremonial head in the Bishop of Constantinople (Istanbul), also known as a Patriarch, but its various regional forms (e.g., Greek Orthodox, Russian Orthodox, Serbian Orthodox, Ukrainian Orthodox) are autocephalous (independent of Constantinople's authority, and have their own Patriarchs). Orthodox churches are highly nationalist and ethnic. The Orthodox Christian faith shares many theological tenets with the Roman Catholic Church, but

diverges on some key premises and does not recognize the governing authority of the Pope.

Protestant Christianity: Protestant Christianity originated in the 16th century as an attempt to reform Roman Catholicism's practices, dogma, and theology. It encompasses several forms or denominations which are extremely varied in structure, beliefs, relationship to state, clergy, and governance. Many protestant theologies emphasize the primary role of scripture in their faith, advocating individual interpretation of Christian texts without the mediation of a final religious authority such as the Roman Pope. The oldest Protestant Christianities include Lutheranism, Calvinism (Presbyterians), and Anglican Christianity (Episcopalians), which have established liturgies, governing structure, and formal clergy. Other variants on Protestant Christianity, including Pentecostal movements and independent churches, may lack one or more of these elements, and their leadership and beliefs are individualized and dynamic.

Hinduism—Originating in the Vedic civilization of India (second and first millennium B.C.), Hinduism is an extremely diverse set of beliefs and practices with no single founder or religious authority. Hinduism has many scriptures; the Vedas, the Upanishads, and the Bhagavad-Gita are among some of the most important. Hindus may worship one or many deities, usually with prayer rituals within their own home. The most common figures of devotion are the gods Vishnu, Shiva, and a mother goddess, Devi. Most Hindus believe the soul, *atman*, is eternal, and goes through a cycle of birth, death, and rebirth (*samsara*) determined by one's positive or negative karma, or the consequences of one's actions. The goal of religious life is to learn to act so as to finally achieve liberation (*moksha*) of one's soul, escaping the rebirth cycle.

Islam—The third of the monotheistic Abrahamic faiths, Islam originated with the teachings of Muhammad in the 7th century. Muslims believe Muhammad is the final of all religious prophets (beginning with Abraham) and that the Qu'ran, which is the Islamic scripture, was revealed to him by God. Islam derives from the word submission, and obedience to God is a primary theme in this religion. In order to live an Islamic life, believers must follow the five pillars, or tenets, of Islam, which are the testimony of faith (*shahada*), daily prayer (*salah*), giving alms (*zakah*), fasting during Ramadan (*sawm*), and the pilgrimage to Mecca (*hajj*). *Basic Groupings*

The two primary branches of Islam are Sunni and Shia, which split from each other over a religio-political leadership dispute about the rightful successor to Muhammad. The Shia believe Muhammad's cousin and son-in-law, Ali, was the only divinely ordained Imam (religious leader), while the Sunni maintain the first three caliphs after Muhammad were also legitimate authorities. In modern Islam, Sunnis and Shia continue to have different views of acceptable schools of Islamic jurisprudence, and who is a proper Islamic religious authority. Islam also has an active mystical branch, Sufism, with various Sunni and Shia subsets.

Sunni Islam accounts for over 75% of the world's Muslim population. It recognizes the Abu Bakr as the first caliph after Muhammad. Sunni has four schools of Islamic doctrine and law—Hanafi, Maliki, Shafi'i, and Hanbali—which uniquely interpret the *Hadith*, or recorded oral traditions of Muhammad. A Sunni Muslim may elect to follow any one of these schools, as all are considered equally valid.

Shia Islam represents 10-20% of Muslims worldwide, and its distinguishing feature is its reverence for Ali as an infallible, divinely inspired leader, and as the first Imam of the Muslim community after Muhammad. A majority of Shia are known as "Twelvers," because they believe that the 11 familial successor imams after Muhammad culminate in a 12th Imam (al-Mahdi) who is hidden in the world and will reappear at its end to redeem the righteous.

Variants

Ismaili faith: A sect of Shia Islam, its adherents are also known as "Sevensers," because they believe that the rightful seventh Imam in Islamic leadership was Isma'il, the elder son of Imam Jafar al-Sadiq. Ismaili tradition awaits the return of the seventh

Imam as the Mahdi, or Islamic messianic figure. Ismailis are located in various parts of the world, particularly South Asia and the Levant.

Alawi faith: Another Shia sect of Islam, the name reflects followers' devotion to the religious authority of Ali. Alawites are a closed, secretive religious group who assert they are Shia Muslims, although outside scholars speculate their beliefs may have a syncretic mix with other faiths originating in the Middle East. Alawis live mostly in Syria, Lebanon, and Turkey.

Druze faith: A highly secretive tradition and a closed community that derives from the Ismaili sect of Islam; its core beliefs are thought to emphasize a combination of Gnostic principles believing that the Fatimid caliph, al-Hakin, is the one who embodies the key aspects of goodness of the universe, which are, the intellect, the word, the soul, the preponderant, and the follower. The Druze have a key presence in Syria, Lebanon, and Israel.

Jainism—Originating in India, Jain spiritual philosophy believes in an eternal human soul, the eternal universe, and a principle of "the own nature of things." It emphasizes compassion for all living things, seeks liberation of the human soul from reincarnation through enlightenment, and values personal responsibility due to the belief in the immediate consequences of one's behavior. Jain philosophy teaches non-violence and prescribes vegetarianism for monks and laity alike; its adherents are a highly influential religious minority in Indian society.

Judaism—One of the first known monotheistic religions, likely dating to between 2000-1500 B.C., Judaism is the native faith of the Jewish people, based upon the belief in a covenant of responsibility between a sole omnipotent creator God and Abraham, the patriarch of Judaism's Hebrew Bible, or *Tanakh*. Divine revelation of principles and prohibitions in the Hebrew Scriptures form the basis of Jewish law, or *halakhah*, which is a key component of the faith. While there are extensive traditions of Jewish halakhic and theological discourse, there is no final dogmatic authority in the tradition. Local communities have their own religious leadership. Modern Judaism has three basic categories of faith: Orthodox, Conservative, and Reform/Liberal. These differ in their views and observance of Jewish law, with the Orthodox representing the most traditional practice, and Reform/Liberal communities the most accommodating of individualized interpretations of Jewish identity and faith.

Shintoism—A native animist tradition of Japan, Shinto practice is based upon the premise that every being and object has its own spirit or *kami*. Shinto practitioners worship several particular *kamis*, including the *kamis* of nature, and families often have shrines to their ancestors' *kamis*. Shintoism has no fixed tradition of prayers or prescribed dogma, but is characterized by individual ritual. Respect for the *kamis* in nature is a key Shinto value. Prior to the end of World War II, Shinto was the state religion of Japan, and bolstered the cult of the Japanese emperor.

Sikhism—Founded by the Guru Nanak (born 1469), Sikhism believes in a non-anthropomorphic, supreme, eternal, creator God; centering one's devotion to God is seen as a means of escaping the cycle of rebirth. Sikhs follow the teachings of Nanak and nine subsequent gurus. Their scripture, the *Guru Granth Sahib*—also known as the *Adi Granth*—is considered the living Guru, or final authority of Sikh faith and theology. Sikhism emphasizes equality of humankind and disavows caste, class, or gender discrimination.

Taoism—Chinese philosophy or religion based upon Lao Tzu's *Tao Te Ching*, which centers on belief in the Tao, or the way, as the flow of the universe and the nature of things. Taoism encourages a principle of non-force, or *wu-wei*, as the means to live harmoniously with the Tao. Taoists believe the esoteric world is made up of a perfect harmonious balance and nature, while in the manifest world—particularly in the body—balance is distorted. The Three Jewels of the Tao—compassion, simplicity, and humility—serve as the basis for Taoist ethics.

Zoroastrianism—Originating from the teachings of Zoroaster in about the 9th or 10th century B.C., Zoroastrianism may be the oldest continuing creedal religion. Its key beliefs center on a transcendent creator God, Ahura Mazda, and the concept of free will. The key ethical tenets of Zoroastrianism expressed in its

scripture, the Avesta, are based on a dualistic worldview where one may prevent chaos if one chooses to serve God and exercises good thoughts, good words, and good deeds. Zoroastrianism is generally a closed religion and members are almost always born to Zoroastrian parents. Prior to the spread of Islam, Zoroastrianism dominated greater Iran. Today, though a minority, Zoroastrians remain primarily in Iran, India (where they are known as Parsi), and Pakistan.

Traditional beliefs

Animism: the belief that non-human entities contain souls or spirits.

Badimo: a form of ancestor worship of the Tswana people of Botswana.

Confucianism: an ideology that humans are perfectible through self-cultivation and self-creation; developed from teachings of the Chinese philosopher Confucius. Confucianism has strongly influenced the culture and beliefs of East Asian countries, including China, Japan, Korea, Singapore, Taiwan, and Vietnam.

Inuit beliefs are a form of shamanism (see below) based on animistic principles of the Inuit or Eskimo peoples.

Kirant: the belief system of the Kirat, a people who live mainly in the Himalayas of Nepal. It is primarily a form of polytheistic shamanism, but includes elements of animism and ancestor worship.

Pagan is a blanket term used to describe many unconnected belief practices throughout history, usually in reference to religions outside of the Abrahamic category (monotheistic faiths like Judaism, Christianity, and Islam).

Shamanism: beliefs and practices promoting communication with the spiritual world. Shamanistic beliefs are organized around a shaman or medicine man who—as an intermediary between the human and spirit world—is believed to be able to heal the sick (by healing their souls), communicate with the spirit world, and help souls into the afterlife through the practice of entering a trance. In shaman-based religions, the shaman is also responsible for leading sacred rites.

Spiritualism: the belief that souls and spirits communicate with the living usually through intermediaries called mediums.

Syncretic (fusion of diverse religious beliefs and practices)

Santería: practiced in Cuba, the merging of the Yoruba religion of Nigeria with Roman Catholicism and native Indian traditions. Its practitioners believe that each person has a destiny and eventually transcends to merge with the divine creator and source of all energy, Olorun.

Voodoo/Vodun: a form of spirit and ancestor worship combined with some Christian faiths, especially Catholicism. Haitian and Louisiana Voodoo, which have included more Catholic practices, are separate from West African Vodun, which has retained a focus on spirit worship.

Cao Dai: a nationalistic Vietnamese sect, officially established in 1926, that draws practices and precepts from Confucianism, Taoism, Buddhism, and Catholicism.

Rastafarian: an afro-centrist ideology and movement based on Christianity that arose in Jamaica in the 1930s; it believes that Haile Selassie I, Emperor of Ethiopia from 1930-74, was the incarnation of the second coming of Jesus.

Kimbanguist: a puritan form of the Baptist denomination founded by Simon Kimbangu in the 1920s in what is now the Democratic Republic of Congo. Adherents believe that salvation comes through Jesus' death and resurrection, like Christianity, but additionally that living a spiritually pure life following strict codes of conduct is required for salvation.

Modekngai: a hybrid of Christianity and ancient Palauan culture and oral traditions founded around 1915 on the island of Babeldaob. Adherents simultaneously worship Jesus Christ and Palauan goddesses.

Chondogyo: or the religion of the Heavenly Way, is based on Korean shamanism, Buddhism, and Korean folk traditions, with some elements drawn from Christianity. Formulated in the 1860s, it holds that God lives in all of us and strives to convert society into a paradise on earth, populated by believers transformed into intelligent moral beings with a high social conscience.

Non-religious

Agnosticism: the belief that most things are unknowable. In regard to religion it is usually characterized as neither a belief nor non belief in a deity.

Atheism: the belief that there are no deities of any kind.

Reserves of foreign exchange and gold This entry gives the dollar value for the stock of all financial assets that are available to the central monetary authority for use in meeting a country's balance of payments needs as of the end-date of the period specified. This category includes not only foreign currency and gold, but also a country's holdings of Special Drawing Rights in the International Monetary Fund, and its reserve position in the Fund.

Roadways This entry gives the *total* length of the road network and includes the length of the *paved* and *unpaved* portions.

Sanitation facility access This entry provides information about access to improved or unimproved sanitation facilities available to segments of the population of a country: *improved* sanitation—use of any of the following facilities: flush or pour-flush to a piped sewer system, septic tank or pit latrine; ventilated improved pit (VIP) latrine; pit latrine with slab; or a composting toilet. *unimproved* sanitation—use of any of the following facilities: flush or pour-flush not piped to a sewer system, septic tank or pit latrine; pit latrine without a slab or open pit; bucket; hanging toilet or hanging latrine; shared facilities of any type; no facilities; or bush or field.

School life expectancy (primary to tertiary education) School life expectancy (SLE) is the total number of years of schooling (primary to tertiary) that a child can expect to receive, assuming that the probability of his or her being enrolled in school at any particular future age is equal to the current enrollment ratio at that age. Caution must be maintained when utilizing this indicator in international comparisons. For example, a year or grade completed in one country is not necessarily the same in terms of educational content or quality as a year or grade completed in another country. SLE represents the expected number of years of schooling that will be completed, including years spent repeating one or more grades.

Sex ratio This entry includes the number of males for each female in five age groups—at birth, under 15 years, 15-64 years, 65 years and over, and for the *total population*. Sex ratio at birth has recently emerged as an indicator of certain kinds of sex discrimination in some countries. For instance, high sex ratios at birth in some Asian countries are now attributed to sex-selective abortion and infanticide due to a strong preference for sons. This will affect future marriage patterns and fertility patterns. Eventually, it could cause unrest among young adult males who are unable to find partners.

Stock of broad money This entry covers all of "Narrow money," plus the total quantity of time and savings deposits, credit union deposits, institutional money market funds, short-term repurchase agreements between the central bank and commercial deposit banks, and other large liquid assets held by nonbank financial institutions, state and local governments, nonfinancial public enterprises, and the private sector of the economy. National currency units have been converted to US dollars at the closing exchange rate for the date of the information. Because of exchange rate movements, changes in money stocks measured in national currency units may vary significantly from those shown in US dollars, and caution is urged when making comparisons over time in US dollars. In addition to serving as a medium of exchange, broad money includes assets that are slightly less liquid than narrow money and the assets tend to function as a "store of value"—a means of holding wealth.

Stock of direct foreign investment—abroad This entry gives the cumulative US dollar value of all investments in foreign countries made directly by residents—primarily companies—of the home country, as of the end of the time period indicated. Direct investment excludes investment through purchase of shares.

Stock of direct foreign investment—at home This entry gives the cumulative US dollar value of all investments in the home country made directly by residents—primarily companies—of other countries as of the end of the time period indicated. Direct investment excludes investment through purchase of shares.

Stock of domestic credit This entry is the total quantity of credit, denominated in the domestic currency, provided by financial institutions to the central bank, state and local governments, public non-financial corporations, and the private sector. The national currency units have been converted to US dollars at the closing exchange rate on the date of the information.

Stock of narrow money This entry, also known as "M1," comprises the total quantity of currency in circulation (notes and coins) plus demand deposits denominated in the national currency held by nonbank financial institutions, state and local governments, nonfinancial public enterprises, and the private sector of the economy, measured at a specific point in time. National currency units have been converted to US dollars at the closing exchange rate for the date of the information. Because of exchange rate movements, changes in money stocks measured in national currency units may vary significantly from those shown in US dollars, and caution is urged when making comparisons over time in US dollars. Narrow money consists of more liquid assets than broad money and the assets generally function as a "medium of exchange" for an economy.

Suffrage This entry gives the age at enfranchisement and whether the right to vote is universal or restricted.

Taxes and other revenues This entry records total taxes and other revenues received by the national government during the time period indicated, expressed as a percent of GDP. Taxes include personal and corporate income taxes, value added taxes, excise taxes, and tariffs. Other revenues include social contributions—such as payments for social security and hospital insurance—grants, and net revenues from public enterprises. Normalizing the data, by dividing total revenues by GDP, enables easy comparisons across countries, and provides an average rate at which all income (GDP) is paid to the national level government for the supply of public goods and services.

Telephone numbers All telephone numbers in *The World Factbook* consist of the country code in brackets, the city or area code (where required) in parentheses, and the local number. The one component that is not presented is the international access code, which varies from country to country. For example, an international direct dial telephone call placed from the US to Madrid, Spain, would be as follows: 011 [34] (1) 577-xxxx, where 011 is the international access code for station-to-station calls; 01 is for calls other than station-to-station calls, [34] is the country code for Spain, (1) is the city code for Madrid, 577 is the local exchange, and xxxx is the local telephone number. An international direct dial telephone call placed from another country to the US would be as follows: international access code + [1] (202) 939-xxxx, where [1] is the country code for the US, (202) is the area code for Washington, DC, 939 is the local exchange, and xxxx is the local telephone number.

Telephone system This entry includes a brief general assessment of the system with details on the domestic and international components. The following terms and abbreviations are used throughout the entry:

Arabsat—Arab Satellite Communications Organization (Riyadh, Saudi Arabia).

Autodin—Automatic Digital Network (US Department of Defense).

CB—citizen's band mobile radio communications.

Cellular telephone system—the telephones in this system are radio transceivers, with each instrument having its own private radio frequency and sufficient radiated power to reach the booster station in its area (cell), from which the telephone signal is fed to a telephone exchange.

Central American Microwave System—a trunk microwave radio relay system that links the countries of Central America and Mexico with each other.

Coaxial cable—a multichannel communication cable consisting of a central conducting wire, surrounded by and insulated from a cylindrical conducting shell; a large number of telephone channels can be made available within the insulated space by the use of a large number of carrier frequencies.

Comsat—Communications Satellite Corporation (US).

DSN—Defense Switched Network (formerly Automatic Voice Network or Autovon); basic general-purpose, switched voice network of the Defense Communications System (US Department of Defense).

Eutelsat—European Telecommunications Satellite Organization (Paris).

Fiber-optic cable—a multichannel communications cable using a thread of optical glass fibers as a transmission medium in which the signal (voice, video, etc.) is in the form of a coded pulse of light.

GSM—a global system for mobile (cellular) communications devised by the Groupe Special Mobile of the pan-European standardization organization, Conference Europeenne des Posts et Telecommunications (CEPT) in 1982.

HF—high frequency; any radio frequency in the 3,000- to 30,000-kHz range.

Inmarsat—International Maritime Satellite Organization (London); provider of global mobile satellite communications for commercial, distress, and safety applications at sea, in the air, and on land.

Intelsat—International Telecommunications Satellite Organization (Washington, DC).

Intersputnik—International Organization of Space Communications (Moscow); first established in the former Soviet Union and the East European countries, it is now marketing its services worldwide with earth stations in North America, Africa, and East Asia.

Landline—communication wire or cable of any sort that is installed on poles or buried in the ground.

Marecs—Maritime European Communications Satellite used in the Inmarsat system on lease from the European Space Agency.

Marisat—satellites of the Comsat Corporation that participate in the Inmarsat system.

Medarabtel—the Middle East Telecommunications Project of the International Telecommunications Union (ITU) providing a modern telecommunications network, primarily by microwave radio relay, linking Algeria, Djibouti, Egypt, Jordan, Libya, Morocco, Saudi Arabia, Somalia, Sudan, Syria, Tunisia, and Yemen; it was initially started in Morocco in 1970 by the Arab Telecommunications Union (ATU) and was known at that time as the Middle East Mediterranean Telecommunications Network.

Microwave radio relay—transmission of long distance telephone calls and television programs by highly directional radio microwaves that are received and sent on from one booster station to another on an optical path.

NMT—Nordic Mobile Telephone; an analog cellular telephone system that was developed jointly by the national telecommunications authorities of the Nordic countries (Denmark, Finland, Iceland, Norway, and Sweden).

Orbita—a Russian television service; also the trade name of a packet-switched digital telephone network.

Radiotelephone communications—the two-way transmission and reception of sounds by broadcast radio on authorized frequencies using telephone handsets.

PanAmSat—PanAmSat Corporation (Greenwich, CT).

SAFE—South African Far East Cable

Satellite communication system—a communication system consisting of two or more earth stations and at least one satellite that provide long distance transmission of voice, data, and television; the system usually serves as a trunk connection between telephone exchanges; if the earth stations are in the same country, it is a domestic system.

Satellite earth station—a communications facility with a microwave radio transmitting and receiving antenna and required receiving and transmitting equipment for communicating with satellites.

Satellite link—a radio connection between a satellite and an earth station permitting communication between them, either one-way (down link from satellite to earth station—television receive-only transmission) or two-way (telephone channels).

SHF—super high frequency; any radio frequency in the 3,000- to 30,000-MHz range.

Shortwave—radio frequencies (from 1.605 to 30 MHz) that fall above the commercial broadcast band and are used for communication over long distances.

Solidaridad—geosynchronous satellites in Mexico's system of international telecommunications in the Western Hemisphere.

Stasionar—Russia's geostationary system for satellite telecommunications.

Submarine cable—a cable designed for service under water.

TAT—Trans-Atlantic Telephone; any of a number of high-capacity submarine coaxial telephone cables linking Europe with North America.

Telex—facsimile service between subscriber stations via the public switched telephone network or the international Datel network.

Telegraph—a telecommunications system designed for unmodulated electric impulse transmission.

Telex—a communication service involving teletypewriters connected by wire through automatic exchanges.

Tropospheric scatter—a form of microwave radio transmission in which the troposphere is used to scatter and reflect a fraction of the incident radio waves back to earth; powerful, highly directional antennas are used to transmit and receive the microwave signals; reliable over-the-horizon communications are realized for distances up to 600 miles in a single hop; additional hops can extend the range of this system for very long distances.

Trunk network—a network of switching centers, connected by multichannel trunk lines.

UHF—ultra high frequency; any radio frequency in the 300- to 3,000-MHz range.

VHF—very high frequency; any radio frequency in the 30- to 300-MHz range.

Telephones—main lines in use This entry gives the total number of main telephone lines in use.

Telephones—mobile cellular This entry gives the total number of mobile cellular telephone subscribers.

Terminology Due to the highly structured nature of the *Factbook* database, some collective generic terms have to be used. For example, the word **Country** in the **Country name** entry refers to a wide variety of dependencies, areas of special sovereignty, uninhabited islands, and other entities in addition to the traditional countries or independent states. **Military** is also used as an umbrella term for various civil defense, security, and defense activities in many entries. The **Independence** entry includes the usual colonial independence dates and former ruling states as well as other significant nationhood dates such as the traditional founding date or the date of unification, federation, confederation, establishment, or state succession that are not strictly independence dates. Dependent areas have the nature of their dependency status noted in this same entry.

Terrain This entry contains a brief description of the topography.

Time difference This entry is expressed in *The World Factbook* in two ways. First, it is stated as the difference in hours between the capital of an entity and **Coordinated Universal Time (UTC)** during Standard Time. Additionally, the difference in time between the capital of an entity and that observed in Washington, D.C. is also provided. Note that the time difference assumes both locations are simultaneously observing Standard Time or Daylight Saving Time.

Time zones Ten countries (Australia, Brazil, Canada, Indonesia, Kazakhstan, Mexico, New Zealand, Russia, Spain, and the United States) and the island of Greenland observe more than one official time depending on the number of designated time zones within their boundaries. An illustration of time zones throughout the world and within countries can be seen in the Standard Time Zones of the World map included in the **Reference Maps** section of *The World Factbook*.

Total fertility rate This entry gives a figure for the average number of children that would be born per woman if all women lived to the end of their childbearing years and bore children according to a given fertility rate at each age. The total fertility rate (TFR) is a more direct measure of the level of fertility than the crude birth rate, since it refers to births per woman. This indicator

shows the potential for population change in the country. A rate of two children per woman is considered the replacement rate for a population, resulting in relative stability in terms of total numbers. Rates above two children indicate populations growing in size and whose median age is declining. Higher rates may also indicate difficulties for families, in some situations, to feed and educate their children and for women to enter the labor force. Rates below two children indicate populations decreasing in size and growing older. Global fertility rates are in general decline and this trend is most pronounced in industrialized countries, especially Western Europe, where populations are projected to decline dramatically over the next 50 years.

Total renewable water resources This entry provides the long-term average water availability for a country in cubic kilometers of precipitation, recharged ground water, and surface inflows from surrounding countries. The values have been adjusted to account for overlap resulting from surface flow recharge of groundwater sources. Total renewable water resources provides the water total available to a country but does not include water resource totals that have been reserved for upstream or downstream countries through international agreements. Note that these values are averages and do not accurately reflect the total available in any given year. Annual available resources can vary greatly due to short-term and long-term climatic and weather variations.

Trafficking in persons Trafficking in persons is modern-day slavery, involving victims who are forced, defrauded, or coerced into labor or sexual exploitation. The International Labor Organization (ILO), the UN agency charged with addressing labor standards, employment, and social protection issues, estimates that 12.3 million people worldwide are enslaved in forced labor, bonded labor, forced child labor, sexual servitude, and involuntary servitude at any given time. Human trafficking is a multi-dimensional threat, depriving people of their human rights and freedoms, risking global health, promoting social breakdown, inhibiting development by depriving countries of their human capital, and helping fuel the growth of organized crime. In 2000, the US Congress passed the Trafficking Victims Protection Act (TVPA), reauthorized in 2003 and 2005, which provides tools for the US to combat trafficking in persons, both domestically and abroad. One of the law's key components is the creation of the US Department of State's annual *Trafficking in Persons Report*, which assesses the government response (i.e., the *current situation*) in some 150 countries with a significant number of victims trafficked across their borders who are recruited, harbored, transported, provided, or obtained for forced labor or sexual exploitation. Countries in the annual report are rated in three tiers, based on government efforts to combat trafficking. The countries identified in this entry are those listed in the *2010 Trafficking in Persons Report* as **Tier 2 Watch List** or **Tier 3** based on the following tier rating definitions:

Tier 2 Watch List countries do not fully comply with the minimum standards for the elimination of trafficking but are making significant efforts to do so, and meet one of the following criteria:

1. they display high or significantly increasing number of victims,
2. they have failed to provide evidence of increasing efforts to combat trafficking in persons, or,
3. they have committed to take action over the next year.

Tier 3 countries neither satisfy the minimum standards for the elimination of trafficking nor demonstrate a significant effort to do so. Countries in this tier are subject to potential non-humanitarian and non-trade sanctions.

Transnational issues This category includes four entries—**Disputes**—international, Refugees and internally displaced persons, **Trafficking in persons**, and **Illicit drugs**—that deal with current issues going beyond national boundaries.

Transportation This category includes the entries dealing with the means for movement of people and goods.

Transportation—note This entry includes miscellaneous transportation information of significance not included elsewhere.

Unemployment rate This entry contains the percent of the labor force that is without jobs. Substantial underemployment might be noted.

Unemployment, youth ages 15-24 This entry gives the percent of the total labor force ages 15-24 unemployed during a specified year.

Urbanization This entry provides two measures of the degree of urbanization of a population. The first, *urban population*, describes the percentage of the total population living in urban areas, as defined by the country. The second, *rate of urbanization*, describes the projected average rate of change of the size of the urban population over the given period of time. Additionally, the World entry includes a list of the *ten largest urban agglomerations*. An *urban agglomeration* is defined as comprising the city or town proper and also the suburban fringe or thickly settled territory lying outside of, but adjacent to, the boundaries of the city.

UTC (Coordinated Universal Time) See entry for Coordinated Universal Time.

Waterways This entry gives the total length of navigable rivers, canals, and other inland bodies of water.

Weights and Measures This information is presented in Appendix G: Weights and Measures and includes mathematical notations (mathematical powers and names), metric interrelationships (prefix; symbol; length, weight, or capacity; area; volume), and standard conversion factors.

Years All year references are for the calendar year (CY) unless indicated as fiscal year (FY). The calendar year is an accounting period of 12 months from 1 January to 31 December. The fiscal year is an accounting period of 12 months other than 1 January to 31 December.

NOTE: Information for the US and US dependencies was compiled from material in the public domain and does not represent Intelligence community estimates.

AFGHANISTAN

INTRODUCTION

Background: Ahmad Shah DURRANI unified the Pashtun tribes and founded Afghanistan in 1747. The country served as a buffer between the British and Russian Empires until it won independence from notional British control in 1919. A brief experiment in democracy ended in a 1973 coup and a 1978 Communist counter-coup. The Soviet Union invaded in 1979 to support the tottering Afghan Communist regime, touching off a long and destructive war. The USSR withdrew in 1989 under relentless pressure by internationally supported anti-Communist mujahedin rebels. A series of subsequent civil wars saw Kabul finally fall in 1996 to the Taliban, a hardline Pakistani-sponsored movement that emerged in 1994 to end the country's civil war and anarchy. Following the 11 September 2001 terrorist attacks in New York City and Washington, D.C., a US, Allied, and anti-Taliban Northern Alliance military action toppled the Taliban for sheltering Osama BIN LADIN. The UN-sponsored Bonn Conference in 2001 established a process for political reconstruction that included the adoption of a new constitution, a presidential election in 2004, and National Assembly elections in 2005. In December 2004, Hamid KARZAI became the first democratically elected president of Afghanistan and the National Assembly was inaugurated the following December. KARZAI was re-elected in August 2009 for a second term. Despite gains toward building a stable central government, a resurgent Taliban and continuing provincial instability—particularly in the south and the east—remain serious challenges for the Afghan Government. In January 2011, Afghanistan assumed a nonpermanent seat on the UN Security Council for the 2012–13 term.

ECONOMY

Economy—overview: Afghanistan's economy is recovering from decades of conflict. The economy has improved significantly since the fall of the Taliban regime in 2001 largely because of the infusion of international assistance, the recovery of the agricultural sector, and service sector growth. Despite the progress of the past few years, Afghanistan is extremely poor, landlocked, and highly dependent on foreign aid. Much of the population continues to suffer from shortages of housing, clean water, electricity, medical care, and jobs. Criminality, insecurity, weak governance, and the Afghan Government's difficulty in extending rule of law to all parts of the country pose challenges to future economic growth. Afghanistan's living standards are among the lowest in the world. While the international community remains committed to Afghanistan's development, pledging over \$67 billion at nine donors' conferences between 2003–10, the Government of Afghanistan will need to overcome a number of challenges, including low revenue collection, anemic job creation, high levels of corruption, weak government capacity, and poor public infrastructure.

AKROTIRI

INTRODUCTION

Background: By terms of the 1960 Treaty of Establishment that created the independent Republic of Cyprus, the UK retained full sovereignty and jurisdiction over two

areas of almost 254 square kilometers—Akrotiri and Dhekelia. The southernmost and smallest of these is the Akrotiri Sovereign Base Area, which is also referred to as the Western Sovereign Base Area.

GEOGRAPHY

Location: Eastern Mediterranean, peninsula on the southwest coast of Cyprus

Geographic coordinates:

34 37 N, 32 58 E

Map references: Europe

Area: total: 123 sq km

country comparison to the world: 222

note: includes a salt lake and wetlands

Area—comparative: about 0.7 times the size of Washington, DC

Land boundaries: total: 47.4 km

border countries: Cyprus 47.4 km

Coastline: 56.3 km

Climate: temperate; Mediterranean with hot, dry summers and cool winters

TRANSNATIONAL ISSUES

Disputes—international: Afghan, Coalition, and Pakistan military meet periodically to clarify the alignment of the boundary on the ground and on maps; Afghan and Iranian commissioners have discussed boundary monument densification and resurvey; Iran protests Afghanistan's restricting flow of dammed Helmand River tributaries during drought; Pakistan has sent troops across and built fences along some remote tribal areas of its treaty-defined Durand Line border with Afghanistan which serve as bases for foreign terrorists and other illegal activities; Russia remains concerned about the smuggling of poppy derivatives from Afghanistan through Central Asian countries

Refugees and internally displaced persons: IDPs: 132,246 (mostly Pashtuns and Kuchis displaced in south and west due to drought and instability) (2007)

Illicit drugs: world's largest producer of opium; while poppy cultivation was relatively stable at 119,000 hectares in 2010, a poppy blight affecting the high cultivation areas in 2010 reduced potential opium production to 3,200 metric tons, down over 40 percent from 2009; the Taliban and other antigovernment groups participate in and profit from the opiate trade, which is a key source of revenue for the Taliban inside Afghanistan; widespread corruption and instability impede counterdrug efforts; most of the heroin consumed in Europe and Eurasia is derived from Afghan opium; vulnerable to drug money laundering through informal financial networks; regional source of hashish (2008)

Environment—current issues: hunting around the salt lake; note—breeding place for loggerhead and green turtles; only remaining colony of griffon vultures is on the base

Geography—note: British extraterritorial rights also extended to several small off-post sites scattered across Cyprus; of the Sovereign Base Area (SBA) land, 60% is privately owned and farmed, 20% is owned by the Ministry of Defense, and 20% is SBA Crown land

PEOPLE AND SOCIETY

Languages: English, Greek

Population: approximately 15,700 live on the Sovereign Base Areas of Akrotiri and Dhekelia including 7,700 Cypriots, 3,600 Service and UK-based contract personnel, and 4,400 dependents
 country comparison to the world: 219

ALBANIA

INTRODUCTION

Background: Albania declared its independence from the Ottoman Empire in 1912, but was conquered by Italy in 1939. Communist partisans took over the country in 1944. Albania allied itself first with the USSR (until 1960), and then with China (to 1978). In the early 1990s, Albania ended 46 years of xenophobic Communist rule and established a multiparty democracy. The transition has proven challenging as successive governments have tried to deal with high unemployment, widespread corruption, a dilapidated physical infrastructure, powerful organized crime networks, and combative political opponents. Albania has made progress in its democratic development since first holding multiparty elections in 1991, but deficiencies remain. International observers judged elections to be largely free and fair since the restoration of political stability following the collapse of pyramid schemes in 1997; however, there have been claims of electoral fraud in every one

of Albania's post-communist elections. The 2009 general elections resulted in no single party gaining a majority of the 140 seats in Parliament, and the Movement for Socialist Integration (LSI) and the Democratic Party (DP) combined to form a coalition government, the first such in Albania's history. The Socialist Party (SP) contested the results of the 2009 parliamentary elections and the 2011 local elections. Albania joined NATO in April 2009 and is a potential candidate for EU accession. Although Albania's economy continues to grow, the country is still one of the poorest in Europe, hampered by a large informal economy and an inadequate energy and transportation infrastructure.

Flag description: red with a black two-headed eagle in the center; the design is claimed to be that of 15th-century hero George Kastrioti SKANDERBEG, who led a successful uprising against the Turks that resulted in a short-lived independence for some Albanian regions (1443-1478); an unsubstantiated explanation for the eagle symbol is the tradition that Albanians see themselves as descendants of the eagle; they refer to themselves as "Shkypetars," which translates as "sons of the eagle"

National symbol(s): double-headed eagle

National anthem: name: "Hymni i Flamurit" (Hymn to the Flag)

lyrics/music: Aleksander Stavre DREN- OVA/Ciprian PORUMBESCU

note: adopted 1912

ECONOMY

Economy—overview: Albania, a formerly closed, centrally-planned state, is making the difficult transition to a more modern open-market economy. Macroeconomic growth averaged around 6% between 2004-08, but declined to about 3% in 2009-11. Inflation is low and stable. The government has taken measures to curb violent crime, and recently adopted a fiscal reform package aimed at reducing the large gray economy and attracting foreign investment. Remittances, a significant catalyst for economic growth declined from 12-15% of GDP before the 2008 financial crisis to 8% of GDP in 2010, mostly from Albanians residing in Greece and Italy. The agricultural sector, which accounts for almost half of employment but only about one-fifth of GDP, is limited primarily to small family operations and subsistence farming because of lack of modern equipment, unclear property rights, and the prevalence of small, inefficient plots of land. Energy shortages because of a reliance on hydropower-98% of the electrical power produced in Albania-and antiquated and inadequate infrastructure contribute to Albania's poor business environment and lack of success in

attracting new foreign investment needed to expand the country's export base. FDI is among the lowest in the region, but the government has embarked on an ambitious program to improve the business climate through fiscal and legislative reforms. The completion of a new thermal power plant near Vlore has helped diversify generation capacity, and plans to upgrade transmission lines between Albania and Montenegro and Kosovo would help relieve the energy shortages. Also, with help from EU funds, the government is taking steps to improve the poor national road and rail network, a long-standing barrier to sustained economic growth. The country will continue to face challenges from increasing public debt, approaching its statutory limit of 60% of GDP. Strong trade, remittance, and banking sector ties with Greece and Italy make Albania vulnerable to spillover of

TRANSNATIONAL ISSUES

Disputes—International: none

Illicit drugs: increasingly active transshipment point for Southwest Asian opiates, hashish, and cannabis transiting the Balkan route and—to a lesser extent—cocaine from South America destined for Western Europe; limited opium and expanding cannabis production; ethnic Albanian narcotrafficking organizations active and expanding in Europe; vulnerable to money laundering associated with regional trafficking in narcotics, arms, contraband, and illegal aliens

ALGERIA

INTRODUCTION

Background: After more than a century of rule by France, Algerians fought through much of the 1950s to achieve independence in 1962. Algeria's primary political party, the National Liberation Front (FLN), was established in 1954 as part of the struggle for independence and has largely dominated politics since. The Government of Algeria in 1988 instituted a multi-party

system in response to public unrest, but the surprising first round success of the Islamic Salvation Front (FIS) in the December 1991 balloting spurred the Algerian army to intervene and postpone the second round of elections to prevent what the secular elite feared would be an extremist-led government from assuming power. The army began a crackdown on the FIS that spurred FIS supporters to begin attacking government targets, and fighting escalated into

an insurgency, which saw intense violence between 1992–98 resulting in over 100,000 deaths—many attributed to indiscriminate massacres of villagers by extremists. The government gained the upper hand by the late-1990s, and FIS's armed wing, the Islamic Salvation Army, disbanded in January 2000. Abdelaziz BOUTEFLIKA, with the backing of the military, won the presidency in 1999 in an election widely viewed as fraudulent. He was reelected to a second

term in 2004 and overwhelmingly won a third term in 2009 after the government amended the constitution in 2008 to remove presidential term limits. Longstanding problems continue to face BOUTEFLIKA, including large-scale unemployment, a shortage of housing, unreliable electrical and water supplies, government inefficiencies and corruption, and the continuing activities of extremist militants. The Salafist Group for Preaching and Combat (GSPC) in 2006 merged with al-Qa'ida to form al-Qa'ida in the Lands of the Islamic Maghreb, which has launched an ongoing series of kidnappings and bombings targeting the Algerian Government and Western interests. The government in 2011 introduced some political reforms in response to the Arab Spring, including lifting the 19-year-old state of emergency restrictions and ending the state's monopoly on broadcast media. Political protest activity in the country remained low in 2011, but small, sometimes violent socioeconomic demonstrations by disparate groups continued to be a common occurrence.

ECONOMY

Economy—overview: Algeria's economy remains dominated by the state, a legacy of the country's socialist post-independence development model. In recent years the Algerian Government has halted the privatization of state-owned industries and imposed restrictions on imports and foreign involvement in its economy. Hydrocarbons have long been the backbone of the economy, accounting for roughly 60% of budget revenues, 30% of GDP, and over 95% of export earnings. Algeria has the 10th-largest reserves of natural gas in the world and is the sixth-largest gas exporter. It ranks 16th in oil reserves. Thanks to strong hydrocarbon revenues, Algeria has a cushion of \$173 billion in foreign currency reserves and a large hydrocarbon stabilization fund. In addition, Algeria's external debt is extremely low at about 2% of GDP. Algeria has struggled to develop industries outside of hydrocarbons in part because of high costs and an inert state bureaucracy. The government's efforts to diversify the economy by attracting foreign and domestic investment outside the energy sector have done little to reduce high youth unemployment rates or to address housing shortages. A wave of economic protests in February and March 2011

prompted the Algerian Government to offer more than \$23 billion in public grants and retroactive salary and benefit increases. Public spending has increased by 27% annually during the past five years. Long-term economic challenges include diversification from hydrocarbons, relaxing state control of the economy, and providing adequate jobs for younger Algerians.

privatization of Algeria's telecommunica-

tions sector began in 2000; three mobile

cellular licenses have been issued and, in

2005, a consortium led by Egypt's Orascom

Telecom won a 15-year license to build and

operate a fixed-line network in Algeria;

the license will allow Orascom to develop

high-speed data and other specialized ser-

vices and contribute to meeting the large

unfulfilled demand for basic residential

telephony; Internet broadband services

began in 2003

domestic: a limited network of fixed lines

with a teledensity of less than 10 tel-

ephones per 100 persons is offset by the

rapid increase in mobile-cellular subscrib-

ership; in 2010, combined fixed-line and

mobile-cellular teledensity was roughly 100 telephones per 100 persons

TRANSNATIONAL ISSUES

Disputes—International: Algeria and many other states reject Moroccan administration of Western Sahara; the Polisario Front, exiled in Algeria, represents the Sahrawi Arab Democratic Republic; Algeria's border with Morocco remains an irritant to bilateral relations, each nation accusing the other of harboring militants and arms smuggling; dormant disputes include Libyan claims of about 32,000 sq km still reflected on its maps of southeastern Algeria and the National Liberation Front's (FLN) assertions of a claim to Chirac Pastures in southeastern Morocco

Refugees and internally displaced persons: **refugees (country of origin):** 90,000 (Western Saharan Sahrawi, mostly living in Algerian-sponsored camps in the southwestern Algerian town of Tindouf)

IDPs: undetermined (civil war during 1990s) (2007)

Trafficking in persons: **current situation:** Algeria is a transit and, to a lesser extent, a destination and source country for men, women, and children subjected to forced labor and sex trafficking; criminal networks which sometimes extend to sub-Saharan Africa and to Europe are involved in both smuggling and human trafficking **tier rating:** Tier 3—the Government of Algeria does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government made no discernible effort to enforce its 2009 anti-trafficking law; it also failed to identify and protect trafficking victims and continued to lack adequate measures to protect victims and prevent trafficking (2009)

AMERICAN SAMOA

INTRODUCTION

Background: Settled as early as 1000 B.C., Samoa was "discovered" by European explorers in the 18th century. International rivalries in the latter half of the 19th century were settled by an 1899 treaty in which Germany and the US divided the Samoan archipelago. The US formally occupied its portion—a smaller group of eastern islands with the excellent harbor of Pago Pago—the following year.

note: local anthem adopted 1950; as a territory of the United States, "The Star-Spangled Banner" is official (see United States)

ECONOMY

Economy—overview: American Samoa has a traditional Polynesian economy in which more than 90% of the land is communally owned. Economic activity is strongly linked to the US with which American Samoa conducts most of its commerce. Tuna fishing and tuna processing plants are the backbone of the private sector with canned tuna the primary export. The two tuna canneries account for 80% of employment. In late September 2009, an earthquake and the resulting tsunami devastated American Samoa and nearby Samoa, disrupting transportation and power generation, and resulting in about 200 deaths. The US Federal Emergency Management Agency is overseeing a relief program of nearly \$25 million. Transfers from the US Government add substantially to American Samoa's economic well being. Attempts by the government to develop a larger and broader economy are restrained by Samoa's remote location, its limited transportation, and its devastating hurricanes. Tourism is a promising developing sector.

ANDORRA

INTRODUCTION

Background: For 715 years, from 1278 to 1993, Andorrans lived under a unique coprincipality, ruled by French and Spanish leaders (from 1607 onward, the French chief of state and the Spanish bishop of Seu d'Urgell). In 1993, this feudal system was modified with the titular heads of state retained, but the government transformed into a parliamentary democracy. For decades Andorra enjoyed its status as a small refuge of fiscal and banking freedom and benefitted from Spanish and French tourists attracted to the country's duty-free shopping. The situation has changed in recent years as Andorra started to tax foreign investment and other sectors. Tourism accounts for over 80% of Andorra's gross domestic product.

ECONOMY

Economy—overview: Tourism, retail sales, and finance are the mainstays of Andorra's tiny, well-to-do economy, accounting for more than three-quarters of GDP. About 9 million tourists visit annually, attracted by Andorra's duty-free status for some products and by its summer and winter resorts. The banking sector also contributes substantially to the economy. Andorra's comparative advantage as a tax haven eroded when the borders of neighboring France and Spain opened; its bank secrecy laws have been relaxed under pressure from the EU and OECD. Agricultural production is limited—only 2% of the land is arable—and most food

has to be imported, making the economy vulnerable to changes in fuel and food prices. The principal livestock activity is sheep raising. Manufacturing output and exports consist mainly of perfumes and cosmetic products, products of the printing industry, electrical machinery and equipment, clothing, tobacco products, and furniture. Andorra is a member of the EU Customs Union and is treated as an EU member for trade in manufactured goods (no tariffs) and as a non-EU member for agricultural products. Andorra uses the euro and is effectively subject to the monetary policy of the European Central Bank. Slower growth in Spain and France has dimmed Andorra's prospects. In 2010 and 2011 a drop in tourism contributed to a contraction in GDP and a deterioration of public finances, prompting the government to implement several austerity measures.

INTRODUCTION

Background: Angola is rebuilding its country after the end of a 27-year civil war in 2002. Fighting between the Popular Movement for the Liberation of Angola (MPLA), led by Jose Eduardo DOS SANTOS, and the National Union for the Total Independence of Angola (UNITA), led by Jonas SAVIMBI, followed independence from Portugal in 1975. Peace seemed imminent in 1992 when Angola held national elections, but fighting picked up again by 1996. Up to 1.5 million lives may have been lost—and 4 million people displaced—in the quarter century of fighting. SAVIMBI's death in 2002 ended UNITA's insurgency and strengthened the MPLA's hold on power. President DOS SANTOS held legislative elections in September 2008 and, despite promising to hold presidential elections in 2009, has since pushed through a new constitution that calls for elections in 2012.

ECONOMY

Economy—overview: Angola's high growth rate in recent years was driven by high international prices for its oil. Angola became a member of OPEC in late 2006 and its current assigned a production quota of 1.65 million barrels a day (bbl/day). Oil production and its supporting activities contribute about 85% of GDP. Diamond exports contribute an additional 5%. Subsistence agriculture provides the main livelihood for most of the people, but half of the country's food is still imported. Increased oil production supported growth averaging more than 17% per year from 2004 to 2008. A postwar reconstruction boom and resettlement of displaced persons has led to high rates of growth in construction and agriculture as well. Much of the country's infrastructure is still damaged or undeveloped from the 27-year-long civil war. Land mines left from the war still mar the countryside, even though peace was established after the death of rebel leader Jonas SAVIMBI in February 2002. Since 2005, the government has used billions of dollars in credit lines from China, Brazil, Portugal, Germany, Spain, and the EU to rebuild Angola's public infrastructure. The global recession that started in 2008 temporarily stalled economic growth. Lower prices for oil and diamonds during the global recession slowed GDP growth to 2.4% in 2009 and to 3.4% in 2010, and many construction projects stopped because Luanda accrued \$9 billion in arrears to foreign construction companies when government revenue fell in 2008 and 2009. Angola abandoned its currency peg in 2009, and in November 2009 signed onto an IMF Stand-By Arrangement loan of \$1.4 billion to rebuild international reserves. Consumer inflation declined from 325% in 2000 to 14% in 2011. Higher oil prices in 2011, helped Angola climb turn a budget deficit of 8.6% of GDP in 2009 into

an surplus of 7.5% of GDP in 2010. Corruption, especially in the extractive sectors, also is a major challenge.

ANGUILLA

INTRODUCTION

Background: Colonized by English settlers from Saint Kitts in 1650, Anguilla was administered by Great Britain until the early 19th century, when the island—against the wishes of the inhabitants—was incorporated into a single British dependency along with Saint Kitts and Nevis. Several attempts at separation failed. In 1971, two years after a revolt, Anguilla was finally

allowed to secede; this arrangement was formally recognized in 1980 with Anguilla becoming a separate British dependency.

National symbol(s): dolphin

National anthem: name: “God Bless Anguilla”

lyrics/music: Alex RICHARDSON

note: local anthem adopted 1981; as a territory of the United Kingdom, “God Save the Queen” is official (see United Kingdom)

ECONOMY

Economy—overview: Anguilla has few natural resources, and the economy

depends heavily on luxury tourism, offshore banking, lobster fishing, and remittances from emigrants. Increased activity in the tourism industry has spurred the growth of the construction sector contributing to economic growth. Anguillian officials have put substantial effort into developing the offshore financial sector, which is small but growing. In the medium term, prospects for the economy will depend largely on the tourism sector and, therefore, on revived income growth in the industrialized nations as well as on favorable weather conditions.

ANTARCTICA

INTRODUCTION

Background: Speculation over the existence of a "southern land" was not confirmed until the early 1820s when British and American commercial operators and British and Russian national expeditions began exploring the Antarctic Peninsula region and other areas south of the Antarctic Circle. Not until 1840 was it established that Antarctica was indeed a continent and not just a group of islands or an area of ocean. Several exploration "firsts" were achieved in the early 20th century, but generally the area saw little human activity. Following World War II, however, there was an upsurge in scientific research on the continent. A number of countries have set up a range of year-round and seasonal stations, camps, and refuges to support scientific research in Antarctica. Seven have made territorial claims, but not all countries recognize these claims. In order to form a legal framework for the activities of nations on the continent, an Antarctic Treaty was negotiated that neither denies nor gives recognition to existing territorial claims; signed in 1959, it entered into force in 1961.

GEOGRAPHY

Location: continent mostly south of the Antarctic Circle

Geographic coordinates: 90 00 S, 0 00 E

Map references: Antarctic Region

Area: total: 14 million sq km

land: 14 million sq km (280,000 sq km ice-free, 13.72 million sq km ice-covered) (est.)

note: fifth-largest continent, following Asia, Africa, North America, and South America, but larger than Australia and the subcontinent of Europe

Area—comparative: slightly less than 1.5 times the size of the US

Land boundaries: 0 km

note: see entry on Disputes—international

Coastline: 17,968 km

Maritime claims: Australia, Chile, and Argentina claim Exclusive Economic Zone (EEZ) rights or similar over 200 nm

extensions seaward from their continental claims, but like the claims themselves, these zones are not accepted by other countries; 21 of 28 Antarctic consultative nations have made no claims to Antarctic territory (although Russia and the US have reserved the right to do so) and do not recognize the claims of the other nations; also see the Disputes—international entry

Climate: severe low temperatures vary with latitude, elevation, and distance from the ocean; East Antarctica is colder than West Antarctica because of its higher elevation; Antarctic Peninsula has the most moderate climate; higher temperatures occur in January along the coast and average slightly below freezing

Terrain: about 98% thick continental ice sheet and 2% barren rock, with average elevations between 2,000 and 4,000 meters; mountain ranges up to nearly 5,000 meters; ice-free coastal areas include parts of southern Victoria Land, Wilkes Land, the Antarctic Peninsula area, and parts of Ross Island on McMurdo Sound; glaciers form ice shelves along about half of the coastline, and floating ice shelves constitute 11% of the area of the continent

Elevation extremes: lowest point: Bentley Subglacial Trench -2,540 m

highest point: Vinson Massif 4,897 m

note: the lowest known land point in Antarctica is hidden in the Bentley Subglacial Trench; at its surface is the deepest ice yet discovered and the world's lowest elevation not under seawater

Natural resources: iron ore, chromium, copper, gold, nickel, platinum and other minerals, and coal and hydrocarbons have been found in small noncommercial quantities; none presently exploited; krill, finfish, and crab have been taken by commercial fisheries

Land use: arable land: 0%

permanent crops: 0%

other: 100% (ice 98%, barren rock 2%) (2005)

Natural hazards: katabatic (gravity-driven) winds blow coastward from the high interior; frequent blizzards form near the foot of the plateau; cyclonic storms form over the ocean and move clockwise along the coast; volcanism on Deception Island and isolated areas of West Antarctica; other seismic activity rare and weak; large icebergs may calve from ice shelf

Environment—current issues: in 1998, NASA satellite data showed that the Antarctic ozone hole was the largest on record, covering 27 million square kilometers; researchers in 1997 found that increased ultraviolet light passing through the hole damages the DNA of icefish, an Antarctic fish lacking hemoglobin; ozone depletion earlier was shown to harm one-celled Antarctic marine plants; in 2002, significant areas of ice shelves disintegrated in response to regional warming

Geography—note: the coldest, windiest, highest (on average), and driest continent; during summer, more solar radiation reaches the surface at the South Pole than is received at the Equator in an equivalent period; mostly uninhabitable

PEOPLE AND SOCIETY

Population: no indigenous inhabitants, but there are both permanent and summer-only staffed research stations

note: 29 nations, all signatory to the Antarctic Treaty, operate through their National Antarctic Program a number of seasonal-only (summer) and year-round research stations on the continent and its nearby islands south of 60 degrees south latitude (the region covered by the Antarctic Treaty); the population doing and supporting science or engaged in the management and protection of the Antarctic region varies from approximately 4,400 in summer to 1,100 in winter; in addition, approximately 1,000 personnel, including ship's crew and scientists doing onboard research, are present in the waters of the treaty region;; peak summer (December–February) population—4,490 total; Argentina 667, Australia 200, Australia and Romania jointly 13, Belgium 20, Brazil 40, Bulgaria 18, Chile 359, China 90, Czech Republic 20, Ecuador 26, Finland 20, France 125, France and Italy jointly 60, Germany 90, India 65, Italy 102, Japan 125, South Korea 70, NZ 85, Norway 44, Peru 28, Poland 40, Russia 429, South Africa 80, Spain 50, Sweden 20, Ukraine 24, UK 217, US 1,293, Uruguay 70 (2008–2009); winter (June–August) station population—1,106 total; Argentina 176, Australia 62, Brazil 12, Chile 114, China 29, France 26, France and Italy jointly 13, Germany 9, India 25, Japan 40, South Korea 18, NZ 10, Norway 7, Poland 12, Russia 148, South Africa 10, Ukraine 12, UK 37, US 337, Uruguay 9 (2009); research stations operated within the Antarctic Treaty area (south of 60 degrees south latitude) by National Antarctic Programs;; year-round stations—40 total; Argentina 6, Australia 3, Brazil 1, Chile 6, China 2, France 1, France and Italy jointly 1, Germany 1, India 1, Japan 1, South Korea 1, NZ 1, Norway 1, Poland 1, Russia 5, South Africa 1, Ukraine 1, UK 2, US 3, Uruguay 1 (2009); a range of seasonal-only (summer) stations, camps, and refuges—Argentina, Australia, Belgium, Bulgaria, Brazil, Chile, China, Czech Republic, Ecuador, Finland, France, Germany, India, Italy, Japan, South Korea, New Zealand, Norway, Peru, Poland, Romania (with Australia), Russia, South Africa, Spain, Sweden, Ukraine, UK, US, and Uruguay (2008–2009); in addition, during the austral summer some nations have numerous occupied locations such as tent camps, summer-long temporary facilities, and mobile traverses in support of research (May 2009 est.)

GOVERNMENT

Country name: *conventional long form:* none

conventional short form: Antarctica

Government type: *Antarctic Treaty Summary—the Antarctic region is governed by a system known as the Antarctic Treaty System; the system includes:* 1. the Antarctic Treaty, signed on 1 December 1959 and entered into force on 23 June 1961, which establishes the legal framework for the management of Antarctica, 2. Recommendations and Measures adopted at meetings of Antarctic Treaty countries, 3. The Convention for the Conservation of Antarctic Seals (1972), 4. The Convention for the Conservation of Antarctic Marine Living Resources (1980), and 5. The Protocol on Environmental Protection to the Antarctic Treaty (1991); the 33rd Antarctic Treaty Consultative Meeting was held in Punta del Este, Uruguay in May 2010; at these periodic meetings, decisions are made by consensus (not by vote) of all consultative member nations; by April 2010, there were 48 treaty member nations: 28 consultative and 20 non-consultative; consultative (decision-making) members include the seven nations that claim portions of Antarctica as national territory (some claims overlap) and 21 non-claimant nations; the US and Russia have reserved the right to make claims; the US does not recognize the claims of others; Antarctica is administered through meetings of the consultative member nations; decisions from these meetings are carried out by these member nations (with respect to their own nationals and operations) in accordance with their own national laws; the years in parentheses indicate when a consultative member-nation acceded to the Treaty and when it was accepted as a consultative member, while no date indicates the country was an original 1959 treaty signatory; claimant nations are—Argentina, Australia, Chile, France, NZ, Norway, and the UK; nonclaimant consultative nations are—Belgium, Brazil (1975/1983), Bulgaria (1978/1998), China (1983/1985), Ecuador (1987/1990), Finland (1984/1989), Germany (1979/1981), India (1983/1983), Italy (1981/1987), Japan, South Korea (1986/1989), Netherlands (1967/1990), Peru (1981/1989), Poland (196

Article 1—area to be used for peaceful purposes only; military activity, such as weapons testing, is prohibited, but military personnel and equipment may be used for scientific research or any other peaceful purpose; Article 2—freedom of scientific investigation and cooperation shall continue; Article 3—free exchange of information and personnel, cooperation with the UN and other international agencies; Article 4—does not recognize, dispute, or establish territorial claims and no new claims shall be asserted while the treaty is in force; Article 5—prohibits nuclear explosions or disposal of radioactive wastes; Article 6—includes under the treaty all land and ice shelves south of 60 degrees 00 minutes

south and reserves high seas rights; Article 7—treaty-state observers have free access, including aerial observation, to any area and may inspect all stations, installations, and equipment; advance notice of all expeditions and of the introduction of military personnel must be given; Article 8—allows for jurisdiction over observers and scientists by their own states; Article 9—frequent consultative meetings take place among member nations; Article 10—treaty states will discourage activities by any country in Antarctica that are contrary to the treaty; Article 11—disputes to be settled peacefully by the parties concerned or, ultimately, by the ICJ; Articles 12, 13, 14—deal with upholding, interpreting, and amending the treaty among involved nations; other agreements—some 200 recommendations adopted at treaty consultative meetings and ratified by governments; a mineral resources agreement was signed in 1988 but remains unratified; the Protocol on Environmental Protection to the Antarctic Treaty was signed 4 October 1991 and entered into force 14 January 1998; this agreement provides for the protection of the Antarctic environment through six specific annexes: 1) environmental impact assessment, 2) conservation of Antarctic fauna and flora, 3) waste disposal and waste management, 4) prevention of marine pollution, 5) area protection and management and 6) liability arising from environmental emergencies; it prohibits all activities relating to mineral resources except scientific research; a permanent Antarctic Treaty Secretariat was established in 2004 in Buenos Aires, Argentina

Legal system: Antarctica is administered through annual meetings—known as Antarctic Treaty Consultative Meetings—which include consultative member nations, non-consultative member nations, observer organizations, and expert organizations; decisions from these meetings are carried out by these member nations (with respect to their own nationals and operations) in accordance with their own national laws; more generally, access to the Antarctic Treaty area, that is to all areas between 60 and 90 degrees south latitude, is subject to a number of relevant legal instruments and authorization procedures adopted by the states party to the Antarctic Treaty; note—US law, including certain criminal offenses by or against US nationals, such as murder, may apply extraterritorially; some US laws directly apply to Antarctica; for example, the Antarctic Conservation Act, 16 U.S.C. section 2401 et seq., provides civil and criminal penalties for the following activities unless authorized by regulation of statute: the taking of native mammals or birds; the introduction of nonindigenous plants and animals; entry into specially protected areas; the discharge or disposal of pollutants; and the importation into the US of certain items from Antarctica; violation of the Antarctic Conservation Act carries penalties of up to \$10,000 in fines and one year in prison; the National Sci-

ence Foundation and Department of Justice share enforcement responsibilities; Public Law 95-541, the US Antarctic Conservation Act of 1978, as amended in 1996, requires expeditions from the US to Antarctica to notify, in advance, the Office of Oceans, Room 5805, Department of State, Washington, DC 20520, which reports such plans to other nations as required by the Antarctic Treaty; for more information, contact Permit Office, Office of Polar Programs, National Science Foundation, Arlington, Virginia 22230; telephone: (703) 292-8030, or visit its website at www.nsf.gov

ECONOMY

Economy—overview: Scientific undertakings rather than commercial pursuits are the predominate human activity in Antarctica. Fishing off the coast and tourism, both based abroad, account for Antarctica's limited economic activity. Antarctic fisheries, targeting three main species—Patagonian and Antarctic toothfish (*Dissostichus eleginoides* and *D. mawsoni*), mackerel icefish (*Champsocephalus gunnari*), and krill (*Euphausia superba*)—reported landing 141,147 metric tons in 2008–09 (1 July–30 June). (Estimated fishing is from the area covered by the Convention on the Conservation of Antarctic Marine Living Resources (CCAMLR), which extends slightly beyond the Antarctic Treaty area.) Unregulated fishing, particularly of Patagonian toothfish (also known as Chilean sea bass), is a serious problem. The CCAMLR determines the recommended catch limits for marine species. A total of 37,858 tourists visited the Antarctic Treaty area in the 2008–09 Antarctic summer, down from the 46,265 visitors in 2007–2008 (estimates provided to the Antarctic Treaty by the International Association of Antarctica Tour Operators (IAATO); this does not include passengers on overflights). Nearly all of them were passengers on commercial (nongovernmental) ships and several yachts that make trips during the summer.

Transportation—note: US coastal stations include McMurdo (77 51 S, 166 40 E) and Palmer (64 43 S, 64 03 W); government use only except by permit (see Permit Office under "Legal System"); all ships at port are subject to inspection in accordance with Article 7, Antarctic Treaty; relevant legal instruments and authorization procedures adopted by the states parties to the Antarctic Treaty regulating access to the Antarctic

Treaty area to all areas between 60 and 90 degrees of latitude south have to be complied with (see "Legal System"); The Hydrographic Commission on Antarctica (HCA), a commission of the International Hydrographic Organization (IHO), is responsible for hydrographic surveying and nautical charting matters in Antarctic Treaty area; it coordinates and facilitates provision of accurate and appropriate charts and other aids to navigation in support of safety of navigation in region; membership of HCA is open to any IHO Member State whose government has acceded to the Antarctic Treaty and which contributes resources or data to IHO Chart coverage of the area

MILITARY

Military—note: the Antarctic Treaty prohibits any measures of a military nature, such as the establishment of military bases and fortifications, the carrying out of mili-

tary maneuvers, or the testing of any type of weapon; it permits the use of military personnel or equipment for scientific research or for any other peaceful purposes

TRANSNATIONAL ISSUES

Disputes—International: the Antarctic Treaty freezes, and most states do not recognize, the land and maritime territorial claims made by Argentina, Australia, Chile, France, New Zealand, Norway, and the United Kingdom (some overlapping) for three-fourths of the continent; the US and Russia reserve the right to make claims; no formal claims have been made in the sector between 90 degrees west and 150 degrees west; the International Whaling Commission created a sanctuary around the entire continent to deter catches by countries claiming to conduct scientific whaling; Australia has established a similar preserve in the waters around its territorial claim

ANTIGUA AND BARBUDA

INTRODUCTION

Background: The Siboney were the first people to inhabit the islands of Antigua and Barbuda in 2400 B.C., but Arawak Indians populated the islands when COLUMBUS landed on his second voyage in 1493. Early Spanish and French settlements were succeeded by an English colony in 1667. Slavery, established to run the sugar plantations on Antigua, was abolished in 1834. The islands became an independent state within the British Commonwealth of Nations in 1981.

GEOGRAPHY

Location: Caribbean, islands between the Caribbean Sea and the North Atlantic Ocean, east-southeast of Puerto Rico

Geographic coordinates: 17 03 N, 61 48 W
Map references: Central America and the Caribbean

Area: total: 442.6 sq km (Antigua 280 sq km; Barbuda 161 sq km)

country comparison to the world: 199

land: 442.6 sq km

water: 0 sq km

note: includes Redonda, 1.6 sq km

Area—comparative: 2.5 times the size of Washington, DC

Land boundaries: 0 km

Coastline: 153 km

Maritime claims: territorial sea: 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: 200 nm or to the edge of the continental margin

Climate: tropical maritime; little seasonal temperature variation

Terrain: mostly low-lying limestone and coral islands, with some higher volcanic areas

Elevation extremes: lowest point: Caribbean Sea 0 m

highest point: Boggy Peak 402 m

Natural resources: NEGL; pleasant climate fosters tourism

Land use: arable land: 18.18%

permanent crops: 4.55%

other: 77.27% (2005)

Irrigated land: 1.3 sq km

Total renewable water resources: 0.1 cu km (2000)

Freshwater withdrawal (domestic/industrial/agricultural): total: 0.005 cu km/yr (60%/20%/20%)

per capita: 63 cu m/yr (1990)

Natural hazards: hurricanes and tropical storms (July to October); periodic droughts

Environment—current issues: Environment—a major concern because of limited natural freshwater resources—is further hampered by the clearing of trees to increase crop production, causing rainfall to run off quickly

Environment—International agreements: party to: Biodiversity, Climate Change,

Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Wetlands, Whaling signed, but not ratified: none of the selected agreements

Geography—note: Antigua has a deeply indented shoreline with many natural harbors and beaches; Barbuda has a large western harbor

consulate(s) general: Miami, New York

Diplomatic representation from the US: the US does not have an embassy in Antigua and Barbuda; the US Ambassador to Barbados is accredited to Antigua and Barbuda

Flag description: red, with an inverted isosceles triangle based on the top edge of the flag; the triangle contains three horizontal bands of black (top), light blue, and white, with a yellow rising sun in the black band; the sun symbolizes the dawn of a new era, black represents the African heritage of most of the population, blue is for hope, and red is for the dynamism of the people; the "V" stands for victory; the successive yellow, blue, and white coloring is also meant to evoke the country's tourist attractions of sun, sea, and sand

National anthem: name: "Fair Antigua, We Salute Thee"

lyrics/music: Novelle Hamilton RICHARDS/Walter Gamet Picart CHAMBERS
note: adopted 1967; as a Commonwealth country, in addition to the national anthem, "God Save the Queen" serves as the royal anthem (see United Kingdom)

ECONOMY

Economy—overview: Tourism continues to dominate Antigua and Barbuda's economy, accounting for nearly 60% of GDP and 40% of investment. The dual-island nation's agricultural production is focused on the domestic market and constrained by a limited water supply and a labor shortage stemming from the lure of higher wages in tourism and construction. Manufacturing comprises enclave-type assembly for export with major products being bedding, handicrafts, and electronic components. Prospects for economic growth in the medium term will continue to depend on tourist arrivals from the US, Canada, and Europe and potential damages from natural disasters. After taking office in 2004, the SPENCER government adopted an ambitious fiscal reform program and was successful in reducing its public debt-to-GDP ratio from 120% to about 90% in 2008. However, the global financial crisis that began in 2008, has led to a significant increase in

the national debt, which topped 130% at the end of 2010. The Antiguan economy experienced solid growth from 2003 to 2007, reaching over 12% in 2006 driven by a construction boom in hotels and housing associated with the Cricket World Cup, but growth dropped off in 2008 with the end of the boom. In 2009, Antigua's economy was severely hit by the global economic crisis, suffering from the collapse of its largest financial institution and a steep decline in tourism. This decline continued in 2010 as the country struggled with a yawning budget deficit but returned to positive growth in 2011.

TRANSNATIONAL ISSUES

Disputes—International: none

Illicit drugs: considered a minor transshipment point for narcotics bound for the US and Europe; more significant as an offshore financial center

ARCTIC OCEAN

INTRODUCTION

Background: The Arctic Ocean is the smallest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, Indian Ocean, and the recently delimited Southern Ocean). The Northwest Passage (US and Canada) and Northern Sea Route (Norway and Russia) are two important seasonal waterways. In recent years the polar ice pack has thinned allowing for increased navigation and raising the possibility of future sovereignty and shipping disputes among countries bordering the Arctic Ocean.

GEOGRAPHY

Location: body of water between Europe, Asia, and North America, mostly north of the Arctic Circle

Geographic coordinates: 90 00 N, 0 00 E

Map references: Arctic

Area: total: 14.056 million sq km

note: includes Baffin Bay, Barents Sea, Beaufort Sea, Chukchi Sea, East Siberian Sea, Greenland Sea, Hudson Bay, Hudson Strait, Kara Sea, Laptev Sea, Northwest Passage, and other tributary water bodies

Area—comparative: slightly less than 1.5 times the size of the US

Coastline: 45,389 km

Climate: polar climate characterized by persistent cold and relatively narrow annual temperature ranges; winters characterized by continuous darkness, cold and stable weather conditions, and clear skies; summers characterized by continuous daylight, damp and foggy weather, and weak cyclones with rain or snow

Terrain: central surface covered by a perennial drifting polar icepack that, on average, is about 3 meters thick, although pressure ridges may be three times that thickness; clockwise drift pattern in the Beaufort Gyral Stream, but nearly straight-line movement from the New Siberian Islands (Russia) to Denmark Strait (between Greenland and Iceland); the icepack is surrounded by open seas during the summer, but more than doubles in size during the winter and extends to the encircling landmasses; the ocean floor is about 50% continental shelf (highest percentage of any ocean) with the remainder a central basin interrupted by three submarine ridges (Alpha Cordillera, Nansen Cordillera, and Lomonosov Ridge)

Elevation extremes: lowest point: Fram Basin -4,665 m

highest point: sea level 0 m

Natural resources: sand and gravel aggregates, placer deposits, polymetallic nodules, oil and gas fields, fish, marine mammals (seals and whales)

Natural hazards: ice islands occasionally break away from northern Ellesmere Island; icebergs calved from glaciers in western Greenland and extreme northeastern Canada; permafrost in islands; virtually ice locked from October to June; ships subject to superstructure icing from October to May

Environment—current issues: endangered marine species include walrus and whales; fragile ecosystem slow to change

and slow to recover from disruptions or damage; thinning polar icepack

Geography—note: major chokepoint is the southern Chukchi Sea (northern access to the Pacific Ocean via the Bering Strait); strategic location between North America and Russia; shortest marine link between the extremes of eastern and western Russia; floating research stations operated by the US and Russia; maximum snow cover in March or April about 20 to 50 centimeters over the frozen ocean; snow cover lasts about 10 months

ECONOMY

Economy—overview: Economic activity is limited to the exploitation of natural resources, including petroleum, natural gas, fish, and seals.

TRANSPORTATION

Ports and terminals: Churchill (Canada), Murmansk (Russia), Prudhoe Bay (US)

Transportation—note: sparse network of air, ocean, river, and land routes; the Northwest Passage (North America) and Northern Sea Route (Eurasia) are important seasonal waterways

TRANSNATIONAL ISSUES

Disputes—International: Canada and the United States dispute how to divide the Beaufort Sea and the status of the Northwest Passage but continue to work cooperatively to survey the Arctic continental shelf; Denmark (Greenland) and Norway have made submissions to the Commission on the Limits of the Continental shelf (CLCS) and Russia is collecting additional data to augment its 2001 CLCS submission; record summer melting of sea ice in the Arctic has renewed interest in maritime shipping lanes and sea floor exploration; Norway and Russia signed a comprehensive maritime boundary agreement in 2010

ARGENTINA

INTRODUCTION

Background: In 1816, the United Provinces of the Rio Plata declared their independence from Spain. After Bolivia, Paraguay, and Uruguay went their separate ways, the area that remained became Argentina. The country's population and culture were heavily shaped by immigrants from throughout Europe, but most particularly Italy and Spain, which provided the largest percentage of newcomers from 1860 to 1930. Up until about the mid-20th century, much of Argentina's history was dominated by periods of internal political conflict between Federalists and Unitarians and between civilian and military factions. After World War II, an era of Peronist populism and direct and indirect military interference in subsequent governments was followed by a military junta that took power in 1976. Democracy returned in 1983 after a failed bid to seize the Falkland Islands (Islas Malvinas) by force, and has persisted despite numerous challenges, the most formidable of which was a severe economic crisis in 2001–02 that led to violent public protests and the successive resignations of several presidents.

GEOGRAPHY

Location: Southern South America, bordering the South Atlantic Ocean, between Chile and Uruguay

Geographic coordinates: 34 00 S, 64 00 W

Map references: South America

Area: total: 2,780,400 sq km
country comparison to the world: 8
land: 2,736,690 sq km
water: 43,710 sq km

Area—comparative: slightly less than three-tenths the size of the US

Land boundaries: total: 9,861 km
border countries: Bolivia 832 km, Brazil 1,261 km, Chile 5,308 km, Paraguay 1,880 km, Uruguay 580 km

Coastline: 4,989 km

Maritime claims: territorial sea: 12 nm
contiguous zone: 24 nm
exclusive economic zone: 200 nm
continental shelf: 200 nm or to the edge of the continental margin

Climate: mostly temperate; arid in southeast; subantarctic in southwest

Terrain: rich plains of the Pampas in northern half, flat to rolling plateau of Patagonia in south, rugged Andes along western border

Elevation extremes: lowest point: Laguna del Carbon -105 m (located between Puerto San Julian and Comandante Luis Piedra Buena in the province of Santa Cruz)

highest point: Cerro Aconcagua 6,960 m (located in the northwestern corner of the province of Mendoza)

Natural resources: fertile plains of the pampas, lead, zinc, tin, copper, iron ore, manganese, petroleum, uranium

Land use: arable land: 10.03%
permanent crops: 0.36%
other: 89.61% (2005)

Irrigated land: 15,500 sq km (2003)

Total renewable water resources: 814 cu km (2000)

Freshwater withdrawal (domestic/industrial/agricultural): total: 29.19 cu km/yr (17%/9%/74%)
per capita: 753 cu m/yr (2000)

Natural hazards: San Miguel de Tucuman and Mendoza areas in the Andes subject to earthquakes; pamperos are violent windstorms that can strike the pampas and northeast; heavy flooding in some areas
volcanism: volcanic activity in the Andes Mountains along the Chilean border; Copahue (elev. 2,997 m) last erupted in 2000; other historically active volcanoes include Llullaillaco, Maipo, Planchon-Peteroa, San Jose, Tromen, Tupungatito, and Viedma

Environment—current issues: environmental problems (urban and rural) typical of an industrializing economy such as deforestation, soil degradation, desertification, air pollution, and water pollution
note: Argentina is a world leader in setting voluntary greenhouse gas targets

Environment—international agreements: party to: Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Spe-

cies, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Wetlands, Whaling
signed, but not ratified: Marine Life Conservation

Geography—note: second-largest country in South America (after Brazil); strategic location relative to sea lanes between the South Atlantic and the South Pacific Oceans (Strait of Magellan, Beagle Channel, Drake Passage); diverse geophysical landscapes range from tropical climates in the north to tundra in the far south; Cerro Aconcagua is the Western Hemisphere's tallest mountain, while Laguna del Carbon is the lowest point in the Western Hemisphere

ECONOMY

Economy—overview: Argentina benefits from rich natural resources, a highly literate population, an export-oriented agricultural sector, and a diversified industrial base. Although one of the world's wealthiest countries 100 years ago, Argentina suffered during most of the 20th century from recurring economic crises, persistent fiscal and current account deficits, high inflation, mounting external debt, and capital flight. A severe depression, growing public and external indebtedness, and a bank run culminated in 2001 in the most serious economic, social, and political crisis in the country's turbulent history. Interim President Adolfo RODRIGUEZ SAA declared a default—the largest in history—on the government's foreign debt in December of that year, and abruptly resigned only a few days after taking office. His successor, Eduardo DUHALDE, announced an end to the peso's decade-long 1-to-1 peg to the US dollar in early 2002. The economy bottomed out that year, with real GDP 18% smaller than in 1998 and almost 60% of Argentines under the poverty line. Real GDP rebounded to grow by an average 8.5% annually over the subsequent six years, taking advantage of previously idled industrial capacity and labor, an audacious debt restructuring and reduced debt burden, excellent international financial conditions, and expansionary monetary and fiscal policies. Inflation also increased, however, during the administration of President Nestor KIRCHNER, which responded with price restraints on businesses, as well as export taxes and restraints, and beginning in early 2007, with understating inflation data. Cristina FERNANDEZ DE KIRCHNER succeeded her husband as President in late 2007, and the rapid economic growth of previous years began to slow sharply the following year as government policies held back exports and the world economy fell

into recession. The economy has rebounded strongly from the 2009 recession, but the government's continued reliance on expansionary fiscal and monetary policies

TRANSNATIONAL ISSUES

Disputes—International: Argentina continues to assert its claims to the UK-administered Falkland Islands (Islas Malvinas), South Georgia, and the South Sandwich Islands in its constitution, forcibly occupying the Falklands in 1982, but in 1995 agreed to no longer seek settlement by force; UK continues to reject Argentine requests for sovereignty talks; territorial claim in Antarctica partially overlaps UK and Chilean claims; uncontested dispute between Brazil and Uruguay over Brazileira/Brasiliera Island in the Quarai/Cuareim River leaves the tripoint with Argentina in question; in 2010, the ICJ ruled in favor of Uruguay's operation of two paper mills on the Uruguay River, which forms the border with Argentina; the two countries formed a joint pollution monitoring regime; the joint boundary commission, established by Chile and Argentina in 2001 has yet to map and demarcate the delimited boundary in the inhospitable Andean Southern Ice Field (Campo de Hielo Sur); contraband smuggling, human trafficking, and illegal narcotic trafficking are problems in the porous areas of the border with Bolivia

Illicit drugs: a transshipment country for cocaine headed for Europe, heroin headed for the US, and ephedrine and pseudoephedrine headed for Mexico; some money-laundering activity, especially in the Tri-Border Area; law enforcement corruption; a source for precursor chemicals; increasing domestic consumption of drugs in urban centers, especially cocaine base and synthetic drugs (2008)

ARMENIA

INTRODUCTION

Background: Armenia prides itself on being the first nation to formally adopt Christianity (early 4th century). Despite periods of autonomy, over the centuries Armenia came under the sway of various empires including the Roman, Byzantine, Arab, Persian, and Ottoman. During World War I in the western portion of Armenia, Ottoman Turkey instituted a policy of forced resettlement coupled with other harsh practices that resulted in at least 1 million Armenian deaths. The eastern area of Armenia was ceded by the Ottomans to Russia in 1828; this portion declared its independence in 1918, but was conquered by the Soviet Red Army in 1920. Armenian leaders remain preoccupied by the long conflict with Azerbaijan over Nagorno-Karabakh, a primarily Armenian-populated region, assigned to Soviet Azerbaijan in the 1920s by Moscow. Armenia and Azerbaijan began fighting over the area in 1988; the struggle escalated after both countries attained independence from the Soviet Union in 1991. By May 1994, when a cease-fire took hold, ethnic Armenian forces held not only Nagorno-Karabakh but also a significant portion of Azerbaijan proper. The economies of both sides have been hurt by their inability to make substantial progress toward a peaceful resolution. Turkey closed the common border with Armenia in 1994 in support of Azerbaijan in its conflict with Armenia over control of Nagorno-Karabakh and surrounding areas, further hampering Armenian economic growth. In 2009, senior Armenian leaders began pursuing rapprochement with Turkey, aiming to secure an opening of the border.

ECONOMY

Economy—overview: After several years of double-digit economic growth, Armenia faced a severe economic recession with GDP declining more than 14% in 2009, despite large loans from multilateral institutions. Sharp declines in the construction sector and workers' remittances, particularly from Russia, led the downturn. The economy began to recover in 2010 with 2.1% growth, and picked up to 4.6% growth in 2011. Under the old Soviet central planning system, Armenia developed a modern industrial sector, supplying machine tools, textiles, and other manufactured goods to sister republics, in exchange for raw materials and energy. Armenia has since switched to small-scale agriculture and away from the large agroindustrial complexes of the Soviet era. Armenia has managed to reduce poverty, slash inflation, stabilize its currency, and privatize most small- and medium-sized enterprises. Armenia's geographic isolation, a narrow export base, and pervasive monopolies in important business sectors have made it particularly vulnerable to the sharp deterioration in the global economy and the economic downturn in Russia. The conflict with Azerbaijan over the ethnic Armenian-dominated region of Nagorno-Karabakh contributed to a severe economic decline in the early 1990s and Armenia's borders with Turkey remain closed. Armenia is particularly dependent on Russian commercial and governmental support and most key Armenian infrastructure is Russian-owned and/or managed, especially in the energy sector. The electricity distribution system was privatized in 2002 and bought by Russia's RAO-UES in 2005. Natural gas is primarily imported from Russia but construction of a pipeline to deliver natural gas from Iran to Armenia was completed in December 2008, and gas deliveries expanded after the April 2010 completion of the Yerevan Thermal Power Plant. Armenia's severe trade imbalance has been offset somewhat by international aid, remittances from Armenians working abroad, and foreign direct investment. Armenia joined the WTO in January 2003. The government made some improvements in tax and customs administration in recent years, but anti-corruption measures have been ineffective and the economic downturn has led to a sharp drop in tax revenue and forced the government to accept large loan packages from Russia, the IMF, and other international financial institutions. Amendments to tax legislation, including the introduction of the first ever "luxury tax" in 2011, aim to increase the ratio of budget revenues to GDP, which still remains at low levels. Armenia will need to pursue additional economic reforms

and to strengthen the rule of law in order to regain economic growth and improve economic competitiveness and employment opportunities, especially given its economic isolation from two of its nearest neighbors, Turkey and Azerbaijan.

TRANSNATIONAL ISSUES

Disputes—international: the dispute over the break-away Nagorno-Karabakh

region and the Armenian military occupation of surrounding lands in Azerbaijan remains the primary focus of regional instability; residents have evacuated the former Soviet-era small ethnic enclaves in Armenia and Azerbaijan; Turkish authorities have complained that blasting from quarries in Armenia might be damaging the medieval ruins of Ani, on the other side of the Arpacay valley; in 2009, Swiss mediators facilitated an accord reestablishing diplomatic ties between Armenia and Turkey, but neither side has ratified the agreement and the rapprochement effort has faltered; local border forces struggle to control the illegal transit of goods and people across the porous, undemarcated Armenian, Azerbaijani, and Georgian borders; ethnic Armenian groups in the Javakheti region of Georgia seek greater autonomy from the Georgian Government

Refugees and internally displaced persons: *refugees (country of origin):* 113,295 (Azerbaijan)

IDPs: 8,400 (conflict with Azerbaijan over Nagorno-Karabakh, majority have returned home since 1994 ceasefire) (2007)

Illicit drugs: illicit cultivation of small amount of cannabis for domestic consumption; minor transit point for illicit drugs—mostly opium and hashish—moving from Southwest Asia to Russia and to a lesser extent the rest of Europe

ARUBA

INTRODUCTION

Background: Discovered and claimed for Spain in 1499, Aruba was acquired by the Dutch in 1636. The island's economy has been dominated by three main industries. A 19th century gold rush was followed by prosperity brought on by the opening in 1924 of an oil refinery. The last decades of the 20th century saw a boom in the tourism industry. Aruba seceded from the Netherlands Antilles

in 1986 and became a separate, autonomous member of the Kingdom of the Netherlands. Movement toward full independence was halted at Aruba's request in 1990.

ECONOMY

Economy—overview: Tourism and offshore banking are the mainstays of the small open Aruban economy. Oil refining and storage ended in 2009. The rapid growth of the tourism sector over the last decade has resulted in a substantial expansion of other activities. Over 1.5 million tourists per year visit Aruba with 75% of those from the US. Construction continues to boom with hotel capacity five times the 1985 level. Tourist arrivals rebounded strongly following a dip after the 11 September 2001 attacks. The government has made cutting the budget and trade deficits a high priority.

ASHMORE AND CARTIER ISLANDS

INTRODUCTION

Background: These uninhabited islands came under Australian authority in 1931; formal administration began two years later. Ashmore Reef supports a rich and diverse avian and marine habitat; in 1983, it became a National Nature Reserve. Cartier Island, a former bombing range, became a marine reserve in 2000.

GEOGRAPHY

Location: Southeastern Asia, islands in the Indian Ocean, midway between northwestern Australia and Timor island

Geographic coordinates:

Area—comparative: about eight times the size of The Mall in Washington, DC

Land boundaries: 0 km

Coastline: 74.1 km

Maritime claims: territorial sea: 12 nm
contiguous zone: 12 nm

exclusive fishing zone: 200 nm

continental shelf: 200 m depth or to the depth of exploitation

Climate: tropical

Terrain: low with sand and coral

Elevation extremes:

lowest point: Indian Ocean 0 m

highest point: unnamed location 3 m

Natural resources: fish

Land use: arable land: 0%

permanent crops: 0%

other: 100% (all grass and sand) (2005)

Irrigated land: 0 sq km

Natural hazards: surrounded by shoals and reefs that can pose maritime hazards

Environment—current issues: illegal killing of protected wildlife by traditional Indonesian fisherman, as well as fishing by non-traditional Indonesian vessels, are ongoing problems

Geography—note: Ashmore Reef National Nature Reserve established in August 1983; Cartier Island Marine Reserve established in 2000

PEOPLE AND SOCIETY

Population: no indigenous inhabitants

note: Indonesian fishermen are allowed access to the lagoon and fresh water at Ashmore Reef's West Island; access to East and Middle Islands is by permit only

GOVERNMENT

Country name: conventional long form: Territory of Ashmore and Cartier Islands

conventional short form: Ashmore and Cartier Islands

Dependency status: territory of Australia; administered from Canberra by the Department of Regional Australia, Regional Development and Local Government

Legal system: the laws of the Commonwealth of Australia and the laws of the Northern Territory of Australia, where applicable, apply

Diplomatic representation in the US: none (territory of Australia)

Diplomatic representation from the US: none (territory of Australia)

Flag description: the flag of Australia is used

ECONOMY

Economy—overview: no economic activity

TRANSPORTATION

Ports and terminals: none; offshore anchorage only

MILITARY

Military—note: defense is the responsibility of Australia; periodic visits by the Royal Australian Navy and Royal Australian Air Force

TRANSNATIONAL ISSUES

Disputes—international: Australia has closed parts of the Ashmore and Cartier reserve to Indonesian traditional fishing; Indonesian groups challenge Australia's claim to Ashmore Reef

ATLANTIC OCEAN

INTRODUCTION

Background: The Atlantic Ocean is the second largest of the world's five oceans (after the Pacific Ocean, but larger than the Indian Ocean, Southern Ocean, and Arctic Ocean). The Kiel Canal (Germany), Oresund (Denmark-Sweden), Bosphorus (Turkey), Strait of Gibraltar (Morocco-Spain), and the Saint Lawrence Seaway (Canada-US) are important strategic access waterways. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth world ocean, the Southern Ocean, removed the portion of the Atlantic Ocean south of 60 degrees south latitude.

GEOGRAPHY

Location: body of water between Africa, Europe, the Arctic Ocean, the Americas, and the Southern Ocean

Geographic coordinates: 0 00 N, 25 00 W
Map references: Political Map of the World

Area: total: 76.762 million sq km

note: includes Baltic Sea, Black Sea, Caribbean Sea, Davis Strait, Denmark Strait, part of the Drake Passage, Gulf of Mexico, Labrador Sea, Mediterranean Sea, North Sea, Norwegian Sea, almost all of the Scotia Sea, and other tributary water bodies

Area—comparative: slightly less than 6.5 times the size of the US

Coastline: 111,866 km

Climate: tropical cyclones (hurricanes) develop off the coast of Africa near Cape Verde and move westward into the Caribbean Sea; hurricanes can occur from May to December but are most frequent from August to November

Terrain: surface usually covered with sea ice in Labrador Sea, Denmark Strait, and coastal portions of the Baltic Sea from October to June; clockwise warm-water gyre (broad, circular system of currents) in the northern Atlantic, counterclockwise warm-water gyre in the southern Atlantic; the ocean floor is dominated by the Mid-Atlantic Ridge, a rugged north-south centerline for the entire Atlantic basin

Elevation extremes: lowest point: Milwaukee Deep in the Puerto Rico Trench -8,605 m

highest point: sea level 0 m

Natural resources: oil and gas fields, fish, marine mammals (seals and whales), sand and gravel aggregates, placer deposits, poly-metallic nodules, precious stones

Natural hazards: icebergs common in Davis Strait, Denmark Strait, and the northwestern Atlantic Ocean from February to August and have been spotted as far south as Bermuda and the Madeira Islands; ships subject to superstructure icing in extreme northern Atlantic from October to May; persistent fog can be a maritime hazard from May to September; hurricanes (May to December)

Environment—current issues: endangered marine species include the manatee,

seals, sea lions, turtles, and whales; drift net fishing is hastening the decline of fish stocks and contributing to international disputes; municipal sludge pollution off eastern US, southern Brazil, and eastern Argentina; oil pollution in Caribbean Sea, Gulf of Mexico, Lake Maracaibo, Mediterranean Sea, and North Sea; industrial waste and municipal sewage pollution in Baltic Sea, North Sea, and Mediterranean Sea

Geography—note: major chokepoints include the Dardanelles, Strait of Gibraltar, access to the Panama and Suez Canals; strategic straits include the Strait of Dover, Straits of Florida, Mona Passage, The Sound (Oresund), and Windward Passage; the Equator divides the Atlantic Ocean into the North Atlantic Ocean and South Atlantic Ocean

ECONOMY

Economy—overview: The Atlantic Ocean provides some of the world's most heavily trafficked sea routes, between and within the Eastern and Western Hemispheres. Other economic activity includes the exploitation of natural resources, e.g., fishing, dredging of aragonite sands (The Bahamas), and production of crude oil and natural gas (Caribbean Sea, Gulf of Mexico, and North Sea).

TRANSPORTATION

Ports and terminals: Alexandria (Egypt), Algiers (Algeria), Antwerp (Belgium), Barcelona (Spain), Buenos Aires (Argentina), Casablanca (Morocco), Colon

(Panama), Copenhagen (Denmark), Dakar (Senegal), Gdansk (Poland), Hamburg (Germany), Helsinki (Finland), Las Palmas (Canary Islands, Spain), Le Havre (France), Lisbon (Portugal), London (UK), Marseille (France), Montevideo (Uruguay), Montreal (Canada), Naples (Italy), New Orleans (US), New York (US), Oran (Algeria), Oslo (Norway), Peiraiefs or Piraeus (Greece), Rio de Janeiro (Brazil), Rotterdam (Netherlands), Saint Petersburg (Russia), Stockholm (Sweden)

Transportation—note:

Kiel Canal and Saint Lawrence Seaway are two important waterways; significant domestic commercial and recreational use of Intracoastal Waterway on central and south Atlantic seaboard and Gulf of Mexico coast of US; the International Maritime Bureau reports the territorial waters of littoral states and offshore Atlantic waters as high risk for piracy and armed robbery against ships, particularly in the Gulf of Guinea off West Africa, the east coast of Brazil, and the Caribbean Sea; numerous commercial vessels have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargoes stolen; crews have been robbed and stores or cargoes stolen

TRANSNATIONAL ISSUES

Disputes—International:

some maritime disputes (see littoral states)

AUSTRALIA

INTRODUCTION

Background: Aboriginal settlers arrived on the continent from Southeast Asia about 40,000 years before the first Europeans began exploration in the 17th century. No formal territorial claims were made until 1770, when Capt. James COOK took possession of the east coast in the name of Great Britain (all of Australia was claimed

as British territory in 1829 with the creation of the colony of Western Australia). Six colonies were created in the late 18th and 19th centuries; they federated and became the Commonwealth of Australia in 1901. The new country took advantage of its natural resources to rapidly develop agricultural and manufacturing industries and to make a major contribution to the British effort in World Wars I and II. In recent decades, Australia has transformed itself into an internationally competitive, advanced market economy. It boasted one of the OECD's fastest growing economies during the 1990s, a performance due in large part to economic reforms adopted in the 1980s. Long-term concerns include ageing of the population, pressure on infrastructure, and environmental issues such as frequent droughts.

GEOGRAPHY

Location: Oceania, continent between the Indian Ocean and the South Pacific Ocean

Geographic coordinates: 27 00 S, 133 00 E

Map references: Oceania

Area: total: 7,741,220 sq km

country comparison to the world: 6

land: 7,682,300 sq km

water: 58,920 sq km

note: includes Lord Howe Island and Macquarie Island

Area—comparative: slightly smaller than the US contiguous 48 states

Land boundaries: 0 km

Coastline: 25,760 km

Maritime claims: territorial sea: 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: 200 nm or to the edge of the continental margin

Climate: generally arid to semiarid; temperate in south and east; tropical in north

Terrain: mostly low plateau with deserts; fertile plain in southeast

Elevation extremes: lowest point: Lake Eyre -15 m

highest point: Mount Kosciuszko 2,229 m

Natural resources: bauxite, coal, iron ore, copper, tin, gold, silver, uranium, nickel, tungsten, rare earth elements, mineral sands, lead, zinc, diamonds, natural gas, petroleum

note: Australia is the world's largest net exporter of coal accounting for 29% of global coal exports

per capita: 1,193 cu m/yr (2000)

Natural hazards: cyclones along the coast; severe droughts; forest fires
volcanism: volcanic activity on Heard and McDonald Islands

Environment—current issues: soil erosion from overgrazing, industrial development, urbanization, and poor farming practices; soil salinity rising due to the use of poor quality water; desertification; clearing for agricultural purposes threatens the natural habitat of many unique animal and plant species; the Great Barrier Reef off the northeast coast, the largest coral reef in the world, is threatened by increased shipping and its popularity as a tourist site; limited natural freshwater resources

Environment—international agreements: *party to:* Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Marine Life Conservation, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling
signed, but not ratified: none of the selected agreements

Geography—note: world's smallest continent but sixth-largest country; the only continent without glaciers; population concentrated along the eastern and south-eastern coasts; the invigorating sea breeze known as the "Fremantle Doctor" affects the city of Perth on the west coast and is one of the most consistent winds in the world

Flag description: blue with the flag of the UK in the upper hoist-side quadrant and a large seven-pointed star in the lower hoist-side quadrant known as the Commonwealth or Federation Star, representing the federation of the colonies of Australia in 1901; the star depicts one point for each of the six original states and one representing all of Australia's internal and external territories; on the fly half is a representation of the Southern Cross constellation in white with one small five-pointed star and four larger, seven-pointed stars

National symbol(s): Southern Cross constellation (five, seven-pointed stars); kangaroo; emu

National anthem: name: "Advance Australia Fair"

lyrics/music: Peter Dodds McCORMICK

note: adopted 1984; although originally written in the late 19th century, the anthem did not become used for all official occasions until 1984; as a Commonwealth country, in addition to the national anthem, "God Save the Queen" is also played at Royal functions (see United Kingdom)

ECONOMY

Economy—overview: Australia's abundant and diverse natural resources attract high levels of foreign investment and include extensive reserves of coal, iron ore, copper, gold, natural gas, uranium, and renewable energy sources. A series of major investments, such as the US\$40 billion Gorgon Liquid Natural Gas project, will significantly expand the resources sector. Australia also has a large services sector and is a significant exporter of natural resources, energy, and food. Key tenets of Australia's trade policy include support for open trade and the successful culmination of the Doha Round of multilateral trade negotiations, particularly for agriculture and services. The Australian economy grew for 17 consecutive years before the global financial crisis. Subsequently, the former RUDD government introduced a fiscal stimulus package worth over US\$50 billion to offset the effect of the slowing world economy, while the Reserve Bank of Australia cut interest

rates to historic lows. These policies—and continued demand for commodities, especially from China—helped the Australian economy rebound after just one quarter of negative growth. The economy grew by 1.4% during 2009—the best performance in the OECD—by 2.7% in 2010, and by 1.8% in 2011. Unemployment, originally expected to reach 8–10%, peaked at 5.7% in late 2009 and fell to 5.0% in 2011. As a result of an improved economy, the budget deficit is expected to peak below 4.2% of GDP and the government could return to budget surpluses as early as 2015. Australia was one of the first advanced economies to raise interest rates, with seven rate hikes between October 2009 and November 2010. The GILLARD government is focused on raising Australia's economic productivity to ensure the sustainability of growth, and continues to manage the symbiotic, but sometimes tense, economic relationship with China. Australia is engaged in the Trans-Pacific Partnership talks and ongoing free trade agreement negotiations with China, Japan, and Korea

TRANSNATIONAL ISSUES

Disputes—International: In 2007, Australia and Timor-Leste agreed to a 50-year development zone and revenue sharing arrangement and deferred a maritime boundary; Australia asserts land and mari-

time claims to Antarctica; Australia's 2004 submission to Commission on the Limits of the Continental Shelf (CLCS) extends its continental margins over 3.37 million square kilometers, expanding its seabed roughly 30 percent beyond its claimed exclusive economic zone; all borders between Indonesia and Australia have been agreed upon bilaterally, but a 1997 treaty that would settle the last of their maritime and Exclusive Economic Zone (EEZ) boundary has yet to be ratified by Indonesia's legislature; Indonesian groups challenge Australia's claim to Ashmore Reef; Australia closed parts of the Ashmore and Cartier reserve to Indonesian traditional fishing

Illicit drugs: Tasmania is one of the world's major suppliers of licit opiate products; government maintains strict controls over areas of opium poppy cultivation and output of poppy straw concentrate; major consumer of cocaine and amphetamines

AUSTRIA

INTRODUCTION

Background: Once the center of power for the large Austro-Hungarian Empire, Austria was reduced to a small republic after its defeat in World War I. Following annexation by Nazi Germany in 1938 and subsequent occupation by the victorious Allies in 1945, Austria's status remained unclear for a decade. A State Treaty signed in 1955 ended the occupation, recognized Austria's independence, and forbade unification with Germany. A constitutional law that same year declared the country's "perpetual neutrality" as a condition for Soviet military withdrawal. The Soviet Union's collapse in 1991 and Austria's entry into the European Union in 1995 have altered the meaning of this neutrality. A prosperous, democratic country, Austria entered the EU Economic and Monetary Union in 1999.

Flag description: three equal horizontal bands of red (top), white, and red; the flag design is certainly one of the oldest—if not the oldest—national banners in the world; according to tradition, in 1191, following a fierce battle in the Third Crusade, Duke Leopold V of Austria's white tunic became completely blood-spattered; upon removal of his wide belt or sash, a white band was revealed; the red-white-red color combination was subsequently adopted as his banner

National symbol(s): black eagle

National anthem: name: "Bundeshymne" (Federal Hymn)

lyrics/music: Paula von PRERADOVIC/Wolfgang Amadeus MOZART or Johann HOLZER (disputed)

note: adopted 1947; the anthem is also known as "Land der Berge, Land am Strome" (Land of the Mountains, Land on the River); Austria adopted a new national anthem after World War II to replace the former imperial anthem composed by Franz Josef HAYDN, which had been appropriated

by Germany in 1922 and was now associated with the Nazi regime

ECONOMY

Economy—overview: Austria, with its well-developed market economy, skilled labor force, and high standard of living, is closely tied to other EU economies, especially Germany's. Its economy features a large service sector, a sound industrial sector, and a small, but highly developed agricultural sector. Following several years of solid foreign demand for Austrian exports and record employment growth, the international financial crisis of 2008 and subsequent global economic downturn led to a sharp but brief recession. Austrian GDP contracted 3.9% in 2009 but saw positive growth of about 2% in 2010 and 3% in 2011. Unemployment did not rise as steeply in Austria as elsewhere in Europe, partly because the government subsidized reduced working hour schemes to allow companies to retain employees. Stabilization measures, stimulus spending, and an income tax reform pushed the budget deficit to 4.7% in 2010 and 3.6% in 2011, from only about 1.3% in 2008. The international financial crisis of 2008 caused difficulties for Austria's largest banks whose extensive operations in central, eastern, and southeastern Europe faced large losses. The government provided bank support—including in some instances, nationalization—to support aggregate demand and stabilize the banking system. Austria's fiscal position compares favorably with other euro-zone countries, but it faces considerable external risks, such as Austrian banks' continued high exposure to central and eastern Europe as well as political and economic uncertainties caused by the European sovereign debt crisis. In 2011 the government attempted to pass a constitutional amendment limiting public debt to 60% of GDP by 2020, but it was unable to obtain sufficient support in parliament and instead passed the measure as a simple law. In March 2012, the Austrian parliament approved an austerity budget that will bring public finances into balance by 2016.

AZERBAIJAN

INTRODUCTION

Background: Azerbaijan—a nation with a majority-Turkic and majority-shia Muslim population—was briefly independent (from 1918 to 1920) following the collapse of the Russian Empire; it was subsequently incorporated into the Soviet Union for seven decades. Despite a 1994 cease-fire, Azerbaijan has yet to resolve its conflict with Armenia over Nagorno-Karabakh, a primarily Armenian-populated region that Moscow recognized as part of Soviet Azerbaijan in the 1920s after Armenia and Azerbaijan disputed the status of the territory. Armenia and Azerbaijan began fighting over the area in 1988; the struggle escalated after both countries attained independence from the Soviet Union in 1991. By May 1994, when a cease-fire took hold, ethnic Armenian forces held not only Nagorno-Karabakh but also seven surrounding provinces in the territory of Azerbaijan. Corruption in the country is ubiquitous, and the government, which eliminated presidential term limits in a 2009 referendum, has been accused of authoritarianism. Although the poverty rate has been reduced in recent years due to revenue from oil production, the promise of widespread wealth resulting from the continued development of Azerbaijan's energy sector remains largely unfulfilled.

GEOGRAPHY

Location: Southwestern Asia, bordering the Caspian Sea, between Iran and Russia, with a small European portion north of the Caucasus range

Geographic coordinates: 40 30 N, 47 30 E

Map references: Middle East

Area:

total: 86,600 sq km

country comparison to the world: 112

land: 82,629 sq km

water: 3,971 sq km

note: includes the exclave of Naxçıvan Autonomous Republic and the Nagorno-Karabakh region; the region's autonomy was abolished by Azerbaijani Supreme Soviet on 26 November 1991

Area—comparative: slightly smaller than Maine

Land boundaries: total: 2,013 km

border countries: Armenia (with Azerbaijan-proper) 566 km, Armenia (with Azerbaijan-Naxçıvan exclave) 221 km, Georgia 322 km, Iran (with Azerbaijan-proper) 432 km, Iran (with Azerbaijan-Naxçıvan exclave) 179 km, Russia 284 km, Turkey 9 km

Coastline: 0 km (landlocked); note—Azerbaijan borders the Caspian Sea (713 km)

Maritime claims: none (landlocked)

Climate: dry, semiarid steppe

Terrain: large, flat Kur-Araz Ovaligi (Kura-Araks Lowland, much of it below sea level) with Great Caucas Mountains to the north, Qarabag Yaylasi (Karabakh Upland) in west; Baku lies on Abseron Yasaqligi (Apsheron Peninsula) that juts into Caspian Sea

Elevation extremes: lowest point: Caspian Sea -28 m

highest point: Bazarduzu Dagi 4,485 m

Natural resources: petroleum, natural gas, iron ore, nonferrous metals, bauxite

Land use: arable land: 20.62%

permanent crops: 2.61%

other: 76.77% (2005)

Irrigated land: 14,300 sq km (2003)

ECONOMY

Economy—overview: Azerbaijan's high economic growth during 2006–08 was attributable to large and growing oil exports, but some non-export sectors also featured double-digit growth, including construction, banking, and real estate, although most of this increase was tied to growth in the hydrocarbon sector. In 2011, economic growth slowed to 0.2%, largely because oil production reached a plateau. The current global economic slowdown presents some challenges for the Azerbaijani economy as oil prices remain volatile, highlighting Azerbaijan's reliance on energy exports and lackluster attempts to diversify its economy. Oil exports through the Baku-Tbilisi-Ceyhan Pipeline remain the main economic driver while efforts to boost Azerbaijan's gas production are underway. However, Azerbaijan has made only limited progress on instituting market-based economic reforms. Pervasive public and private sector corruption and structural economic inefficiencies remain a drag on long-term growth, particularly in non-energy sectors. Several other obstacles impede Azerbaijan's economic progress, including the need for stepped up foreign investment in the non-energy sector and the continuing conflict with Armenia over the Nagorno-Karabakh region. Trade with Russia and the other former Soviet republics is declining in importance, while trade is building with Turkey and the nations of Europe. Long-term prospects depend on world oil prices, the location of new oil and gas pipelines in the region, Azerbaijan's ability to negotiate export routes for its growing gas production, and its ability to manage its energy wealth to promote growth and spur employment in non-energy sectors of the economy.

tier rating: Tier 2 Watch List—Azerbaijan is on the Tier 2 Watch List for not fully complying with the minimum standards for the elimination of trafficking; the Government of Azerbaijan has not made sufficient progress in investigating, prosecuting, or convicting labor trafficking offenses or in identifying victims of forced labor (2008)

Illicit drugs: limited illicit cultivation of cannabis and opium poppy, mostly for CIS consumption; small government eradication program; transit point for Southwest Asian opiates bound for Russia and to a lesser extent the rest of Europe

BAHAMAS

INTRODUCTION

Background: Lucayan Indians inhabited the islands when Christopher COLUMBUS first set foot in the New World on San Salvador in 1492. British settlement of the islands began in 1647; the islands became a colony in 1783. Since attaining independence from the UK in 1973, The Bahamas has prospered through tourism and international banking and investment management. Because of its geography, the country is a major transshipment point for illegal drugs, particularly shipments to the US and Europe, and its territory is used for smuggling illegal migrants into the US.

ECONOMY

Economy—overview: The Bahamas is one of the wealthiest Caribbean countries with an economy heavily dependent on tourism and offshore banking. Tourism together with tourism-driven construction and manufacturing accounts for approximately 60% of GDP and directly or indirectly employs half of the archipelago's labor force. Prior to 2006, a steady growth in tourism receipts and a boom in construction of new hotels, resorts, and residences led to solid GDP growth but since then tourism receipts have begun to drop off. The global recession in 2009 took a sizeable toll on The Bahamas, resulting in a contraction in GDP and a widening budget deficit. The decline was reversed in 2010-11 as tourism from the US and sector investment returned. Financial services constitute the second-most important sector of the Bahamian economy and, when combined with business services, account for about 36% of GDP. However, the financial sector currently is smaller than it has been in the past because of the enactment of new and stricter financial regulations in 2000 that caused many inter-

national businesses to relocate elsewhere. Manufacturing and agriculture combined contribute approximately a 10th of GDP and show little growth, despite government incentives aimed at those sectors. Overall growth prospects in the short run rest heavily on the fortunes of the tourism sector and foreign investment in tourism related infrastructure projects. The government also completed the sale of 51% of the telecommunications company in 2011 after 14 years of trying to privatize the state-owned enterprise.

BAHRAIN

INTRODUCTION

Background: In 1783, the Sunni Al-Khalifa family captured Bahrain from the Persians. In order to secure these holdings, it entered into a series of treaties with the UK during the 19th century that made Bahrain a British protectorate. The archipelago attained its independence in 1971. Facing declining oil reserves, Bahrain has turned to petroleum processing and refining and has transformed itself into an international banking center. Bahrain's small size and central location among Persian Gulf countries require it to play a delicate balancing act in foreign affairs among its larger neighbors. In addition, the Sunni-led government has struggled to manage relations with its large Shia-majority population. During the mid-to-late 1990s, Shia activists mounted a low-intensity uprising to demand that the Sunni-led government stop systemic economic, social, and political discrimination against Shia Bahrainis. King HAMAD bin Isa Al-Khalifa, after succeeding his late father in 1999, pushed economic and political reforms in part to improve relations with the Shia community. After boycotting the country's first round of democratic elections under the newly-promulgated constitution in 2002, Shia political societies participated in 2006 and 2010 in legislative and municipal elections and Wifaq, the largest Shia political society, won the largest bloc of seats in the elected lower-house of the legislature both times. In early 2011, Bahrain's fractious opposition sought to ride a rising tide of popular Arab protests to petition for the redress of popular grievances. In mid-March 2011, with the backing of Gulf Cooperation Council (GCC) capitals, King HAMAD put an end to the mass public gatherings and increasingly disruptive civil disobedience by declaring a state of emergency. Manama also welcomed a contingent of mostly Saudi and Emirati forces as part of a GCC deployment intended to help Bahraini security forces maintain order. Since that time, intermittent efforts at political dialogue between the government and opposition have remained at

a stalemate. The Bahrain Independent Commission of Inquiry (BICI), formed in June 2011 to investigate abuses during the unrest and state of emergency, released its final report in November 2011. The King fully endorsed the report, and since then Manama has begun to implement many of the BICI's recommendations, including improving policing procedures, reinstating fired workers, rebuilding some mosques, and establishing a compensation fund for those affected by the unrest and crack-down. Despite this progress, street protests have grown increasingly violent since the beginning of 2012.

ECONOMY

Economy—overview: Bahrain is one of the most diversified economies in the Persian Gulf. Highly developed communication and transport facilities make Bahrain home to numerous multinational firms with business in the Gulf. As part of its diversification plans, Bahrain implemented a Free Trade Agreement (FTA) with the US in August 2006, the first FTA between the US and a Gulf state. Bahrain's economy, however, continues to depend heavily on oil. Petroleum production and refining account for more than 60% of Bahrain's export receipts, 70% of government revenues, and 11% of GDP (exclusive of allied industries). Other major economic activities are production of aluminum—Bahrain's second biggest export after oil—finance, and construction. Bahrain competes with Malaysia as a worldwide center for Islamic banking and continues to seek new natural gas supplies as feedstock to support its expanding petrochemical and aluminum industries. In 2011, Bahrain experienced economic setbacks as a result of domestic unrest. Bahrain's reputation as a financial hub of the Gulf has been damaged, and the country now risks losing financial institutions to other regional centers such as Dubai or Doha. Economic policies aimed at restoring confidence in Bahrain's economy, such as the suspension of an expatriate labor tax, will make Bahrain's foremost long-term economic challenges—youth unemployment and the growth of government debt—more difficult to address.

BAKER ISLAND

INTRODUCTION

Background: All of the following US Pacific island territories except Midway Atoll constitute the Pacific Remote Islands National Wildlife Refuge (NWR) Complex and as such are managed by the Fish and Wildlife Service of the US Department of the Interior. Midway Atoll NWR has been included in a Refuge Complex with the Hawaiian Islands NWR and also designated as part of Papahānaumokuākea Marine National Monument. These remote refuges are the most widespread collection of marine- and terrestrial-life protected areas on the planet under a single country's jurisdiction. They sustain many endemic species including corals, fish, shellfish, marine mammals, seabirds, water birds, land birds, insects, and vegetation not found elsewhere. *Baker Island:* The US took possession of the island in 1857. Its guano deposits were mined by US and British companies during the second half of the 19th century. In 1935, a short-lived attempt at colonization began on this island but was disrupted by World War II and thereafter abandoned. The island was established as a NWR in 1974.

Howland Island: Discovered by the US early in the 19th century, the uninhabited atoll was officially claimed by the US in 1857. Both US and British companies mined for guano deposits until about 1890. In 1935,

a short-lived attempt at colonization began on this island, similar to the effort on nearby Baker Island, but was disrupted by World War II and thereafter abandoned. The famed American aviatrix Amelia EARHART disappeared while seeking out Howland Island as a refueling stop during her 1937 round-the-world flight; Earhart Light, a day beacon near the middle of the west coast, was named in her memory. The island was established as a NWR in 1974.

Jarvis Island: First discovered by the British in 1821, the uninhabited island was annexed by the US in 1858 but abandoned in 1879 after tons of guano had been removed. The UK annexed the island in 1889 but never carried out plans for further exploitation. The US occupied and reclaimed the island in 1935. It was abandoned in 1942 during World War II. The island was established as a NWR in 1974.

Johnston Atoll: Both the US and the Kingdom of Hawaii annexed Johnston Atoll in 1858, but it was the US that mined the guano deposits until the late 1880s. Johnston and Sand Islands were designated wildlife refuges in 1926. The US Navy took over the atoll in 1934. Subsequently, the US Air Force assumed control in 1948. The site was used for high-altitude nuclear tests in the 1950s and 1960s. Until late in 2000 the atoll was maintained as a storage and disposal site for chemical weapons. Munitions destruction, cleanup, and closure of the facility were completed by May 2005. The Fish and Wildlife Service and the US Air Force are currently discussing future management options; in the interim, Johnston Atoll and the three-mile Naval Defensive Sea around it remain under the jurisdiction and administrative control of the US Air Force.

Kingman Reef: The US annexed the reef in 1922. Its sheltered lagoon served as a way station for flying boats on Hawaii-to-American Samoa flights during the late 1930s. There are no terrestrial plants on the reef, which is frequently awash, but it does support abundant and diverse marine fauna and flora. In 2001, the waters surrounding the reef out to 12 nm were designated a US NWR.

Midway Islands: The US took formal possession of the islands in 1867. The laying of the trans-Pacific cable, which passed through the islands, brought the first residents in 1903. Between 1935 and 1947,

Midway was used as a refueling stop for trans-Pacific flights. The US naval victory over a Japanese fleet off Midway in 1942 was one of the turning points of World War II. The islands continued to serve as a naval station until closed in 1993. Today the islands are a NWR and are the site of the world's largest Laysan albatross colony. *Palmyra Atoll:* The Kingdom of Hawaii claimed the atoll in 1862, and the US included it among the Hawaiian Islands when it annexed the archipelago in 1898. The Hawaii Statehood Act of 1959 did not include Palmyra Atoll, which is now partly privately owned by the Nature Conservancy with the rest owned by the Federal government and managed by the US Fish and Wildlife Service. These organizations are managing the atoll as a wildlife refuge. The lagoons and surrounding waters within the 12 nm US territorial seas were transferred to the US Fish and Wildlife Service and designated as a NWR in January 2001.

Climate: Baker, Howland, and Jarvis Islands: equatorial; scant rainfall, constant wind, burning sun

Johnston Atoll and Kingman Reef: tropical, but generally dry; consistent northeast trade winds with little seasonal temperature variation

Midway Islands: subtropical with cool, moist winters (December to February) and warm, dry summers (May to October); moderated by prevailing easterly winds; most of the 1,067 mm (42 in) of annual rainfall occurs during the winter

Palmyra Atoll: equatorial, hot; located within the low pressure area of the Inter-tropical Convergence Zone (ITCZ) where the northeast and southeast trade winds meet, it is extremely wet with between

4,000–5,000 mm (160–200 in) of rainfall each year

Terrain: low and nearly level sandy coral islands with narrow fringing reefs that have developed at the top of submerged volcanic mountains, which in most cases rise steeply from the ocean floor

Elevation extremes: lowest point: Pacific Ocean 0 m

highest point: Baker Island, unnamed location—8 m; Howland Island, unnamed location—3 m; Jarvis Island, unnamed location—7 m; Johnston Atoll, Sand Island—10 m; Kingman Reef, unnamed location—less than 2 m; Midway Islands, unnamed location—13 m; Palmyra Atoll, unnamed location—3 m

Natural resources: terrestrial and aquatic wildlife

Land use: arable land: 0%

permanent crops: 0%

other: 100% (2008)

Natural hazards: Baker, Howland, and Jarvis Islands: the narrow fringing reef surrounding the island can be a maritime hazard

Kingman Reef: wet or awash most of the time, maximum elevation of less than 2 m makes Kingman Reef a maritime hazard
Midway Islands, Johnston, and Palmyra Atolls: NA

Environment—current issues: Baker, Howland, and Jarvis Islands, and Johnston Atoll: no natural freshwater resources

Kingman Reef: none

Midway Islands and Palmyra Atoll: NA

Geography—note: Baker, Howland, and Jarvis Islands: scattered vegetation consisting of grasses, prostrate vines, and low growing shrubs; primarily a nesting, roosting, and foraging habitat for seabirds, shorebirds, and marine wildlife; closed to the public

Johnston Atoll: Johnston Island and Sand Island are natural islands, which have been expanded by coral dredging; North Island (Akau) and East Island (Hikina) are man-made islands formed from coral dredging; the egg-shaped reef is 34 km in circumference; closed to the public

Kingman Reef: barren coral atoll with deep interior lagoon; closed to the public

Midway Islands: a coral atoll managed as a NWR and open to the public for wildlife-related recreation in the form of wildlife observation and photography

Palmyra Atoll: the high rainfall and resulting lush vegetation make the environment of this atoll unique among the US Pacific Island territories; supports a large undisturbed stand of Pisonia beach forest

PEOPLE AND SOCIETY

Population: no indigenous inhabitants

note: public entry is by special-use permit from US Fish and Wildlife Service only and generally restricted to scientists and educators; visited annually by US Fish and Wildlife Service

Johnston Atoll: in previous years, an average of 1,100 US military and civilian contractor personnel were present; as of May 2005, all US government personnel had left the island

Midway Islands: approximately 40 people make up the staff of US Fish and Wildlife Service and their services contractor living at the atoll

Palmyra Atoll: four to 20 Nature Conservancy, US Fish and Wildlife staff, and researchers

GOVERNMENT

Country name: conventional long form: none

conventional short form: Baker Island; Howland Island; Jarvis Island; Johnston Atoll; Kingman Reef; Midway Islands; Palmyra Atoll

Dependency status: unincorporated territories of the US; administered from Washington, DC by the Fish and Wildlife Service of the US Department of the Interior as part of the National Wildlife Refuge system
note on Palmyra Atoll: incorporated Territory of the US; partly privately owned and partly federally owned; administered from Washington, DC by the Fish and Wildlife Service of the US Department of the Interior; the Office of Insular Affairs of the US Department of the Interior continues to administer nine excluded areas comprising certain tidal and submerged lands within the 12 nm territorial sea or within the lagoon

Legal system: the laws of the US where applicable apply

Diplomatic representation from the US: none (territories of the US)

Flag description: the flag of the US is used

ECONOMY

Economy—overview: no economic activity

TRANSPORTATION

Airports: Baker Island: one abandoned World War II runway of 1,665 m covered with vegetation and unusable

Howland Island: airstrip constructed in 1937 for scheduled refueling stop on the round-the-world flight of Amelia EARHART and Fred NOONAN; the aviators left Lae, New Guinea, for Howland Island but were never seen again; the airstrip is no longer serviceable
Johnston Atoll: one closed and not maintained
Kingman Reef: lagoon was used as a half-way station between Hawaii and American Samoa by Pan American Airways for flying boats in 1937 and 1938

Midway Islands: 3—one operational (2,409 m paved); no fuel for sale except emergencies
Palmyra Atoll: 1–1,846 m unpaved runway; privately owned (2010)

Ports and terminals: Baker, Howland, and Jarvis Islands, and Kingman Reef: none; off-shore anchorage only

Johnston Atoll: Johnston Island

Midway Islands: Sand Island

Palmyra Atoll: West Lagoon

BANGLADESH

INTRODUCTION

Background: Europeans began to set up trading posts in the area of Bangladesh in the 16th century; eventually the British came to dominate the region and it became part of British India. In 1947, West Pakistan and East Bengal (both primarily Muslim) separated from India (largely Hindu) and jointly became the new country of Pakistan. East Bengal became East Pakistan in 1955, but the awkward arrangement of a two-part country with its territorial units separated by 1,600 km left the Bengalis marginalized and dissatisfied. East Pakistan seceded from its union with West Pakistan in 1971 and was renamed Bangladesh. A military-backed, emergency caretaker regime suspended parliamentary elections planned for January 2007 in an effort to reform the political system and root out corruption. In contrast to the strikes and violent street rallies that had marked Bangladeshi politics in previous years, the parliamentary elections finally held in late December 2008 were mostly peaceful and Sheikh HASINA Wajed was elected prime minister. About a third of this extremely poor country floods annually during the monsoon rainy season, hampering economic development.

GEOGRAPHY

Location: Southern Asia, bordering the Bay of Bengal, between Burma and India

ECONOMY

Economy—overview: The economy has grown 5–6% per year since 1996 despite political instability, poor infrastructure, corruption, insufficient power supplies, and slow implementation of economic reforms. Bangladesh remains a poor, overpopulated, and inefficiently-governed nation. Although more than half of GDP is generated through the service sector, 45% of Bangladeshis are employed in the agricultural sector with rice as the single-most-important product. Bangladesh's growth was resilient during the 2008–09 global financial crisis and recession. Garment exports, totaling \$12.3 billion in FY09 and remittances from overseas Bangladeshis, totaling \$11 billion in FY10, accounted for almost 12% of GDP.

TRANSNATIONAL ISSUES

Disputes—International: Bangladesh referred its maritime boundary claims with Burma and India to the International Tribunal on the Law of the Sea; Prime Minister Singh's September 2011 visit to Bangladesh resulted in the signing of a Protocol to the 1974 Land Boundary Agreement between India and Bangladesh, which had called for the settlement of longstanding boundary disputes over undemarcated areas and the exchange of territorial enclaves, but which had never been implemented; Bangladesh struggles to accommodate 29,000 Rohingya, Burmese Muslim minority from Arakan State, living as refugees in Cox's Bazar; Burmese border authorities are constructing a 200 km (124 mi) wire-fence designed to deter illegal cross-border transit and

tensions from the military build-up along border

Refugees and internally displaced persons: *refugees (country of origin):* 26,268 (Burma)

IDPs: 65,000 (land conflicts, religious persecution) (2007)

Trafficking in persons: *current situation:* Bangladesh is a source and transit country for men, women, and children trafficked for the purposes of forced labor and commercial sexual exploitation; a significant share of Bangladesh's trafficking victims are men recruited for work overseas with fraudulent employment offers who are subsequently exploited under conditions of forced labor or debt bondage; children are trafficked within Bangladesh for commercial sexual exploitation, bonded labor, and forced labor; women and children from Bangladesh are also trafficked to India and Pakistan for sexual exploitation

tier rating: Tier 2 Watch List—Bangladesh does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so, including some progress in addressing sex trafficking; the government did not demonstrate sufficient progress in criminally prosecuting and convicting labor trafficking offenders, particularly those responsible for the recruitment of Bangladeshi workers for the purpose of labor trafficking (2009)

Illicit drugs: transit country for illegal drugs produced in neighboring countries

BARBADOS

INTRODUCTION

Background: The island was uninhabited when first settled by the British in 1627. Slaves worked the sugar plantations established on the island until 1834 when slavery

was abolished. The economy remained heavily dependent on sugar, rum, and molasses production through most of the 20th century. The gradual introduction of social and political reforms in the 1940s and 1950s led to complete independence from the UK in 1966. In the 1990s, tourism and manufacturing surpassed the sugar industry in economic importance.

note: adopted 1966; the anthem is also
 known as "In Plenty and In Time of Need"

ECONOMY

Economy—overview: Historically, the
 Barbadian economy was dependent on
 sugarcane cultivation and related activi-
 ties. However, in recent years the economy
 has diversified into light industry and
 tourism with about four-fifths of GDP and
 of exports being attributed to services.
 Growth has rebounded since 2003, bol-
 stered by increases in construction projects
 and tourism revenues, reflecting its success
 in the higher-end segment, but the sector
 faced declining revenues in 2009 with the
 global economic downturn. The country
 enjoys one of the highest per capita
 incomes in the region. Offshore finance and
 information services are important foreign
 exchange earners and thrive from having
 the same time zone as eastern US financial
 centers and a relatively highly educated
 workforce. The government continues its
 efforts to reduce unemployment, to encour-
 age direct foreign investment, and to pri-
 vate remaining state-owned enterprises.
 The public-debt-to-GDP ratio rose to over
 100% in 2009-11, largely because a sharp
 slowdown in tourism and financial services
 led to a wide budget deficit.

Military—note: the Royal Barbados Defense Force includes a land-based Troop Command and a small Coast Guard; the primary role of the land element is island defense against external aggression; the Command consists of a single, part-time battalion with a small regular cadre deployed throughout the island; the cadre increasingly supports the police in patrolling the coastline for smuggling and other illicit activities (2007)

TRANSNATIONAL ISSUES

Disputes—international: Barbados and Trinidad and Tobago abide by the April 2006 Permanent Court of Arbitration decision delimiting a maritime boundary and limiting catches of flying fish in Trinidad and Tobago's exclusive economic zone; joins other Caribbean states to counter Venezuela's claim that Aves Island sustains human habitation, a criterion under the UN Convention on the Law of the Sea, which permits Venezuela to extend its Economic Exclusion Zone/continental shelf over a large portion of the eastern Caribbean Sea

Illicit drugs: one of many Caribbean transshipment points for narcotics bound for Europe and the US; offshore financial center

BELARUS

INTRODUCTION

Background: After seven decades as a constituent republic of the USSR, Belarus attained its independence in 1991. It has retained closer political and economic ties to Russia than any of the other former Soviet republics. Belarus and Russia signed a treaty on a two-state union on 8 December 1999 envisioning greater political and

economic integration. Although Belarus agreed to a framework to carry out the accord, serious implementation has yet to take place. Since his election in July 1994 as the country's first president, Aleksandr LUKASHENKO has steadily consolidated his power through authoritarian means. Government restrictions on freedom of speech and the press, peaceful assembly, and religion remain in place.

ECONOMY

Economy—overview: As part of the former Soviet Union, Belarus had a relatively well-developed industrial base; it retained this industrial base—which is now outdated, energy inefficient, and dependent on subsidized Russian energy and preferential access to Russian markets—following the breakup of the USSR. The country also has a broad agricultural base which is inefficient and dependent on government subsidies. After an initial burst of capitalist reform from 1991–94, including privatization of state enterprises, creation of institutions of private property, and development of entrepreneurship, Belarus' economic development greatly slowed. About 80% of all industry remains in state hands, and foreign investment has been hindered by a climate hostile to business. A few banks, which had been privatized after independence, were

renationalized. State banks account for 75% of the banking sector. Economic output, which had declined for several years following the collapse of the Soviet Union, revived in the mid-2000s thanks to the boom in oil prices. Belarus has only small reserves of crude oil, though it imports most of its crude oil and natural gas from Russia at prices substantially below the world market. Belarus exported refined oil products at market prices produced from Russian crude oil purchased at a steep discount. In late 2006, Russia began a process of rolling back its subsidies on oil and gas to Belarus. Tensions over Russian energy reached a peak in 2010, when Russia stopped the export of all subsidized oil to Belarus save for domestic needs. In December 2010, Russia and Belarus reached a deal to restart the export of discounted oil to Belarus. In November 2011, Belarus and Russia reached an agreement to drastically reduce the price of natural gas in exchange for selling to Russia the remaining share of Beltransgaz, the Belarusian natural gas pipeline operator. Little new foreign investment has occurred in recent years. In 2011, a financial crisis began, triggered by government directed salary hikes unsupported by commensurate productivity increases. The crisis was compounded by an increased cost in Russian energy inputs and an overvalued Belarusian ruble, and eventually led to a near three-fold devaluation of the Belarusian ruble in 2011. The situation has stabilized short-term due to a \$3 billion loan from the Russian-dominated Eurasian Economic Community Bail-out Fund, a \$1 billion loan from the Russian state-owned bank Sberbank, and the \$2.5 billion sale of Beltransgaz to Russian state-owned Gazprom.

Illicit drugs: limited cultivation of opium poppy and cannabis, mostly for the domestic market; transshipment point for illicit drugs to and via Russia, and to the Baltics and Western Europe; a small and lightly regulated financial center; anti-money-laundering legislation does not meet international standards and was weakened further when know-your-customer requirements were curtailed in 2008; few investigations or prosecutions of money-laundering activities (2008)

BELGIUM**INTRODUCTION**

Background: Belgium became independent from the Netherlands in 1830; it was occupied by Germany during World Wars I and II. The country prospered in the past half century as a modern, technologically advanced European state and member of NATO and the EU. Tensions between the Dutch-speaking Flemings of the north and the French-speaking Walloons of the south have led in recent years to constitutional amendments granting these regions formal recognition and autonomy.

ECONOMY

Economy—overview: This modern, open, and private-enterprise-based economy has capitalized on its central geographic location, highly developed transport network, and diversified industrial and commercial base. Industry is concentrated mainly in the more heavily-populated region of Flanders

in the north. With few natural resources, Belgium imports substantial quantities of raw materials and exports a large volume of manufactures, making its economy vulnerable to volatility in world markets. Roughly three-quarters of Belgium's trade is with other EU countries, and Belgium has benefited most from its proximity to Germany. In 2011 Belgian GDP grew by 2.0%, the unemployment rate decreased slightly to 7.7% from 8.3% the previous year, and the government reduced the budget deficit from a peak of 6% of GDP in 2009 to 4.2% in 2011. Despite the relative improvement in Belgium's budget deficit, public debt hovers near 100% of GDP, a factor that has contributed to investor perceptions that the country is increasingly vulnerable to spillover from the euro-zone crisis. Belgian banks were severely affected by the international financial crisis in 2008 with three major banks receiving capital injections from the government, and the nationalization of the Belgian arm of a Franco-Belgian bank. An ageing population and rising social expenditures are mid- to long-term challenges to public finances.

BELIZE

INTRODUCTION

Background: Belize was the site of several Mayan city states until their decline at the end of the first millennium A.D. The British and Spanish disputed the region in the 17th and 18th centuries; it formally became the colony of British Honduras in 1854. Territorial disputes between the UK and Guatemala delayed the independence of Belize until 1981. Guatemala refused to recognize the new nation until 1992 and the two countries are involved in an ongoing border dispute. Guatemala and Belize plan to hold a simultaneous referendum to determine if this dispute will go before the International Court of Justice at The Hague, though they have not yet set a date. Tourism has become the mainstay of the economy. Current concerns include the country's heavy foreign debt burden, high unemployment, growing involvement in the Mexican and South American drug trade, high crime rates, and one of the highest prevalence rates of HIV/AIDS in Central America.

Flag description: blue with a narrow red stripe along the top and the bottom edges; centered is a large white disk bearing the coat of arms; the coat of arms features a shield flanked by two workers in front of a mahogany tree with the related motto SUB UMBRA

FLOREO (I Flourish in the Shade) on a scroll at the bottom, all encircled by a green garland of 50 mahogany leaves; the colors are those of the two main political parties: blue for the PUP and red for the UDP; various elements of the coat of arms—the figures, the tools, the mahogany tree, and the garland of leaves—recall the logging industry that led to British settlement of Belize

note: Belize's flag is the only national flag that depicts human beings; two British overseas territories, Montserrat and the British Virgin Islands, also depict humans

National symbol(s): Baird's tapir (a large, browsing, forest-dwelling mammal); keel-billed toucan

National anthem: name: "Land of the Free" lyrics/music: Samuel Alfred HAYNES/Selwyn Walford YOUNG

note: adopted 1981; as a Commonwealth country, in addition to the national anthem, "God Save the Queen" serves as the royal anthem (see United Kingdom)

ECONOMY

Economy—overview: Tourism is the number one foreign exchange earner in this small economy, followed by exports of marine products, citrus, cane sugar, bananas, and garments. The government's expansionary monetary and fiscal policies, initiated in September 1998, led to GDP growth averaging nearly 4% in 1999–2007. Oil discoveries in 2006 bolstered this growth. Exploration efforts have continued and production has increased a small amount. In February 2007, the government restructured nearly all of its public external commercial debt, which helped reduce interest payments and relieved some of the country's liquidity concerns. Growth slipped to 0% in 2009, 2.7% in 2010, and 2.5% in 2011 as a result of the global slowdown, natural disasters, and a temporary drop in the price of oil. With weak economic growth and a large public debt burden, fiscal spending is likely to be tight. A key government objective remains the reduction of poverty and inequality with the help of international donors. Although Belize has the second highest per capita income in Central America, the average income figure masks a huge income disparity between rich and poor. The 2010 Poverty Assessment shows that more than 4 out of 10 people live in poverty. The sizable trade deficit and heavy foreign debt burden continue to be major concerns.

BENIN

INTRODUCTION

Background: Present day Benin was the site of Dahomey, a prominent West African kingdom that rose in the 15th century. The territory became a French Colony in 1872 and achieved independence on 1 August 1960, as the Republic of Benin. A succession of military governments ended in 1972 with the rise to power of Mathieu KEREKOU and the establishment of a government based on Marxist-Leninist principles. A move to representative government began in 1989. Two years later,

free elections ushered in former Prime Minister Nicephore SOGLO as president, marking the first successful transfer of power in Africa from a dictatorship to a democracy. KEREKOU was returned to power by elections held in 1996 and 2001, though some irregularities were alleged. KEREKOU stepped down at the end of his second term in 2006 and was succeeded by Thomas YAYI Boni, a political outsider and independent. YAYI, who won a second five-year term in March 2011, has attempted to stem corruption and has strongly promoted accelerating Benin's economic growth.

ECONOMY

Economy—overview: The economy of Benin remains underdeveloped and dependent on subsistence agriculture, cotton production, and regional trade. Growth in real output had averaged almost 4% before the global recession but fell to 2.7% in 2009 and 2.6% in 2010. Inflation has subsided over the past several years. In order to raise growth, Benin plans to attract more foreign investment, place more emphasis on tourism, facilitate the development of new food processing systems and agricultural products, and encourage new information and communication technology. Specific projects to improve the business climate by reforms to the land tenure system, the commercial justice system, and the financial sector were included in Benin's \$307 million Millennium Challenge Account grant signed in February 2006. The 2001 privatization policy continues in telecommunications, water, electricity, and agriculture. The Paris Club and bilateral creditors have eased the external debt situation with Benin benefiting from a G-8 debt reduction announced in July 2005, while pressing for more rapid structural reforms. An insufficient electrical supply continues to adversely affect Benin's economic growth though the government recently has taken steps to increase domestic power production. Private foreign direct investment is small, and foreign aid accounts for the majority of investment in infrastructure projects. Cotton, a key export, suffered from flooding in 2010-11, but high prices supported export earnings. The government agreed to 25% increase in civil servant salaries in 2011, following a series of strikes, has increased pressure on the national budget. Benin has appealed for international assistance to mitigate piracy against commercial shipping in its territory.

BERMUDA

INTRODUCTION

Background: Bermuda was first settled in 1609 by shipwrecked English colonists

headed for Virginia. Tourism to the island to escape North American winters first developed in Victorian times. Tourism continues to be important to the island's economy, although international business has overtaken it in recent years. Bermuda has also developed into a highly successful offshore financial center. A referendum on independence from the UK was soundly defeated in 1995.

ECONOMY

Economy—overview: Bermuda enjoys the fourth highest per capita income in the world, more than 50% higher than that of the US; the average cost of a house by the mid-2000s exceeded \$1,000,000. Its economy is primarily based on providing financial services for international business and luxury facilities for tourists. A number of reinsurance companies relocated to the island following the 11 September 2001 attacks on the US and again after Hurricane Katrina in August 2005 contributing to the expansion of an already robust international business sector. Bermuda's tourism industry—which derives over 80% of its visitors from the US—continues to struggle but remains the island's number two industry. Most capital equipment and food must be imported. Bermuda's industrial sector is largely focused on construction and agriculture is limited, with only 20% of the land being arable.

BHUTAN

INTRODUCTION

Background: In 1865, Britain and Bhutan signed the Treaty of Sinchulu, under which Bhutan would receive an annual subsidy in exchange for ceding some border land to British India. Under British influence, a monarchy was set up in 1907; three years later, a treaty was signed whereby the British agreed not to interfere in Bhutanese internal affairs and Bhutan allowed Britain to direct its foreign affairs. This role was assumed by independent India after 1947. Two years later, a formal Indo-Bhutanese accord returned the areas of Bhutan annexed by the British, formalized the annual subsidies the country received, and defined India's responsibilities in defense and foreign relations. A refugee issue of over 100,000 Bhutanese in Nepal remains unresolved; 90% of the refugees are housed in seven United Nations Office of the High Commissioner for Refugees (UNHCR) camps. In March 2005, King Jigme Singye WANGCHUCK unveiled the government's draft constitution—which would introduce major democratic reforms—and pledged to hold a national referendum for its approval. In December 2006, the King abdicated the throne to his son, Jigme Khesar Namgyel WANGCHUCK, in order to give him experience as head of state before the democratic transition. In early 2007, India and Bhutan renegotiated their treaty to allow Bhutan greater autonomy in conducting its foreign policy, although Thimphu continues to coordinate policy decisions in this area with New Delhi. In July 2007, seven ministers of Bhutan's 10-member cabinet resigned to join the political process, and the cabinet acted as a caretaker regime until democratic elections for seats to the country's first parliament were completed in March 2008. The king ratified the country's first constitution in July 2008.

ECONOMY

Economy—overview: The economy, one of the world's smallest and least developed, is based on agriculture and forestry, which provide the main livelihood for more than 40% of the population. Agriculture consists largely of subsistence farming and animal husbandry. Rugged mountains dominate the terrain and make the building of roads and other infrastructure difficult and expensive. The economy is closely aligned with India's through strong trade and monetary links and dependence on India's financial assistance. The industrial sector is technologically backward with most production of the cottage industry type. Most development projects, such as road construction, rely on Indian migrant labor. Model education, social, and environment programs are underway with support from multilateral development organizations. Each economic program takes into account the government's desire to protect the country's environment and cultural traditions. For example, the government, in its cautious expansion of the tourist sector, encourages visits by upscale, environmentally conscientious tourists. Complicated controls and uncertain policies in areas such as industrial licensing, trade, labor, and finance continue to hamper foreign investment. Hydropower exports to India have boosted Bhutan's overall growth. New hydropower projects will be the driving force behind Bhutan's ability to create employment and sustain growth in the coming years.

BOLIVIA

INTRODUCTION

Background: Bolivia, named after independence fighter Simon BOLIVAR, broke away from Spanish rule in 1825; much of its subsequent history has consisted of a series of nearly 200 coups and counter coups. Democratic civilian rule was established in 1982, but leaders have faced difficult problems of deep-seated poverty, social unrest, and illegal drug production. In December 2005, Bolivians elected Movement Toward Socialism leader Evo MORALES president—by the widest margin of any leader since the restoration of civilian rule in 1982—after he ran on a promise to change the country's traditional political class and empower the nation's poor, indigenous majority. However, since taking office, his controversial strategies have exacerbated racial and economic tensions between the Amerindian populations of the Andean west and the non-indigenous communities of the eastern lowlands. In December 2009, President MORALES easily won reelection, and his party took control of the legislative branch of the government, which will allow him to continue his process of change. In October 2011, the country held its first judicial elections to appoint judges to the four highest courts.

ECONOMY

Economy—overview: Bolivia is one of the poorest and least developed countries in Latin America. Following a disastrous economic crisis during the early 1980s, reforms spurred private investment, stimulated economic growth, and cut poverty rates in the 1990s. The period 2003–05 was characterized by political instability, racial tensions, and violent protests against plans—subsequently abandoned—to export Bolivia's newly discovered natural gas reserves to large Northern Hemisphere markets. In 2005, the government passed a controversial hydrocarbons law that imposed significantly higher royalties and required foreign firms then operating under risk-sharing contracts to surrender all production to the state energy company in exchange for a pre-determined service fee. The global recession slowed growth, but Bolivia recorded the highest growth rate in South America during 2009. During 2010–11 increases in world commodity prices resulted in large trade surpluses. However, a lack of foreign investment in the key sectors of mining and hydrocarbons and higher food prices pose challenges for the Bolivian economy.

BOSNIA AND HERZEGOVINA

INTRODUCTION

Background: Bosnia and Herzegovina's declaration of sovereignty in October 1991 was followed by a declaration of independence from the former Yugoslavia on 3 March 1992 after a referendum boycotted by ethnic Serbs. The Bosnian Serbs - supported by neighboring Serbia and Montenegro - responded with armed resistance aimed at partitioning the republic along ethnic lines and joining Serb-held areas to form a "Greater Serbia." In March 1994, Bosniaks and Croats reduced the number of warring factions from three to two by signing an agreement creating a joint Bosniak/Croat Federation of Bosnia and Herzegovina. On 21

November 1995, in Dayton, Ohio, the warring parties initiated a peace agreement that brought to a halt three years of interethnic civil strife (the final agreement was signed in Paris on 14 December 1995). The Dayton Peace Accords retained Bosnia and Herzegovina's international boundaries and created a multi-ethnic and democratic government charged with conducting foreign, diplomatic, and fiscal policy. Also recognized was a second tier of government composed of two entities roughly equal in size: the Bosniak/Bosnian Croat Federation of Bosnia and Herzegovina and the Bosnian Serb-led Republika Srpska (RS). The Federation and RS governments were charged with overseeing most government

functions. The Dayton Accords also established the Office of the High Representative (OHR) to oversee the implementation of the civilian aspects of the agreement. The Peace Implementation Council (PIC) at its conference in Bonn in 1997 also gave the High Representative the authority to impose legislation and remove officials, the so-called "Bonn Powers." In 1995–96, a NATO-led international peacekeeping force (IFOR) of 60,000 troops served in Bosnia to implement and monitor the military aspects of the agreement. IFOR was succeeded by a smaller, NATO-led Stabilization Force (SFOR) whose mission was to deter renewed hostilities. European Union

peacekeeping troops (EUFOR) replaced SFOR in December 2004; their mission is to maintain peace and stability throughout the country. EUFOR's mission changed from peacekeeping to civil policing in October 2007, with its presence reduced from nearly 7,000 to less than 2,500 troops. Currently EUFOR deploys around 1,300 troops in theater.

ECONOMY

Economy—overview: Bosnia has a transitional economy with limited market reforms. The economy relies heavily on the export of metals as well as on remittances and foreign aid. A highly decentralized government hampers economic policy coordination and reform. The interethnic warfare in Bosnia and Herzegovina caused production to plummet by 80% from 1992 to 1995 and unemployment to soar. With an uneasy peace in place, output recovered in 1996–99 at high percentage rates from a low base; but output growth slowed in 2000–02. Part of the lag in output was made up during 2003–08, when GDP growth exceeded 5% per year. However, the country experienced a decline in GDP of nearly 3% in 2009 reflecting local effects of the global economic crisis. One of Bosnia's main economic challenges since the recession began has been to reduce spending on public sector wages and social benefits to meet the IMF's criteria for obtaining funding for budget shortfalls. Banking reform accelerated in 2001 as all the Communist-era payments bureaus were shut down;

foreign banks, primarily from Austria and Italy, now control most of the banking sector. The konvertibilna marka (convertible mark or BAM) - the national currency introduced in 1998 - is pegged to the euro, and confidence in the currency and the banking sector has increased. Bosnia's private sector is growing, but foreign investment has dropped off sharply since 2007. Government spending, at roughly 50% of GDP, remains high because of redundant government offices at the state, entity and municipal level. Privatization of state enterprises has been slow, particularly in the Federation where political division between ethnically-based political parties makes agreement on economic policy more difficult. A sizeable current account deficit and high unemployment rate remain the two most serious macroeconomic problems. Successful implementation of a value-added tax in 2006 provided a predictable source of revenue for the government and helped rein in gray-market activity. National-level statistics have also improved over time but a large share of economic activity remains unofficial and unrecorded. Bosnia and Herzegovina became a full member of the Central European Free Trade Agreement in September 2007. Bosnia and Herzegovina's top economic priorities are: acceleration of integration into the EU; strengthening the fiscal system; public administration reform; World Trade Organization (WTO) membership; and securing economic growth by fostering a dynamic, competitive private sector. The country has received a substantial amount of foreign assistance and will need to demonstrate its ability to implement its economic reform agenda in order to advance its stated goal of EU accession. In 2009, Bosnia and Herzegovina undertook an International Monetary Fund (IMF) standby arrangement, necessitated by sharply increased social spending and a fiscal crisis exacerbated by the global economic downturn. The program aims to reduce recurrent government spending and to strengthen revenue collection. However, disbursement of IMF aid was suspended in 2011 after a parliamentary deadlock left Bosnia without a state-level government. In 2011, the country continued to recover from a recession caused by the global financial crisis. Unemployment and poverty are high. Ethnic and political stalemate slow reform and discourage investment. Bosnia relies heavily on West Europe for trade and credit.

BOTSWANA

INTRODUCTION

Background: Formerly the British protectorate of Bechuanaland, Botswana adopted its new name upon independence in 1966. Four decades of uninterrupted civilian leadership, progressive social policies, and significant capital investment have created one of the most dynamic economies in Africa. Mineral extraction, principally diamond mining, dominates economic activity, though tourism is a growing sector due to the country's conservation practices and extensive nature preserves. Botswana has one of the world's highest known rates of HIV/AIDS infection, but also one of Africa's most progressive and comprehensive programs for dealing with the disease.

ECONOMY

Economy—overview: Botswana has maintained one of the world's highest economic growth rates since independence in 1966. However, economic growth was negative in 2009, with the industrial sector shrinking by 30%, after the global crisis reduced demand for Botswana's diamonds. The economy has since recovered, with GDP growth in 2010 at 7.2% and estimated GDP growth in 2011 of 6.2%. Through fiscal discipline and sound management, Botswana transformed itself from one of the poorest countries in the world to a middle-income country with a per capita GDP of \$16,300 in 2011. Two major investment services rank Botswana as the best credit risk in Africa. Diamond mining has fueled much of the expansion and currently accounts for more than one-third of GDP, 70–80% of export earnings, and about half of the government's revenues. Botswana's heavy reliance on a single luxury export was a critical factor in the sharp economic contraction of 2009. Tourism, financial services, subsistence farming, and cattle raising are other key sectors. Although unemployment was 7.5% in 2007 according to official reports, unofficial estimates place it closer to 40%. The prevalence of HIV/AIDS is second highest in the world and threatens Botswana's impressive economic gains. An expected leveling off in diamond mining production within the next two decades overshadows long-term prospects.

BOUVET ISLAND

INTRODUCTION

Background: This uninhabited, volcanic, Antarctic island is almost entirely covered by glaciers and is the most remote island on Earth, making it difficult to approach. It was discovered in 1739 by the French naval officer after whom the island was named. No claim was made until 1825, when the British flag was raised. In 1928, the UK waived its claim in favor of Norway, which had occupied the island the previous year. In 1971, Norway designated Bouvet Island and the adjacent territorial waters a nature reserve. Since 1977, Norway has run an automated meteorological station and studied foraging strategies and distribution of fur seals and penguins on the island.

BRAZIL

INTRODUCTION

Background: Following more than three centuries under Portuguese rule, Brazil gained its independence in 1822, maintaining a monarchical system of government until the abolition of slavery in 1888 and the subsequent proclamation of

a republic by the military in 1889. Brazilian coffee exporters politically dominated the country until populist leader Getúlio VARGAS rose to power in 1930. By far the largest and most populous country in South America, Brazil underwent more than a half century of populist and military government until 1985, when the military regime peacefully ceded power to civilian rulers. Brazil continues to pursue industrial and agricultural growth and development of its interior. Exploiting vast natural resources and a large labor pool, it is today South America's leading economic power and a regional leader, one of the first in the area to begin an economic recovery. Highly unequal income distribution and crime remain pressing problems.

Flag description: green with a large yellow diamond in the center bearing a blue celestial globe with 27 white five-pointed stars; the globe has a white equatorial band with the motto ORDEM E PROGRESSO (Order and Progress); the current flag was inspired by the banner of the former Empire of Brazil (1822-1889); on the imperial flag,

the green represented the House of Braganza of Pedro I, the first Emperor of Brazil, while the yellow stood for the Habsburg Family of his wife; on the modern flag the green represents the forests of the country and the yellow rhombus its mineral wealth; the blue circle and stars, which replaced the coat of arms of the original flag, depict the sky over Rio de Janeiro on the morning of 15 November 1889—the day the Republic of Brazil was declared; the number of stars has changed with the creation of new states and has risen from an original 21 to the current 27 (one for each state and the Federal District)

National symbol(s): Southern Cross constellation

National anthem: *name:* “Hino Nacional Brasileiro” (Brazilian National Anthem)

lyrics/music: Joaquim Osorio Duque ESTRADA/Francisco Manoel DA SILVA

note: music adopted 1890, lyrics adopted 1922; the anthem's music, composed in 1822, was used unofficially for many years before it was adopted

ECONOMY

Economy—overview: Characterized by large and well-developed agricultural, mining, manufacturing, and service sectors, Brazil's economy outweighs that of all other South American countries, and Brazil is expanding its presence in world markets. Since 2003, Brazil has steadily improved its macroeconomic stability, building up foreign reserves, and reducing its debt profile by shifting its debt burden toward real denominated and domestically held instruments. In 2008, Brazil became a net external creditor and two ratings agencies awarded investment grade status to its debt. After strong growth in 2007 and 2008, the onset of the global financial crisis hit Brazil in 2008. Brazil experienced two quarters of recession, as global demand for Brazil's commodity-based exports dwindled and external credit dried up. However, Brazil was one of the first emerging markets to begin a recovery. In 2010, consumer and investor confidence revived and GDP growth reached 7.5%, the highest growth rate in the past 25 years. Rising inflation led the authorities to take measures to cool the economy; these actions and the deteriorating international economic situation slowed growth to 2.7% for 2011 as a whole, though forecasts for 2012 growth are somewhat higher. Despite slower growth in 2011, Brazil overtook the United Kingdom as the world's seventh largest economy in terms of GDP. Urban unemployment is at the historic low of 4.7% (December 2011), and Brazil's traditionally high level of income equality has declined for each of the last 12 years. Brazil's high interest rates make it an attractive destination for foreign investors. Large capital inflows over the past several years have contributed to the appreciation of the currency, hurting the competitiveness of Brazilian manufacturing and leading the government to intervene in foreign exchanges markets and raise taxes

on some foreign capital inflows. President Dilma ROUSSEFF has retained the previous administration's commitment to inflation targeting b

TRANSNATIONAL ISSUES

Disputes—international: uncontested boundary dispute between Brazil and Uruguay over Braziliera/Brasiliera Island in the Quarai/Cuareim River leaves the tripoint with Argentina in question; smuggling of firearms and narcotics continues to be an issue along the Uruguay-Brazil border; Colombian-organized illegal narcotics and paramilitary activities penetrate Brazil's border region with Venezuela

Illicit drugs: second-largest consumer of cocaine in the world; illicit producer of cannabis; trace amounts of coca cultivation in the Amazon region, used for domestic consumption; government has a large-scale eradication program to control cannabis; important transshipment country for Bolivian, Colombian, and Peruvian cocaine headed for Europe; also used by traffickers as a way station for narcotics air transshipments between Peru and Colombia; upsurge in drug-related violence and weapons smuggling; important market for Colombian, Bolivian, and Peruvian cocaine; illicit narcotics proceeds are often laundered through the financial system; significant illicit financial activity in the Tri-Border Area (2008)

BRITISH INDIAN OCEAN TERRITORY

INTRODUCTION

Background: Formerly administered as part of the British Crown Colony of Mauritius, the British Indian Ocean Territory (BIOT) was established as an overseas territory of the UK in 1965. A number of the islands of the territory were later transferred to the Seychelles when it attained independence in 1976. Subsequently, BIOT has consisted only of the six main island groups comprising the Chagos Archipelago. The largest and most southerly of the islands, Diego Garcia, contains a joint UK-US naval support facility. All of the

remaining islands are uninhabited. Between 1967 and 1973, former agricultural workers, earlier residents in the islands, were relocated primarily to Mauritius, but also to the Seychelles. Negotiations between 1971 and 1982 resulted in the establishment of a trust fund by the British Government as compensation for the displaced islanders, known as Chagossians. Beginning in 1998, the islanders pursued a series of lawsuits against the British Government seeking further compensation and the right to return to the territory. In 2006 and 2007, British court rulings invalidated the immigration policies contained

in the 2004 BIOT Constitution Order that had excluded the islanders from the archipelago, but upheld the special military status of Diego Garcia. In 2008, the House of Lords, as the final court of appeal in the UK, ruled in favor of the British Government by overturning the lower court rulings and finding no right of return for the Chagossians.

BRITISH VIRGIN ISLANDS

INTRODUCTION

Background: First inhabited by Arawak and later by Carib Indians, the Virgin Islands were settled by the Dutch in 1648 and then annexed by the English in 1672. The islands were part of the British colony of the Leeward Islands from 1872–1960; they were granted autonomy in 1967. The economy is closely tied to the larger and more populous US Virgin Islands to the west; the US dollar is the legal currency.

ECONOMY

Economy—overview: The economy, one of the most stable and prosperous in the Caribbean, is highly dependent on tourism generating an estimated 45% of the national income. More than 934,000 tourists, mainly from the US, visited the islands in 2008. In the mid-1980s, the government began offering offshore registration to companies wishing to incorporate in the islands, and incorporation fees now generate substantial revenues. Roughly 400,000 companies were on the offshore registry by yearend 2000. The adoption of a comprehensive insurance law in late 1994, which provides a blanket of confidentiality with regulated statutory gateways for investigation of criminal offenses, made the British Virgin Islands even more attractive to international business. Livestock raising is

the most important agricultural activity; poor soils limit the islands' ability to meet domestic food requirements. Because of traditionally close links with the US Virgin Islands, the British Virgin Islands has used the US dollar as its currency since 1959.

Background: The Sultanate of Brunei's influence peaked between the 15th and 17th centuries when its control extended over coastal areas of northwest Borneo and the southern Philippines. Brunei subsequently entered a period of decline brought on by internal strife over royal succession, colonial expansion of European powers, and piracy. In 1888, Brunei became a British protectorate; independence was achieved in 1984. The same family has ruled Brunei for over six centuries. Brunei benefits from extensive petroleum and natural gas fields, the source of one of the highest per capita GDPs in Asia.

ECONOMY

Economy—overview: Brunei has a small well-to-do economy that encompasses a mixture of foreign and domestic entrepreneurship, government regulation, welfare measures, and village tradition. Crude oil and natural gas production account for just over half of GDP and more than 90% of exports. Per capita GDP is among the highest in Asia, and substantial income from overseas investment supplements income from domestic production. The government provides for all medical services and free education through the university level and subsidizes rice and housing. A new monetary authority was established in January 2011 with responsibilities that include monetary policy, monitoring of financial institutions, and currency trading activities.

TRANSNATIONAL ISSUES

Disputes—international: per Letters of
Exchange signed in 2009, Malaysia in 2010
ceded two hydrocarbon concession blocks
to Brunei in exchange for Brunei's sultan
dropping claims to the Limbang corridor,
which divides Brunei; nonetheless, Brunei
claims a maritime boundary extending as
far as a median with Vietnam, thus assert-
ing an implicit claim to Lousia Reef

Illicit drugs: drug trafficking and illegally
importing controlled substances are serious
offenses in Brunei and carry a mandatory
death penalty

BULGARIA

INTRODUCTION

Background: The Bulgars, a Central Asian Turkic tribe, merged with the local Slavic inhabitants in the late 7th century to form the first Bulgarian state. In succeeding centuries, Bulgaria struggled with the Byzantine Empire to assert its place in the Balkans, but by the end of the 14th century the country was overrun by the Ottoman Turks. Northern Bulgaria attained autonomy in 1878 and all of Bulgaria became independent from the Ottoman Empire in 1908. Having fought on the losing side in both World Wars, Bulgaria fell within the Soviet sphere of influence and became a People's Republic in 1946. Communist domination ended in 1990, when Bulgaria held its first multi-party election since World War II and began the contentious process of moving toward political democracy and a market economy while combating inflation, unemployment, corruption, and crime. The country joined NATO in 2004 and the EU in 2007.

ECONOMY

Economy—overview: Bulgaria, a former Communist country that entered the EU on 1 January 2007, averaged more than 6% annual growth from 2004 to 2008, driven by significant amounts of bank lending, consumption, and foreign direct investment. Successive governments have demonstrated a commitment to economic reforms and responsible fiscal planning, but the global downturn sharply reduced domestic demand, exports, capital inflows, and industrial production. GDP contracted by 5.5% in 2009, stagnated in 2010, despite a significant recovery in exports, and grew approximately 2.2% in 2011. Despite having a favorable investment regime, including low, flat corporate income taxes, significant challenges remain. Corruption in public administration, a weak judiciary, and the presence of organized crime continue to hamper the country's investment climate and economic prospects.

BURKINA FASO

INTRODUCTION

Background: Burkina Faso (formerly Upper Volta) achieved independence from France in 1960. Repeated military coups during the 1970s and 1980s were followed by multiparty elections in the early 1990s. Current President Blaise COMPAORE came to power in a 1987 military coup and has won every election since then. Burkina Faso's high population density and limited natural resources result in poor economic prospects for the majority of its citizens.

ECONOMY

Economy—overview: Burkina Faso is a poor, landlocked country that relies heavily on cotton and gold exports for revenue. The country has few natural resources and a weak industrial base. About 90% of the population is engaged in subsistence agriculture, which is vulnerable to periodic drought. Cotton is the main cash crop. Since 1998, Burkina Faso has embarked upon a gradual privatization of state-owned enterprises and in 2004 revised its investment code to attract foreign investment. As a result of this new code and other legislation favoring the mining sector, the country has seen an upswing in gold exploration and production. By 2010, gold had become the main source of export revenue. Gold mining production doubled between

2009 and 2010. Two new mining projects were launched the third quarter of 2011. Local community conflict persists in the mining and cotton sectors, but the Prime Minister has made efforts to defuse some of the economic cause of public discontent, including announcing income tax reductions, reparations for looting victims, and subsidies for basic food items and fertilizer. An IMF mission to Burkina Faso in October 2011 expressed general satisfaction with the measures. The risk of a mass exodus of the 3 to 4 million Burinabe who live and work in Cote D'Ivoire has dissipated and trade, power, and transport links are being restored.

TRANSNATIONAL ISSUES

Disputes—International: adding to illicit cross-border activities, Burkina Faso has issues concerning unresolved boundary alignments with its neighbors; demarcation is currently underway with Mali, the dispute with Niger was referred to the ICJ in 2010, and a dispute over several villages with Benin persists; Benin retains a border dispute with Burkina Faso around the town of Koualou

BURMA

INTRODUCTION

Background: Various ethnic Burmese and ethnic minority city-states or kingdoms occupied the present borders through the 19th century. Over a period of 62 years (1824–1886), Britain conquered Burma and incorporated the country into its Indian Empire. Burma was administered as a province of India until 1937 when it became a separate, self-governing colony; in 1948, Burma attained independence from the Commonwealth. Gen. NE WIN dominated the government from 1962 to 1988, first as military ruler, then as self-appointed president, and later as political kingpin. In September 1988, the military deposed NE WIN and established a new ruling junta. Multiparty legislative elections in 1990 resulted in the main opposition party—the National League for

Democracy (NLD)—winning a landslide victory. Instead of handing over power, the junta placed NLD leader (and Nobel Peace Prize recipient) AUNG SAN SUU KYI (ASSK) under house arrest from 1989 to 1995, 2000 to 2002, and from May 2003 to November 2010. In late September 2007, the ruling junta brutally suppressed protests over increased fuel prices led by prodemocracy activists and Buddhist monks, killing at least 13 people and arresting thousands for participating in the demonstrations. In early May 2008, Burma was struck by Cyclone Nargis, which left over 138,000 dead and tens of thousands injured and homeless. Despite this tragedy, the junta proceeded with its May constitutional referendum, the first vote in Burma since 1990. Parliamentary elections held in November 2010, considered flawed by many in the international community, saw

the ruling Union Solidarity and Development Party garnering over 75% of the seats. Parliament convened in January 2011 and selected former Prime Minister THEIN SEIN as president. Although the vast majority of national-level appointees named by THEIN SEIN are former or current military officers, the government has initiated a series of political and economic reforms leading to a substantial opening of the long-isolated country. These reforms have included a senior-level dialogue with ASSK, re-registering the NLD as a political party, enabling party members, including ASSK, to contest parliamentary by-elections on 1 April 2012, the release of many (but not all) political prisoners, preliminary peace agreements with some armed ethnic groups, a reduction in media censorship, and an increasingly open debate in the Parliament.

lyrics/music: SAYA TIN

note: adopted 1948; Burma is among a handful of non-European nations that have anthems rooted in indigenous traditions; the beginning portion of the anthem is a traditional Burmese anthem before transitioning into a Western-style orchestrated work

ECONOMY

Economy—overview: Burma, a resource-rich country, suffers from pervasive government controls, inefficient economic policies, corruption, and rural poverty. Despite Burma's emergence as a natural gas exporter, socio-economic conditions have deteriorated under the mismanagement of the previous regime. Approximately 32% of the population lives in poverty and Burma is the poorest country in Southeast Asia. The business climate is widely perceived as opaque, corrupt, and highly inefficient. Wealth from country's ample natural resources is concentrated in the hands of an elite group of military leaders and business associates. In 2010-11, the transfer of state assets—especially real estate—to military families under the guise of a privatization policy further widened the gap between the economic elite and the public. The economy suffers from serious macroeconomic imbalances—including multiple official exchange

rates that overvalue the Burmese kyat, fiscal deficits, lack of commercial credit further distorted by a non-market interest rate regime, unpredictable inflation, unreliable economic data, and an inability to reconcile national accounts. Burma's poor investment climate—including weak rule of law—hampers the inflow of foreign investment; in recent years, foreign investors have shied away from nearly every sector except for natural gas, power generation, timber, and mining. The exploitation of natural resources does not benefit the population at large. The most productive sectors will continue to be in extractive industries—especially oil and gas, mining, and timber—with the latter two causing significant environmental degradation. Other areas, such as manufacturing, tourism, and services, struggle in the face of poor infrastructure, unpredictable trade policies, undeveloped human resources (the result of neglected health and education systems), endemic corruption, and inadequate access to capital for investment. Private banks still operate under tight domestic and international restrictions, limiting the private sector's access to credit. The United States, the European Union, and Canada have imposed financial and economic sanctions on Burma. US sanctions, prohibiting most financial transactions with Burmese entities, impose travel bans on senior Burmese military and civilian leaders and others connected to the ruling regime, and ban imports of Burmese products. These sanctions affect the country's fledgling garment industry, isolate the struggling banking sector, and raise the costs of doing business with Burmese companies, particularly firms tied to Burmese regime leaders. Remittances from overseas Burmese workers—who had provided significant financial support for their families—have driven the Ministry of Finance to license domestic banks to carry out overseas operations. In 2011 the government took initial steps toward reforming and opening up the economy by lowering export taxes, easing restrictions on its financial sector, and reaching out to international organizations for assistance. Although the Burmese government has good economic relations with its neighbors, significant improvements in economic governance, the business climate, and the political situation are needed to promote serious foreign investment.

TRANSNATIONAL ISSUES

Disputes—International: over half of Burma's population consists of diverse ethnic groups who have substantial numbers of kin in neighboring countries; the Naf river on the border with Bangladesh serves as a smuggling and illegal transit route; Bangladesh struggles to accommodate 29,000 Rohingya, Burmese Muslim minority from Arakan State, living as refugees in Cox's Bazar; Burmese border authorities are constructing a 200 km (124 mi) wire fence designed to deter illegal cross-border transit and tensions from the military build-up along border with Bangladesh in 2010; Bangladesh referred its maritime boundary

claims with Burma and India to the International Tribunal on the Law of the Sea; Burmese forces attempting to dig in to the largely autonomous Shan State to rout local militias tied to the drug trade, prompts local residents to periodically flee into neighboring Yunnan Province in China; fencing along the India-Burma international border at Manipur's Moreh town is in progress to check illegal drug trafficking and movement of militants; 140,000 mostly Karen refugees fleeing civil strife, political upheaval and economic stagnation in Burma live in remote camps in Thailand near the border
Refugees and internally displaced persons: IDPs: 503,000 (government offensives against ethnic insurgent groups near the eastern borders; most IDPs are ethnic Karen, Karenni, Shan, Tavoyan, and Mon) (2007)

Trafficking in persons: current situation: Burma is a source country for women, children, and men trafficked for the purpose of forced labor and commercial sexual exploitation; Burmese women and children are trafficked to East and Southeast Asia for commercial sexual exploitation, domestic servitude, and forced labor; Burmese children are subjected to conditions of forced labor in Thailand as hawkers and beggars; women are trafficked for commercial sexual exploitation to Malaysia and China; some trafficking victims transit Burma from Bangladesh to Malaysia and from China to Thailand; Burma's internal trafficking remains the most serious concern occurring primarily from villages to urban centers and economic hubs for labor in industrial zones, agricultural estates, and commercial sexual exploitation; the Burmese military continues to engage in the unlawful conscription of child soldiers, and continues to be the main perpetrator of forced labor inside Burma; a small number of foreign pedophiles occasionally exploit Burmese children in the country

tier rating: Tier 3—the driving factors behind Burma's significant trafficking problem are the regime's gross economic mismanagement and human rights abuses, the military's continued widespread use of forced and child labor, and the recruitment of child soldiers; although the government of Burma has taken some steps to address cross-border sex trafficking, it has not demonstrated serious and sustained efforts to clamp down on military and local authorities who are themselves deriving economic benefit from forced labor practices (2010)

Illicit drugs: world's third largest producer of illicit opium with an estimated production in 2009 of 250 metric tons, a decrease of 27%, and poppy cultivation in 2009 totaled 17,000 hectares, a 24% decrease from 2008; production in the United Wa State Army's areas of greatest control remains low; Shan state is the source of 94.5% of Burma's poppy cultivation; lack of government will to take on major narcotrafficking groups and lack of serious commitment against money laundering continues to hinder the overall antidrug effort; major source of methamphetamine and heroin for regional consumption (2008)

BURUNDI

INTRODUCTION

Background: Burundi's first democratically elected president was assassinated in October 1993 after only 100 days in office, triggering widespread ethnic violence between Hutu and Tutsi factions. More than 200,000 Burundians perished during the conflict that spanned almost a dozen years. Hundreds of thousands of Burundians were internally displaced or became refugees in neighboring countries. An internationally brokered power-sharing agreement between the Tutsi-dominated government and the Hutu rebels in 2003 paved the way for a transition process that led to an integrated defense force, established a new constitution in 2005, and elected a majority Hutu government in 2005. The government of President Pierre NKURUNZIZA, who was reelected in 2010, continues to face many political and economic challenges.

ECONOMY

Economy—overview: Burundi is a landlocked, resource-poor country with an underdeveloped manufacturing sector. The economy is predominantly agricultural. It accounts for just over 30% of GDP and employs more than 90% of the population. Burundi's primary exports are coffee and tea, which account for 90% of foreign exchange earnings, though exports are a relatively small share of GDP. Burundi's export earnings—and its ability to pay for imports—rests primarily on weather conditions and international coffee and tea prices. The Tutsi minority, 14% of the population, dominates the coffee trade. An ethnic-based war that lasted for over a decade resulted in more than 200,000 deaths, forced more than 48,000 refugees into Tanzania, and displaced 140,000 others internally. Only one in two children go to school, and approximately one in 15 adults has HIV/AIDS. Food, medicine, and electricity remain in short supply. Less than 2% of the population has electricity in its homes. Burundi's GDP grew around 4% annually in 2006–11. Political stability and the end of the civil war have improved aid flows and economic activity has increased, but underlying weaknesses—a high poverty rate, poor education rates, a weak legal system, a poor transportation network, overburdened utilities, and low administrative capacity—risk undermining planned economic reforms. The purchasing power of most Burundians has decreased as wage increases have not kept up with inflation. Burundi will remain heavily dependent on aid from bilateral and multilateral donors—foreign aid represents 42% of Burundi's national income,

the second highest rate in Sub-Saharan Africa; the delay of funds after a corruption scandal cut off bilateral aid in 2007 reduced government's revenues and its ability to pay salaries. Burundi joined the East African Community, which should boost Burundi's regional trade ties, and received \$700 million in debt relief in 2009. Government corruption is also hindering the development of a healthy p

TRANSNATIONAL ISSUES

Disputes—International: Burundi and Rwanda dispute two sq km (0.8 sq mi) of Sabanerwa, a farmed area in the Rukurazi Valley where the Akanyaru/Kanyaru River shifted its course southward after heavy rains in 1965; cross-border conflicts persist among Tutsi, Hutu, other ethnic groups, associated political rebels, armed gangs, and various government forces in the Great Lakes region

Refugees and internally displaced persons: refugees (country of origin): 9,849 (Democratic Republic of the Congo) IDPs: 100,000 (armed conflict between government and rebels; most IDPs in northern and western Burundi) (2007)

CAMBODIA

INTRODUCTION

Background: Most Cambodians consider themselves to be Khmers, descendants of the Angkor Empire that extended over much of Southeast Asia and reached its zenith between the 10th and 13th centuries. Attacks by the Thai and Cham (from present-day Vietnam) weakened the empire, ushering in a long period of decline. The king placed the country under French protection in 1863 and it became part of French Indochina in 1887. Following Japanese occupation in World War II, Cambodia gained full independence from France in 1953. In April 1975, after a five-year struggle, Communist Khmer Rouge forces captured Phnom Penh and evacuated all cities and towns. At least 1.5 million Cambodians died from execution, forced hardships, or starvation during the Khmer Rouge regime under POL POT. A December 1978 Vietnamese invasion drove the Khmer Rouge into the countryside, began a 10-year Vietnamese occupation, and touched off almost 13 years of civil war. The 1991 Paris Peace Accords mandated democratic elections and a ceasefire, which was not fully respected by the Khmer Rouge. UN-sponsored elections in 1993 helped restore some semblance of normalcy under a coalition government. Factional fighting in 1997 ended the first coalition government, but a second round of national elections in 1998 led to the formation of another coalition government and renewed political stability. The remaining elements of the Khmer Rouge surrendered in early 1999. Some of the surviving Khmer Rouge leaders have been tried or are awaiting trial for crimes against humanity by a hybrid UN-Cambodian tribunal supported by international assistance. Elections in July 2003 were relatively peaceful, but it took one year of negotiations between contending political parties before a coalition government was formed. In October 2004, King Norodom SIHANOUK abdicated the throne and his son, Prince Norodom SIHAMONI, was selected to succeed him. Local elections were held in Cambodia in April 2007, with little of the pre-election violence that preceded prior elections.

National elections in July 2008 were relatively peaceful.

GEOGRAPHY

Location: Southeastern Asia, bordering the Gulf of Thailand, between Thailand, Vietnam, and Laos

ECONOMY

Economy—overview: From 2004 to 2008, the economy grew about 10% per year, driven largely by an expansion in the garment sector, construction, agriculture, and tourism. GDP contracted slightly in 2009 as a result of the global economic slowdown but climbed more than 6% in 2010 and 6.7 in 2011, driven by tourism and renewed exports. With the January 2005 expiration of a WTO Agreement on

Textiles and Clothing, Cambodian textile producers were forced to compete directly with lower-priced countries such as China, India, Vietnam, and Bangladesh. The garment industry currently employs more than 300,000 people—about 5% of the work force—and contributes more than 70% of Cambodia's exports. In 2005, exploitable oil deposits were found beneath Cambodia's territorial waters, representing a potential revenue stream for the government when commercial extraction begins. Mining also is attracting significant investor interest, particularly in the northern parts of the country. The government has said opportunities exist for mining bauxite, gold, iron and gems. In 2006, a US-Cambodia bilateral Trade and Investment Framework Agreement (TIFA) was signed, and several rounds of discussions have been held since 2007. Rubber exports increased about 50% in 2011 due to continued demand for raw rubber, particularly from China, Malaysia, and Vietnam. The tourism industry has continued to grow rapidly with foreign arrivals exceeding 2 million per year since 2007; economic troubles abroad dampened growth in 2009 but arrivals rebounded to over 2 million in 2010–11. The global financial crisis is weakening demand for many Cambodian exports, and construction is declining due to a shortage of credit. The long-term development of the economy remains a daunting challenge. The Cambodian government is working with bilateral and multilateral donors, including the World Bank and IMF, to address the country's many pressing needs. The major economic challenge for Cambodia over the next decade will be fashioning an eco

TRANSNATIONAL ISSUES

Disputes—International: Cambodia is concerned about Laos' extensive upstream dam construction; Cambodia and Thailand dispute sections of boundary; in 2011 Thailand and Cambodia resorted to arms in the dispute over the location of the boundary on the precipice surmounted by Preah Vihear temple ruins, awarded to Cambodia by ICJ decision in 1962 and part of a planned UN World Heritage site; Cambodia accuses Vietnam of a wide variety of illicit cross-border activities; Progress on a joint development area with Vietnam is hampered by an unresolved dispute over sovereignty of offshore islands

Illicit drugs: narcotics-related corruption reportedly involving some in the government, military, and police; limited methamphetamine production; vulnerable to money laundering due to its cash-based economy and porous borders

CAMEROON

INTRODUCTION

Background: French Cameroon became independent in 1960 as the Republic of

Cameroon. The following year the southern portion of neighboring British Cameroon voted to merge with the new country to form the Federal Republic of Cameroon. In 1972, a new constitution replaced the federation with a unitary state, the United Republic of Cameroon. The country has generally enjoyed stability, which has permitted the development of agriculture, roads, and railways, as well as a petroleum industry. Despite slow movement toward democratic reform, political power remains firmly in the hands of President Paul BIYA.

GEOGRAPHY

Location: Central Africa, bordering the Bight of Biafra, between Equatorial Guinea and Nigeria

Geographic coordinates: 6 00 N, 12 00 E

Map references: Africa

Area: **total:** 475,440 sq km

country comparison to the world: 53

land: 472,710 sq km

water: 2,730 sq km

Area—comparative: slightly larger than California

Land boundaries: **total:** 4,591 km

border countries: Central African Republic 797 km, Chad 1,094 km, Republic of the Congo 523 km, Equatorial Guinea 189 km, Gabon 298 km, Nigeria 1,690 km

Coastline: 402 km

Maritime claims: **territorial sea:** 12 nm

contiguous zone: 24 nm

Climate: varies with terrain, from tropical along coast to semiarid and hot in north

Terrain: diverse, with coastal plain in southwest, dissected plateau in center, mountains in west, plains in north

Elevation extremes:

lowest point: Atlantic Ocean 0 m

highest point: Fako 4,095 m (on Mt. Cameroon)

Natural resources: petroleum, bauxite, iron ore, timber, hydropower

Land use: arable land: 12.6%

permanent crops: 2.52%

other: 84.86% (2005)

Irrigated land: 290 sq km (2003)

Freshwater withdrawal (domestic/industrial/agricultural): total: 1.18 cu km/yr

(18.2%/8.1%/73.7%)

per capita: 601 cu m/yr (2000)

Natural hazards: volcanic activity with periodic releases of poisonous gases from Lake Nyos and Lake Monoun volcanoes
volcanism: Mt. Cameroon (elev. 4,095 m), which last erupted in 2000, is the most frequently active volcano in West Africa; lakes in Oku volcanic field have released fatal levels of gas on occasion, killing some 1,700 people in 1986

Environment—current issues: waterborne diseases are prevalent; deforestation; overgrazing; desertification; poaching; overfishing

Environment—international agreements:

party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Hazardous Wastes, Law of the Sea, Ozone Layer Protection, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling

signed, but not ratified: none of the selected agreements

Geography—note: sometimes referred to as the hinge of Africa; throughout the country there are areas of thermal springs and indications of current or prior volcanic activity; Mount Cameroon, the highest mountain in Sub-Saharan west Africa, is an active volcano

Flag description: three equal vertical bands of green (hoist side), red, and yellow, with a yellow five-pointed star centered in the red

band; the vertical tricolor recalls the flag of France; red symbolizes unity, yellow the sun, happiness, and the savannahs in the north, and green hope and the forests in the south; the star is referred to as the "star of unity"
note: uses the popular Pan-African colors of Ethiopia

National symbol(s): lion

National anthem: name: "O Cameroun, Berceau de nos Ancêtres" (O Cameroon, Cradle of Our Forefathers)

lyrics/music: Rene Djam AFAME, Samuel Minkio BAMBIA, Moise Nyatte NKO'O [French], Benard Nsokika FONLON [English]/Rene Djam AFAME

note: adopted 1957; Cameroon's anthem, also known as "Chant de Ralliement" (The Rallying Song), has been used unofficially since 1948 and officially adopted in 1957; the anthem has French and English versions whose lyrics differ

ECONOMY

Economy—overview: Because of its modest oil resources and favorable agricultural conditions, Cameroon has one of the best-endowed primary commodity economies in sub-Saharan Africa. Still, it faces many of the serious problems confronting other underdeveloped countries, such as stagnant per capita income, a relatively inequitable distribution of income, a top-heavy civil service, endemic corruption, and a generally unfavorable climate for business enterprise. Since 1990, the government has embarked on various IMF and World Bank programs designed to spur business investment, increase efficiency in agriculture, improve trade, and recapitalize the nation's banks. The IMF is pressing for more reforms, including increased budget transparency, privatization, and poverty reduction programs. Subsidies for electricity, food, and fuel have strained the budget. New mining projects—in diamonds, for example—have attracted foreign investment, but large ventures will take time to develop. Cameroon's business environment—one of the world's worst—is a deterrent to foreign investment.

Telephone system: general assessment: system includes cable, microwave radio relay, and tropospheric scatter; Camtel, the monopoly provider of fixed-line service, provides connections for only about 2 per 100 persons; equipment is old and outdated, and connections with many parts of the country are unreliable

domestic: mobile-cellular usage, in part a reflection of the poor condition and general inadequacy of the fixed-line network, has increased sharply, reaching a subscribership base of 40 per 100 persons

international: country code—237; landing point for the SAT-3/WASC fiber-optic submarine cable that provides connectivity to Europe and Asia; satellite earth stations—2 Intelsat (Atlantic Ocean) (2009)

Broadcast media: government maintains tight control over broadcast media; state-owned Cameroon Radio Television (CRTV), broadcasting on both a TV and radio network, was the only officially recognized and fully licensed broadcaster until August 2007 when the government finally issued licenses to 2 private TV broadcasters and 1 private radio broadcaster; about 70 privately-owned, unlicensed radio stations operating but are subject to closure at any time; foreign news services required to partner with state-owned national station (2007)

TRANSNATIONAL ISSUES

Disputes—International: Joint Border Commission with Nigeria reviewed 2002 ICJ ruling on the entire boundary and bilaterally resolved differences, including June 2006 Greentree Agreement that immediately ceded sovereignty of the Bakassi Peninsula to Cameroon with a full phase-out of Nigerian control and patriation of residents in 2008; Cameroon and Nigeria agreed on maritime delimitation in March 2008; sovereignty dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty, which also includes the Chad-Niger and Niger-Nigeria boundaries

Refugees and internally displaced persons: refugees (country of origin): 3,717 (Chad); 2,871 (Nigeria); 83,950 (Central African Republic) (2007)

Trafficking in persons: current situation: Cameroon is a source, transit, and destination country for women and children trafficked for the purposes of forced labor and commercial sexual exploitation; most victims are children trafficked within country; girls are primarily trafficked for domestic servitude and sexual exploitation and both boys and girls are trafficked for forced labor in sweatshops, bars, restaurants, street vending, mining, and on tea and cocoa plantations; children are trafficked into Cameroon from neighboring states for forced labor in agriculture, fishing, street vending, and spare-parts shops; Nigerian and Beninese children transiting Cameroon

to Gabon, Equatorial Guinea, or adjacent countries often fall victim to traffickers; it is a source country for women transported by sex-trafficking rings to Europe; Cameroonian trafficking victims were reported in the United Kingdom, Germany, Spain, Cyprus, Norway, and Senegal

tier rating: Tier 2 Watch List—while the government modestly increased its efforts to prevent trafficking, including the creation of an inter-ministerial committee and a national action plan, it failed to convict or punish trafficking offenders, including complicit officials, under its child trafficking

law, did not take steps to enact a 2006 draft law prohibiting the trafficking of adults, and did not exhibit significant efforts to protect victims of trafficking (2008)

CANADA

INTRODUCTION

Background: A land of vast distances and rich natural resources, Canada became a self-governing dominion in 1867 while retaining ties to the British crown. Economically and technologically, the nation has developed in parallel with the US, its neighbor to the south across the World's longest unfortified border. Canada faces the political challenges of meeting public demands for quality improvements in health care, education, social services, and economic competitiveness, as well as responding to the particular concerns of predominantly francophone Quebec. Canada also aims to develop its diverse energy resources while maintaining its commitment to the environment.

GEOGRAPHY

Location: Northern North America, bordering the North Atlantic Ocean on the east, North Pacific Ocean on the west, and the Arctic Ocean on the north, north of the contiguous US

Geographic coordinates: 60 00 N, 95 00 W

Freshwater withdrawal (domestic/industrial/agricultural): total: 44.72 cu km/yr (20%/69%/12%)

per capita: 1,386 cu m/yr (1996)

Natural hazards: continuous permafrost in north is a serious obstacle to development; cyclonic storms form east of the Rocky Mountains, a result of the mixing of air masses from the Arctic, Pacific, and North American interior, and produce most of the country's rain and snow east of the mountains **volcanism:** the vast majority of volcanoes in Western Canada's Coast Mountains remain dormant

Environment—current issues: air pollution and resulting acid rain severely affecting lakes and damaging forests; metal smelting, coal-burning utilities, and vehicle emissions impacting on agricultural and forest productivity; ocean waters becoming contaminated due to agricultural, industrial, mining, and forestry activities

Environment—International agreements: party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Persistent Organic Pollutants, Air Pollution-Sulfur 85, Air Pollution-Sulfur 94, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands

signed, but not ratified: Air Pollution-Volatile Organic Compounds, Marine Life Conservation

Geography—note: second-largest country in world (after Russia); strategic location between Russia and US via north polar route; approximately 90% of the population is concentrated within 160 km of the US border

ECONOMY

Economy—overview: As an affluent, high-tech industrial society in the trillion-dollar class, Canada resembles the US in its market-oriented economic system, pattern of production, and affluent living standards. Since World War II, the impressive growth of the manufacturing, mining, and service sectors has transformed the nation from a largely rural economy into one primarily industrial and urban. The 1989 US-Canada Free Trade Agreement (FTA) and the 1994 North American Free Trade Agreement (NAFTA) (which includes Mexico) touched off a dramatic increase in trade and economic integration with the US its principal trading partner. Canada enjoys a substantial trade surplus with the US, which absorbs about three-fourths of Canadian exports each year. Canada is the US's largest foreign supplier of energy, including oil, gas, uranium, and electric power. Given its great natural resources, highly skilled labor force, and modern capital plant, Canada enjoyed solid economic growth from 1993 through 2007. Buffeted by the global economic crisis, the economy dropped into a sharp recession in the final months of 2008, and Ottawa posted its first fiscal deficit in 2009 after 12 years of surplus. Canada's major banks, however, emerged from the financial crisis of 2008-09 among the strongest in the world, owing to the financial sector's

tradition of conservative lending practices and strong capitalization. Canada achieved marginal growth in 2010 and 2011 and plans to balance the budget by 2015. In addition, the country's petroleum sector is rapidly becoming an even larger economic driver with Alberta's oil sands significantly boosting Canada's proven oil reserves, ranking the country third in the world behind Saudi Arabia and Venezuela.

TRANSNATIONAL ISSUES

Disputes—International: managed maritime boundary disputes with the US at Dixon Entrance, Beaufort Sea, Strait of Juan de Fuca, and the Gulf of Maine including the disputed Machias Seal Island and North Rock; Canada and the United States dispute how to divide the Beaufort Sea and the status of the Northwest Passage but continue to work cooperatively to survey the Arctic continental shelf; US works closely with Canada to intensify security measures for monitoring and controlling legal and illegal movement of people, transport, and commodities across the international border; sovereignty dispute with Denmark over Hans Island in the Kennedy Channel between Ellesmere Island and Greenland; commencing the collection of technical evidence for submission to the Commission on the Limits of the Continental Shelf in support of claims for continental shelf beyond 200 nautical miles from its declared baselines in the Arctic, as stipulated in Article 76, paragraph 8, of the United Nations Convention on the Law of the Sea

Illicit drugs: illicit producer of cannabis for the domestic drug market and export to US; use of hydroponics technology permits growers to plant large quantities of high-quality marijuana indoors; increasing ecstasy production, some of which is destined for the US; vulnerable to narcotics money laundering because of its mature financial services sector

CAPE VERDE

INTRODUCTION

Background: The uninhabited islands were discovered and colonized by the Portuguese in the 15th century; Cape Verde subsequently became a trading center for African slaves and later an important coaling and resupply stop for whaling and transatlantic shipping. Following independence in 1975, and a tentative interest in unification with Guinea-Bissau, a one-party system was established and maintained until multi-party elections were held in 1990. Cape Verde continues to exhibit one of Africa's most stable democratic governments. Repeated droughts during the second half of the 20th century caused significant hardship and prompted heavy emigration. As a result, Cape Verde's expatriate population is greater than its domestic one. Most Cape Verdeans have both African and Portuguese antecedents.

ECONOMY

Economy—overview: This island economy suffers from a poor natural resource base, including serious water shortages exacerbated by cycles of long-term drought and poor soil for agriculture on several of the islands. The economy is service oriented with commerce, transport, tourism, and public services accounting for about three-fourths of GDP. Although about 40% of the population lives in rural areas, the share of food production in GDP is low. About 82% of food must be imported. The fishing potential, mostly lobster and tuna, is not fully exploited. Cape Verde annually runs a high trade deficit financed by foreign aid and remittances from its large pool of emigrants; remittances supplement GDP by more than 20%. Despite the lack of resources, sound economic management has produced steadily improving incomes.

Continued economic reforms are aimed at developing the private sector and attracting foreign investment to diversify the economy and mitigate high unemployment. Future prospects depend heavily on the maintenance of aid flows, the encouragement of tourism, remittances, and the momentum of the government's development program. Cape Verde became a member of the WTO in July 2008.

INTRODUCTION

Background: The former French colony of Ubangi-Shari became the Central African Republic upon independence in 1960. After three tumultuous decades of misrule—mostly by military governments—civilian rule was established in 1993 and lasted for one decade. President Ange-Felix PATASSE's civilian government was plagued by unrest, and in March 2003 he was deposed in a military coup led by General Francois BOZIZE, who established a transitional government. Though the government has the tacit support of civil society groups and the main parties, a wide field of candidates contested the municipal, legislative, and presidential elections held in March and May of 2005 in which General BOZIZE was affirmed as president. BOZIZE was reelected in the 2011 elections, which were widely viewed as having gross inaccuracies and discrepancies. The government still does not fully control the countryside, where pockets of lawlessness persist. Militant group Lord's Resistance Army (LRA) continues to affect stability in the Central African Republic as well.

ECONOMY

Economy—overview: Subsistence agriculture, together with forestry, remains the backbone of the economy of the Central African Republic (CAR), with about 60% of the population living in outlying areas. The agricultural sector generates more than half of GDP. Timber has accounted for about 16% of export earnings and the diamond industry, for 40%. Important constraints to economic development include the CAR's landlocked position, a poor transportation system, a largely unskilled work force, and a legacy of misdirected macroeconomic policies. Factional fighting between the government and its opponents remains a drag on economic revitalization. Since 2009 the IMF has worked closely with the government to institute reforms that have resulted in some improvement in budget transparency, but other problems remain. The government's additional spending in the run-up to the election in 2011 worsened CAR's fiscal situation. Distribution of income is extraordinarily unequal. Grants from France and the international community can only partially meet humanitarian needs. CAR currently lacks an IMF program.

TRANSNATIONAL ISSUES

Disputes—International: periodic skirmishes over water and grazing rights among related pastoral populations along the border with southern Sudan persist

Refugees and internally displaced persons: *refugees (country of origin):* 7,900 (Sudan); 3,700 (Democratic Republic of the Congo); note—UNHCR resumed repatriation of Southern Sudanese refugees in 2006

IDPs: 197,000 (ongoing unrest following coup in 2003) (2007)

Trafficking in persons: *current situation:* Central African Republic is a source, transit, and destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; the majority of victims are children trafficked within the country for sexual exploitation, domestic servitude, street vending, and forced agricultural, mine, market and restaurant labor; to a lesser extent, children are trafficked from the Central African Republic to Cameroon, Nigeria, Chad, Republic of the Congo, Sudan, and the Democratic Republic of Congo; rebels continue to abduct and exploit enslaved Sudanese, Congolese, Central African, and Ugandan children for use as cooks, porters, concubines, and combatants

tier rating: Tier 3—Central African Republic does not fully comply with the minimum standards for the elimination of trafficking; the government, which has limited human and physical capital, did not investigate and prosecute trafficking offenses, identify or provide protective services to trafficking victims, or take steps to raise public awareness about the dangers of human trafficking; the revised Central African penal code, enacted in January 2010, outlaws all forms of trafficking in persons, but awareness of this statute remains low (2008)

CHAD

INTRODUCTION

Background: Chad, part of France's African holdings until 1960, endured three decades of civil warfare as well as invasions by Libya before a semblance of peace was finally restored in 1990. The government eventually drafted a democratic constitution and held flawed presidential elections in 1996 and 2001. In 1998, a rebellion broke out in northern Chad, which has sporadically flared up despite several peace agreements between the government and the rebels. In 2005, new rebel groups emerged in western Sudan and made probing attacks into eastern Chad despite signing peace agreements in December 2006 and October 2007. In June 2005, President Idriss DEBY held a referendum successfully removing constitutional term limits and won another controversial election in 2006. Sporadic rebel campaigns continued throughout 2006 and 2007. The capital experienced a significant rebel threat in early 2008, but has had no significant rebel threats since then, in part

due to Chad's 2010 rapprochement with Sudan, which previously used Chadian rebels as proxies. DEBY in 2011 was reelected to his fourth term in an election that international observers described as proceeding without incident. Power remains in the hands of an ethnic minority.

National symbol(s): goat (north); lion (south)

National anthem: name: "La Tchadienne" (The Chadian)

lyrics/music: Louis GIDROL and his students/Paul VILLARD

note: adopted 1960

ECONOMY

Economy—overview: Chad's primarily agricultural economy will continue to be boosted by major foreign direct investment projects in the oil sector that began in 2000. At least 80% of Chad's population relies on subsistence farming and livestock raising for its livelihood. Chad's economy has long been handicapped by its landlocked position, high energy costs, and a history of instability. Chad relies on foreign assistance and foreign capital for most public and private sector investment projects. Remittances are also an important source of income. The Libyan conflict disrupted inflows of remittances to Chad's impoverished western region that relies on income from Chadians living in Libya. A consortium led by two US companies has been investing \$3.7 billion to develop oil reserves—estimated at 1.5 billion barrels—in southern Chad. Chinese companies are also expanding exploration efforts and have completed a 311-km pipeline and the country's first refinery. The nation's total oil reserves are estimated at 1.5 billion barrels. Oil production came on stream in late 2003. Chad began to export oil in 2004. Cotton, cattle, and gum arabic provide the bulk of Chad's non-oil export earnings.

TRANSNATIONAL ISSUES

Disputes—International: since 2003, ad
hoc armed militia groups and the Sudanese
military have driven hundreds of thousands
of Darfur residents into Chad; Chad wishes
to be a helpful mediator in resolving the
Darfur conflict, and in 2010 established a
joint border monitoring force with Sudan,
which has helped to reduce cross-border
banditry and violence; only Nigeria and
Cameroon have heeded the Lake Chad
Commission's admonition to ratify the
delimitation treaty, which also includes the
Chad-Niger and Niger-Nigeria boundaries

**Refugees and internally displaced per-
sons:** *refugees (country of origin):* 234,000
(Sudan); 54,200 (Central African Republic)
IDPs: 178,918 (2007)

Trafficking in persons: *current situation:*
Chad is a source, transit, and destination
country for children trafficked for the pur-
poses of forced labor and commercial sexual
exploitation; the majority of children are
trafficked within Chad for involuntary
domestic servitude, forced cattle herding,
forced begging, involuntary agricultural
labor, or for commercial sexual exploitation;
to a lesser extent, Chadian children are also
trafficked to Cameroon, the Central African
Republic, and Nigeria for cattle herding
tier rating: Tier 2 Watch List—the Govern-
ment of Chad does not fully comply with
the minimum standards for the elimination
of trafficking; however, it is making signifi-
cant efforts to do so; by 2011 the Govern-
ment of Chad reportedly ended all child
conscription into its national army and
continued to engage in efforts to demobilize
remaining child soldiers from rebel forces;
fewer efforts were made to address the
forced labor of children in cattle herding,
domestic service, and begging, or to com-
bat the commercial sexual exploitation of
Chadian children; the government did not
enact legislation prohibiting trafficking in
persons and undertook limited anti-traffick-
ing law enforcement and victim protection
activities (2009)

CHILE

INTRODUCTION

Background: Prior to the arrival of the Spanish in the 16th century, the Inca ruled northern Chile while the indigenous Mapuche inhabited central and southern Chile. Although Chile declared its independence in 1810, decisive victory over the Spanish was not achieved until 1818. In the War of the Pacific (1879–83), Chile defeated Peru and Bolivia and won its present northern regions. It was not until the 1880s that the Mapuche Indians were completely subjugated. After a series of elected governments, the three-year-old Marxist government of Salvador ALLENDE was overthrown in 1973 by a military coup led by Augusto PINOCHET, who ruled until a freely elected president was installed in 1990. Sound economic policies, maintained consistently since the 1980s, have contributed to steady growth, reduced poverty rates by over half, and have helped secure the country's commitment to democratic and representative government. Chile has increasingly assumed regional and international leadership roles befitting its status as a stable, democratic nation.

note: music adopted 1828, original lyrics adopted 1818, adapted lyrics adopted 1847; under Augusto PINOCHET's military rule, a verse glorifying the army was added; however, as a protest, some citizens refused to sing this verse; it was removed when democracy was restored in 1990

ECONOMY

Economy—overview: Chile has a market-oriented economy characterized by a high level of foreign trade and a reputation for strong financial institutions and sound policy that have given it the strongest sovereign bond rating in South America. Exports account for more than one-third of GDP, with commodities making up some three-quarters of total exports. Copper alone provides one-third of government revenue. During the early 1990s, Chile's reputation as a role model for economic reform was strengthened when the democratic government of Patricio AYLWIN—which took over from the military in 1990—deepened the economic reform initiated by the military government. Since 1999, growth has averaged 4% per year. Chile deepened its longstanding commitment to trade liberalization with the signing of a free trade agreement with the US, which took effect on 1 January 2004. Chile claims to have more bilateral or regional trade agreements than any other country. It has 59 such agreements (not all of them full free trade agreements), including with the European Union, Mercosur, China, India, South Korea, and Mexico. Over the past seven years, foreign direct investment inflows have quadrupled to some \$15 billion in 2010, but foreign direct investment had dropped to about \$7 billion in 2009 in the face of diminished investment throughout the world. The Chilean government conducts a rule-based countercyclical fiscal policy, accumulating surpluses in sovereign wealth funds during periods of high copper prices and economic growth, and allowing deficit spending only during periods of low copper prices and growth. As of November 2011, those sovereign wealth funds—kept mostly outside the country and separate from Central Bank reserves—amounted to more than \$18 billion. Chile used this fund to finance fiscal stimulus packages during the 2009 economic downturn. In

December 2009, the OECD invited Chile to become a full member, after a two year period of compliance with organization mandates, and in May 2010 Chile signed the OECD Convention, becoming the first South American country to join the OECD. The economy started to show signs of a rebound in the fourth quarter of 2009, and GDP grew 5.1% in 2010 and 6.5% in 2011. Chile achieved this growth despite the 8.8 magnitude earthquake that struck in February 2010, which was one of the top 10 strongest earthquakes on record. The earthquake and subsequent tsunamis it generated caused considerable damage near the epicenter, located about 70 miles from Concepcion—and about 200 miles southwest of Santiago.

TRANSNATIONAL ISSUES

Disputes—international: Chile and Peru rebuff Bolivia's reactivated claim to restore the Atacama corridor, ceded to Chile in 1884, but Chile has offered instead unrestricted but not sovereign maritime access through Chile to Bolivian natural gas; Chile rejects Peru's unilateral legislation to change its latitudinal maritime boundary with Chile to an equidistance line with a southwestern axis favoring Peru; in October 2007, Peru took its maritime complaint with Chile to the ICJ; territorial claim in Antarctica (Chilean Antarctic Territory) partially overlaps Argentine and British claims; the joint boundary commission, established by Chile and Argentina in 2001, has yet to map and demarcate the delimited boundary in the inhospitable Andean Southern Ice Field (Campo de Hielo Sur)

Illicit drugs: transshipment country for cocaine destined for Europe and the region; some money laundering activity, especially through the Iquique Free Trade Zone; imported precursors passed on to Bolivia; domestic cocaine consumption is rising, making Chile a significant consumer of cocaine (2008)

CHINA

INTRODUCTION

Background: For centuries China stood as a leading civilization, outpacing the rest of the world in the arts and sciences, but in the 19th and early 20th centuries, the country was beset by civil unrest, major famines, military defeats, and foreign occupation. After World War II, the Communists under MAO Zedong established an autocratic socialist system that, while ensuring China's sovereignty, imposed strict controls over everyday life and cost the lives of tens of millions of people. After 1978, MAO's successor DENG Xiaoping and other leaders focused on market-oriented economic development and by 2000 output had quadrupled. For much of the population, living standards have improved dramatically and the room for personal choice has expanded, yet political controls remain tight. China since the early 1990s has increased its global outreach and participation in international organizations.

GEOGRAPHY

Location: Eastern Asia, bordering the East China Sea, Korea Bay, Yellow Sea, and South China Sea, between North Korea and Vietnam

Geographic coordinates: 35 00 N, 105 00 E

Map references: Asia

Area: total: 9,596,961 sq km

country comparison to the world: 4

land: 9,569,901 sq km

water: 27,060 sq km

Area—comparative: slightly smaller than the US

border countries: Afghanistan 76 km, Bhutan 470 km, Burma 2,185 km, India 3,380 km, Kazakhstan 1,533 km, North Korea 1,416 km, Kyrgyzstan 858 km, Laos 423 km, Mongolia 4,677 km, Nepal 1,236 km, Pakistan 523 km, Russia (northeast) 3,605 km, Russia (northwest) 40 km, Tajikistan 414 km, Vietnam 1,281 km

regional borders: Hong Kong 30 km, Macau 0.34 km

Coastline: 14,500 km

Maritime claims: territorial sea: 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: 200 nm or to the edge of the continental margin

Climate: extremely diverse; tropical in south to subarctic in north

Terrain: mostly mountains, high plateaus, deserts in west; plains, deltas, and hills in east

Elevation extremes:

lowest point: Turpan Pendi -154 m

highest point: Mount Everest 8,850 m

Natural resources: coal, iron ore, petroleum, natural gas, mercury, tin, tungsten, antimony, manganese, molybdenum, vanadium, magnetite, aluminum, lead, zinc, rare earth elements, uranium, hydropower potential (world's largest)

Land use: arable land: 14.86%

permanent crops: 1.27%

other: 83.87% (2005)

Irrigated land: 641,410 sq km (2003)

Total renewable water resources: 2,829.6 cu km (1999)

Freshwater withdrawal (domestic/industrial/agricultural): total: 549.76 cu km/yr (7%/26%/68%)

per capita: 415 cu m/yr (2000)

Natural hazards: frequent typhoons (about five per year along southern and eastern coasts); damaging floods; tsunamis; earthquakes; droughts; land subsidence volcanism: China contains some historically active volcanoes including Changbaishan (also known as Baitoushan, Baegdu, or P'aektu-san), Hainan Dao, and Kunlun although most have been relatively inactive in recent centuries

Environment—current issues: air pollution (greenhouse gases, sulfur dioxide particulates) from reliance on coal produces acid rain; water shortages, particularly in the north; water pollution from untreated wastes; deforestation; estimated loss of one-fifth of agricultural land since 1949 to soil erosion and economic development; desertification; trade in endangered species

Environment—international agreements: party to: Antarctic-Environmental Protocol,

Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling
signed, but not ratified: none of the selected agreements

Geography—note: world's fourth largest country (after Russia, Canada, and US); Mount Everest on the border with Nepal is the world's tallest peak

Flag description: red with a large yellow five-pointed star and four smaller yellow five-pointed stars (arranged in a vertical arc toward the middle of the flag) in the upper hoist-side corner; the color red represents revolution, while the stars symbolize the four social classes—the working class, the peasantry, the urban petty bourgeoisie, and the national bourgeoisie (capitalists)—united under the Communist Party of China

National symbol(s): dragon

National anthem: name: “Yiyongjun Jinxingqu” (The March of the Volunteers)

lyrics/music: TIAN Han/NIE Er

note: adopted 1949; the anthem, though banned during the Cultural Revolution, is more commonly known as “Zhongguo Guoge” (Chinese National Song); it was originally the theme song to the 1935 Chinese movie, “Sons and Daughters in a Time of Storm”

ECONOMY

Economy—overview: Since the late 1970s China has moved from a closed, centrally planned system to a more market-oriented one that plays a major global role - in 2010 China became the world's largest exporter. Reforms began with the phasing out of collectivized agriculture, and expanded to include the gradual liberalization of prices, fiscal decentralization, increased autonomy for state enterprises, creation of a diversified banking system, development of stock markets, rapid growth of the private sector, and opening to foreign trade and investment. China has implemented reforms in a gradualist fashion. In recent years, China has renewed its support for state-owned enterprises in sectors it considers important to “economic security,” explicitly looking to foster globally competitive national champions. After keeping its currency tightly linked to the US dollar for years, in July 2005 China revalued its currency by 2.1% against the US dollar and moved to an exchange rate system that references a basket of currencies. From mid 2005 to late 2008 cumulative appreciation of the renminbi against the US dollar was more than 20%, but the exchange rate remained virtually pegged to the dollar from the onset of the global financial crisis until June 2010, when Beijing allowed resumption of a gradual appreciation. The restructuring of the economy and resulting efficiency gains have contributed to a more than tenfold increase in GDP since 1978. Measured on a purchasing power parity (PPP) basis that adjusts for price differences, China in 2010 stood as the second-largest economy in the world after the US, having surpassed Japan in 2001. The dollar values of China's agricultural and industrial output each exceed those of the US; China is second to the US in the value of services it produces. Still, per capita income is below the world average. The Chinese government faces numerous economic challenges, including: (a) reducing its high domestic savings rate and correspondingly low domestic demand; (b) sustaining adequate job growth for tens of millions of migrants and new entrants to the work

force; (c) reducing corruption and other economic crimes; and (d) containing environmental damage and social strife related to the economy's rapid transformation. Economic development has progressed further in coastal provinces than in the interior, and by 2011 more than 250 million migrant workers and their dependents had relocated to urban areas to find work. One consequence of population control policy is that China is now one of the most rapidly aging countries in the world. Deterioration in the environment—notably air pollution, soil erosion, and the steady fall of the water table, especially in the North—is another long-term problem. China continues to lose arable land because of erosion and economic development. The Chinese government is seeking to add energy production capacity from sources other than coal and oil, focusing on nuclear and alternative energy development. In 2010–11, China faced high inflation resulting largely from its credit-fueled stimulus program. Some tightening measures appear to have controlled inflation, but GDP growth consequently slowed to near 9% for 2011. An economic slowdown in Europe is expected to further drag Chinese growth in 2012. Debt overhang from the stimulus program, particularly among local governments, and a property price bubble challenge policy makers currently. The government's 12th Five-Year Plan, adopted in March 2011, emphasizes continued economic reforms and the need to increase domestic consumption in order to make the economy less dependent on exports in the future. However, China has made only marginal progress toward these rebalancing goals.

Telephone system: general assessment: domestic and international services are increasingly available for private use; unevenly distributed domestic system serves principal cities, industrial centers, and many towns; China continues to develop its telecommunications infrastructure, and is partnering with foreign providers to expand its global reach; China in the summer of 2008 began a major restructuring of its telecommunications industry, resulting in

the consolidation of its six telecom service operators to three, China Telecom, China Mobile and China Unicom, each providing both fixed-line and mobile services
domestic: interprovincial fiber-optic trunk lines and cellular telephone systems have been installed; mobile-cellular subscriber-ship is increasing rapidly; the number of Internet users exceeded 250 million by summer 2008; a domestic satellite system with 55 earth stations is in place
international: country code—86; a number of submarine cables provide connectivity to Asia, the Middle East, Europe, and the US; satellite earth stations—7 (5 Intelsat—4 Pacific Ocean and 1 Indian Ocean; 1 Intersputnik—Indian Ocean region; and 1 Inmarsat—Pacific and Indian Ocean regions) (2008)

Broadcast media: all broadcast media are owned by, or affiliated with, the Communist Party of China or a government agency; no privately-owned TV or radio stations; state-run Chinese Central TV, provincial, and municipal stations offer more than 2,000 channels; the Central Propaganda Department lists subjects that are off limits to domestic broadcast media with the government maintaining authority to approve all programming; foreign-made TV programs must be approved prior to broadcast (2008)

TRANSNATIONAL ISSUES

Disputes—international: continuing talks and confidence-building measures work toward reducing tensions over Kashmir that nonetheless remains militarized

with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; China and India continue their security and foreign policy dialogue started in 2005 related to the dispute over most of their rugged, militarized boundary, regional nuclear proliferation, and other matters; China claims most of India's Arunachal Pradesh to the base of the Himalayas; lacking any treaty describing the boundary, Bhutan and China continue negotiations to establish a common boundary alignment to resolve territorial disputes arising from substantial cartographic discrepancies, the largest of which lie in Bhutan's northwest and along the Chumbi salient; Burmese forces attempting to dig in to the largely autonomous Shan State to rout local militias tied to the drug trade, prompts local residents to periodically flee into neighboring Yunnan Province in China; Chinese maps show an international boundary symbol off the coasts of the littoral states of the South China Seas, where China has interrupted Vietnamese hydrocarbon exploration; China asserts sovereignty over Scarborough Reef along with the Philippines and Taiwan, and over the Spratly Islands together with Malaysia, the Philippines, Taiwan, Vietnam, and Brunei; the 2002 Declaration on the Conduct of Parties in the South China Sea eased tensions in the Spratlys but is not the legally binding code of conduct sought by some parties; Vietnam and China continue to expand construction of facilities in the Spratlys and in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord on marine seismic activities in the Spratly Islands; China occupies some of the Paracel Islands also claimed by Vietnam and Taiwan; China and Taiwan continue to reject both Japan's claims to the uninhabited islands of Senkaku-shoto (Diaoyu Tai) and Japan's unilaterally declared equidistance line in the East China Sea, the site of intensive hydrocarbon exploration and exploitation; certain islands in the Yalu and Tumen rivers are in dispute with North Korea; North Korea and China seek to stem illegal migration to China by North Koreans, fleeing privations and oppression, by building a fence along portions of the border and imprisoning North Koreans deported by China; China and Russia have demarcated the once disputed islands at the Amur and Ussuri confluence and in the Argun River in accordance with their 2004 Agreement; China and Tajikistan have

begun demarcating the revised boundary agreed to in the delimitation of 2002; the decade-long demarcation of the China-Vietnam land boundary was completed in 2009; citing environmental, cultural, and social concerns, China has reconsidered construction of 13 dams on the Salween River, but energy-starved Burma, with backing from Thailand, remains intent on building five hydro-electric dams downstream despite regional and international protests; Chinese and Hong Kong authorities met in March 2008 to resolve ownership and use of lands recovered in Shenzhen River channelization, including 96-hectare Lok Ma Chau Loop; Hong Kong developing plans to reduce 2,000 out of 2,800 hectares of its restricted Closed Area by 2010

Refugees and internally displaced persons: *refugees (country of origin):* 300,897 (Vietnam); estimated 30,000–50,000 (North Korea) IDPs: 90,000 (2007)

Trafficking in persons: *current situation:* China is a source, transit, and destination country for men, women, and children trafficked for the purposes of sexual exploitation and forced labor; the majority of trafficking in China occurs within the country's borders, there are reports in recent years that Chinese men, women, and children may be subjected to conditions of sex trafficking and forced labor in numerous countries and territories worldwide; women and children are trafficked to China from Burma, Vietnam, Laos, Mongolia, Russia, North Korea, Romania, and Zimbabwe for forced labor, marriage, and prostitution; some Chinese children are forced into prostitution, and various forms of forced labor, including begging, stealing, and work in brick kilns and factories

tier rating: Tier 2 Watch List—China does not fully comply with the minimum standards for the elimination of trafficking and did not demonstrate evidence of significant efforts to address all forms of trafficking or effectively protect victims; however, China has increased its attention to trafficking of women and children nationwide; China continues to lack a formal, nationwide procedure to systematically identify victims of trafficking (2008)

Illicit drugs: major transshipment point for heroin produced in the Golden Triangle region of Southeast Asia; growing domestic consumption of synthetic drugs, and heroin from Southeast and Southwest Asia; source country for methamphetamine and heroin chemical precursors, despite new regulations on its large chemical industry (2008)

CHRISTMAS ISLAND

INTRODUCTION

Background: Named in 1643 for the day of its discovery, the island was annexed and settlement began by the UK in 1888. Phosphate mining began in the 1890s. The UK transferred sovereignty to Australia in 1958. Almost two-thirds of the island has been declared a national park.

COCOS (KEELING) ISLANDS

INTRODUCTION

Background: There are 27 coral islands in the group. Captain William KEELING

discovered the islands in 1609, but they remained uninhabited until the 19th century. From the 1820s to 1978, members of the CLUNIE-ROSS family controlled the islands and the copra produced from local

coconuts. Annexed by the UK in 1857, the Cocos Islands were transferred to the Australian Government in 1955. The population on the two inhabited islands generally is split between the ethnic Europeans

on West Island and the ethnic Malays on Home Island.

COLOMBIA

INTRODUCTION

Background: Colombia was one of the three countries that emerged from the collapse of Gran Colombia in 1830 (the others are Ecuador and Venezuela). A four-decade long conflict between government forces and anti-government insurgent groups, principally the Revolutionary Armed Forces of Colombia (FARC) heavily funded by the drug trade, escalated during the 1990s. The insurgents lack the military or popular support necessary to overthrow the government, and violence has been decreasing since about 2002. However, insurgents continue attacks against civilians and large areas of the countryside are under guerrilla influence or are contested by security forces. More than 31,000 former paramilitaries had demobilized by the end of 2006 and the United Self Defense Forces of Colombia (AUC) as a formal organization had ceased to function. In the wake of the paramilitary demobilization, emerging criminal groups arose, whose members include some former paramilitaries. The Colombian Government has stepped up efforts to reassert government control throughout the country, and now has a presence in every one of its administrative departments. However, neighboring countries worry about the violence spilling over

their borders. In January 2011, Colombia assumed a nonpermanent seat on the UN Security Council for the 2011–12 term.

Flag description: three horizontal bands of yellow (top, double-width), blue, and red; the flag retains the three main colors of the banner of Gran Colombia, the short-lived South American republic that broke up in 1830; various interpretations of the colors exist and include: yellow for the gold in Colombia's land, blue for the seas on its shores, and red for the blood spilled in attaining freedom; alternatively, the colors have been described as representing more elemental concepts such as sovereignty and justice (yellow), loyalty and vigilance (blue), and valor and generosity (red); or simply the principles of liberty, equality, and fraternity *note:* similar to the flag of Ecuador, which is longer and bears the Ecuadorian coat of arms superimposed in the center

National symbol(s): Andean condor

National anthem: name: "Himno Nacional de la Republica de Colombia" (National Anthem of the Republic of Colombia)

lyrics/music: Rafael NUNEZ/Oreste SIN-DICI

note: adopted 1920; the anthem was created from an inspirational poem written by President Rafael NUNEZ

ECONOMY

Economy—overview: Colombia's consistently sound economic policies and aggressive promotion of free trade agreements in recent years have bolstered its ability to face external shocks. Real GDP grew 5.7% in 2011 and inflation ended 2011 at 3.7%, continuing almost a decade of strong economic performance. All three major ratings agencies have upgraded Colombia's investment grade. Nevertheless, Colombia depends heavily on oil exports, making it vulnerable to a drop in oil prices. Economic development is stymied by inadequate infrastructure, weakened further by recent flooding. Moreover, the unemployment rate of 10.8% in 2011 is still one of Latin America's highest. The SANTOS Administration's foreign policy has focused on bolstering Colombia's commercial ties and boosting investment at home. The US-Colombia Free Trade Agreement (FTA) was ratified by the US Congress in October 2011 and is pending implementation in 2012. Colombia has signed or is negotiating FTAs with a number of other countries, including Canada, Chile, Mexico, Switzerland, the EU, Venezuela, South Korea, Turkey, Japan, and Israel. Foreign direct investment—notably in the oil sector—reached a record \$10 billion in 2008 but dropped to \$7.2 billion in 2009, before beginning to recover in 2010, and it appears to have reached a record high \$13 billion in 2011. Colombia is the third largest Latin American exporter of oil to the US. Inequality, underemployment, and narcotraficking remain significant challenges, and Colombia's infrastructure requires major improvements to sustain economic expansion. In late 2010, Colombia experienced its most severe flooding in decades with damages estimated to exceed \$6 billion. The rains resumed in 2011 causing further damages to crops and infrastructure as well as killing hundreds of Colombians and displacing millions.

TRANSNATIONAL ISSUES

Disputes—International: in December 2007, ICJ allocated San Andres, Providencia, and Santa Catalina islands to Colombia under 1928 Treaty but did not rule on 82

degrees W meridian as maritime boundary with Nicaragua; managed dispute with Venezuela over maritime boundary and Venezuelan-administered Los Monjes Islands near the Gulf of Venezuela; Colombian-organized illegal narcotics, guerrilla, and paramilitary activities penetrate all neighboring borders and have caused Colombian citizens to flee mostly into neighboring countries; Colombia, Honduras, Nicaragua, Jamaica, and the US assert various claims to Bajo Nuevo and Serranilla Bank

Refugees and Internally displaced persons: IDPs: 1.8–3.5 million (conflict between government and illegal armed groups and drug traffickers) (2007)

Illicit drugs: illicit producer of coca, opium poppy, and cannabis; world's leading coca cultivator with 116,000 hectares in coca cultivation in 2009, a 3% decrease over 2008, producing a potential of 270 mt of pure cocaine; the world's largest producer of coca derivatives; supplies cocaine to nearly all of the US market and the great majority of other international drug mar-

kets; in 2010, aerial eradication dispensed herbicide to treat over 101,000 hectares combined with manual eradication of 61,000 hectares; a significant portion of narcotics proceeds are either laundered or invested in Colombia through the black market peso exchange; important supplier of heroin to the US market; opium poppy cultivation is estimated to have fallen to 1,100 hectares in 2009 while pure heroin production declined to 2.1 mt; most Colombian heroin is destined for the US market (2008)

COMOROS

INTRODUCTION

Background: Comoros has endured more than 20 coups or attempted coups since gaining independence from France in 1975. In 1997, the islands of Anjouan and Moheli declared independence from Comoros. In 1999, military chief Col. AZALI seized power in a bloodless coup, and helped negotiate the 2000 Fomboni Accords power-sharing agreement in which the federal presidency rotates among the three islands, and each island maintains its local government. AZALI won the 2002 presidential election, and each island in the archipelago elected its president. AZALI stepped down in 2006 and President SAMBI was elected to office. In 2007, Mohamed BACAR effected Anjouan's de-facto secession from the Union, refusing to step down in favor of fresh Anjouanais elections when Comoros' other islands held legitimate elections in July. The African Union (AU) initially attempted to resolve the political crisis by applying sanctions and a naval blockade on Anjouan, but in March 2008 AU and Comoran soldiers seized the island. The move was generally welcomed by the island's inhabitants.

ECONOMY

Economy—overview: One of the world's poorest countries, Comoros is made up of three islands that have inadequate transportation links, a young and rapidly increasing population, and few natural resources. The low educational level of the labor force contributes to a subsistence level of economic activity, high unemployment, and a heavy dependence on foreign grants and technical assistance. Agriculture, including fishing, hunting, and forestry, contributes 40% to GDP, employs 80% of the labor force, and provides most of the exports. Export income is heavily reliant on the three main crops of vanilla, cloves, and ylang-ylang and Comoros' export earnings are easily disrupted by disasters such as fires. The country is not self-sufficient in food production; rice, the main staple, accounts for the bulk of imports. The government—which is hampered by internal political disputes—lacks a comprehensive strategy to attract foreign investment and is struggling to upgrade education and technical training, privatize commercial and industrial enterprises, improve health services, diversify exports, promote tourism, and reduce the high population growth rate. Political problems have inhibited growth, which averaged only about 1% in 2006–09 but more than 2% per year in 2010–11. Remittances from 150,000 Comorans abroad help supplement GDP. In September 2009 the IMF approved Comoros for a three-year

\$21 million loan, but the government has struggled to meet program targets, such as restricting spending on wages, strengthening domestic revenue collection, and moving forward on structural reforms.

TRANSNATIONAL ISSUES

Disputes—International: claims French-administered Mayotte and challenges France's and Madagascar's claims to Banc du Geyser, a drying reef in the Mozambique Channel; in May 2008, African Union forces are called in to assist the Comoros military recapture Anjouan Island from rebels who seized it in 2001

CONGO, DEMOCRATIC REPUBLIC OF THE

INTRODUCTION

Background: Established as a Belgian colony in 1908, the then-Republic of the Congo gained its independence in 1960, but its early years were marred by political and social instability. Col. Joseph MOBUTU seized power and declared himself president in a November 1965 coup. He subsequently changed his name—to MOBUTU Sese Seko—as well as that of the country—to Zaire. MOBUTU retained his position for 32 years through several sham elections, as well as through brutal force. Ethnic strife and civil war, touched off by a massive inflow of refugees in 1994 from fighting in Rwanda and Burundi, led in May 1997 to the toppling of the MOBUTU regime by a rebellion backed by Rwanda and Uganda and fronted by Laurent KABILA. He renamed the country the Democratic Republic of the Congo (DRC), but in August 1998 his regime was itself challenged by a second insurrection again backed by Rwanda and Uganda. Troops from Angola, Chad, Namibia, Sudan, and Zimbabwe intervened to support KABILA's regime. A cease-fire was signed in July 1999 by the DRC, Congolese armed rebel groups, Angola, Namibia, Rwanda, Uganda, and Zimbabwe but sporadic fighting continued. Laurent KABILA was assassinated in January 2001 and his son, Joseph KABILA, was named head of state. In October 2002, the new president was successful in negotiating the withdrawal of Rwandan forces occupying eastern Congo; two months later, the

Pretoria Accord was signed by all remaining warring parties to end the fighting and establish a government of national unity. A transitional government was set up in July 2003. Joseph KABILA as president and four vice presidents represented the former government, former rebel groups, the political opposition, and civil society. The transitional government held a successful constitutional referendum in December 2005 and elections for the presidency, National Assembly, and provincial legislatures in 2006. The National Assembly was installed in September 2006 and KABILA was inaugurated president in December 2006. Provincial assemblies were constituted in early 2007, and elected governors and national senators in January 2007. The most recent national elections were held on 28 November 2011.

ECONOMY

Economy—overview: The economy of the Democratic Republic of the Congo—a nation endowed with vast potential wealth—is slowly recovering from decades of decline. Systemic corruption since independence in 1960 and conflict that began in May 1997 has dramatically reduced national output and government revenue, increased external debt, and resulted in the deaths of more than 5 million people from violence, famine, and disease. Foreign businesses curtailed operations due to uncertainty about the outcome of the conflict, lack of infrastructure, and the difficult operating environment. Conditions began to improve in late 2002 with the withdrawal of a large portion of the invading foreign troops. The transitional government reopened relations with international financial institutions and international donors, and President KABILA began implementing reforms. Progress has been slow and the International Monetary Fund curtailed its program for the DRC at the end of March 2006 because of fiscal overruns. Much economic activity still occurs in the informal sector and is not reflected in GDP data. Renewed activity in the mining sector, the source of most export income, boosted Kinshasa's fiscal position and GDP growth from 2006–08, however, the government's review of mining contracts that began in 2006, combined with a fall in world market prices for the DRC's key mineral exports temporarily weakened output in 2009, leading to a balance of payments crisis. The recovery in mineral prices beginning in mid 2009 boosted mineral exports, and emergency funds from the IMF boosted foreign reserves. An uncertain legal framework, corruption, and a lack of transparency in government policy are long-term problems for the mining sector and for the economy as a whole. The global recession cut economic growth in 2009 to less than half its 2008 level, but growth returned to 6–7% in 2010–11. The DRC signed a Poverty Reduction and Growth Facility with the IMF in 2009 and received \$12 billion in multilateral aid

TRANSNATIONAL ISSUES

Disputes—International: heads of the Great Lakes states and UN pledged in 2004 to abate tribal, rebel, and militia fighting in the region, including northeast Congo, where the UN Organization Mission in the Democratic Republic of the Congo (MONUC), organized in 1999, maintains over 16,500 uniformed peacekeepers; members of Uganda's Lords Resistance Army forces continue to seek refuge in Congo's Garamba National Park as peace talks with the Uganda government evolve; the location of the boundary in the broad Congo River with the Republic of the Congo is indefinite except in the Pool Malebo/Stanley Pool area; Uganda and DRC dispute Rukwanzi Island in Lake Albert and other areas on the Semliki River with hydrocarbon potential; boundary commission continues discussions over Congolese-administered triangle of land on the right bank of the Lunkinda River claimed by Zambia near the DRC village of Pweto; DRC accuses Angola of shifting monuments

Refugees and internally displaced persons:

refugees (country of origin): 132,295 (Angola); 37,313 (Rwanda); 17,777 (Burundi); 13,904 (Uganda); 6,181 (Sudan); 5,243 (Republic of Congo)

IDPs: 1.4 million (fighting between government forces and rebels since mid-1990s; most IDPs are in eastern provinces) (2007)

Trafficking in persons: *current situation:* Democratic Republic of the Congo is a source and destination country for men, women, and children subjected to

trafficking for the purposes of forced labor and forced prostitution; the majority of this trafficking is internal, and much of it is perpetrated by armed groups and government forces outside government control within the country's unstable eastern provinces; Congolese women and children are exploited in forced prostitution, domestic servitude, and forced agricultural labor in Angola, South Africa, Republic of the Congo, as well as East African, Middle Eastern, and European nations

tier rating: Tier 3—the Government of the Democratic Republic of the Congo does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government did not show evidence of progress in prosecuting and punishing labor or sex trafficking offenders, including members of its own armed forces, in providing protective services for the vast majority of trafficking victims, or in raising public awareness of human trafficking (2010)

Illicit drugs: one of Africa's biggest producers of cannabis, but mostly for domestic consumption; traffickers exploit lax shipping controls to transit pseudoephedrine through the capital; while rampant corruption and inadequate supervision leaves the banking system vulnerable to money laundering, the lack of a well-developed financial system limits the country's utility as a money-laundering center (2008)

CONGO, REPUBLIC OF THE

INTRODUCTION

Background: Upon independence in 1960, the former French region of Middle Congo became the Republic of the Congo. A quarter century of experimentation with Marxism was abandoned in 1990 and a democratically elected government took office in 1992. A brief civil war in 1997 restored former Marxist President Denis SASSOU-Nguesso, and ushered in a period of ethnic and political unrest. Southern-based rebel groups agreed to a final peace accord in March 2003, but the calm is tenuous and refugees continue to present a humanitarian crisis. The Republic of Congo was once one of Africa's largest petroleum producers, but with declining production it will need new offshore oil finds to sustain its oil earnings over the long term.

ECONOMY

Economy—overview: The economy is a mixture of subsistence agriculture, an industrial sector based largely on oil and support services, and government spending. Oil has supplanted forestry as the mainstay of the economy, providing a major share of government revenues and exports. In the early 1980s, rapidly rising oil revenues enabled the government to finance large-scale development projects with GDP growth averaging 5% annually, one of the highest rates in Africa. Characterized by budget problems and overstaffing, the government has mortgaged a substantial portion of its oil earnings through oil-backed loans that have contributed to a growing debt burden

and chronic revenue shortfalls. Economic reform efforts have been undertaken with the support of international organizations, notably the World Bank and the IMF. However, the reform program came to a halt in June 1997 when civil war erupted. Denis SASSOU-Nguesso, who returned to power when the war ended in October 1997, publicly expressed interest in moving forward on economic reforms and privatization and in renewing cooperation with international financial institutions. Economic progress was badly hurt by slumping oil prices and the resumption of armed conflict in December 1998, which worsened the republic's budget deficit. The current administration presides over an uneasy internal peace and faces difficult economic challenges of stimulating recovery and reducing poverty. The drop in oil prices during the global crisis reduced oil revenue by about 30%, but the subsequent recovery of oil prices has boosted the economy's GDP and near-term prospects. In March 2006, the World Bank and the International Monetary Fund (IMF) approved Heavily Indebted Poor Countries (HIPC) treatment for Congo, which received \$1.9 billion in debt relief under the program in 2010.

Terrain: low coral atolls in north; volcanic, hilly islands in south

Elevation extremes: lowest point: Pacific Ocean 0 m

highest point: Te Manga 652 m

Refugees and internally displaced persons:

refugees (country of origin): 46,341 (Democratic Republic of Congo); 6,564 (Rwanda) *IDPs:* 48,000 (multiple civil wars since 1992; most IDPs are ethnic Lari) (2007)

Trafficking in persons:

current situation: Republic of the Congo is a source and destination country for children trafficked for the purposes of forced labor or, to a lesser extent, sex trafficking; most child trafficking victims are from Benin, though Togo, Mali, Guinea, Cameroon, Senegal, and the Democratic Republic of the Congo are also sources of victims subjected to forced domestic labor, market vending, and fishing, as well as commercial sexual exploitation

tier rating: Tier 2 Watch List—the Republic of the Congo is on the Tier 2 Watch List for its failure to show evidence of increasing efforts to combat trafficking in persons; the government enacted the Child Protection Code in June 2010, informally referred victims to foster care, and continued implementation of its 2009–10 National Action Plan; a lack of trained law enforcement personnel and adequate, consistent funding for prevention efforts seriously limited the government's ability to address trafficking and assist victims (2008)

INTRODUCTION

Background: Named after Captain COOK, who sighted them in 1770, the islands became a British protectorate in 1888. By 1900, administrative control was transferred to New Zealand; in 1965, residents chose self-government in free association with New Zealand. The emigration of skilled workers to New Zealand and government deficits are continuing problems.

ECONOMY

Economy—overview: Like many other South Pacific island nations, the Cook Islands' economic development is hindered by the isolation of the country from foreign markets, the limited size of domestic markets, lack of natural resources, periodic devastation from natural disasters, and inadequate infrastructure. Agriculture, employing more than one-quarter of the working population, provides the economic base with major exports made up of copra and citrus fruit. Black pearls are the Cook Islands' leading export. Manufacturing activities are limited to fruit processing, clothing, and handicrafts. Trade deficits are offset by remittances from emigrants and by foreign aid overwhelmingly from New Zealand. In the 1980s and 1990s, the country lived beyond its means, maintaining a bloated public service and accumulating a large foreign debt. Subsequent reforms, including the sale of state assets, the strengthening of economic management, the encouragement of tourism, and a debt restructuring agreement, have rekindled investment and growth.

COSTA RICA

INTRODUCTION

Background: Although explored by the Spanish early in the 16th century, initial attempts at colonizing Costa Rica proved unsuccessful due to a combination of factors, including: disease from mosquito-infested swamps, brutal heat, resistance by natives, and pirate raids. It was not until 1563 that a permanent settlement of Cartago was established in the cooler, fertile central highlands. The area remained a colony for some two and a half

centuries. In 1821, Costa Rica became one of several Central American provinces that jointly declared their independence from Spain. Two years later it joined the United Provinces of Central America, but this federation disintegrated in 1838, at which time Costa Rica proclaimed its sovereignty and independence. Since the late 19th century, only two brief periods of violence have marred the country's democratic development. In 1949, Costa Rica dissolved its armed forces. Although it still maintains a large agricultural sector, Costa Rica has expanded its economy to include strong technology and tourism industries. The standard of living is relatively high. Land ownership is widespread.

GEOGRAPHY

Location: Central America, bordering both the Caribbean Sea and the North Pacific Ocean, between Nicaragua and Panama

Natural hazards: occasional earthquakes, hurricanes along Atlantic coast; frequent flooding of lowlands at onset of rainy season and landslides; active volcanoes *volcanism*: Arenal (elev. 1,670 m), which erupted in 2010, is the most active volcano in Costa Rica; a 1968 eruption destroyed the town of Tabacon; Irazu (elev. 3,432 m), situated just east of San Jose, has the potential to spew ash over the capital city as it did between 1963 and 1965; other historically active volcanoes include Miravalles, Poas, Rincon de la Vieja, and Turrialba

Environment—current issues: deforestation and land use change, largely a result of the clearing of land for cattle ranching and agriculture; soil erosion; coastal marine pollution; fisheries protection; solid waste management; air pollution

Environment—international agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Wetlands, Whaling

five horizontal bands of blue (top), white, red (double width), white, and blue, with the coat of arms in a white elliptical disk toward the hoist side of the red band; Costa Rica retained the earlier blue-white-blue flag of Central America until 1848 when, in response to revolutionary activity in Europe, it was decided to incorporate the French colors into the national flag and a central red stripe was added; today the blue color is said to stand

for the sky, opportunity, and perseverance, white denotes peace, happiness, and wisdom, while red represents the blood shed for freedom, as well as the generosity and vibrancy of the people

note: somewhat resembles the flag of North Korea; similar to the flag of Thailand but with the blue and red colors reversed

note: adopted 1949; the anthem's music was originally written for an 1853 welcome ceremony for diplomatic missions from the United States and United Kingdom; the lyrics were added in 1903

ECONOMY

Economy—overview: Prior to the global economic crisis, Costa Rica enjoyed stable economic growth. The economy contracted 1.3% in 2009 but resumed growth at about 4% per year in 2010–11. While the traditional agricultural exports of bananas, coffee, sugar, and beef are still the backbone of commodity export trade, a variety of industrial and specialized agricultural products have broadened export trade in recent years. High value added goods and services, including microchips, have further bolstered exports. Tourism continues to bring in foreign exchange, as Costa Rica's impressive biodiversity makes it a key destination for ecotourism. Foreign investors remain attracted by the country's political stability and relatively high education levels, as well as the incentives offered in the free-trade zones; and Costa Rica has attracted one of the highest levels of foreign direct investment per capita in Latin America. However, many business impediments remain such as high levels of bureaucracy, legal uncertainty due to overlapping and at times conflicting responsibilities between agencies, difficulty of enforcing contracts, and weak investor protection. Poverty has remained around 15–20% for nearly 20 years, and the strong social safety net that had been put into place by the government has eroded due to increased financial constraints on government expenditures. Unlike the rest of Central America, Costa Rica is not highly dependent on remittances as they only represent about 2% of GDP. Immigration from Nicaragua has increasingly become a concern for the government. The estimated 300,000–500,000 Nicaraguans in Costa Rica legally and illegally are an important source of mostly unskilled labor but also place heavy demands on the social welfare system. The US-Central American-Dominican Republic Free Trade Agreement (CAFTA-DR) entered into force on 1 January 2009 after significant delays within the Costa Rican legislature. CAFTA-DR has increased foreign direct investment in key sectors of the economy, including the

insurance and telecommunications sectors recently opened to private investors. President CHINCHILLA was not able to gain legislative approval for fiscal reform, her top priority. She has indicated she will continue to pursue fiscal reform in 2012. President CHINCHILLA and the PLN were successful in passing a tax on corporations to fund an increase for security services.

INTRODUCTION

Background: Close ties to France since independence in 1960, the development of cocoa production for export, and foreign investment made Côte d'Ivoire one of the most prosperous of the West African states but did not protect it from political turmoil. In December 1999, a military coup—the first ever in Côte d'Ivoire's history—overthrew the government. Junta leader Robert GUEI blatantly rigged elections held in late 2000 and declared himself the winner. Popular protest forced him to step aside and brought Laurent GBAGBO into power. Ivorian dissidents and disaffected members of the military launched a failed coup attempt in September 2002. Rebel forces claimed the northern half of the country, and in January 2003 were granted ministerial positions in a unity government under the auspices of the Linas-Marcoussis Peace Accord. President GBAGBO and rebel forces resumed implementation of the peace accord in December 2003 after a three-month stalemate, but issues that sparked the civil war, such as land reform and grounds for citizenship, remained unresolved. In March 2007 President GBAGBO and former New Forces rebel leader Guillaume SORO signed the Ouagadougou Political Agreement. As a result of the agreement, SORO joined GBAGBO's government as Prime Minister and the two agreed to reunite the country by dismantling the zone of confidence separating North from South, integrate rebel forces into the national armed forces, and hold elections. Disarmament, demobilization, and reintegration of rebel forces have been problem-

atic as rebels seek to enter the armed forces. Citizen identification and voter registration pose election difficulties, and balloting planned for November 2009 was postponed to 2010. On 28 November 2010, Alassane Dramane OUATTARA won the presidential election, defeating then President Laurent GBAGBO. GBAGBO refused to hand over power, resulting in a five-month standoff. In April 2011, after widespread fighting, GBAGBO was formally forced from office by armed OUATTARA supporters with the help of UN and French forces. Several thousand UN peacekeepers and several hundred French troops remain in Côte d'Ivoire to support the transition process.

ECONOMY

Economy—overview: Cote d'Ivoire is heavily dependent on agriculture and related activities, which engage roughly 68% of the population. Cote d'Ivoire is the world's largest producer and exporter of cocoa beans and a significant producer and exporter of coffee and palm oil. Consequently, the economy is highly sensitive to fluctuations in international prices for these products, and, to a lesser extent, in climatic conditions. Cocoa, oil, and coffee are the country's top export revenue earners, but the country is also producing gold. Since the end of the civil war in 2003, political turmoil has continued to damage the economy, resulting in the loss of foreign investment and slow economic growth. GDP grew by more than 2% in 2008 and around 4% per year in 2009–10. Per capita income has declined by 15% since 1999 but registered a slight improvement in 2009–10. Power cuts caused by a turbine failure in early 2010

slowed economic activity. Cote d'Ivoire in 2010 signed agreements to restructure its Paris Club bilateral, other bilateral, and London Club debt. Cote d'Ivoire's long term challenges include political instability and degrading infrastructure. In late 2011, Cote d'Ivoire's economy was recovering from a severe downturn of the first quarter of the year that was caused by widespread post-election fighting.

TRANSNATIONAL ISSUES

Disputes—international: despite the presence of over 9,000 UN forces (UNOCI) in Cote d'Ivoire since 2004, ethnic conflict still leaves displaced hundreds of thousands of Ivoirians in and out of the country as well as driven out migrants from neighboring states who worked in Ivorian cocoa plantations; the March 2007 peace deal between Ivorian rebels and the government brought significant numbers of rebels out of hiding in neighboring states

Refugees and internally displaced persons:

refugees (country of origin): 25,615 (Liberia)

IDPs: 709,000 (2002 coup; most IDPs are in western regions) (2007)

Illicit drugs: illicit producer of cannabis, mostly for local consumption; utility as a narcotic transshipment point to Europe reduced by ongoing political instability; while rampant corruption and inadequate supervision leave the banking system vulnerable to money laundering, the lack of a developed financial system limits the country's utility as a major money-laundering center (2008)

CROATIA

INTRODUCTION

Background: The lands that today comprise Croatia were part of the Austro-Hungarian Empire until the close of World War I. In 1918, the Croats, Serbs, and Slovenes formed a kingdom known after 1929 as Yugoslavia. Following World War II, Yugoslavia became a

federal independent Communist state under the strong hand of Marshal TITO. Although Croatia declared its independence from Yugoslavia in 1991, it took four years of sporadic, but often bitter, fighting before occupying Serb armies were mostly cleared from Croatian lands, along with a majority of Croatia's ethnic Serb population. Under UN supervision, the

last Serb-held enclave in eastern Slavonia was returned to Croatia in 1998. In April 2009, Croatia joined NATO; Croatia signed the EU Accession Treaty in December 2011 and ratified the Treaty in January, 2012. Croatia will become a member after all 27 EU members ratify the treaty, with a target date of July 2013.

ECONOMY

Economy—overview: Though still one of the wealthiest of the former Yugoslav republics, Croatia's economy suffered badly during the 1991-95 war. The country's output during that time collapsed and Croatia missed the early waves of investment in Central and Eastern Europe that followed the fall of the Berlin Wall. Between 2000 and 2007, however, Croatia's economic fortunes began to improve slowly with moderate but steady GDP growth between 4% and 6% led by a rebound in tourism and credit-driven consumer spending. Inflation over the same period remained tame and the currency, the kuna, stable. Croatia experienced an abrupt slowdown in the economy in 2008 and has yet to recover. Difficult problems still remain, including a stubbornly high unemployment rate, a growing trade deficit, uneven regional development, and a challenging investment climate. The new government has announced a more flexible approach to privatization, including the sale in the coming years of state-owned businesses that are not of strategic importance. While macroeconomic stabilization has largely been achieved, structural reforms lag. Croatia will face significant pressure as a result of the global financial crisis, due to reduced exports and capital inflows. The World Bank expects Croatia to enter a recession in 2012 and has urged the new government to cut spending, particularly on social programs. Croatia's high foreign debt, anemic export sector, strained state budget, and over-reliance on tourism revenue will result in higher risk to economic progress over the medium term.

TRANSNATIONAL ISSUES

Disputes—international: dispute remains
with Bosnia and Herzegovina over several
small sections of the boundary related to
maritime access that hinders ratification
of the 1999 border agreement; the Croa-
tia-Slovenia land and maritime boundary
agreement, which would have ceded most
of Pirin Bay and maritime access to Slove-
nia and several villages to Croatia, remains
unratified and in dispute; Slovenia also
protests Croatia's 2003 claim to an exclu-
sive economic zone in the Adriatic; as a
European Union peripheral state, Slovenia
imposed a hard border Schengen regime
with non-member Croatia in December
2007

**Refugees and internally displaced
persons:**

IDPs: 2,900–7,000 (Croats and Serbs dis-
placed in 1992–95 war) (2007)

Illicit drugs:

transit point along the Balkan route for
Southwest Asian heroin to Western
Europe; has been used as a transit point for
maritime shipments of South American
cocaine bound for Western Europe (2008)

CUBA

INTRODUCTION

Background: The native Amerindian
population of Cuba began to decline after
the European discovery of the island by

Christopher COLUMBUS in 1492 and fol-
lowing its development as a Spanish colony
during the next several centuries. Large
numbers of African slaves were imported to
work the coffee and sugar plantations, and

Havana became the launching point for the
annual treasure fleets bound for Spain from
Mexico and Peru. Spanish rule eventually
provoked an independence movement and
occasional rebellions that were harshly
suppressed. US intervention during the
Spanish-American War in 1898 assisted the
Cubans in overthrowing Spanish rule. The
Treaty of Paris established Cuban independ-
ence from the US in 1902 after which the
island experienced a string of governments
mostly dominated by the military and cor-
rupt politicians. Fidel CASTRO led a rebel
army to victory in 1959; his iron rule held
the subsequent regime together for nearly
five decades. He stepped down as president
in February 2008 in favor of his younger
brother Raul CASTRO. Cuba's Commu-
nist revolution, with Soviet support, was
exported throughout Latin America and
Africa during the 1960s, 1970s, and 1980s.
The country faced a severe economic
downturn in 1990 following the withdrawal

of former Soviet subsidies worth \$4 billion to \$6 billion annually. Cuba at times portrays the US embargo, in place since 1961, as the source of its difficulties. Illicit migration to the US—using homemade rafts, alien smugglers, air flights, or via the southwest border—is a continuing problem. The US Coast Guard intercepted some 1,000 individuals attempting to cross the Straits of Florida in fiscal year 2011.

ECONOMY

Economy—overview: The government continues to balance the need for loosening

its socialist economic system against a desire for firm political control. The government in April 2011 held the first Cuban Communist Party Congress in almost 13 years, during which leaders approved a plan for wide-ranging economic changes. President Raul CASTRO said such changes were needed to update the economic model to ensure the survival of socialism. The government has expanded opportunities for self employment and has introduced limited reforms, some initially implemented in the 1990s, to increase enterprise efficiency and alleviate serious shortages of food, consumer goods, services, and housing. The average Cuban's standard of living remains at a lower level than before the downturn of the 1990s, which was caused by the loss of Soviet aid and domestic inefficiencies. Since late 2000, Venezuela has been providing oil on preferential terms, and it currently supplies over 100,000 barrels per day of petroleum products. Cuba has been paying for the oil, in part, with the services of Cuban personnel in Venezuela including some 30,000 medical professionals.

Military—note: the collapse of the Soviet Union deprived the Cuban military of its major economic and logistic support and

had a significant impact on the state of Cuban equipment; the army remains well trained and professional in nature; while the lack of replacement parts for its existing equipment has increasingly affected operational capabilities, Cuba remains able to offer considerable resistance to any regional power (2010)

TRANSNATIONAL ISSUES

Disputes—international: US Naval Base at Guantanamo Bay is leased to US and only mutual agreement or US abandonment of the facility can terminate the lease

Trafficking in persons: current situation: Cuba is a source country for adults and some children subjected to forced labor and sex trafficking; prostitution of children reportedly occurs in Cuba as prostitution is

not criminalized for anyone above 16 years old; the scope of trafficking within Cuba is particularly difficult to gauge due to the closed nature of the government and sparse non-governmental or independent reporting

tier rating: Tier 3—Cuba does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government did not publicize information about government measures to address human trafficking through prosecution, protection, or prevention efforts during the reporting period (2010)

Illicit drugs: territorial waters and air space serve as transshipment zone for US- and European-bound drugs; established the death penalty for certain drug-related crimes in 1999 (2008)

CURACAO

INTRODUCTION

Background: Originally settled by Arawak Indians, Curacao was seized by the Dutch in 1634 along with the neighboring island of Bonaire. Once the center of the Caribbean slave trade, Curacao was hard hit economically by the abolition of slavery in 1863. Its prosperity (and that of neighboring Aruba) was restored in the early 20th century with the construction of the Isla Refineria to service the newly discovered Venezuelan oil fields. In 1954, Curacao and several other Dutch Caribbean possessions were reorganized as the Netherlands Antilles, part of the Kingdom of the Netherlands. In referenda in 2005 and 2009, the citizens of Curacao voted to become a self-governing country within the Kingdom of the Netherlands. The change in status became effective in October 2010 with the dissolution of the Netherlands Antilles.

ECONOMY

Economy—overview: Tourism, petroleum refining, and offshore finance are the mainstays of this small economy, which is closely tied to the outside world. Although GDP grew slightly during the past decade, the island enjoys a high per capita income and a well-developed infrastructure compared with other countries in the region. Curacao has an excellent natural harbor that can accommodate large oil tankers. The Venezuelan state oil company leases the single refinery on the island from the government; most of the oil for the refinery is imported from Venezuela; most of the refined products are exported to the US. Almost all consumer and capital goods are imported, with the US, Brazil, Italy, and Mexico being the major suppliers. The government is attempting to diversify its industry and trade and has signed an Association Agreement with the EU to expand business there. Poor soils and inadequate water supplies hamper the development of agriculture. Budgetary problems complicate reform of the health and pension systems for an aging population.**GDP (purchasing power parity):**

CYPRUS

INTRODUCTION

Background: A former British colony, Cyprus became independent in 1960 following years of resistance to British rule. Tensions between the Greek Cypriot majority and Turkish Cypriot minority came to a head in December 1963, when violence broke out in the capital of Nicosia. Despite the deployment of UN peacekeepers in 1964, sporadic intercommunal violence continued forcing most Turkish Cypriots into enclaves throughout the island. In 1974, a Greek Government-sponsored attempt to seize control of Cyprus was met by military intervention from Turkey, which soon controlled more than a third of the island. In 1983, the Turkish Cypriot-occupied area declared itself the "Turkish Republic of Northern Cyprus" ("TRNC"), but it is recognized only by Turkey. The election of a new Cypriot president in 2008 served as the impetus for the UN to encourage both the Greek Cypriot and Turkish Cypriot communities to reopen unification negotiations. In September 2008, the leaders of the two communities began negotiations under UN auspices aimed at reunifying the divided island. The talks are ongoing and the leaders continue to meet regularly. The entire island entered the EU on 1 May 2004, although the EU acquis—the body of common rights and obligations—applies only to the areas under the internationally recognized government, and is suspended in the areas administered by Turkish Cypriots. However, individual Turkish Cypriots able to document their eligibility for Republic

of Cyprus citizenship legally enjoy the same rights accorded to other citizens of European Union states.

Flag description: white with a copper-colored silhouette of the island (the name Cyprus is derived from the Greek word for copper) above two green crossed olive branches in the center of the flag; the branches symbolize the hope for peace and reconciliation between the Greek and Turkish communities

note: the "Turkish Republic of Northern Cyprus" flag retains the white field of the Cyprus national flag but displays narrow horizontal red stripes positioned a small distance from the top and bottom edges between which are centered a red crescent and a red five-pointed star; the banner is modeled after the Turkish national flag but with the colors reversed

National symbol(s): Cypriot mouflon (wild sheep); white dove

National anthem: *name:* "Ymnos eis tin Eleftherian" (Hymn to Liberty)

lyrics/music: Dionysios SOLOMOS/Nikolaos MANTZAROS

note: adopted 1960; Cyprus adopted the Greek national anthem as its own; the Turkish community in Cyprus uses the anthem of Turkey

ECONOMY

Economy—overview: The area of the Republic of Cyprus under government control has a market economy dominated by the service sector, which accounts for four-fifths of GDP. Tourism, financial services, and real estate are the most important sectors. Erratic growth rates over the past decade reflect the economy's reliance on tourism, the profitability of which often fluctuates with political instability in the region and economic conditions in Western Europe. Nevertheless, the economy in the area under government control has grown at a rate well above the EU average since 2000. Cyprus joined the European Exchange Rate Mechanism (ERM2) in May 2005 and adopted the euro as its national currency on 1 January 2008. An aggressive austerity program in the preceding years, aimed at paving the way for the euro, helped turn a soaring fiscal deficit (6.3% in 2003) into a surplus of 1.2% in 2008, and reduced inflation to 4.7%. This prosperity came under pressure in 2009, as construction and tourism slowed in the face of reduced foreign demand triggered by the ongoing global financial crisis. Although Cyprus lagged behind its EU peers in showing signs of stress from the global crisis, the economy tipped into recession in 2009, contracting by 1.7%, and has been slow to bounce back since, posting an anemic growth rate of 1.0% in 2010. A massive munitions blast in July 2011 at a Cypriot naval base triggered country-wide energy outages, a collapse of the governing coalition, and a cabinet shuffle intensifying Cyprus's economic problems. The economy experienced no economic growth in 2011. Serious Cypriot financial sector problems surfaced in early 2011 as the Greek fiscal crisis and euro zone debt crisis deepened. Two of Cyprus's biggest banks are among the largest holders of Greek bonds in Europe

and have a substantial presence in Greece through bank branches and subsidiaries. A liquidity squeeze is choking the financial sector and the real economy as many global investors doubt the Cypriot economy can weather the EU crisis. Cyprus's borrowing costs have risen steadily because of its exposure to Greek debt. The budget deficit is on the rise and reached 7.4% of GDP in 2011, a violation of the EU's budget deficit criteria—no more than 3% of GDP. In response to the country's deteriorating finances and serious risk of contagion from the Greek debt crisis, Nicosia is promising to implement measures to cut the cost of the state payroll, curb tax evasion, and revamp social benefits. However, it has been slow to act, lacking a consensus in parliament and among the social partners for its proposed measures.

Economy of the area administered by Turkish Cypriots:

Economy - overview: The Turkish Cypriot economy has roughly half the per capita GDP of the south, and economic growth tends to be volatile, given the north's relative isolation, bloated public sector, reliance on the Turkish lira, and small market size. The Turkish Cypriots are heavily dependent on transfers from the Turkish Government. Ankara directly finances about one-third of the Turkish Cypriot "administration's" budget. Aid from Turkey has exceeded \$400 million annually in recent years. The Turkish Cypriot economy experienced a sharp slowdown in 2008–09 due to the global financial crisis and to its reliance on British and Turkish tourism, both of which declined due to the recession. The Turkish Cypriot budget deficit also deteriorated in 2009 due to decreased state revenues and increased government expenditures on public sector salaries and social services. The Turkish Cypriot economy declined about 0.6% in 2010.

TRANSNATIONAL ISSUES

Disputes—international: hostilities in 1974 divided the island into two de facto autonomous entities, the internationally recognized Cypriot Government and a Turkish-Cypriot community (north Cyprus); the 1,000-strong UN Peace-keeping Force in Cyprus (UNFICYP) has served in Cyprus since 1964 and maintains the buffer zone between north and south; on 1 May 2004, Cyprus entered the European Union still divided, with the EU's body of legislation and standards (*acquis communautaire*) suspended in the north; Turkey protests Cypriot Government creating hydrocarbon blocks and maritime boundary with Lebanon in March 2007

Refugees and internally displaced persons:

IDPs: 210,000 (both Turkish and Greek Cypriots; many displaced for over 30 years) (2007)

Illicit drugs: minor transit point for heroin and hashish via air routes and container traffic to Europe, especially from Lebanon and Turkey; some cocaine transits as well; despite a strengthening of anti-money-laundering legislation, remains vulnerable to money laundering; reporting of suspicious transactions in offshore sector remains weak (2008)

CZECH REPUBLIC

INTRODUCTION

Background: At the close of World War I, the Czechs and Slovaks of the former Austro-Hungarian Empire merged to form Czechoslovakia. During the interwar years, having rejected a federal system, the new country's leaders were frequently preoccupied with meeting the demands of other ethnic minorities within the republic, most notably the Sudeten Germans and the

Ruthenians (Ukrainians). On the eve of World War II, the Czech part of the country was forcibly annexed to the Third Reich, and the Slovaks declared independence as an ally of Nazi Germany. After the war, a reunited but truncated Czechoslovakia (less Ruthenia) fell within the Soviet sphere of influence. In 1968, an invasion by Warsaw Pact troops ended the efforts of the country's leaders to liberalize Communist Party rule and create "socialism with a human face."

Anti-Soviet demonstrations the following year ushered in a period of harsh repression known as "normalization." With the collapse of Soviet-backed authority in 1989, Czechoslovakia regained its democracy through a peaceful "Velvet Revolution." On 1 January 1993, the country underwent a "velvet divorce" into its two national components, the Czech Republic and Slovakia. The Czech Republic joined NATO in 1999 and the European Union in 2004.

ECONOMY

Economy—overview: The Czech Republic is a stable and prosperous market economy, which harmonized its laws and regulations with those of the EU prior to its EU accession in 2004. While the conservative, inward-looking Czech financial system has remained relatively healthy, the small, open, export-driven Czech economy remains sensitive to changes in the economic performance of its main export markets, especially Germany. When Western Europe and Germany fell into recession in late 2008, demand for Czech goods plunged, leading to double digit drops in industrial production and exports. As a result, real GDP fell 4.7% in 2009, with most of the decline occurring during the first quarter. Real GDP, however, has slowly recovered with positive quarter-on-quarter growth starting in the second half of 2009 and continuing throughout 2011. The auto industry remains the largest single industry, and, together with its upstream suppliers, accounts for nearly 24% of Czech manufacturing. The Czech Republic produced more than a million cars for the first time in 2010, over 80% of which were exported. Foreign and domestic businesses alike voice concerns about corruption especially in public procurement. Other long term challenges include dealing with a rapidly aging population, funding an unsustainable pension and health care system, and diversifying away from manufacturing and toward a more high-tech, services-based, knowledge economy.

DENMARK

INTRODUCTION

Background: Once the seat of Viking raiders and later a major north European power, Denmark has evolved into a modern, prosperous nation that is participating in the general political and economic integration of Europe. It joined NATO in 1949 and the EEC (now the EU) in 1973. However, the country has opted out of certain elements of the European Union's Maastricht Treaty, including the European Economic and Monetary Union (EMU), European defense cooperation, and issues concerning certain justice and home affairs.

GEOGRAPHY

Location: Northern Europe, bordering the Baltic Sea and the North Sea, on a peninsula north of Germany (Jutland); also includes several major islands (Sjælland, Fyn, and Bornholm)

Flag description: red with a white cross that extends to the edges of the flag; the vertical part of the cross is shifted to the hoist side; the banner is referred to as the Dannebrog (Danish flag) and is one of the oldest national flags in the world; traditions as to the origin of the flag design vary, but the best known is a legend that the banner fell from the sky during an early-13th century battle; caught up by the Danish king before it ever touched the earth, this heavenly talisman inspired the royal army to victory; in actuality, the flag may derive from a crusade banner or ensign *note:* the shifted design element was subsequently adopted by the other Nordic countries of Finland, Iceland, Norway, and Sweden

National symbol(s): lion; mute swan

National anthem: *name:* "Der er et yndigt land" (There is a Lovely Land); "Kong Christian" (King Christian)

lyrics/music: Adam Gottlob OEHLEN-SCHLAGER/Hans Ernst KROYER; Johannes EWALD/unknown

note: Denmark has two national anthems with equal status; "Der er et yndigt land," adopted 1844, is a national anthem, while "Kong Christian," adopted 1780, serves as both a national and royal anthem; "Kong Christian" is also known as "Kong Christian stod ved højen mast" (King Christian Stood by the Lofty Mast) and "Kongesangen" (The King's Anthem); within Denmark, the royal anthem is played only when royalty is present and is usually followed by the national anthem; when royalty is not present, only the national anthem is performed; outside Denmark, the royal anthem is played, unless the national anthem is requested

ECONOMY

Economy—overview: This thoroughly modern market economy features a high-tech

agricultural sector, state-of-the-art industry with world-leading firms in pharmaceuticals, maritime shipping and renewable energy, and a high dependence on foreign trade. Denmark is a member of the European Union (EU); Danish legislation and regulations conform to EU standards on almost all issues. Danes enjoy among the highest standards of living in the world and the Danish economy is characterized by extensive government welfare measures and an equitable distribution of income. Denmark is a net exporter of food and energy and enjoys a comfortable balance of payments surplus but depends on imports of raw materials for the manufacturing sector. Within the EU, Denmark is among the strongest supporters of trade liberalization. After a long consumption-driven upswing, Denmark's economy began slowing in 2007 with the end of a housing boom. Housing prices dropped markedly in 2008-09 and, following a short respite in 2010, continued to decline in 2011 though at a slower pace. The global financial crisis has exacerbated this cyclical slowdown through increased borrowing costs and lower export demand, consumer confidence, and investment. The global financial crises cut Danish real GDP by 0.8% in 2008 and 5.8% in 2009. Denmark made a modest recovery in 2010 with real GDP growth of 1.3%, in part because of increased government spending; however, the country experienced a technical recession in late 2010-early 2011. Historically low levels of unemployment rose sharply with the recession and have remained at about 6% in 2010-11, based on the national measure, about two-thirds average EU unemployment. An impending decline in the ratio of workers to retirees will be a major long-term issue. Denmark maintained a healthy budget surplus for many years up to 2008, but the budget balance swung into deficit in 2009. In spite of the deficits, the new coalition government plans to deliver a modest stimulus to the economy in 2012. Nonetheless, Denmark's fiscal position remains among the strongest in the EU at 46.5% of GDP in 2011. Despite previously meeting the criteria to join the European Economic and Monetary Union (EMU), so far Denmark has decided not to join, although the Danish krone remains pegged to the euro. Denmark held the EU presidency during the first half of 2012; priorities included promoting a responsible, dynamic, green, and safe Europe, while working to steer Europe out of its euro zone economic crisis.

DHEKELIA

INTRODUCTION

Background: By terms of the 1960 Treaty of Establishment that created the independent Republic of Cyprus, the UK retained full sovereignty and jurisdiction over two areas of almost 254 square kilometers—Akrotiri and Dhekelia. The larger of these is the Dhekelia Sovereign Base Area, which is also referred to as the Eastern Sovereign Base Area.

GEOGRAPHY

Location: Eastern Mediterranean, on the southeast coast of Cyprus near Famagusta

Geographic coordinates:

34 59 N, 33 45 E

Map references: Europe

Area: total: 130.8 sq km

country comparison to the world: 221

note: area surrounds three Cypriot enclaves

Area—comparative: about three-quarters the size of Washington, DC

Land boundaries:

total: 103 km (approximately)

border countries: Cyprus 103 km (approximately)

Coastline: 27.5 km

Climate: temperate; Mediterranean with hot, dry summers and cool winters

Environment—current issues: netting and trapping of small migrant songbirds in the spring and autumn

Geography—note: British extraterritorial rights also extended to several small off-post sites scattered across Cyprus; of the Sovereign Base Area land 60% is privately owned and farmed, 20% is owned by the Ministry of Defense, and 20% is SBA Crown land

PEOPLE AND SOCIETY

DJIBOUTI

INTRODUCTION

Background: The French Territory of the Afars and the Issas became Djibouti in 1977. Hassan Gouled APTIDON installed an authoritarian one-party state and proceeded to serve as president until 1999. Unrest among the Afars minority during the 1990s led to a civil war that ended in 2001 following the conclusion of a peace accord between Afar rebels and the Issa-dominated government. In 1999, Djibouti's first multi-party presidential

elections resulted in the election of Ismail Omar GUELLEH; he was re-elected to a second term in 2005. Djibouti occupies a strategic geographic location at the mouth of the Red Sea and serves as an important transshipment location for goods entering and leaving the east African highlands. The present leadership favors close ties to France, which maintains a significant military presence in the country, but also has strong ties with the US. Djibouti hosts the only US military base in sub-Saharan Africa.

ECONOMY

Economy—overview: The economy is based on service activities connected with the country's strategic location and status as a free trade zone in the Horn of Africa. Two-thirds of Djibouti's inhabitants live in the capital city; the remainder are mostly nomadic herders. Scanty rainfall limits crop production to fruits and vegetables, and most food must be imported. Djibouti provides services as both a transit port for the region and an international transshipment and refueling center. Imports and exports from landlocked neighbor Ethiopia represent 70% of port activity at Djibouti's container terminal. Djibouti has few natural resources and little industry. The nation is, therefore, heavily dependent on foreign assistance to help support its balance of payments and to finance development projects. An unemployment rate of nearly 60% in urban areas continues to be a major problem. While inflation is not a concern, due to the fixed tie of the Djiboutian franc to the US dollar, the artificially high value of the Djiboutian franc adversely affects Djibouti's balance of payments. Per capita consumption dropped an estimated 35% between 1999 and 2006 because of recession, civil war, and a high population growth rate (including immigrants and refugees). Djibouti has experienced relatively minimal impact from the global economic downturn, but its reliance on diesel-generated electricity and imported food leave average consumers vulnerable to global price shocks.

Telephone system: *general assessment:*

telephone facilities in the city of Djibouti are adequate, as are the microwave radio relay connections to outlying areas of the country

domestic: Djibouti Telecom is the sole provider of telecommunications services and utilizes mostly a microwave radio relay network; fiber-optic cable is installed in the capital; rural areas connected via wireless local loop radio systems; mobile cellular coverage is primarily limited to the area in and around Djibouti city

international: country code—253; landing point for the SEA-ME-WE-3 optical telecommunications submarine cable with links to Asia, the Middle East, and Europe; satellite earth stations—2 (1 Intelsat—Indian Ocean and 1 Arabsat); Medarabel regional microwave radio relay telephone network (2009)

Broadcast media: state-owned Radiodiffusion-Télévision de Djibouti (RTD) operates the sole terrestrial TV station as well as the only 2 domestic radio networks; no private TV or radio stations; transmissions of several international broadcasters are available (2007)

DOMINICA

INTRODUCTION

Background: Dominica was the last of the Caribbean islands to be colonized by Europeans due chiefly to the fierce resistance of the native Caribs. France ceded possession to Great Britain in 1763, which made the island a colony in 1805. In 1980, two years after independence, Dominica's fortunes improved when a corrupt and tyrannical administration was replaced by that of Mary Eugenia CHARLES, the first female prime minister in the Caribbean, who remained in office for 15 years. Some 3,000 Carib Indians still living on Dominica are the only pre-Columbian population remaining in the eastern Caribbean.

the US does not have an embassy in Dominica; the US Ambassador to Barbados is accredited to Dominica

Flag description: green, with a centered cross of three equal bands—the vertical part is yellow (hoist side), black, and white and the horizontal part is yellow (top), black, and white; superimposed in the center of the cross is a red disk bearing a Sisserou parrot, unique to Dominica, encircled by 10 green, five-pointed stars edged in yellow; the 10 stars represent the 10 administrative divisions (parishes); green symbolizes the island's lush vegetation; the triple-colored cross represents the Christian Trinity; the yellow color denotes sunshine, the main agricultural products (citrus and bananas), and the native Carib Indians; black is for the rich soil and the African heritage of most citizens; white signifies rivers, waterfalls, and the purity of aspirations; the red disc stands for social justice

National symbol(s): Sisserou parrot

National anthem: name: "Isle of Beauty, Isle of Splendor"

lyrics/music: Wilfred Oscar Morgan POND/Lemuel McPherson CHRISTIAN

ECONOMY

Economy—overview: The Dominican economy has been dependent on agriculture—primarily bananas—in years past, but increasingly has been driven by tourism as the government seeks to promote Dominica as an "ecotourism" destination. In order to diversify the island's production base, the government also is attempting to develop an offshore financial sector and has signed an agreement with the EU to develop geothermal energy resources. In 2003, the government began a comprehensive restructuring of the economy—including elimination of price controls, privatization of the state banana company, and tax increases—to address an economic and financial crisis and to meet IMF requirements. This restructuring paved the way for an economic recovery and helped to reduce the debt burden, which remains at about 80% of GDP. Hurricane Dean struck the island in August 2007 causing damages equivalent to 20% of GDP. In 2009, growth slowed as a result of the

global recession; it picked up only slightly in 2010–11.

TRANSNATIONAL ISSUES

Disputes—International: Dominica is the only Caribbean state to challenge Venezuela's sovereignty claim over Aves Island and joins the other island nations in challenging whether the feature sustains human habitation, a criterion under the UN Convention on the Law of the Sea (UNCLOS), which permits Venezuela to extend its Exclusive Economic Zone (EEZ) and continental shelf claims over a large portion of the eastern Caribbean Sea

Illicit drugs: transshipment point for narcotics bound for the US and Europe; minor cannabis producer (2008)

DOMINICAN REPUBLIC

INTRODUCTION

Background: The Taino-indigenous inhabitants of Hispaniola prior to the arrival of the Europeans—divided the island into five chiefdoms and territories. Christopher COLUMBUS explored and claimed the island on his first voyage in 1492; it became a springboard for Spanish conquest of the Caribbean and the American mainland. In 1697, Spain recognized French dominion over the western third of the island, which in 1804 became Haiti. The remainder of the island, by then known as Santo Domingo, sought to gain its own independence in 1821 but was conquered and ruled by the Haitians for 22 years; it finally attained independence as the Dominican Republic in 1844. In 1861, the Dominicans voluntarily returned to the Spanish Empire, but two years later they launched a war that restored independence in 1865. A legacy of unsettled, mostly non-representative rule followed, capped by the dictatorship of Rafael Leonidas TRUJILLO from 1930 to 1961. Juan BOSCH was elected president in 1962 but was deposed in a military coup in 1963. In 1965, the United States led an intervention in the midst of a civil war sparked by an uprising to restore BOSCH. In 1966, Joaquin BALAGUER defeated BOSCH in an election to become president. BALAGUER maintained a tight grip on power for most of the next 30 years when international reaction to flawed elections forced him to curtail his term in 1996. Since then, regular competitive elections have been held in which opposition candidates have won the presidency. Former President Leonel FERNANDEZ Reyna (first term 1996–2000) won election to a new term in 2004 following a constitutional amendment allowing presidents to serve more than one term, and was since reelected to a second consecutive term.

ECONOMY

Economy—overview: The Dominican Republic has long been viewed primarily as an exporter of sugar, coffee, and tobacco, but in recent years the service sector has overtaken agriculture as the economy’s largest employer, due to growth in telecommunications, tourism, and free trade zones. The economy is highly dependent upon the US, the destination for more than half of exports. Remittances from the US amount to about a 10th of GDP, equivalent to almost half of exports and three-quarters of tourism receipts. The country suffers from marked

income inequality; the poorest half of the population receives less than one-fifth of GDP, while the richest 10% enjoys nearly 40% of GDP. High unemployment and underemployment remains an important long-term challenge. The Central America-Dominican Republic Free Trade Agreement (CAFTA-DR) came into force in March 2007, boosting investment and exports and reducing losses to the Asian garment industry. The growth of the Dominican Republic's economy rebounded in 2010–11 from the global recession, and remains one of the fastest growing in the region.

TRANSNATIONAL ISSUES

Disputes—International: Haitian migrants cross the porous border into the Dominican Republic to find work; illegal migrants from the Dominican Republic cross the Mona Passage each year to Puerto Rico to find better work

Trafficking in persons: *current situation:* the Dominican Republic is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; a large number of Dominican women are trafficked into prostitution and sexual exploitation throughout the Dominican Republic, the Caribbean, Europe, South America, the Middle East, and the United States; child sex tourism is a problem; forced labor of adults exists in construction, some agricultural production, and the domestic service sectors

tier rating: Tier 2 Watch List—the Government of the Dominican Republic does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; despite some progress, most notably in the area of identifying and protecting a greater number of trafficking victims, the government did not demonstrate overall increased efforts over the previous reporting period in prosecuting trafficking offenders, including officials complicit in forced prostitution and forced labor (2008)

Illicit drugs: transshipment point for South American drugs destined for the US and Europe; has become a transshipment point for ecstasy from the Netherlands and Belgium destined for US and Canada; substantial money laundering activity in particular by Colombian narcotics traffickers; significant amphetamine consumption (2008)

ECUADOR

INTRODUCTION

Background: What is now Ecuador formed part of the northern Inca Empire until the Spanish conquest in 1533. Quito became a seat of Spanish colonial government in 1563 and part of the Viceroyalty of New Granada in 1717. The territories of the Viceroyalty–New Granada (Colombia), Venezuela, and Quito–gained their independence between 1819 and 1822 and formed a federation known as Gran Colombia. When Quito withdrew in 1830, the traditional name was changed in favor of the “Republic of the Equator.” Between 1904 and 1942, Ecuador lost territories in a series of conflicts with its neighbors. A border war with Peru that flared in 1995 was resolved in 1999. Although Ecuador marked 30 years of civilian governance in 2004, the period was marred by political instability. Protests in Quito contributed to the mid-term ouster of three of Ecuador’s last four democratically elected Presidents. In late 2008, voters approved a new constitution. Ecuador’s 20th since gaining independence. General elections, under the new constitutional framework, were held in April 2009, and voters re-elected President Rafael CORREA.

In 1999/2000, Ecuador suffered a severe economic crisis as a result of a banking crisis with GDP contracting by 5.3%. Poverty increased significantly and Ecuador defaulted on some of its external debt. In March 2000,

the Congress approved a series of structural reforms that also provided for the adoption of the US dollar as legal tender. Dollarization stabilized the economy, and positive growth returned in the years that followed, helped by high oil prices, remittances, and increased non-traditional exports. From 2002–06 the economy grew an average of 5.2% per year, the highest five-year average in 25 years. After moderate growth in 2007, the economy reached a growth rate of 7.2% in 2008, in large part due to high global petroleum prices and increased public sector investment. President Rafael CORREA, who took office in January 2007, defaulted in December 2008 on Ecuador's sovereign debt, which, with a total face value of approximately US\$3.2 billion, represented about 30% of Ecuador's public external debt. In May 2009, Ecuador bought back 91% of its "defaulted" bonds via an international reverse auction. Economic policies under the CORREA administration—including an announcement in late 2009 of its intention to terminate 13 bilateral investment treaties, including one with the United States—have generated economic uncertainty and discouraged private investment. The Ecuadorian economy slowed to 0.4% growth in 2009 due to the global financial crisis and to the sharp decline in world oil prices and remittance flows. Growth picked up to a 3.6% rate in 2010 and 6.5% in 2011. The government in 2011 signed a \$2 billion loan with the state-owned China Development Bank, received \$1 billion under a two-year forward sale of an oil contract, negotiated \$571 million

EGYPT**INTRODUCTION**

Background: The regularity and richness of the annual Nile River flood, coupled with semi-isolation provided by deserts to the east and west, allowed for the development of one of the world's great civilizations. A unified kingdom arose circa 3200 B.C., and a series of dynasties ruled in Egypt for the next three millennia. The last native dynasty fell to the Persians in 341 B.C., who in turn were replaced by the Greeks, Romans, and Byzantines. It was the Arabs who introduced Islam and the Arabic language in the 7th century and who ruled for the next six centuries. A local military caste, the Mamluks took control about

1250 and continued to govern after the conquest of Egypt by the Ottoman Turks in 1517. Following the completion of the Suez Canal in 1869, Egypt became an important world transportation hub, but also fell heavily into debt. Ostensibly to protect its investments, Britain seized control of Egypt's government in 1882, but nominal allegiance to the Ottoman Empire continued until 1914. Partially independent from the UK in 1922, Egypt acquired full sovereignty with the overthrow of the British-backed monarchy in 1952. The completion of the Aswan High Dam in 1971 and the resultant Lake Nasser have altered the time-honored place of the Nile River in the agriculture and ecology of Egypt. A rapidly

growing population (the largest in the Arab world), limited arable land, and dependence on the Nile all continue to overtax resources and stress society. The government has struggled to meet the demands of Egypt's growing population through economic reform and massive investment in communications and physical infrastructure. Egyptian youth and opposition groups, inspired by events in Tunisia leading to overthrow of the government there, organized a "Day of Rage" campaign on 25 January 2011 (Police Day) to include non-violent demonstrations, marches, and labor strikes in Cairo and other cities throughout Egypt. Protester grievances focused on police brutality, state emergency laws, lack

of free speech and elections, high unemployment, rising food prices, inflation, and low minimum wages. Within several days of the onset of protests, President MUBARAK addressed the nation pledging the formation of a new government, and in a second address he offered additional concessions, which failed to assuage protesters and resulted in an escalation of the number and intensity of demonstrations and clashes with police. On 11 February MUBARAK resigned and national leadership was assumed by a Supreme Council of Armed Forces (SCAF). The SCAF dissolved the Egyptian parliament, suspended the nation's constitution, and formed a committee to recommend constitutional changes to facilitate a political transition through democratic elections. Following some delays, elections for a new parliament took place between November 2011 and January 2012. Presidential elections are scheduled for May 2012.

note: adopted 1979; after the signing of the 1979 peace with Israel, Egypt sought to create an anthem less militaristic than its previous one; Sayed DARWISH, commonly considered the father of modern Egyptian music, composed the anthem

ECONOMY

Economy—overview: Occupying the northeast corner of the African continent, Egypt is bisected by the highly fertile Nile valley, where most economic activity takes place. Egypt's economy was highly centralized during the rule of former President Gamal Abdel NASSER but opened up considerably under former Presidents Anwar EL-SADAT and Mohamed Hosni MUBARAK. Cairo from 2004 to 2008 aggressively pursued economic reforms to attract foreign investment and facilitate GDP growth. Despite the relatively high levels of economic growth in recent years, living conditions for the average Egyptian remained poor and contributed to public discontent. After unrest erupted in January 2011, the Egyptian Government drastically increased social spending to address public dissatisfaction, but political uncertainty at the same time caused economic growth to slow significantly, reducing the government's revenues. Tourism, manufacturing, and construction are among the hardest hit sectors of the Egyptian economy, and economic growth is likely to remain slow at least through 2012. The government is utilizing foreign exchange reserves to support the Egyptian pound and Egypt may seek a loan from the International Monetary Fund.

lyrics/music: Juan Jose CANAS/Juan ABERLE

note: officially adopted 1953, in use since 1879; the anthem of El Salvador is one of the world’s longest

ECONOMY

Economy—overview: The smallest country in Central America geographically, El Salvador has the third largest economy in the region. With the global recession in 2009, real GDP contracted by 3.1%. The economy began a slow recovery in 2010 on the back of improved export and remittances figures. Remittances accounted for 17% of GDP in 2011 and were received by about a third of all households. In 2006, El Salvador was the first country to ratify the Dominican Republic-Central American Free Trade Agreement (CAFTA-DR), which has bolstered the export of processed foods, sugar, and ethanol, and supported investment in the apparel sector amid increased Asian competition. El Salvador has promoted an open trade and investment environment and has embarked on a wave of privatizations extending to telecom, electricity distribution, banking, and pension funds. The Salvadoran Government maintained fiscal discipline during post-war reconstruction and reconstruction following earthquakes in 2001 and hurricanes in 1998 and 2005. Taxes levied by the government include a value added tax (VAT) of 13%, income tax of 30%, excise taxes on alcohol and cigarettes, and import duties. The VAT accounted for about 51.7% of total tax revenues in 2011. Calculated according to the International Monetary Fund (IMF) standards, El Salvador’s public external debt in December 2011 was about \$12.95 billion or 57.3% of GDP. El Salvador’s total public debt includes non-financial public sector debt, financial public sector debt, and central bank debt. In 2006, El Salvador and the Millennium Challenge Corporation (MCC)—a United States Government agency—signed a five-year, \$461 million compact to stimulate economic growth and reduce poverty in the country’s northern region, the primary conflict zone during the civil war, through investments in education, public services, enterprise development, and transportation infrastructure. In December 2011, the MCC approved El Salvador’s eligibility to develop a proposal for a secon

delimitation of “bolsones” (disputed areas) along the El Salvador-Honduras boundary, in 1992, with final agreement by the parties in 2006 after an Organization of American States survey and a further ICJ ruling in 2003; the 1992 ICJ ruling advised a tripartite resolution to a maritime boundary in the Gulf of Fonseca advocating Honduran access to the Pacific; El Salvador continues to claim tiny Conejo Island, not identified in the ICJ decision, off Honduras in the Gulf of Fonseca

Illicit drugs: transshipment point for cocaine; small amounts of marijuana produced for local consumption; significant use of cocaine

EQUATORIAL GUINEA

INTRODUCTION

Background: Equatorial Guinea gained independence in 1968 after 190 years of Spanish rule. This tiny country, composed of a mainland portion plus five inhabited islands, is one of the smallest on the African continent. President Teodoro OBIANG NGUEMA MBASOGO has ruled the country since 1979 when he seized power in a coup. Although nominally a constitutional democracy since 1991, the 1996, 2002, and 2009 presidential elections—as well as the 1999, 2004, and 2008 legislative elections—were widely seen as flawed. The president exerts almost total control over the political system and has discouraged political opposition. Equatorial Guinea has experienced rapid economic growth due to the discovery of large offshore oil reserves, and in the last decade has become Sub-Saharan Africa's third largest oil exporter. Despite the country's economic windfall from oil production resulting in a massive increase in government revenue in recent years, improvements in the population's living standards have been slow to develop.

ECONOMY

Economy—overview: The discovery and
exploitation of large oil and gas reserves
have contributed to dramatic economic

growth, but fluctuating oil prices have produced huge swings in GDP growth in recent years. Forestry and farming are also minor components of GDP. Subsistence farming is the dominate form of livelihood. Although pre-independence Equatorial Guinea counted on cocoa production for hard currency earnings, the neglect of the rural economy under successive regimes has diminished potential for agriculture-led growth (the government has stated its intention to reinvest some oil revenue into agriculture). A number of aid programs sponsored by the World Bank and the IMF have been cut off since 1993 because of corruption and mismanagement. The government has been widely criticized for its lack of transparency and misuse of oil revenues; however, in 2010, under Equatorial Guinea's candidacy in the Extractive Industries Transparency Initiative, the government published oil revenue figures for the first time. Undeveloped natural resources include gold, zinc, diamonds, columbite-tantalite, and other base metals. Growth remained strong in 2008, when oil production peaked but fell in 2009–10 as the price of oil and the production level dropped. Growth returned in 2011 stimulated by higher oil prices and large investments in public infrastructure and hotels.

TRANSNATIONAL ISSUES

Disputes—International:

in 2002, ICJ ruled on an equidistance settlement of Cameroon–Equatorial Guinea–Nigeria maritime boundary in the Gulf of Guinea, but a dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River and imprecisely defined maritime coordinates in the ICJ decision delayed final delimitation; UN urged Equatorial Guinea and Gabon to resolve the sovereignty dispute over Gabon-occupied Mbane and lesser islands

and to create a maritime boundary in the hydrocarbon-rich Corisco Bay

Trafficking in persons: *current situation:*

Equatorial Guinea is primarily a destination country for children trafficked for the purpose of forced labor and possibly for the purpose of sexual exploitation; children have been trafficked from nearby countries for domestic servitude, market labor, ambulant vending, and possibly sexual exploitation; women may also be trafficked to Equatorial Guinea from Cameroon, Benin, other neighboring countries, and China for sexual exploitation

tier rating: Tier 3—Equatorial Guinea is not making significant efforts to comply with the minimum standards on the elimination of trafficking; despite limited law enforcement action against suspected human smugglers and traffickers, including complicit public officials, the government has made no tangible efforts to provide victims of trafficking with the protective services mandated in its 2004 anti-trafficking law; prevention efforts have decreased, as the government did not hold any public awareness campaigns and its interagency commission on human trafficking took little, if any, action; the government's response to human trafficking has been inadequate, particularly given the government's substantial financial resources (2008)

ERITREA

INTRODUCTION

Background: The UN awarded Eritrea to Ethiopia in 1952 as part of a federation. Ethiopia's annexation of Eritrea as a province 10 years later sparked a 30-year struggle for independence that ended in 1991 with Eritrean rebels defeating governmental forces; independence was overwhelmingly approved in a 1993 referendum.

A two-and-a-half-year border war with Ethiopia that erupted in 1998 ended under UN auspices in December 2000. Eritrea hosted a UN peacekeeping operation that monitored a 25 km-wide Temporary Security Zone (TSZ) on the border with Ethiopia. Eritrea's denial of fuel to the mission caused the UN to withdraw the mission and terminate its mandate 31 July 2008. An international commission, organized to resolve the border dispute, posted its findings in 2002. However, both parties have been unable to reach agreement on implementing the decision. On 30 November 2007, the Eritrea–Ethiopia Boundary Commission remotely demarcated the border by coordinates and dissolved itself, leaving Ethiopia still occupying several tracts of disputed territory, including the town of Badme. Eritrea accepted the EEBC's "virtual demarcation" decision and called on Ethiopia to remove its troops from the TSZ that it states is Eritrean territory. Ethiopia has not accepted the virtual demarcation decision. In 2009 the UN imposed sanctions on Eritrea after accusing it of backing anti-Ethiopian Islamist insurgents in Somalia.

Flag description: red isosceles triangle (based on the hoist side) dividing the flag into two right triangles; the upper triangle is green, the lower one is blue; a gold wreath encircling a gold olive branch is centered on the hoist side of the red triangle; green stands for the country's agriculture economy, red signifies the blood shed in the fight for freedom, and blue symbolizes the bounty of the sea; the wreath-olive branch symbol is similar to that on the first flag of Eritrea from 1952; the shape of the red triangle broadly mimics the shape of the country

National symbol(s): camel

National anthem: name: "Ertra, Ertra, Ertra" (Eritrea, Eritrea, Eritrea)

lyrics/music: SOLOMON Tsehay Beraki/ Isaac Abraham MEHAREZGI and ARON Tekle Tesfatsion

note: adopted 1993; upon independence from Ethiopia in 1993, Eritrea adopted its own national anthem

ECONOMY

Economy—overview: since independence from Ethiopia in 1993, Eritrea has faced the economic problems of a small, desperately poor country, accentuated by the recent implementation of restrictive economic policies. Eritrea has a command economy under the control of the sole political party, the People's Front for Democracy and Justice (PFDJ). Like the economies of many African nations, a large share of the population—nearly 80%—is engaged in subsistence agriculture, but they produce only a small share of total output. Since the conclusion of the Ethiopian-Eritrea war in 2000, the government has maintained a firm grip on the economy, expanding the use of the military and party-owned businesses to complete Eritrea's development agenda. The government strictly controls the use of foreign currency by limiting access and availability. Few private enterprises remain in Eritrea. Eritrea's economy depends heavily on taxes paid by members of the diaspora. Erratic rainfall and the delayed demobilization of agriculturalists from the military continue to interfere with agricultural production, and Eritrea's recent harvests have been unable to meet the food needs of the country. The Government continues to place its hope for additional revenue on the development of several international mining projects. Despite difficulties for international companies in working with the Eritrean Government, a Canadian mining company signed a contract with the government in 2007 and began mineral extraction in 2010. Eritrea's economic future depends upon its ability to master social problems such as illiteracy, unemployment, and low skills, and more importantly, on the government's willingness to support a true market economy.

Trafficking in persons: *current situation:* Eritrea is a source country for men, women, and children trafficked for the purposes of forced labor and commercial sexual exploitation; each year, large numbers of migrant workers depart Eritrea in search of work, particularly in the Gulf States, where some are likely to become victims of forced labor, including in domestic servitude, or commercial sexual exploitation; Eritrean children also work in various economic sectors, including domestic service, street vending, small-scale factories, and agriculture; child laborers frequently suffer abuse from their employers and some may be subjected to conditions of forced labor*tier rating:* Tier 3—the Government of Eritrea does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the Eritrean Government does not operate with transparency and published neither data nor statistics regarding its efforts to combat human trafficking; the government made no known progress in prosecuting and punishing trafficking crimes over the reporting period and did not appear to provide any significant assistance to victims of trafficking (2009)

ESTONIA

INTRODUCTION

Background: After centuries of Danish, Swedish, German, and Russian rule, Estonia attained independence in 1918. Forcibly incorporated into the USSR in 1940—an action never recognized by the US—it regained its freedom in 1991 with the collapse of the Soviet Union. Since the last Russian troops left in 1994, Estonia has been free to promote economic and political ties with the West. It joined both NATO and the EU in the spring of 2004, formally joined the OECD in late 2010, and adopted the euro as its official currency on 1 January 2011.

Flag description: three equal horizontal bands of blue (top), black, and white;

various interpretations are linked to the flag colors; blue represents faith, loyalty, and devotion, while also reminiscent of the sky, sea, and lakes of the country; black symbolizes the soil of the country and the dark past and suffering endured by the Estonian people; white refers to the striving towards enlightenment and virtue, and is the color of birch bark and snow, as well as summer nights illuminated by the midnight sun

National symbol(s):

barn swallow, cornflower

National anthem: name: "Mu isamaa, mu õnn ja rõõm" (My Native Land, My Pride and Joy)

lyrics/music: Johann Voldemar JANNSEN/Fredrik PACIUS

note: adopted 1920, though banned between 1940 and 1990 under Soviet occupation; the anthem, used in Estonia since 1869, shares the same melody with that of Finland but has different lyrics

ECONOMY**Economy—overview:** Estonia, a 2004 European Union entrant, has a modern market-based economy and one of the higher per capita income levels in Central Europe and the Baltic region. Estonia's successive governments have pursued a free market, pro-business economic agenda and have wavered little in their commitment to pro-market reforms. The current government has followed sound fiscal policies that have resulted in balanced budgets and low public debt. The economy benefits from strong electronics and telecommunications sectors and strong trade ties with Finland, Sweden, Russia, and Germany. Tallinn's priority has been to sustain high growth rates—on average 8% per year from 2003 to 2007. Estonia's economy fell sharply into recession in mid-2008, primarily as a result of an investment and consumption slump following the bursting of the real estate market bubble. Estonia has rebounded well from the economic crisis. GDP contracted 14.3% in 2009, but the Estonian economy now has the highest GDP growth rate in Europe, largely thanks to a boom in exports and increased foreign investment following Estonia's adoption of the euro on 1 January 2011. Although Estonian GDP returned to positive growth in 2010, unemployment continued to rise, reaching an all time high of 19.8% in early 2010.**GDP (purchasing power parity):**

TRANSNATIONAL ISSUES

Disputes—international: Russia recalled its signature to the 1996 technical border agreement with Estonia in 2005, rather than concede to Estonia's appending a prepared unilateral declaration referencing Soviet occupation and territorial losses; Russia demands better accommodation of Russian-speaking population in Estonia; Estonian citizen groups continue to press for realignment of the boundary based on the 1920 Tartu Peace Treaty that would bring the now divided ethnic Setu people and parts of the Narva region within Estonia; as a member state that forms part of the EU's external border, Estonia must implement the strict Schengen border rules with Russia

Illicit drugs: growing producer of synthetic drugs; increasingly important transshipment zone for cannabis, cocaine, opiates, and synthetic drugs since joining the European Union and the Schengen Accord; potential money laundering related to organized crime and drug trafficking is a concern, as is possible use of the gambling sector to launder funds; major use of opiates and ecstasy

ETHIOPIA

INTRODUCTION

Background: Unique among African countries, the ancient Ethiopian monarchy maintained its freedom from colonial rule with the exception of a short-lived Italian occupation from 1936–41. In 1974, a military junta, the Derg, deposed Emperor Haile SELASSIE (who had ruled since 1930) and established a socialist state. Torn by bloody coups, uprisings, wide-scale drought, and

massive refugee problems, the regime was finally toppled in 1991 by a coalition of rebel forces, the Ethiopian People's Revolutionary Democratic Front (EPRDF). A constitution was adopted in 1994, and Ethiopia's first multiparty elections were held in 1995. A border war with Eritrea late in the 1990s ended with a peace treaty in December 2000. In November 2007, the Eritrea-Ethiopia Border Commission (EEBC) issued specific coordinates as virtually demarcating the border and pronounced its work finished. Alleging that the EEBC acted beyond its mandate in issuing the coordinates, Ethiopia has not accepted them and has not withdrawn troops from previously contested areas pronounced by the EEBC as belonging to Eritrea

GEOGRAPHY

Location: Eastern Africa, west of Somalia

Geographic coordinates: 8 00 N, 38 00 E

Flag description: three equal horizontal bands of green (top), yellow, and red, with a yellow pentagram and single yellow rays emanating from the angles between the points on a light blue disk centered on the three bands; green represents hope and the fertility of the land, yellow symbolizes justice and harmony, while red stands for sacrifice and heroism in the defense of the land; the blue of the disk symbolizes peace and the pentagram represents the unity and equality of the nationalities and peoples of Ethiopia

note: Ethiopia is the oldest independent country in Africa, and the three main colors of her flag (adopted ca. 1895) were so often adopted by other African countries upon independence that they became known as the Pan-African colors; the emblem in the center of the current flag was added in 1996

National symbol(s): Abyssinian lion

National anthem: *name:* "Whedefit Gesgeshi Woud Enat Ethiopia" (March Forward, Dear Mother Ethiopia)

lyrics/music: DEREJE Melaku Mengesha/SOLOMON Lulu

note: adopted 1992

ECONOMY

Economy—overview: Ethiopia's economy is based on agriculture, which accounts for 41% of GDP and 85% of total employment. Coffee has been a major export crop. The agricultural sector suffers from poor cultivation practices and frequent drought, but recent joint efforts by the Government of Ethiopia and donors have strengthened Ethiopia's agricultural resilience, contributing to a reduction in the number of Ethiopians threatened with starvation. The five-year Growth and Transformation Plan that Ethiopia unveiled in October 2010 presents a government-led effort to achieve the country's ambitious development goals.

The banking, insurance, and micro-credit industries are restricted to domestic investors, but Ethiopia has attracted significant foreign investment in textiles, leather, commercial agriculture and manufacturing. Under Ethiopia's constitution, the state owns all land and provides long-term leases to the tenants; land use certificates are now being issued in some areas so that tenants have more recognizable rights to continued occupancy and hence make more concerted efforts to improve their leaseholds. While GDP growth has remained high, per capita income is among the lowest in the world.

TRANSNATIONAL ISSUES

Disputes—International: Eritrea and Ethiopia agreed to abide by the 2002

Eritrea-Ethiopia Boundary Commission's (EEBC) delimitation decision, but neither party responded to the revised line detailed in the November 2006 EEBC Demarcation Statement; the undemarcated former British administrative line has little meaning as a political separation to rival clans within Ethiopia's Ogaden and southern Somalia's Oromo region; Ethiopian forces invaded southern Somalia and routed Islamist Courts from Mogadishu in January 2007; "Somaliland"

secessionists provide port facilities in Berbera and trade ties to landlocked Ethiopia; civil unrest in eastern Sudan has hampered efforts to demarcate the porous boundary with Ethiopia

Refugees and Internally displaced persons:

refugees (country of origin): 66,980 (Sudan); 16,576 (Somalia); 13,078 (Eritrea)

IDPs: 200,000 (border war with Eritrea from 1998–2000, ethnic clashes in Gambela, and ongoing Ethiopian military counterinsur-

gency in Somali region; most IDPs are in Tigray and Gambela Provinces) (2007)

Illicit drugs: transit hub for heroin originating in Southwest and Southeast Asia and destined for Europe, as well as cocaine destined for markets in southern Africa; cultivates qat (khat) for local use and regional export, principally to Djibouti and Somalia (legal in all three countries); the lack of a well-developed financial system limits the country's utility as a money laundering center

EUROPEAN UNION

INTRODUCTION

Preliminary statement: The evolution of what is today the European Union (EU) from a regional economic agreement among six neighboring states in 1951 to today's hybrid intergovernmental and supranational organization of 27 countries across the European continent stands as an unprecedented phenomenon in the annals of history. Dynastic unions for territorial consolidation were long the norm in Europe; on a few occasions even country-level unions were arranged—the Polish-Lithuanian Commonwealth and the Austro-Hungarian Empire were examples. But for such a large number of nation-states to cede some of their sovereignty to an overarching entity is unique. Although the EU is not a federation in the strict sense, it is far more than a free-trade association such as ASEAN, NAFTA, or Mercosur, and it has certain attributes associated with independent nations: its own flag, currency (for some members), and law-making abilities, as well as diplomatic representation and a common foreign and security policy in its dealings with external partners.

Thus, inclusion of basic intelligence on the EU has been deemed appropriate as a new, separate entity in *The World Factbook*. However, because of the EU's special status, this description is placed after the regular country entries.

Background: Following the two devastating World Wars in the first half of the 20th

century, a number of European leaders in the late 1940s became convinced that the only way to establish a lasting peace was to unite the two chief belligerent nations—France and Germany—both economically and politically. In 1950, the French Foreign Minister Robert SCHUMAN proposed an eventual union of all Europe, the first step of which would be the integration of the coal and steel industries of Western Europe. The following year the European Coal and Steel Community (ECSC) was set up when six members, Belgium, France, West Germany, Italy, Luxembourg, and the Netherlands, signed the Treaty of Paris.

The ECSC was so successful that within a few years the decision was made to integrate other elements of the countries' economies. In 1957, envisioning an "ever closer union," the Treaties of Rome created the European Economic Community (EEC) and the European Atomic Energy Community (Euratom), and the six member states undertook to eliminate trade barriers among themselves by forming a common market. In 1967, the institutions of all three communities were formally merged into the European Community (EC), creating a single Commission, a single Council of Ministers, and the body known today as the European Parliament. Members of the European Parliament were initially selected by national parliaments, but in 1979 the first direct elections were undertaken and they have been held every five years since.

In 1973, the first enlargement of the EC took place with the addition of Denmark, Ireland, and the United Kingdom. The 1980s saw further membership expansion with Greece joining in 1981 and Spain and Portugal in 1986. The 1992 Treaty of Maastricht laid the basis for further forms of cooperation in foreign and defense policy, in judicial and internal affairs, and in the creation of an economic and monetary union—including a common currency. This further integration created the European Union (EU), at the time standing alongside the European Community. In 1995, Austria, Finland, and Sweden joined the EU/EC, raising the membership total to 15.

A new currency, the euro, was launched in world money markets on 1 January 1999;

it became the unit of exchange for all EU member states except the United Kingdom, Sweden, and Denmark. In 2002, citizens of those 12 countries began using euro banknotes and coins. Ten new countries joined the EU in 2004—Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia—and in 2007 Bulgaria and Romania joined, bringing the membership to 27, where it stands today.

In an effort to ensure that the EU could function efficiently with an expanded membership, the Treaty of Nice (signed in 2000) set forth rules aimed at streamlining the size and procedures of EU institutions. An effort to establish a "Constitution for Europe," growing out of a Convention held in 2002–2003, foundered when it was rejected in referenda in France and the Netherlands in 2005. A subsequent effort in 2007 incorporated many of the features of the rejected Constitution while also making a number of substantive and symbolic changes. The new treaty, initially known as the Reform Treaty but subsequently referred to as the Treaty of Lisbon, sought to amend existing treaties rather than replace them. The treaty was approved at the EU intergovernmental conference of the 27 member states held in Lisbon in December 2007, after which the process of national ratifications began. In October 2009, an Irish referendum approved the Lisbon Treaty (overturning a previous rejection) and cleared the way for an ultimate unanimous endorsement. Poland and the Czech Republic signed on soon after. The Lisbon Treaty, again invoking the idea of an "ever closer union," came into force on 1 December 2009 and the European Union officially replaced and succeeded the European Community.

GOVERNMENT

Union name: *conventional long form:* European Union

abbreviation: EU

Political structure: a hybrid intergovernmental and supranational organization

Capital: *name:* Brussels (Belgium), Strasbourg (France), Luxembourg

geographic coordinates: (Brussels) 50 50 N, 4 20 E

time difference: UTC+1 (6 hours ahead of Washington, DC during Standard Time)

daylight saving time: +1hr, begins last Sunday in March; ends last Sunday in October

note: the Council of the European Union meets in Brussels, Belgium; the European Parliament meets in Brussels and Strasbourg, France; the Court of Justice of the European Union meets in Luxembourg

Member states: 27 countries: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, UK; note—candidate countries: Croatia, Iceland, Macedonia, Montenegro, Serbia, Turkey

Independence: 7 February 1992 (Maastricht Treaty signed establishing the EU); 1 November 1993 (Maastricht Treaty entered into force)

note: the Treaties of Rome, signed on 25 March 1957 and subsequently entered into force on 1 January 1958, created the European Economic Community and the European Atomic Energy Community; under the Treaty of Lisbon, signed on 13 December 2007 and subsequently entered into force on 1 December 2009, the European Union replaced and succeeded the European Community

National holiday: Europe Day 9 May (1950); note—the day in 1950 that Robert SCHUMAN proposed the creation of what became the European Coal and Steel Community, the progenitor of today's European Union, with the aim of achieving a united Europe

Constitution: none

note: the EU legal order, although based on a series of treaties, has often been described as “constitutional” in nature; the Treaty on European Union (TEU), as modified by the Lisbon Treaty, states in Article 1 that “the HIGH CONTRACTING PARTIES establish among themselves a EUROPEAN UNION ... on which the Member States confer competences to attain objectives they have in common”; Article 1 of the TEU states further that the EU is “founded on the present Treaty and on the Treaty on the Functioning of the European Union (hereinafter referred to as ‘the Treaties’),” both possessing the same legal value; Article 6 of the TEU provides that a separately adopted Charter of Fundamental Rights of the European Union “shall have the same legal value as the Treaties”

Legal system: unique supranational law system in which, according to an interpretive declaration of member-state governments appended to the Treaty of Lisbon, “the Treaties and the law adopted by the Union on the basis of the Treaties have primacy over the law of Member States” under conditions laid down in the case law of the Court of Justice; key principles of EU law include fundamental rights as guaranteed by the European Convention for the Protection of Human Rights and Fundamental Freedoms and as resulting from constitutional traditions common to the EU's states

Suffrage: 18 years of age; universal; voting for the European Parliament is permitted in each member state

Executive branch: under the EU treaties there are three distinct institutions each of which conducts functions that may be regarded as executive in nature: *the European Council:* brings together heads of state and government, along with the president of the European Commission, and meets at least four times a year; its aim is to provide the impetus for the development of the Union and to issue general policy guidelines; *leaders of the EU member states* appointed former Belgian Prime Minister Herman VAN ROMPUY to be the first full-time president of the European Council in November 2009; he took office on 1

December 2009 and will serve a two-and-one-half-year term, renewable once; his core responsibilities include chairing the summits and providing policy and organizational continuity

the Council: consists of ministers of each EU member state and meets regularly in different configurations depending on the subject matter; it carries out policy-making and coordinating functions (as well as legislative functions); although the name is similar, the "Council" is an institution distinct from the head of state-level "European Council"; ministers of EU member states chair meetings of the Council based on a six-month rotating presidency

the European Commission: is headed by a College of Commissioners comprised of 27 members, one from each member country; each commissioner is responsible for one or more policy areas; the Commission's responsibilities include promoting the general interest of the EU, acting as "guardian of the Treaties," executing the budget and managing programs, ensuring the Union's external representation, and additional duties; its president is Jose Manuel BARROSO (since 2004); the president of the European Commission is designated by member state governments and confirmed by the European Parliament; working from member state recommendations, the Commission president then assembles the "college" of Commission members; the European Parliament confirms the entire Commission for a five-year term; the next confirmation process will likely be held in January 2015

note: for external representation and foreign policy making, leaders of the EU member states appointed UK Baroness Catherine ASHTON to be the first High Representative of the Union for Foreign Affairs and Security Policy; ASHTON took office on 1 December 2009; her concurrent appointment as Vice President of the European Commission endows her position with the policymaking influence of the Council of the EU and the budgetary influence of the European Commission; the High Representative helps develop and implement the EU's common foreign and security policy, represents and acts for the Union in many international contexts, and oversees the new diplomatic corps of the EU, formally established on 1 December 2010, the European External Action Service (EEAS)

Legislative branch: two legislative bodies consisting of the Council of the European Union (27 member-state ministers having 345 votes; the number of votes is roughly proportional to member-states' population) and the European Parliament (736 seats; seats allocated among member states in proportion to population; members elected by direct universal suffrage for a five-year term); note—the European Parliament President is elected by a majority of fellow members of the European Parliament (MEP), and represents the Parliament with the EU and internationally; German MEP Martin Schulz from the Progressive Alliance of Socialists and Democrats (S & D)

group was elected in January 2012; the Council is the main decision-making body of the EU, although the Commission proposes most EU legislative acts

elections: last held on 4–7 June 2009 (next to be held in June 2014)

election results: percent of vote—EPP 36%, S&D 25%, ALDE 11.4%, Greens/EFA 7.5%, ECR 7.3%, GUE/NGL 4.8%, EFD 4.3%, independents 3.7%; seats by party—EPP 265, S&D 184, ALDE 84, Greens/EFA 55, ECR 54, GUE/NGL 35, EFD 32, independents 27

Judicial branch: Court of Justice of the European Union (ensures that the treaties are interpreted and applied uniformly throughout the EU, resolves disputed issues among the EU institutions, issues opinions on questions of EU law referred by member state courts)—27 judges (one from each member state) appointed for a six-year term; note—the court can sit in chambers, in a "Grand Chamber" of 13 judges, or as the full court; General Court (a court below the Court of Justice)—27 judges appointed for a six-year term; Civil Service Tribunal—7 judges appointed for a three-year term

Political parties and leaders: Confederal Group of the European United Left-Nordic Green Left or GUE/NGL [Lothar BISKY]; Europe of Freedom and Democracy Group or EFD [Nigel Farage and Francesco SPERONI]; European Conservatives and Reformists Group or ECR [Michael KAMINSKI]; Group of Greens/European Free Alliance or Greens/EFA [Rebecca HARMS and Daniel COHN-BENDIT]; Group of the Alliance of Liberals and Democrats for Europe or ALDE [Guy VERHOEFSTADT]; Group of the European People's Party or EPP [Joseph DAUL]; Group of the Progressive Alliance of Socialists and Democrats in the European Parliament or S&D [Martin SCHULZ]

International organization participation: ARF (dialogue member), ASEAN (dialogue member), Australian Group, BIS, BSEC (observer), CBSS, CERN, EBRD, FAO, FATE, G-8, G-10, G-20, IDA, IEA, IGAD (partners), LAIA (observer), NSG (observer), OAS (observer), OECD, PIF (partner), SAARC (observer), UN (observer), UNRWA (observer), WCO, WTO, ZC (observer)

Flag description: a blue field with 12 five-pointed gold stars arranged in a circle in the center; blue represents the sky of the

Western world, the stars are the peoples of Europe in a circle, a symbol of unity; the number of stars is fixed

National symbol(s): a circle of 12 stars

National anthem: name: "Ode to Joy"

lyrics/music: none/Ludwig VON BEETHOVEN, arranged by Herbert VON KARAJAN

note: adopted 1972, not in use until 1986; according to the European Union, the song is meant to represent all of Europe rather than just the organization; the song also serves as the anthem for the Council of Europe

ECONOMY

Economy—overview: Internally, the EU has abolished trade barriers, adopted a common currency, and is striving toward convergence of living standards. Internationally, the EU aims to bolster Europe's trade position and its political and economic weight. Because of the great differences in per capita income among member states (from \$7,000 to \$78,000) and in national attitudes toward issues like inflation, debt, and foreign trade, the EU faces difficulties in devising and enforcing common policies. Eleven established EU member states, under the auspices of the European Economic and Monetary Union (EMU), introduced the euro as their common currency on 1 January 1999 (Greece did so two years later). Between 2004 and 2007, 12 states acceded to the EU that are, in general, less advanced economically than the other 15 member states. Of the 12 most recent entrants, only Slovenia (1 January 2007), Cyprus and Malta (1 January 2008), Slovakia (1 January 2009), and Estonia (1 January 2011) have adopted the euro; 10 non-Euro member states, other than the UK and Denmark which have formal opt-outs, are required by EU treaties to adopt the common currency upon meeting fiscal and monetary convergence criteria. Following the 2008–09 global economic crisis, the EU economy saw moderate GDP growth in 2010 and 2011, but a sovereign debt crisis in the euro zone intensified in 2011 and became the bloc's top economic and political priority. Despite EU/IMF adjustment programs in Greece, Ireland, and Portugal, and consolidation measures in many other EU member states, significant risks to growth remain, including high public debt loads, aging populations, onerous regulations, and fears of debt crisis contagion. In response, euro-zone leaders moved in 2011 to boost funding levels for the temporary European Financial Stability Facility (EFSF) to almost \$600 billion, to make loan terms more favorable for crisis-hit countries, and to bring the permanent European Stabilization Mechanism (ESM) online in July 2012,

Belgium, Spain, and Luxembourg—has deployed troops and police on peacekeeping missions to Bosnia-Herzegovina, Macedonia, and the Democratic Republic of the Congo and assumed command of the ISAF in Afghanistan in August 2004; Eurocorps directly commands the 5,000-man Franco-German Brigade, the Multinational Command Support Brigade, and EUFOR in Bosnia and Herzegovina; in November 2004, the EU Council of Ministers formally committed to creating 13 1,500-man battle groups by the end of 2007, to respond to international crises on a rotating basis; 22 of the EU's 27 nations have agreed to supply troops; France, Italy, and the UK formed the first of three battle groups in 2005; Norway, Sweden, Estonia, and Finland established the Nordic Battle Group effective 1 January 2008; nine other groups are to be formed; a rapid-reaction naval EU Maritime Task Group was stood up in March 2007 (2007)

TRANSNATIONAL ISSUES

Disputes—International: as a political union, the EU has no border disputes with neighboring countries, but Estonia has no land boundary agreements with Rus-

sia, Slovenia disputes its land and maritime boundaries with Croatia, and Spain has territorial and maritime disputes with Morocco and with the UK over Gibraltar; the EU has set up a Schengen area—consisting of 22 EU member states that have signed the convention implementing the Schengen agreements or “acquis” (1985 and 1990) on the free movement of persons and the harmonization of border controls in Europe; these agreements became incorporated into EU law with the implementation of the 1997 Treaty of Amsterdam on 1 May 1999; in addition, non-EU states Iceland and Norway (as part of the Nordic Union) have been included in the Schengen area since 1996 (full members in 2001), and Switzerland since 2008 bringing the total current membership to 25; the UK (since 2000) and Ireland (since 2002) take part in only some aspects of the Schengen area, especially with respect to police and criminal matters; nine of the 12 new member states that joined the EU since 2004 joined Schengen on 21 December 2007; of the three remaining EU states, Romania and Bulgaria may join by late 2011, while Cyprus’ entry is held up by the ongoing Cyprus dispute

FALKLAND ISLANDS

INTRODUCTION

Background: Although first sighted by an English navigator in 1592, the first landing (English) did not occur until almost a century later in 1690, and the first settlement (French) was not established until 1764. The colony was turned over to Spain two years later and the islands have since been the subject of a territorial dispute, first between Britain and Spain, then between Britain and Argentina. The UK asserted its claim to the islands by establishing a naval garrison there in 1833. Argentina invaded the islands on 2 April 1982. The British responded with an expeditionary force that landed seven weeks later and after fierce fighting forced an Argentine surrender on 14 June 1982. With hostilities ended and Argentine forces withdrawn, UK administration resumed.

ECONOMY

Economy—overview: The economy was formerly based on agriculture, mainly sheep farming but fishing and tourism currently comprise the bulk of economic activity. In 1987, the government began selling fishing licenses to foreign trawlers operating within the Falkland Islands' exclusive fishing zone. These license fees net more than \$40 million per year, which help support the island's health, education, and welfare system. The waters around the Falkland Islands are known for their squid, which account for around 75% of the annual 200,000 ton fish catch. Dairy farming supports domestic consumption; crops furnish winter fodder. Foreign exchange earnings come from shipments of high-grade wool to the UK and from the sale of postage stamps and coins. In 2001, the government purchased 100 reindeer with the intent to increase the number to 10,000 over the following 20 years so that Falkland could export venison to Scandinavia and Chile. Tourism, especially eco-tourism, is increasing rapidly, with about 69,000 visitors in 2009. The British military presence also provides a sizeable economic boost. The islands are now self-financing except for defense. In 1993 the British Geological Survey announced a 200-mile oil exploration zone around the islands, and early seismic surveys suggest substantial reserves capable of producing 500,000 barrels per day. Political tensions between the UK and Argentina remain high following the start of oil drilling activities in the waters. In September 2011, a British exploration firm announced that it plans to commence oil production in 2016.

FAROE ISLANDS

INTRODUCTION

Background: The population of the Faroe Islands is largely descended from Viking settlers who arrived in the 9th century. The islands have been connected politically to Denmark since the 14th century. A high degree of self government was granted the Faroese in 1948, who have autonomy over most internal affairs while Denmark is responsible for justice, defense, and foreign affairs. The Faroe Islands are not part of the European Union.

ECONOMY

Economy—overview: The Faroese economy is dependent on fishing, which makes the economy vulnerable to price fluctuations. The sector normally accounts for about 95% of exports and nearly half of GDP. In early 2008 the Faroese economy began to slow as a result of smaller catches and historically high oil prices. The slowdown in the Faroese economy followed a strong performance since the mid-1990s with annual growth rates averaging close to 6%, mostly a result of increased fish landings and salmon farming, and high export prices. Unemployment reached its lowest level in June 2008 at 1.1%. The Faroese Home Rule Government produced increasing budget surpluses in that period, which helped to reduce the large public debt, most of it to Denmark. However, total dependence on fishing and salmon farming make the Faroese economy vulnerable to fluctuations in world demand. Initial discoveries of oil in the Faroese area give hope for eventual oil production, which may provide a foundation for a more diversified economy and less dependence on Danish economic assistance. Aided by an annual subsidy from Denmark amounting to about 5% of Faroese GDP, the Faroese have a standard of living almost equal to that of Denmark and Greenland. The Faroese Government ran relatively large deficits from 2008 to 2010 and budget deficits are forecast for several years ahead. At year-end 2010 the gross debt had reached approximately US\$900 million.

FIJI

INTRODUCTION

Background: Fiji became independent in 1970 after nearly a century as a British colony. Democratic rule was interrupted by two military coups in 1987 caused by concern over a government perceived as dominated by the Indian community (descendants of contract laborers brought to the islands by the British in the 19th century). The coups and a 1990 constitution that cemented native Melanesian control of Fiji led to heavy Indian emigration; the population loss resulted in economic difficulties, but ensured that Melanesians became the majority. A new constitution

enacted in 1997 was more equitable. Free and peaceful elections in 1999 resulted in a government led by an Indo-Fijian, but a civilian-led coup in May 2000 ushered in a prolonged period of political turmoil. Parliamentary elections held in August 2001 provided Fiji with a democratically elected government led by Prime Minister Laisenia QARASE. Re-elected in May 2006, QARASE was ousted in a December 2006 military coup led by Commodore Voreqe BAINIMARAMA, who initially appointed himself acting president but in January 2007 became interim prime minister. Since taking power BAINIMARAMA has neutralized his opponents, crippled Fiji's democratic institutions, and refused to hold elections.

Flag description: light blue with the flag of the UK in the upper hoist-side quadrant and the Fijian shield centered on the outer half of the flag; the blue symbolizes the Pacific ocean and the Union Jack reflects the links with Great Britain; the shield-taken from Fiji's coat of arms—depicts a yellow lion above a white field quartered by the cross of Saint George; the four quarters depict stalks of sugarcane, a palm tree, bananas, and a white dove

National anthem: *name:* "God Bless Fiji" *lyrics/music:* Michael Francis Alexander PRESCOTT/C. Austin MILES (adapted by Michael Francis Alexander PRESCOTT)

note: adopted 1970; the anthem is known in Fijian as "Meda Dau Doka" (Let Us Show Pride); adapted from the hymn, "Dwelling in Beulah Land," the anthem's English lyrics are generally sung, although they differ in meaning from the official Fijian lyrics

ECONOMY

Economy—overview: Fiji, endowed with forest, mineral, and fish resources, is one of the most developed of the Pacific island economies though still with a large subsistence sector. Sugar exports, remittances from Fijians working abroad, and a growing tourist industry—with 400,000 to 500,000 tourists annually—are the major sources of foreign exchange. Fiji's sugar has special access to European Union markets but will be harmed by the EU's decision to cut sugar subsidies. Sugar processing makes up one-third of industrial activity but is not efficient. Fiji's tourism industry was damaged

by the December 2006 coup and is facing an uncertain recovery time. In 2007 tourist arrivals were down almost 6%, with substantial job losses in the service sector, and GDP dipped. The coup has created a difficult business climate. The EU has suspended all aid until the interim government takes steps toward new elections. Long-term problems include low investment, uncertain land ownership rights, and the government's inability to manage its budget. Overseas remittances from Fijians working in Kuwait and Iraq have decreased significantly. Fiji's current account deficit peaked at 23% of GDP in 2006, and has been improving since that year.

FINLAND

INTRODUCTION

Background: Finland was a province and then a grand duchy under Sweden from the 12th to the 19th centuries, and an autonomous grand duchy of Russia after 1809. It won its complete independence in 1917. During World War II, it was able to successfully defend its freedom and resist invasions by the Soviet Union—albeit with some loss of territory. In the subsequent half century, the Finns made a remarkable transformation from a farm/forest economy to a diversified modern industrial economy; per capita income is now among the highest in Western Europe. A member of the European Union since 1995, Finland was the only Nordic state to join the euro system at its initiation in January 1999. In the 21st century, the key features of Finland's modern welfare state are a high standard of education, equality promotion, and national social security system—currently challenged by an aging population and the fluctuations of an export-driven economy.

lyrics/music: Johan Ludvig RUNEBERG/Fredrik PACIUS

note: in use since 1848; although never officially adopted by law, the anthem has been popular since it was first sung by a student group in 1848; Estonia's anthem uses the same melody as that of Finland

ECONOMY

Economy—overview: Finland has a highly industrialized, largely free-market economy with per capita output roughly that of Austria, Belgium, the Netherlands, and Sweden. Trade is important with exports accounting for over one third of GDP in recent years. Finland is strongly competitive in manufacturing—principally the wood, metals, engineering, telecommunications, and electronics industries. Finland excels in high-tech exports such as mobile phones. Except for timber and several minerals, Finland depends on imports of raw materials, energy, and some components for manufactured goods. Because of the climate, agricultural development is limited to maintaining self-sufficiency in basic products. Forestry, an important

export earner, provides a secondary occupation for the rural population. Finland had been one of the best performing economies within the EU in recent years and its banks and financial markets avoided the worst of global financial crisis. However, the world slowdown hit exports and domestic demand hard in 2009, with Finland experiencing one of the deepest contractions in the euro zone. A recovery of exports, domestic trade, and household consumption stimulated economic growth in 2010. The recession left a deep mark on general government finances and the debt ratio, turning previously strong budget surpluses into deficits. In addition to marginal growth prospects, general government finances will remain in deficit during the next few years. The great challenge of economic policy will be to mitigate a possible recession in 2012 in which measures supporting growth will be combined with general government adjustment measures. Longer-term, Finland must address a rapidly aging population and decreasing productivity that threaten competitiveness, fiscal sustainability, and economic growth.

FRANCE

INTRODUCTION

Background: France today is one of the
most modern countries in the world and is
a leader among European nations. It plays
an influential global role as a permanent
member of the United Nations Security
Council, NATO, the G-8, the G-20, the
EU and other multilateral organizations.
France rejoined NATO's integrated mili-
tary command structure in 2009, reversing
de Gaulle's 1966 decision to take French
forces out of NATO. Since 1958, it has
constructed a hybrid presidential-parlia-
mentary governing system resistant to the
instabilities experienced in earlier more
purely parliamentary administrations. In
recent decades, its reconciliation and coop-
eration with Germany have proved central
to the economic integration of Europe,
including the introduction of a common

exchange currency, the euro, in January
1999. In the early 21st century, five French
overseas entities—French Guiana, Guade-
loupe, Martinique, Mayotte, and Reunion—
became French regions and were made part
of France proper.

note: adopted 1795, restored 1870; originally known as "Chant de Guerre pour l'Armee du Rhin" (War Song for the Army of the Rhine), the National Guard of Marseille made the song famous by singing it

while marching into Paris in 1792 during the French Revolutionary Wars

ECONOMY

Economy—overview: France was transitioning from an economy that has featured extensive government ownership and intervention to one that relies more on market mechanisms but is in the midst of a euro-zone crisis. The government has partially or fully privatized many large companies, banks, and insurers, and has ceded stakes in such leading firms as Air France, France Telecom, Renault, and Thales. It maintains a strong presence in some sectors, particularly power, public transport, and defense industries. With at least 75 million foreign tourists per year, France is the most visited country in the world and maintains the third largest income in the world from tourism. France's leaders remain committed to a capitalism in which they maintain social equity by means of laws, tax policies, and social spending that reduce income disparity and the impact of free markets on public health and welfare. France's real GDP contracted 2.6% in 2009, but recovered somewhat in 2010 and 2011. The unemployment rate increased from 7.4% in 2008 to 9.3% in 2010 and 9.1% in 2011. Lower-than-expected growth and increased unemployment have cut government revenues and increased borrowing costs, contributing to a deterioration of France's public finances. The government budget deficit rose sharply from 3.4% of GDP in 2008 to 7.5% of GDP in 2009 before improving to 5.8% of GDP in 2011, while France's public debt rose from 68% of GDP to 86% over the same period. Under President SARKOZY, Paris implemented austerity measures that eliminated tax credits and froze most government spending in an effort to bring the budget deficit under the 3% euro-zone ceiling by 2013 and to highlight France's commitment to fiscal discipline at a time of intense financial market scrutiny of euro-zone debt levels. Socialist Francois HOLLANDE won the May 2012 presidential election, after advocating pro-growth economic policies, as well as measures such as forcing banks to separate their traditional deposit taking and lending activities from more speculative businesses, increasing taxes on bank profits, introducing a new top bracket on income taxes for people earning over ?1 million (\$1.3 million) a year, and hiring an additional 60,000 civil servants during his five-year term of office.

INTRODUCTION

Background: The French annexed various Polynesian island groups during the 19th century. In September 1995, France stirred up widespread protests by resuming nuclear testing on the Mururoa atoll after a three-year moratorium. The tests were suspended in January 1996. In recent years, French Polynesia's autonomy has been considerably expanded.

Government—note: under certain acts of France, French Polynesia has acquired autonomy in all areas except those relating to police and justice, monetary policy, tertiary education, immigration, and defense and foreign affairs; the duties of its president are fashioned after those of the French prime minister

ECONOMY

Economy—overview: Since 1962, when France stationed military personnel in the region, French Polynesia has changed from a subsistence agricultural economy to one in which a high proportion of the work force is either employed by the military or supports the tourist industry. With the halt of French nuclear testing in 1996, the military contribution to the economy fell sharply. Tourism accounts for about one-fourth of GDP and is a primary source of hard currency earnings. Other sources of income are pearl farming and deep-sea commercial fishing. The small manufacturing sector primarily processes agricultural products. The territory benefits substantially from development agreements with France aimed principally at creating new businesses and strengthening social services.

FRENCH SOUTHERN AND ANTARTIC LANDS

INTRODUCTION

Background: In February 2007, the Iles Eparses became an integral part of the French Southern and Antarctic Lands (TAAF). The Southern Lands are now divided into five administrative districts, two of which are archipelagos, Iles Crozet and Iles Kerguelen; the third is a district composed of two volcanic islands, Ile Saint-Paul and Ile Amsterdam; the fourth, Iles

Eparses, consists of five scattered tropical islands around Madagascar. They contain no permanent inhabitants and are visited only by researchers studying the native fauna, scientists at the various scientific stations, fishermen, and military personnel. The fifth district is the Antarctic portion, which consists of "Adelie Land," a thin slice of the Antarctic continent discovered and claimed by the French in 1840. *Ile Amsterdam*: Discovered but not named in 1522 by the Spanish, the island subse-

quently received the appellation of *Nieuw Amsterdam* from a Dutchman; it was claimed by France in 1843. A short-lived attempt at cattle farming began in 1871. A French meteorological station established on the island in 1949 is still in use. *Ile Saint Paul*: Claimed by France since 1893, the island was a fishing industry center from 1843 to 1914. In 1928, a spiny lobster cannery was established, but when the company went bankrupt in 1931, seven workers were abandoned. Only two

survived until 1934 when rescue finally arrived.

Iles Crozet: A large archipelago formed from the Crozet Plateau, Iles Crozet is divided into two main groups: L'Occidental (the West), which includes Ile aux Cochons, Ilots des Apotres, Ile des Pingouins, and the reefs Brisants de l'Heroine; and L'Oriental (the east), which includes Ile d'Est and Ile de la Possession (the largest island of the Crozets). Discovered and claimed by France in 1772, the islands were used for seal hunting and as a base for whaling. Originally administered as a dependency of Madagascar, they became part of the TAAF in 1955.

Iles Kerguelen: This island group, discovered in 1772, is made up of one large island (Ile Kerguelen) and about 300 smaller islands. A permanent group of 50 to 100 scientists resides at the main base at Port-aux-Francais.

Adelie Land: The only non-insular district of the TAAF is the Antarctic claim known as "Adelie Land." The US Government does not recognize it as a French dependency.

Bassas da India: A French possession since 1897, this atoll is a volcanic rock surrounded by reefs and is awash at high tide.

Europa Island: This heavily wooded island has been a French possession since 1897; it is the site of a small military garrison that staffs a weather station.

Glorioso Islands: A French possession since 1892, the Glorioso Islands are composed of two lushly vegetated coral islands (Ile Glorieuse and Ile du Lys) and three rock islets. A military garrison operates a weather and radio station on Ile Glorieuse.

Juan de Nova Island: Named after a famous 15th century Spanish navigator and explorer, the island has been a French possession since 1897. It has been exploited for its guano and phosphate. Presently a small military garrison oversees a meteorological station.

Tromelin Island: First explored by the French in 1776, the island came under the jurisdiction of Reunion in 1814. At present, it serves as a sea turtle sanctuary and is the site of an important meteorological station.

GEOGRAPHY

Area—comparative: Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul): less than one-half the size of Washington, DC

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul): more than 10 times the size of The Mall in Washington, DC

Iles Crozet: about twice the size of Washington, DC

Iles Kerguelen: slightly larger than Delaware

Bassas da India (Iles Eparses): land area about one-third the size of The Mall in Washington, DC

Europa Island (Iles Eparses): about one-sixth the size of Washington, DC

Glorioso Islands (Iles Eparses): about eight times the size of The Mall in Washington, DC

Juan de Nova Island (Iles Eparses): about seven times the size of The Mall in Washington, DC

Tromelin Island (Iles Eparses): about 1.7 times the size of The Mall in Washington, DC

Land boundaries: 0 km

Coastline: Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul): 28 km

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul):

Iles Kerguelen: 2,800 km

Bassas da India (Iles Eparses): 35.2 km

Europa Island (Iles Eparses): 22.2 km

Glorioso Islands (Iles Eparses): 35.2 km

Juan de Nova Island (Iles Eparses): 24.1 km

Tromelin Island (Iles Eparses): 3.7 km

Maritime claims: territorial sea: 12 nm

exclusive economic zone: 200 nm from Iles Kerguelen and Iles Eparses (does not include the rest of French Southern and Antarctic Lands); Juan de Nova Island and Tromelin Island claim a continental shelf of 200-m depth or to the depth of exploitation

Climate: Ile Amsterdam et Ile Saint-Paul: oceanic with persistent westerly winds and high humidity

Iles Crozet: windy, cold, wet, and cloudy

Iles Kerguelen: oceanic, cold, overcast, windy

Iles Eparses: tropical

Terrain: Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul): a volcanic island with steep coastal cliffs; the center floor of the volcano is a large plateau

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul): triangular in shape, the island is the top of a volcano, rocky with steep cliffs on the eastern side; has active thermal springs

Iles Crozet: a large archipelago formed from the Crozet Plateau is divided into two groups of islands

Iles Kerguelen: the interior of the large island of Ile Kerguelen is composed of rugged terrain of high mountains, hills, valleys, and plains with a number of peninsulas stretching off its coasts

Bassas da India (Iles Eparses): atoll, awash at high tide; shallow (15 m) lagoon

Europa Island, Glorioso Islands, Juan de Nova Island: low, flat, and sandy

Tromelin Island (Iles Eparses): low, flat, sandy; likely volcanic seamount

Elevation extremes: lowest point: Indian Ocean 0 m

highest point: Mont de la Dives on Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul) 867 m; unnamed location on Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul) 272 m; Pic Marion-Dufresne in Iles Crozet 1,090 m; Mont Ross in Iles Kerguelen 1,850 m; unnamed location on Bassas da India (Iles Eparses) 2.4 m; unnamed location on Europa Island (Iles Eparses) 24 m; unnamed location on Glorioso Islands (Iles Eparses) 12 m; unnamed location on Juan de Nova Island (Iles Eparses) 10 m; unnamed location on Tromelin Island (Iles Eparses) 7 m

Natural resources: fish, crayfish *note:* Glorioso Islands and Tromelin Island (Iles Eparses) have guano, phosphates, and coconuts

Land use: Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul)—100% trees, grasses, ferns, and moss; Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul)—100% grass, ferns, and moss; Iles Crozet—100% tussock grass, heath, and fern; Iles Kerguelen—100% tussock grass and Kerguelen cabbage; Bassas da India (Iles Eparses)—100% rock, coral reef, and sand; Europa Island (Iles Eparses)—100% mangrove swamp and dry woodlands; Glorioso Islands (Iles Eparses)—100% lush vegetation and coconut palms; Juan de Nova Island (Iles Eparses)—90% forest, 10% other; Tromelin Island (Iles Eparses)—100% grasses and scattered brush (2005)

Irrigated land: 0 sq km

Natural hazards: Ile Amsterdam and Ile Saint-Paul are inactive volcanoes; Iles Eparses subject to periodic cyclones; Bassas da India is a maritime hazard since it is under water for a period of three hours prior to and following the high tide and surrounded by reefs *volcanism:* Reunion Island—Piton de la Fournaise (elev. 2,632 m.), which has erupted many times in recent years including 2010, is one of the world's most active volcanoes; although rare, eruptions outside the volcano's caldera could threaten nearby cities

Environment—current issues: introduction of foreign species on Iles Crozet has caused severe damage to the original ecosystem; overfishing of Patagonian toothfish around Iles Crozet and Iles Kerguelen

Geography—note: islands component is widely scattered across remote locations in the southern Indian Ocean *Bassas da India (Iles Eparses):* the atoll is a circular reef that sits atop a long-extinct, submerged volcano *Europa Island and Juan de Nova Island (Iles Eparses):* wildlife sanctuary for seabirds and sea turtles

Glorioso Island (Iles Eparses): the islands and rocks are surrounded by an extensive reef system

Tromelin Island (Iles Eparses): climatologically important location for forecasting cyclones in the western Indian Ocean; wildlife sanctuary (seabirds, tortoises)

PEOPLE AND SOCIETY

Population: no indigenous inhabitants *Ile Amsterdam (Ile Amsterdam et Ile Saint-Paul):*

has no permanent residents but has a meteorological station

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul): is uninhabited but is frequently visited by fishermen and has a scientific research cabin for short stays

Iles Crozet: are uninhabited except for 18 to 30 people staffing the Alfred Faure research station on Ile del la Possession

Iles Kerguelen: 50 to 100 scientists are located at the main base at Port-aux-Francais on Ile Kerguelen

Bassas da India (Iles Eparses): uninhabitable *Europa Island, Glorioso Islands, Juan de Nova Island (Iles Eparses):* a small French military garrison and a few meteorologists on each possession; visited by scientists

Tromelin Island (Iles Eparses): uninhabited, except for visits by scientists

GOVERNMENT

GABON

INTRODUCTION

Background: El Hadj Omar BONGO Ondimba—one of the longest-serving heads of state in the world—dominated the country's political scene for four decades (1967–2009) following independence from France in 1960. President BONGO introduced a nominal multiparty system and a new constitution in the early 1990s. However, allegations of electoral fraud during local elections in 2002–03 and the presidential elections in 2005 exposed the weaknesses of formal political structures in Gabon. Following President BONGO's death in 2009, new elections in brought Ali Ben BONGO, son of the former president, to power. Despite constrained political conditions, Gabon's small population, abundant natural resources, and considerable foreign support have helped make it one of the more prosperous and stable African countries.

ECONOMY

Economy—overview: Gabon enjoys a per capita income four times that of most sub-Saharan African nations, but because of high income inequality, a large proportion of the population remains poor. Gabon depended on timber and manganese until oil was discovered offshore in the early 1970s. The economy was reliant on oil for about 50% of its GDP, about 70% of revenues, and 87% of goods exports for 2010, although some fields have passed their peak production. A rebound of oil prices from 1999 to 2008 helped growth, but declining production has hampered Gabon from fully realizing potential gains. Gabon signed a 14-month Stand-By Arrangement with the IMF in May 2007, and later that year issued a \$1 billion sovereign bond to buy back a sizable portion of its Paris Club debt. Gabon continues to face fluctuating prices for its oil, timber, and manganese exports. Despite the abundance of natural wealth, poor fiscal management has stifled the economy. However, President BONGO has made efforts to increase transparency and is taking steps to make Gabon a more attractive investment destination to diversify the economy. BONGO intends to boost growth by increasing government investment in human resources and infrastructure.

GAMBIA, THE

INTRODUCTION

Background: The Gambia gained its independence from the UK in 1965. Geographically surrounded by Senegal, it formed a short-lived federation of Senegambia between 1982 and 1989. In 1991 the two nations signed a friendship and cooperation treaty, but tensions have flared up intermittently since then. Yahya JAMMEH led a military coup in 1994 that overthrew the president and banned political activity. A new constitution and presidential elections in 1996, followed by parliamentary balloting in 1997, completed a nominal return to civilian rule. JAMMEH has been elected president in all subsequent elections including most recently in late 2011.

ECONOMY

Economy—overview: The Gambia has
sparse natural resource deposits and a lim-
ited agricultural base, and relies in part
on remittances from workers overseas and
tourist receipts. About three-quarters of
the population depends on the agricul-
tural sector for its livelihood and the sector
provides for about one-third of GDP. The
agricultural sector has untapped potential—
less than half of arable land is cultivated.
Small-scale manufacturing activity features
the processing of peanuts, fish, and hides.
The Gambia's natural beauty and proxim-
ity to Europe has made it one of the larger
markets for tourism in West Africa, boosted
by government and private sector invest-
ments in eco-tourism and upscale facili-
ties. In 2011 tourism contributed about
one-fifth of GDP but suffered from the
European economic downturn. The Gam-
bia's re-export trade accounted for almost
80% of goods exports. Unemployment
and underemployment rates remain high;
economic progress depends on sustained
bilateral and multilateral aid, on respon-
sible government economic management,
and on continued technical assistance from
multilateral and bilateral donors. Interna-
tional donors and lenders continue to be
concerned about the quality of fiscal man-
agement and The Gambia's debt burden.

GAZA STRIP

INTRODUCTION

Background: The September 1993 Israel-PLO Declaration of Principles on Interim Self-Government Arrangements provided for a transitional period of Palestinian self-rule in the West Bank and Gaza Strip. Under a series of agreements signed between May 1994 and September 1999, Israel transferred to the Palestinian Authority (PA) security and civilian responsibility for many Palestinian-populated areas of the West Bank and Gaza Strip. Negotiations to determine the permanent status of the West Bank and Gaza Strip stalled following the outbreak of an intifada in September 2000. In April 2003, the Quartet (US, EU, UN, and Russia) presented a roadmap to a final settlement of the conflict by 2005 based on reciprocal steps by the two parties leading to two states, Israel and a democratic Palestine. Following Palestinian leader Yasir ARAFAT's death in late 2004, Mahmud ABBAS was elected PA president in January 2005. A month later, Israel and the PA agreed to the Sharm el-Sheikh Commitments in an effort to move the peace process forward. In September 2005, Israel unilaterally withdrew all of its settlers and soldiers and dismantled its military facilities in the Gaza Strip and withdrew settlers and redeployed soldiers from four small northern West Bank settlements. Nonetheless, Israel still controls maritime,

airspace, and other access to the Gaza Strip; Israel also enforces a restricted zone along the border inside Gaza. In January 2006, the Islamic Resistance Movement, HAMAS, won control of the Palestinian Legislative Council (PLC). HAMAS took control of the PA government in March 2006, but President ABBAS had little success negotiating with HAMAS to present a political platform acceptable to the international community so as to lift economic sanctions on Palestinians. Violent clashes between Fatah and HAMAS supporters in the Gaza Strip in 2006 and early 2007 resulted in numerous Palestinian deaths and injuries. In February 2007, ABBAS and HAMAS Political Bureau Chief Khalid MISHAL signed the Mecca Agreement in Saudi Arabia that resulted in the formation of a Palestinian National Unity Government (NUG) headed by HAMAS member Ismail HANIYA. However, fighting continued in the Gaza Strip, and in June 2007, HAMAS militants succeeded in a violent takeover of all military and governmental institutions in the Gaza Strip. ABBAS that same month dismissed the NUG and through a series of presidential decrees formed a PA government in the West Bank led by independent Salam FAYYAD. Late November 2007 through June 2008 witnessed a substantial increase in Israeli-Palestinian violence. An Egyptian-brokered truce in June 2008 between Israel and HAMAS brought about a five-month pause in hostilities, but spiraling end-of-year violence resulted in the deaths of an estimated 1,100 to 1,400 Palestinians and left tens of thousands of people homeless. International donors pledged \$4.5 billion in aid to rebuild the Gaza Strip, but by the end of 2011 large-scale reconstruction had not begun. Fatah and HAMAS in May 2011, under the auspices of Egyptian-sponsored reconciliation negotiations, agreed to reunify the Palestinian territories, but the factions have struggled to finalize details on governing and security structures. The status quo remains with HAMAS in control of the Gaza Strip and ABBAS and the Fatah-dominated PA governing the West Bank.

ECONOMY

Economy—overview: High population density and Israeli security controls placed on the Gaza Strip since the end of the second intifada have degraded economic conditions in this territory, which is smaller than the West Bank. Israeli-imposed border closures, which became more restrictive after HAMAS seized control of the territory in June 2007, have resulted in high unemployment, elevated poverty rates, and the near collapse of the private sector that had relied on export markets. The population is reliant on large-scale humanitarian assistance—led by UN agencies. Changes to Israeli restrictions on imports in 2010 resulted in a rebound in some economic activity, but regular exports from Gaza still are not permitted.

GEORGIA

INTRODUCTION

Background: The region of present day Georgia contained the ancient kingdoms of Colchis and Kartli-Iberia. The area came under Roman influence in the first centuries A.D. and Christianity became the state religion in the 330s. Domination by Persians, Arabs, and Turks was followed by a Georgian golden age (11th–13th centuries) that was cut short by the Mongol invasion of 1236. Subsequently, the Ottoman and Persian empires competed for influence in the region. Georgia was absorbed into the Russian Empire in the 19th century. Independent for three years (1918–1921) following the Russian revolution, it was forcibly incorporated into the USSR in 1921 and regained its independence when the Soviet Union dissolved in 1991. Mounting public discontent over rampant corruption and ineffective government services, followed by an attempt by the incumbent Georgian government to manipulate national legislative elections in November 2003 touched off widespread protests that led to the resignation of Eduard SHEVARDNADZE, president since 1995. In the aftermath of that popular movement, which became known as the “Rose Revolution,” new elections in early 2004 swept Mikheil SAKASHVILI into power along with his United National Movement party. Progress on market reforms and democratization has been made in the years since independence, but this progress has been complicated by Russian assistance and support to the separatist regions of Abkhazia and South Ossetia. Periodic flare-ups in

tension and violence culminated in a five-day conflict in August 2008 between Russia and Georgia, including the invasion of large portions of undisputed Georgian territory. Russian troops pledged to pull back from most occupied Georgian territory, but in late August 2008 Russia unilaterally recognized the independence of Abkhazia and South Ossetia and Russian military forces remain in those regions.

ECONOMY

Economy—overview: Georgia's main economic activities include the cultivation of agricultural products such as grapes, citrus fruits, and hazelnuts; mining of manganese, copper, and gold; and output of a small industrial sector producing alcoholic and nonalcoholic beverages, metals, machinery, and chemicals. The country imports nearly all its needed supplies of natural gas and oil products. It has sizeable hydropower capacity that now provides most of its energy needs. Georgia has overcome the chronic energy shortages and gas supply interruptions of the past by renovating hydropower plants and by increasingly relying on natural gas imports from Azerbaijan instead of from Russia. Construction of the Baku-T'bilisi-Ceyhan oil pipeline, the Baku-T'bilisi-Erzurum gas pipeline, and the Kars-Akhalkalaki Railroad are part of a strategy to capitalize on Georgia's strategic location between Europe and Asia and develop its role as a transit point for gas, oil, and other goods. Georgia's economy sustained GDP growth of more than 10% in 2006-07, based on strong inflows of foreign investment and robust government spending. However, GDP growth slowed following the August 2008 conflict with Russia, and turned negative in 2009 as foreign direct investment and workers' remittances declined in the wake of the global

financial crisis. The economy rebounded in 2010-11, with growth rates above 6% per year, but FDI inflows, the engine of Georgian economic growth prior to the 2008 conflict, have not recovered fully. Unemployment has also remained high at 16%. Georgia has historically suffered from a chronic failure to collect tax revenues; however, the government, since coming to power in 2004, has simplified the tax code, improved tax administration, increased tax enforcement, and cracked down on petty corruption, leading to higher revenues. The economic downturn of 2008-09 eroded the tax base and led to a decline in the budget surplus and an increase in public borrowing needs. The country is pinning its hopes for renewed growth on a determined effort to continue to liberalize the economy by reducing regulation, taxes, and corruption in order to attract foreign investment, with a focus on hydropower, agriculture, tourism, and textiles production. Since 2004, the government has taken a series of actions against endemic corruption, including reform of the traffic police and implementation of a fair examination system for entering the university system. The government has received high marks from the World Bank for its anti-corruption efforts.
